This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TO

JAPANESE LOVERS OF KNOWLEDGE IN EVERY AGE:

THE DEAD,

WHO FIRST KINDLED THE SACRED FIRE, WHO PASSED ON THE TORCH;

THE MARTYRS,

WHO SUFFERED DEATH FOR THEIR LOYALTY, PATRIOTISM, DEVOTION TO NATIONAL UNITY, RESTORATION, AND REGENERATION;

THE STUDENTS,

WHO, IN NOBLE THIRST FOR TRUTH, FOUND HONORED GRAVES IN ALIEN SOIL;

THE LIVING,

WITH WHOM RESTS THE FUTURE OF THEIR BEAUTIFUL LAND,

THIS SKETCH

OF THEIR COUNTRY AND PEOPLE, MADE IN THE INTEREST OF TRUTH, AND SET DOWN WITHOUT EXTENUATION OR MALICE, IS,

WITH FRATERNAL REGARD,

DEDICATED

BY THEIR COMRADE AND FRIEND,

THE AUTHOR.

PREFACE TO THE TWELFTH EDITION

"A CYCLE of Cathay," which in science and practice comprises sixty years, has elapsed since President Millard Fillmore—the initiator of the Japan expedition of 1852—began friendly relations with the Mikado's empire. Under President Taft, in 1912, the noble precedent of honoring Asiatic as well as European nations in their bereavement, by sending a special envoy in high office to attend the emperor's funeral obsequies, has been inaugurated. With the decease of Mutsuhito the Great, the glorious era of Meiji, or Enlightened Government, ceases, and that of Taisei, or Great Righteousness, under Yoshihito, the 124th Mikado, begins. In an added chapter in this twelfth edition I have noted not only a few of the great facts and events since 1906, but have also given the philosophy and interpretation of them. Perhaps one, who in 1850, as a child, saw the launching of Commodore Perry's flag-ship, and has during his adult life studied with sympathy the Japanese, has some right to do this. Indeed, I have reason for believing—after a lifelong acquaintance with the Japanese—that they do not ask for their country or themselves any favor beyond a just understanding of their motives and aims, and this I have ever striven to attain.

For the new emperor, Yoshihito, and his people, Banzai!

W. E. G.

LIST OF ILLUSTRATIONS.

Map of Dai Nippon (the Empire of Japan)..... *faces page* 17

1. Nichiren and the Hōjō Executioner. (Humbert, from a temple painting)..... *Frontispiece.*
2. High and Low Type of Face. (Hokusai school)..... 30
3. An Ainō Chief from Yezo. (Photograph by Uchida)..... 32
4. His Imperial Majesty, Mutsûhito. (Photograph by Uchida)..... 37
5. Passage in the Inland Sea. (Alcock)..... 57
6. Mikado's Method of Travel in very Ancient Times. (Native drawing)..... 62
7. Imperial or Government Seal. (Native drawing)..... 66
8. Imperial Crest, or Mikado's Seal. (Native drawing)..... 67
9. Japan, as known to the Ancient Mikados. (From the series of historical maps in the "Nihon Riyaku Shi")..... 69
10. Junk in the Bay of Yedo. (Native drawing)..... 71
11. Her Imperial Majesty Haruko. (Photograph by Uchida)..... 81
12. Shintō Wayside Shrine. (Alcock)..... 89
13. The Peasant of To-day. (Hokusai)..... 91
14. A Court Noble in Ancient Japan. (Native drawing)..... 93
15. The Mikado on his Throne. (Native drawing)..... 102
16. A Samurai in Winter Traveling-dress. (Alcock)..... 106
17. A Japanese Farmer. (Hokusai)..... 107
18. View in the Inland Sea. (Alcock)..... 118
19. View near Hiōgo. (Alcock)..... 120
20. Tamétomo defying the Taira Men. (Bank-note vignette)..... 121
21. The Mountains and Lake of Hakoné. (Alcock)..... 129
22. War-junk of the Twelfth Century. (Bank-note vignette)..... 136
23. Kojima writing on the Cherry-tree. (Bank-note vignette)..... 153
24. Nitta Yoshisada casting the Sword into the Sea. (Bank-note vignette)..... 155
25. Kōbō Daishi. (Photograph from a temple statue)..... 162
26. The Mother's Memorial. (Nankoku Ōzawa)..... 167
27. Belfry of a Buddhist Temple. (Alcock, from a photograph)..... 171
28. Repulse of the Mongol Tartars. (Native painter)..... 179
29. Ashikaga Takauji. (Photograph from a temple statue)..... 185
30. Temple-bell from Kiōto. (Humbert)..... 200
31. Chasing Floral Designs on Copper. (Humbert)..... 203
32. Picnic Booth. (Humbert)..... 205
33. Court Lady in Kiōto. (Humbert)..... 209
34. Kusunoki Masatsura. (Native drawing)..... 220
35. The Challenge. (Hokusai)..... 222
36. Archer on Castle Rampart. (Humbert)..... 226
37. Symbols of the Carpenter's Guild. (Humbert)..... 227
38. View of the Castle of Ōzaka. (Alcock)..... 234
39. Nobunaga's Victims: Priest and Monk. (Alcock)..... 235
40. A Familiar Country Scene. (Hokusai school)..... 236
41. Camp of Hidéyoshi, before Fukui. (Humbert)..... 239
42. Image of Deified Hero. (Native drawing)..... 241
43. Ear Monument in Kiōto. (Photograph)..... 245
44. "The Tarpeian Rock of Japan." (Oliphant)..... 258
45. Hollander on Déshima. (Alcock)..... 260
46. Crest of the Tokugawa Family. (Native drawing)..... 271

47. The Four Classes of Society. (Nankoku Ōzawa) ..... Page 281
48. Fire-lookouts in Yedo. (Native drawing. "Brocade" style) 286
49. Matsudaira Yoshinaga, ex-Daimiō of Echizen. (Photograph) 308
50. Keiki, the last Shōgun of Japan. (Photograph) 314

BOOK I.

HISTORY OF JAPAN FROM 660 B.C. TO 1872 A.D.

THE ORTHOGRAPHY AND PRONUNCIATION OF JAPANESE WORDS.

It is impossible to represent Japanese words exactly by any foreign alphabet; but a knowledge of the sounds heard in Japan, and by using letters which have each one invariable value, will enable a foreigner to reproduce Japanese names with tolerable accuracy. When the native authors and grammarians do not agree, absolute unanimity among foreign scholars is not to be expected; but palpable absurdities, impossible combinations of letters, and mistakes arising out of pure ignorance of the language may be avoided. The system given below, and used throughout this work, is, at least, rational, and is based on the structure and laws of combination in the language itself. This system is substantially (the differences aiming to secure greater simplicity) that of Hepburn's Japanese-English and English-Japanese, and of Satow's English-Japanese dictionary; the Romanized version of the Scriptures, published by the American Bible Society; of the "American Cyclopædia;" the revised editions of Worcester's, and Webster's, dictionary; in Brown's, Aston's, Satow's, Brinckley's, and Hepburn's grammar and works on the Japanese language; Monteith's, Mitchell's, Cornell's, Warren's, and Harper's (American), and the Student's (English) geography and atlas; Mitford's "Tales of Old Japan;" Adams's "History of Japan;" the official documents of the Japanese Government, Department of Education, schools, and colleges; the British and American Legations and Consulates; the Anglo-Japanese press, and almost all scholars and writers who make accuracy a matter of concern.

The standard language (not the local dialect) of Tōkiō—now the literary as well as the political capital of the nation—is taken as the basis, and the words are then transliterated from the *katagana* spelling, as given by the best native scholars. The vowels are sounded as follows:

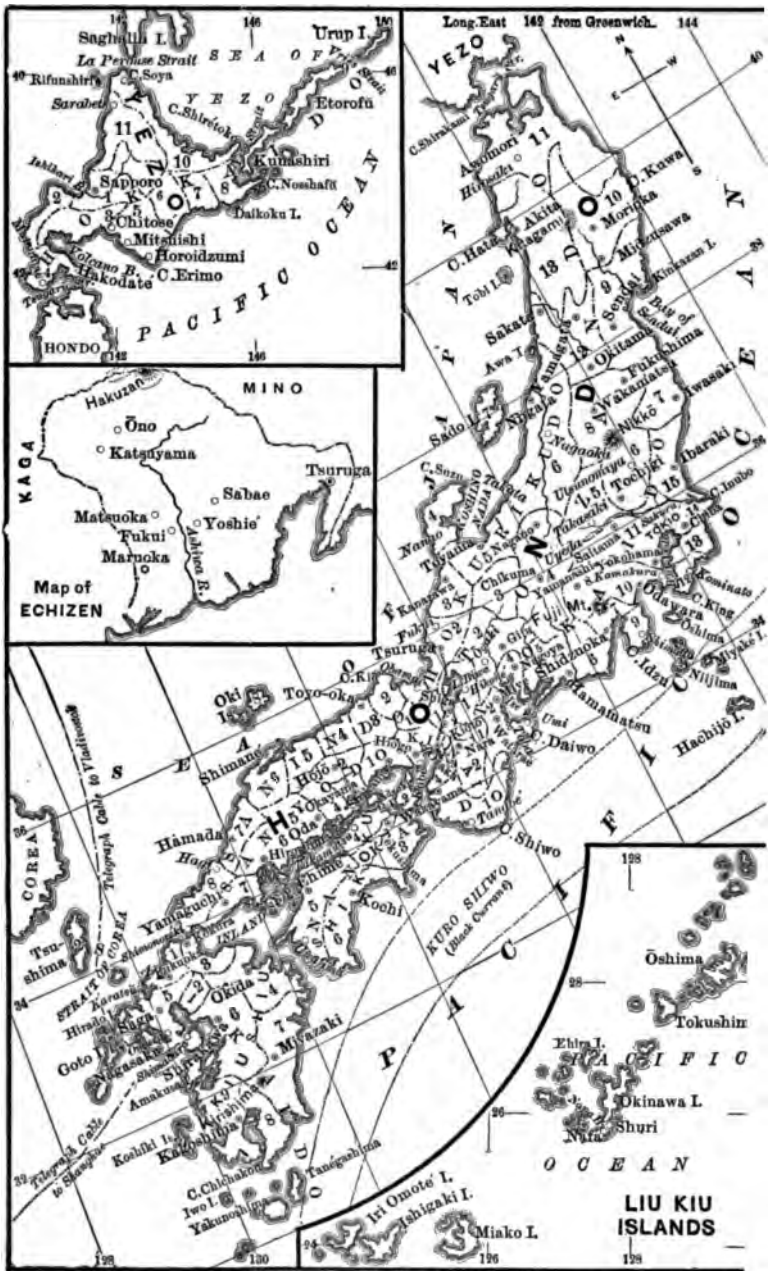
a has the sound of *a* in father, arm;
ai has the sound of *ai* in aisle, or *i* in bite;
i has the sound of *i* in pique, machine;
u has the sound of *u* in rule, or *oo* in boot;
ua has the sound of *ua* in quarantine;
e has the sound of *e* in prey, they;
ei has the sound of *ay* in saying;
o has the sound of *o* in bore, so.

Long vowels are marked thus, ō, ū; short vowels, ŭ, ĭ.

The combination *uai* is sounded as *wai*; *iu* as *yu*; *E* or *é*, as *e* in *prey*; but *e*, as in *men*; *g* is always hard, and *s* surd, as in *sit*, *sap*.

C before a vowel, *g* as in *gin*, *gem*; *l*, *q*, *s* sonant; *x*, and the digraphs *ph* and *th*, are not used.

The map facing page 17 is reduced, and the names transliterated from the large copper-plate map of the empire compiled and published by the Japanese War Department in 1872. The numerals refer to the provinces on page 601.



Dai Nippon (the Empire of Japan).

THE MIKADO'S EMPIRE.

I.

THE BACKGROUND.

It is manifest that to understand a people and their national life, the physical conditions under which they live must be known. To enjoy the picture, we must study the background.

Dai Nippon, as the natives call their beautiful land, occupies a significant position on the globe. Lying in the Pacific Ocean, in the temperate zone, it bends like a crescent off the continent of Asia. In the extreme north, at the island of Saghalin, the distance from the main-land of Asia is so slight that the straits may be crossed easily in a canoe. From Kiushiu, with the island of Tsushima lying between, the distance from Corea is but one day's sail in a junk. For 4000 miles eastward from the main island stretches the Pacific, shored in by the continent of America. From Yezo to Kamtchatka, the Kuriles stretch like the ruins of a causeway, prolonged by the Aleutian Islands, to Alaska. The configuration of the land is that resulting from the combined effects of volcanic action and the incessant motion of the corroding waves. The area of the empire is nearly equal to that of our Middle and New England States. Of the 150,000 square miles of surface, two-thirds consist of mountain land. The island of Saghalin (ceded to Russia in May, 1875) is one mountain chain; that of Yezo one mountain mass. On the main island,* a solid backbone of mountainous elevations runs continuously from

* Dai Nippon, or Nihon, means Great Japan, and is the name of the entire empire, not of the main island. The foreign writers on Japan have almost unanimously blundered in calling the largest island "Niphon." Hondo is the name given to the main island in the Military Geography of Japan (Heiyo Nippon Chiri Yoshi, Tōkiō, 1872) published by the War Department, and which is used in this work throughout.

Rikuoku to Shinano, whence it branches off into subordinate chains that are prolonged irregularly to Nagato and into Kiushiu and Shikoku. Speaking generally, the heights of the mountains gradually increase from the extremities to the centre. In Saghalin, they are low; in Yezo, they are higher: increasing gradually on the north of the main island, they culminate in the centre in the lofty ranges of Shinano, and the peaks of Nantaizan, Yatsugadaké, Hakuzan (nine thousand feet high), and Fuji, whose summit is over twelve thousand feet above the sea. Thence toward the south they gradually decrease in height. There are few high mountains along the sea-coast. The land slopes up gradually into hills, thence into lesser peaks, and finally into lofty ranges.

As Fuji, with his tall satellites, sweeps up from the land, so Japan itself rises up, peak-like, from the sea. From the shores the land plunges abruptly down into deep water. Japan is but an emerged crest of a submarine mountain—perhaps the edge of hard rock left by the submergence of the earth-crust which now floors the Sea of Japan and the Gulf of Tartary. There seems little reason to doubt that Saghalin, Yezo, Hondo, and Kiushiu were in geologic ages united together, forming one island. Surrounded on all sides by swift and variable currents, the islands everywhere on the sea-borders exhibit the effect of their action. At most points the continual detritus is such as to seriously encroach on the land area, and the belief holds among certain native sea-coast dwellers, strengthened by the traditional tales of past ravages, that in process of time the entire country, devoured by successive gnawings of the ocean, will finally sink into its insatiable maw.

The geological formations of the country—the natural foundations—are not as yet accurately determined. Enough, however, is known to give us a fair outline of fact, which future research and a thorough survey must fill up.* Of the soil, more is known.

* Baron Richthofen, in a paper read before the Geological Society of Berlin June 4th, 1873, thus generalizes the geology of Japan: The west and east portion of the aggregate body of the Japanese islands is in every way the direct continuation of the mountain system which occupies the south-eastern portion of China, the axial chain of which extends from the frontier of Annam to the island of Chusan, in the direction of W. 30° S., E. 30° N. It is accompanied on either side by a number of parallel chains. The prolongation of this group of line chains passes through the island of Kiushiu to the great bend of Japan (Suruga and Shinano). Through Kiushiu and the southern part of the main island, the structure of the hills and the rocks of which they are made up (chiefly Silurian

Even in a natural state, without artificial fertilization, most of the tillable land produces good crops of grain or vegetables. On myriads

---

and Devonian strata, accompanied by granite) and the lines of strike are the same as those observed in South-eastern China. This system is intersected at either end by another, which runs S.S.W., N.N.E. On the west it commences in Kiushiu, and extends southward in the direction of the Liu Kiu Islands, while on the east it constitutes the northern branch of the main island, and, with a slight deviation in its course, continues through the islands of Yezo and Saghalin. A third system, which properly does not belong to Japan, is indicated by the S.W. and N.E. line of the Kuriles.

The above outline throws light on the distribution of volcanoes. The first system, where it occupies the breadth of the country for itself alone, is as free from volcanoes, or any accumulation of volcanic rocks, as it is in South-eastern China. The second system is accompanied by volcanoes. But the greatest accumulation of volcanic rocks, as well as of the extinct volcanoes, is found in the places of interference, or those regions where the lines of the two systems cross each other, and, besides, in that region where the third system branches off from the second. To the same three regions the volcanoes which have been active in historic times have been confined.

In the geological structure of Kiushiu, the longer axis is from N. to S., but intersected by several solid bars made up of very ancient rocks, and following the strike of W. 30° S., E. 30° N. They form high mountain barriers, the most central of which, south of the provinces of Higo and Bungo, rises to over seven thousand feet, and is extremely wild and rugged. In Satsuma, the various families of volcanic rocks have arrived at the surface in exactly the same order of succession as in the case of Hungary, Mexico, and many other volcanic regions, viz., first, propylite, or trachytic greenstone; second, andesite; third, trachyte and rhyolite; fourth, the basaltic rocks. The third group was not visited by him. Thomas Antisell, M.D., and Professor Benjamin J. Lyman, M.E., and Henry S. Munroe, M.E., American geologists in Yezo, have also elucidated this interesting problem. From the first I quote. The mountain systems of Yezo and farther north are similar to those in the northern part of the main island. There are in Yezo two distinct systems of mountains. One, coming down directly from the north, is a continuation of the chain in Karafto (Saghalin), which, after passing down south along the west shore of Yezo, is found in Rihuoku, Ugo, Uzen, and farther south. The second enters Yezo from the Kuriles Islands and Kamtchatka, running N. 20–25° E. and S. 20–25° W., and crossing in places the first system. It is from the existence and crossing of these chains that Yezo derives its triangular form. The two systems possess very different mineral contents for their axes. The first has an essentially granitic and feldspathic axis, produced, perhaps, by shrinkage, and is slow of decomposition of its minerals forming the soils. The second has an axis, plutonic or volcanic, yielding basalts, traps, and diorites, decomposing readily, producing deep and rich soils. Hence the different kinds of vegetation on the two chains. Where the two chains cross, also, there is found a form of country closed up in the north and east by hills, the valleys opening to the south and west. This volcanic chain is secondary in the main island of Japan; but in Yezo and in Kiushiu it attains great prominence.

Professor Benjamin S. Lyman, an American geologist, has also made valuable surveys and explorations in Yezo, the results of which are given in the "Reports of Horace Capron and his Foreign Assistants," Tōkiō, 1875.

of rice-fields, which have yielded richly for ages, the fertility is easily maintained by irrigation and the ordinary application of manure, the natives being proficient in both these branches of practical husbandry.

The rivers on such narrow islands, where steep mountains and sharply excavated valleys predominate, are of necessity mainly useless for navigation. Ordinarily they are little more than brooks that flow lazily in narrow and shallow channels to the sea. After a storm, in rainy weather, or in winter, they become swollen torrents, often miles wide, sweeping resistlessly over large tracts of land which they keep perpetually desolate—wildernesses of stones and gravel, where fruitful fields ought to be. The area of land kept permanently waste in Japan on this account is enormous. The traveler, who to-day crosses a clear brook on a plank, may to-morrow be terrified at a roaring flood of muddy water in which neither man, beast, nor boat can live a moment. There are, however, some large plains, and in those we must look to find the navigable rivers. In the mountains of Shinano and Kōdzŭké are found the sources of most of the streams useful for navigation on the main island. On the plains of the Kuantō (from Suruga to Iwaki), Ōshiu (Rikuchiu and Rikuzen), Mino, and Echigo, are a few rivers on which one may travel in boats hundreds of miles. One may go by water from Tōkiō to Niigata by making a few portages, and from Ōzaka to the end of Lake Biwa by natural water. In the northern part of Hondo are several long rivers, notably the Kitagami and Sakata. In Yezo is the Ishikari. In Shikokŭ are several fine streams, which are large for the size of the islands. Kiushiu has but one or two of any importance. Almost every one of these rivers abounds in fish, affording, with the surrounding ocean, an inexhaustible and easily attainable supply of food of the best quality. Before their history began, the aboriginal islanders made this brain-nourishing food their chief diet, and through the recorded centuries to the quick-witted Japanese proper it has been the daily meat.

In the geologic ages volcanic action must have been extremely violent, as in historic time it has been almost continual. Hundreds, at least, of mountains, now quiet, were once blazing furnaces. The evergreenery that decks them to-day reminds one of the ivy that mantles the ruins, or the flowers that overgrow the neglected cannon on the battle-field. Even within the memory of men now living have the most awful and deadly exhibitions of volcanic desolation been witnessed. The annals of Japan are replete with the records of these flame-and-lava-vomiting mountains, and the most harrowing tales of human life

destroyed and human industry overwhelmed are truthfully portrayed by the pencil of the artist and the pen of the historian in the native literature. Even now the Japanese count over twenty active and hundreds of dormant volcanoes. As late as 1874, the volcano of Taromai, in Yezo, whose crater had long since congealed, leaving only a few puffing solfataras, exploded, blowing its rocky cap far up into the air, and scattering a rain of ashes as far as the sea-shore, many miles distant. Even the nearly perfect cone of Shiribéshi, in Yezo, is but one of many of nature's colossal ruins. Asama yama, never quiet, puffs off continual jets of steam, and at this moment of writing is groaning and quaking, to the terror of the people around it. Even the superb Fuji, that sits in lordly repose and looks down over the lesser peaks in thirteen provinces, owes its matchless form to volcanic action, being clothed by a garment of lava on a throne of granite. Hakuzan, on the west coast, which uprears its form above the clouds, nine thousand feet from the sea-level, and holds a lakelet of purest water in its bosom, once in fire and smoke belched out rocks and ulcered its crater jaws with floods of white and black lava. Not a few of these smoking furnaces by day are burning lamps by night to the mariner. Besides the masses and fields of scoria one everywhere meets, other evidences of the fierce unrest of the past are noticed. Beds of sulphur abound. Satsuma, Liu Kiu, and Yezo are noted for the large amount they easily produce. From the sides of Hakuzan huge crystals of sulphur are dug. Solfataras exist in active operation in many places. Sulphur-springs may be found in almost every province. Hot-springs abound, many of them highly impregnated with mineral salts, and famous for their geyser-like rhythm of ebb and flow. In Shinano and Echigo the people cook their food, and the farmer may work in his fields by night, lighted by the inflammable gas which issues from the ground, and is led through bamboo tubes.

Connected with volcanic are the seismic phenomena. The records of Japan from the earliest time make frequent mention of these devastating and terrifying visitations of subterranean disorder. Not only have villages, towns, and cities been shaken down or ingulfed, but in many neighborhoods tradition tells of mountains that have disappeared utterly, or been leveled to earth. The local histories, so numerous in Japan, relate many such instances, and numerous gullies and depressions produced by the opening and partial closure of the earth-lips are pointed out. One, in the province of Echizen, is over a mile long, and resembles a great trench.

In addition to a good soil, Japan has been generously endowed by the Creator with mineral riches. Most of the useful varieties of stone are found throughout the empire. Granite and the harder rocks, through various degrees of softness, down to the easily carved or chipped sandstones and secondary formations useful for fortifications, buildings, tombs, walks, or walls, exist in almost every province.

Almost all the useful metals long known to man are found in this island empire. Gold and silver in workable quantities are found in many places. The island of Sado is a mass of gold-bearing quartz. Copper is very abundant, and of the purest kind. Lead, tin, antimony, and manganese abound. Of zinc and mercury there is but little. Iron is chiefly in the form of magnetic oxide. It occurs in the diluvium of rivers and along the sea-coast, lying in beds, often of great thickness. The first quality of iron may be extracted from it. Iron-stone and many other varieties of ore are also found. Petroleum issues from the ground in Echigo, Suruga, Echizen, Yezo, and in Saghalin; the ocean at some portions on the coast of the latter is said to be smeared with a floating scum of oil for miles.

The botanical wealth of Japan is very great. A considerable number of vegetable species have doubtless been introduced by human agency into Japan from the Asiatic continent, but the indigenous plants and those imported by natural means are very numerous.

The timber of the main island, Kiushiu, and Shikokŭ is superb in appearance and growth, of great variety, beauty, and adaptability to the uses of man. Yezo is one vast boom and lumber yard. Thirty-six varieties of useful timber-trees, including true oak, are found there. The Kuriles also afford rich supplies, and are capable of becoming to the empire proper what forest-clad Norway is to England. Yamato, on the main-land, is also famous for its forests, ranging from tallest evergreen trees of great size, fineness of grain, and strength of fibre, to the soft and easily whittled pines; but the incessant demands for firing and carpentry make devastating inroads on the growing timber. Split wood for cooking, and charcoal for warmth, necessitate the system of forestry long in vogue in some parts of the empire requiring a tree to be planted for every one cut down; and nurseries of young forest trees are regularly set out, though the custom is not universal. Most of the trees and many of the plants are evergreen, thus keeping the islands clothed in perpetual verdure, and reducing the visual difference between winter and summer, in the southern half of Hondo, at least, to a nearly tropical minimum.

The various varieties of bamboo, graceful in appearance, and by its strength, symmetry, hollowness, and regularity of cleavage, adapted to an almost endless variety of uses, are almost omnipresent, from the scrub undergrowth in Yezo to that cultivated in luxuriant groves in Satsuma so as to be almost colossal in proportion. There is, however, as compared with our own country, a deficiency of fruit-trees and edible vegetables. The first use of most of the bread grains and plants is historic. In very ancient times it is nearly certain that the soil produced very little that could be used for food, except roots, nuts, and berries. This is shown both by tradition and history, and also by the fact that the names of vegetables in Japan are mostly foreign.

The geographical position of the Japanese chain would lead us to expect a flora American, Asiatic, and semi-tropical in its character. The rapid variations of temperature, heavy and continuous rains, succeeded by scorching heats and the glare of an almost tropical sun, are accompanied and tempered by strong and constant winds. Hence we find semi-tropical vegetable forms in close contact with Northern temperate types. In general the predominant nature of the Japan flora is shrubby rather than herbaceous.*

The geographical position of Japan hardly explains the marked resemblance of its flora to that of Atlantic America,† on the one hand, and that of the Himalaya region, on the other. Such, however, is the

---

* In the "Enumeratio Plantarum," which treats of all the known exogens and conifers in Japan, 1699 species are enumerated, distributed in 643 genera, which are collocated in 122 orders. In other words, an imperfect botanical survey of the Nippon chain of islands shows that in it are represented nearly half the natural orders, ten per cent. of the genera, and nearly three per cent. of the species of dicotyledons known to exist on the surface of the globe. Future research must largely increase the number of species.

† Very large and splendidly illustrated works on botany exist in the Japanese language. The native botanists classify according to the Linnæan system. In their "Enumeratio Plantarum" (Paris, 1874), Drs. A. Franchet and L. Savatier have given a *résumé* of all the known dicotyledonous plants in Japan. It is a work of great research and conscientious accuracy. I have seen excellent and voluminous native works, richly illustrated, on ichthyology, conchology, zoölogy, entomology, reptilology, and mineralogy. Some of these works are in ninety volumes each. Ten thousand dollars were spent by a wealthy scholar in Mino in the publication of one of them. They would not satisfy the requirements of the exact science of this decade, but they constitute an invaluable thesaurus to the botanical investigator. I am indebted for most of the information concerning the Japanese flora to a paper in the *Japan Mail* of September 25th, 1875, from the pen of a competent reviewer of Dr. Savatier's great work.

fact: the Japanese flora resembles that of Eastern North America more than that of Western North America or Europe.*

The fauna of the island is a very meagre one, and it is also quite probable that the larger domestic animals have been imported. Of wild beasts, the bear, deer, wolf, badger, fox, and monkey, and the smaller ground animals, are most probably indigenous. So far as studied, however, the types approach those of the remote American rather than those of the near Asiatic continent.

It is most probable, and nearly certain, that prehistoric Japan did not possess the cow, horse, sheep, or goat. Even in modern Japan, the poverty of the fauna strikes the traveler with surprise. The birds are mostly those of prey. Eagles and hawks are abundant. The crows, with none to molest their ancient multitudinous reign, are now, as always in the past, innumerable. The twittering of a noticeably small number of the smaller birds is occasionally heard; but bird-song seems to have been omitted from the catalogue of natural glories of this island empire. Two birds, the stork and heron, now, as anciently, tread the fields in stately beauty, or strike admiration in the beholder as they sail in perfect grace in mid-air. The wild ducks and geese in flocks have, from time immemorial, summered in Yezo and wintered in Hondo.

The domestic fowls consist almost entirely of ducks and chickens. The others have, doubtless, been imported. Of sea-birds there are legions on the uninhabited coasts, and from the rocks the fishermen gather harvests of eggs.

Surrounding their land is the great reservoir of food, the ocean. The seas of Japan are probably unexcelled in the world for the multitude and variety of the choicest species of edible fish. The many bays and gulfs indenting the islands have been for ages the happy hunting-grounds of the fisherman. The rivers are well stocked with

---

* The results of Dr. Asa Gray's investigations of the herbarium brought to the United States by the Perry expedition are summed up as follows:

48 per cent. had corresponding European representatives,
37 " " " " Western North American representatives,
61 " " " " Eastern North American representatives;

while

27 per cent. were identical with European species,
20 " " " " " Western North American species,
23 " " " " " Eastern North American species.

"Dr. Gray's report was drawn up in 1858, when Japanese botany was little known, and considerable alteration might be made in his figures; but there can be little doubt that the general result would be the same."

many varieties of fresh-water fish. In Yezo the finest salmon exist in inexhaustible supply, while almost every species of edible shell-fish, mollusca and crustacea, enlivens the shores of the islands, or fertilizes the soil with its catacombs. So abundant is fish that fish-manure is an article of standard manufacture, sale, and use. The variety and luxuriance of edible sea-weed are remarkable.

The aspects of nature in Japan, as in most volcanic countries, comprise a variety of savage hideousness, appalling destructiveness, and almost heavenly beauty. From the mountains burst volcanic eruptions; from the land come tremblings; from the ocean rises the tidal wave; over it blows the cyclone. Floods of rain in summer and autumn give rise to inundations and land-slides. During three months of the year the inevitable, dreaded typhoon may be expected, as the invisible agent of hideous ruin. Along the coast the winds and currents are very variable. Sunken and emerging rocks line the shore. All these make the dark side of nature to cloud the imagination of man, and to create the nightmare of superstition. But Nature's glory outshines her temporary gloom, and in presence of her cheering smiles the past terrors are soon forgotten. The pomp of vegetation, the splendor of the landscape, and the heavenly gentleness of air and climate come to soothe and make vivacious the spirits of man. The seasons come and go with well-nigh perfect regularity; the climate at times reaches the perfection of that in a temperate zone —not too sultry in summer, nor raw in winter. A majority of the inhabitants rarely see ice over an inch thick, or snow more than twenty-four hours old. The average lowest point in cold weather is probably 20° Fahrenheit.

The surrounding ocean and the variable winds temper the climate in summer; the Kuro Shiwo, the Gulf Stream of the Pacific, modifies the cold of winter. A sky such as ever arches over the Mediterranean bends above Japan, the ocean walls her in, and ever green and fertile land is hers. With healthful air, fertile soil, temperate climate, a land of mountains and valleys, with a coast-line indented with bays and harbors, food in plenty, a country resplendent with natural beauty, but liable at any moment to awful desolation and hideous ruin, what influences had Nature in forming the physique and character of the people who inhabit Japan?

II.

THE ABORIGINES.*

In seeking the origin of the Japanese people, we must take into consideration the geographical position of their island chain, with reference to its proximity to the main-land, and its situation in the ocean currents. Japanese traditions and history may have much to tell us concerning the present people of Japan—whether they are exclusively an indigenous race, or the composite of several ethnic stocks. From a study, however imperfect, of the language, physiognomy, and bodily characteristics, survivals of ancient culture, historic geology, and the relics of man's struggle with nature in the early ages, and of the actual varieties of mankind now included within the mikado's dominions,† we may learn much of the ancestors of the present Japanese.

The horns of the crescent-shaped chain of Dai Nippon approach the Asiatic continent at the southern end of Corea and at Siberia. Nearly the whole of Saghalin is within easy reach of the continent by canoe. At the point called Norato, a little north of the fifty-second parallel, the opposite shore, but five miles distant, is easily seen. The water is here so shallow that junks can not cross it at low tide. After long prevalent favorable winds, the ground is left dry, and the

---

* I use the term "aborigines" for the sake of convenience, being by no means absolutely sure that those I so designate were the first people *in situ*. It has been conjectured and held by some native scholars that there was in Japan a pre-Ainō civilization; though of this there is scarcely a shadow of proof, as there is proof for an ancient Malay civilization higher than the present condition of the Malays. By the term "aborigines" I mean the people found on the soil at the dawn of history.

† In compiling this chapter I have used, in addition to my own material and that derived from Japanese books, students, and residents in Yezo, the careful notes of the English travelers, Captains Bridgeford and Blakiston, and Mr. Ernest Satow, and the reports and verbal accounts of the American engineers and geologists in the service of the Kai Takŭ Shi (Department for the Development of Yezo), organized in 1869 by the Imperial Government of Japan. Of these latter, I am especially indebted to Professors B. S. Lyman, Henry S. Munroe, and Thomas Antisell, M.D.

natives can walk dry-shod into Asia. During three or four months in the year it is frozen over, so that, with dog-teams or on foot, communication is often a matter of a single hour. In Japanese atlases, on the map of Karafto, a sand-bank covered by very shallow water is figured as occupying the space between the island and the continent. A people even without canoes might make this place a gate of entrance into Saghalin. The people thus entering Japan from the north would have the attraction of richer supplies of food and more genial climate to tempt them southward. As matter of fact, communication is continually taking place between the Asiatic main-land and Saghalin.

Japan occupies a striking position in the ocean currents which flow up from the Indian Ocean and the Malay peninsula. That branch of the great equatorial current of the Pacific, called the Kuro Shiwo, or Black Stream, on account of its color, flows up in a westerly direction past Luzon, Formosa, and the Liu Kiu Islands, striking the south point of Kiushiu, and sometimes, in summer, sending a branch up the Sea of Japan. With great velocity it scours the east coast of Kiushiu, the south of Shikokŭ; thence, with diminished rapidity, enveloping both the group of islands south of the Bay of Yedo and Ōshima; and, at a point a little north of the latitude of Tōkiō, it leaves the coast of Japan, and flows north-east toward the shores of America. With the variable winds, cyclones, and sudden and violent storms continually arising, for which the coasts of Eastern Asia are notorious, it is easily seen that the drifting northward from the Malay Archipelago of boats and men, and sowing of the shores of Kiushiu, Shikokŭ, and the western shores of Hondo with people from the south and west, must have been a regular and continuous process. This is shown to be the fact in Japanese history, in both ancient and modern times, and is taking place nearly every year of the present century.

It seems most probable that the savages descended from the north, tempted south by richer fisheries and a warmer climate, or urged on by successive immigrations from the continent. There is abundant evidence from Japanese history of the habitation of the main island by the Ainōs, the savages whose descendants now occupy Yezo. Shikokŭ and Kiushiu were evidently peopled by mixed races, sprung of the waifs from the various shores of Southern Asia. When the conquerors landed in Kiushiu, or, in sacred Japanese phrase, "when our divine ancestors descended from heaven to the earth," they found the land peopled by savages, under tribal organizations, living in villages,

l by a head-man. Conquering first the aborigines of Shikokŭ, they advanced into the main island, fought and he Ainōs, then called Ebisŭ, or barbarians, and fixed their r from Kiōto. The Ainōs were not subjugated in a and continual military operations were necessary to keep Only after centuries of fighting were they thoroughly tranquilized. The traveler to-day in the northern part sland may see the barrows of the Ainōs' bones slain by es more than a millennium ago. One of these mounds, in Rikuchiu, very large, and named "Yezo mori" (Ainō pecially famous, containing the bones of the aborigines eaps upon heaps, by the Japanese shōgun (general), Ta- s noted for being six feet high, and for his many bloody the Ebisŭ.

es more, the distinction between conquerors and con- ween Saxon and Norman in England, was kept up; but fusion of races was complete, and the homogeneous Jap- s the result. The remnants of Ainōs in Yezo, shut off of Tsugarŭ from Hondo, have preserved the aboriginal y.

onal origin of the Ainōs, said to be given by them-

Japanese. Its derivation, as given by several eminent native scholars whom I have consulted, is from *inu*, a dog. Others assert that it is an abbreviation of *ai no ko*, "offspring of the middle;" that is, a breed between man and beast. Or, if the Japanese were believers in a theory called of late years the "Darwinian," an idea by no means unknown in their speculations, the Ainōs would constitute the "missing link," or "intermediate" between man and the brutes. In the ancient Japanese literature, and until probably the twelfth century, the Ainōs were called Ebisŭ, or savages.

The proofs from language of the Ainō ancestry of the Japanese are very strong. So far as studied, the Ainō tongue and the Altai dialects are said to be very similar. The Ainō and Japanese languages differ no more than certain Chinese dialects do from each other. Ainōs and Japanese have little difficulty in learning to speak the language of each other. The most ancient specimens of the Japanese tongue are found to show as great a likenesss to the Ainō as to modern Japanese.

Further proofs of the general habitation of Hondo by the Ainōs appear in the geographical names which linger upon the mountains and rivers. These names, musical in sound, and possessing, in their significance, a rude grandeur, have embalmed the life of a past race, as the sweet names of "Juniata" and "Altamaha," or the sonorous onomatopes of "Niagara," "Katahdin," and "Tuscarora" echo the ancient glories of the well-nigh extinct aborigines of America, who indeed may be brethren of the Ainōs. These names abounding in the north, especially in the provinces north of the thirty-eighth parallel, are rare in the south, and in most cases have lost their exact ancient pronunciation by being for centuries spoken by Japanese tongues.

The evidences of an aboriginal race are still to be found in the relics of the Stone Age in Japan. Flint, arrow and spear heads, hammers, chisels, scrapers, kitchen refuse, and various other trophies, are frequently excavated, or may be found in the museum or in homes of private persons. Though covered with the soil for centuries, they seem as though freshly brought from an Ainō hut in Yezo. In scores of striking instances, the very peculiar ideas, customs, and superstitions, of both Japanese and Ainō, are the same, or but slightly modified.

Amidst many variations, two distinctly marked types of features are found among the Japanese people. Among the upper classes, the fine, long, oval face, with prominent, well-chiseled features, deep-sunken eye-sockets, oblique eyes, long, drooping eyelids, elevated and arch-

twenty thousand in all.

As the Ainō of to-day is and lives, so Japan
depict him in the dawn of history: of low s
bearded, bushy hair of a true black, eyes set s
with the

ing in Tōkiō, under instruction of the Kai Takŭ Shi (Department for the Colonization of Yezo). I have had frequent opportunities of studying their physical characteristics, language, and manners.

Their dwellings in Yezo are made of poles covered over with thick straw mats, with thatched roofs, the windows and doors being holes covered with the same material. The earth beaten down hard forms the floor, on which a few coarse mattings or rough boards are laid. Many of the huts are divided into two apartments, separated by a mud and wattle partition. The fire-place, with its pot-hooks, occupies the centre. There being no chimney, the interior walls become thickly varnished with creosote, densely packed with flakes of carbon, or festooned with masses of soot. They are adorned with the implements of the chase, and the skulls of animals taken in hunting. Scarcely any furniture except cooking-pots is visible. The empyreumatical odor and the stench of fish do not conspire to make the visit to an Ainō hut very pleasant.

Raised benches along two walls of the hut afford a sleeping or lounging place, doubtless the original of the *tokonoma* of the modern Japanese houses. They sit, like the Japanese, on their heels. Their food is mainly fish and sea-weed, with rice, beans, sweet-potatoes, millet, and barley, which, in Southern Yezo, they cultivate in small plots. They obtain rice, tobacco, saké, or rice-beer, an exhilarating beverage which they crave as the Indians do "fire-water," and cotton clothing from their masters, the Japanese. The women weave a coarse, strong, and durable cloth, ornamented in various colors, and ropes from the barks of trees. They make excellent dug-out canoes from elm-trees. Their dress consists of an under, and an upper garment having tight sleeves and reaching to the knees, very much like that of the Japanese. The woman's dress is longer, and the sleeves wider. They wear, also, straw leggings and straw shoes. Their hair, which is astonishingly thick, is clipped short in front, and falls in masses down the back and sides to the shoulders. It is of a true black, whereas the hair of the Japanese, when freed from unguents, is of a dark or reddish brown, and I have seen distinctly red hair among the latter. The beard and mustaches of the Ainōs are allowed to attain their fullest development, the former often reaching the length of twelve or fourteen inches. Hence, Ainōs take kindly to the "hairy foreigners," Englishmen and Americans, whose bearded faces the normal Japanese despise, while to a Japanese child, as I found out in Fukui, a man with mustaches appears to be only a dragon without wings or tail. Some, not all, of the

older men, but very few of the younger, have their bodies and limbs covered with thick black hair, about an inch long. The term "hairy Kuriles," applied to them as a characteristic hairy race, is a mythical expression of book-makers, as the excessively hirsute covering supposed to be universal among the Ainōs is not to be found by the investigator on the ground. Their skin is brown, their eyes are horizontal, and their noses low, with the lobes well rounded out. The women are of proportionate stature to the men, but, unlike them, are very ugly. I never met with a handsome Ainō female, though I have seen many of the Yezo women. Their mouths seem like those of ogres, and to stretch from ear to ear. This arises from the fact that they tattoo a wide band of dirty blue, like the woad of the ancient Britons, around their lips, to the extent of three-quarters of an inch, and still longer at the tapering extremities. The tattooing is so completely done, that many persons mistake it for a daub of blue paint, like the artificial exaggeration of a circus clown's mouth. They increase their hideousness by joining their eyebrows over the nose by a fresh band of tattooing. This practice is resorted to in the case of married women and females who are of age, just as that of blackening the teeth and shaving the eyebrows is among the Japanese.

An Ainō Chief from Yezo. (From a photograph taken in Tōkiō, 1872.)

They are said to be faithful wives and laborious helpmates, their moral qualities compensating for their lack of physical charms. The women assist in hunting and fishing, often possessing equal skill with the men. They carry their babies pickapack, as the Japanese mothers, except that the strap passing under the child is put round the mother's forehead. Polygamy is permitted.

Their weapons are of the rudest form. The three-pronged spear is used for the salmon. The single-bladed lance is for the bear, the most terrible enemy, which they regard with superstitious reverence. Their bows are simply peeled boughs, three feet long. The ar-

are one foot shorter, and, like those used by the tribes on the coast of Siberia and in Formosa, have no feather on the shaft. Their pipes are of the same form as those so common in Japan and China; and one obtained from an Ainō came from Santan, a place in Amurland.

The Ainōs possess dogs, which they use in hunting, understand the use of charcoal and candles, make excellent baskets and wicker-work of many kinds; and some of their fine bark-cloth and ornamented weapons for their chiefs show a skill and taste that compare very favorably with those exhibited by the North American Indians. Their oars, having handles fixed crosswise, or sculls made in two pieces, are almost exactly like those of the Japanese. Their river-canoes are dug out of a log, usually elm. Two men will fashion one in five days. For the sea-coast, they use a frame of wood, lacing on the sides with bark fibre. They are skillful canoe-men, using either pole or paddle.

The language of the Ainō is rude and poor, but much like the Japanese. It resembles it so closely, allowing for the fact that it is utterly unpolished and undeveloped, that it seems highly probable it is the original of the present Japanese tongue. They have no written character, no writing of any sort, no literature. A further study may possibly reveal valuable traditions held among them, which at present they are not known by me to have.

In character and morals, the Ainōs are stupid, good-natured, brave, honest, faithful, peaceful, and gentle. The American and English travelers in Yezo agree in ascribing to them these qualities. Their method of salutation is to raise the hands, with the palms upward, and stroke the beard. They understand the rudiments of politeness, as several of their verbal expressions and gestures indicate.

Their religion consists in the worship of kami, or spirits. They do not appear to have any special minister of religion or sacred structure.* They have festivals commemorative of certain events in the

* Some visitors to the Ainō villages in Yezo declare that they have noticed there the presence of the phallic shrines and symbols. It might be interesting if this assertion, and the worship of these symbols by the Ainōs, were clearly proved. It would help to settle definitely the question of the origin in Japan of this oldest form of fetich worship, the evidences of which are found all over the Nippon island-chain, including Yezo. I have noticed the prevalence of these shrines and symbols especially in Eastern and Northern Japan, having counted as many as a dozen, and these by the roadside, in a trip to Nikkō. The barren of both sexes worship them, or offer them *ex voto*. In Sagami, Kadzusa, and even in Tōkiō itself, they were visible as late as 1874, cut in stone and wood. Formerly the toy-shops, porcelain-shops, and itinerant venders of many wares were well supplied with them, made of various materials; they were to be seen in the cor-

past, and they worship the spirit of Yoshitsuné, a Japanese hero, who is supposed to have lived among them in the twelfth century, and who taught them some of the arts of Japanese civilization.

The outward symbols of their religion are sticks of wood two or three feet long, which they whittle all around toward the end into shavings, until the smooth wand contains a mass of pendent curls, as seen in the engraving, page 32. They insert several of these in the ground at certain places, which they hold sacred. The Ainōs also deify mountains, the sea, which furnishes their daily food, bears, the forests, and other natural objects, which they believe to possess intelligence. These wands with the curled shavings are set up in every place of supposed danger or evil omen. The traveler in Yezo sees them on precipices, gorges of mountains, dangerous passes, and river banks.

When descending the rapids of a river in Yezo, he will notice that his Ainō boatmen from time to time will throw one of these wands into the river at every dangerous point or turning. The Ainōs pray raising their hands above their heads. The Buddhist bonzes have in vain attempted to convert them to Buddhism. They have rude songs, which they chant to their kami, or gods, and to the deified sea, forest, mountains, and bears, especially at the close of the hunting and fishing season, in all affairs of great importance, and at the end of the year. The following is given as a specimen:

"To the sea which nourishes us, to the forest that protects us, we present our grateful thanks. You are two mothers that nourish the same child; do not be angry if we leave one to go to the other."

"The Ainōs will always be the pride of the forest and the sea."

The inquirer into the origin of the Japanese must regret that as yet we know comparatively little of the Ainōs and their language. Any opinion hazarded on the subject may be pronounced rash. Yet, after a study of all the obtainable facts, I believe they unmistakably

---

nucopia-banners at New-year's, paraded in the festivals, and at unexpected times and places disturbed the foreign spectator. It was like a glimpse of life in the antediluvian world, or of ancient India, whence doubtless they came, to see evidences of this once widely prevalent form of early religion. Buddhist priests whom I have consulted affirm, with some warmth, that they arose in the "wicked time of Ashikaga," though the majority of natives, learned and unlearned, say they are the relics of the ancient people, or aborigines. In 1872 the mikado's Government prohibited the sale or exposure of these emblems in any form or shape, together with the more artistic obscenities, pictures, books, carvings, and photographs, sent out from the studios of Paris and London.

point to the Ainōs as the primal ancestors of the Japanese; that the mass of the Japanese people of to-day are substantially of Ainō stock. An infusion of foreign blood, the long effects of the daily hot baths and the warm climate of Southern Japan, of Chinese civilization, of agricultural instead of the hunter's method of life, have wrought the change between the Ainō and the Japanese.

It seems equally certain that almost all that the Japanese possess which is not of Chinese, Corean, or Tartar origin has descended from the Ainō, or has been developed or improved from an Ainō model. The Ainōs of Yezo hold politically the same relation to the Japanese as the North American Indians do to the white people of the United States; but ethnically they are, with probability bordering very closely on certainty, as the Saxons to the English.*

* I need scarcely, except to relieve, by borrowed humor, the dull weighing of facts, and the construction of an opinion void of all dogmatism, notice the assertion elaborated at length by some Americans, Scotchmen, and others too, for aught I know, that the Ainōs are the "ten lost tribes of Israel," or that they are the descendants of the sailors and gold-hunters sent out by King Solomon to gain spoil for his temple at Jerusalem. Really, this search after the "lost tribes"—or have they consolidated into the Wandering Jew?—is becoming absurd. They are the most discovered people known. They have been found in America, Britain, Persia, India, China, Japan, and in Yezo. I know of but one haystack left to find this needle in, and that is Corea. It will undoubtedly be found there. It has been kindly provided that there are more worlds for these Alexanders to conquer. It is now quite necessary for the archæological respectability of a people that they be the "lost tribes." To the inventory of wonders in Japan some would add that of her containing "the dispersed among the Gentiles," notwithstanding that the same claim has been made for a dozen other nations.

The Ainō Arrow-poison.—Dr. Stuart Eldredge, who has studied the properties of the Ainō arrow-poison, states that it is made by macerating and pounding the roots of one or more of the virulent species of aconite, mixing the mass into a paste, with (perhaps) inert ingredients, and burying it in the ground for some time. The stiff, dark, reddish-brown paste is then mixed with animal fat, and about ten grains' weight of the paste is applied to the bamboo arrow-tips which are used to set the bear-traps. The wounded animals are found dead near the trap, and their flesh is eaten with impunity, though the hunter cuts off the parts immediately near the wound. The Ainōs know of no antidote for the poison. (See "Transactions of the Asiatic Society of Japan, 1876.")

III.

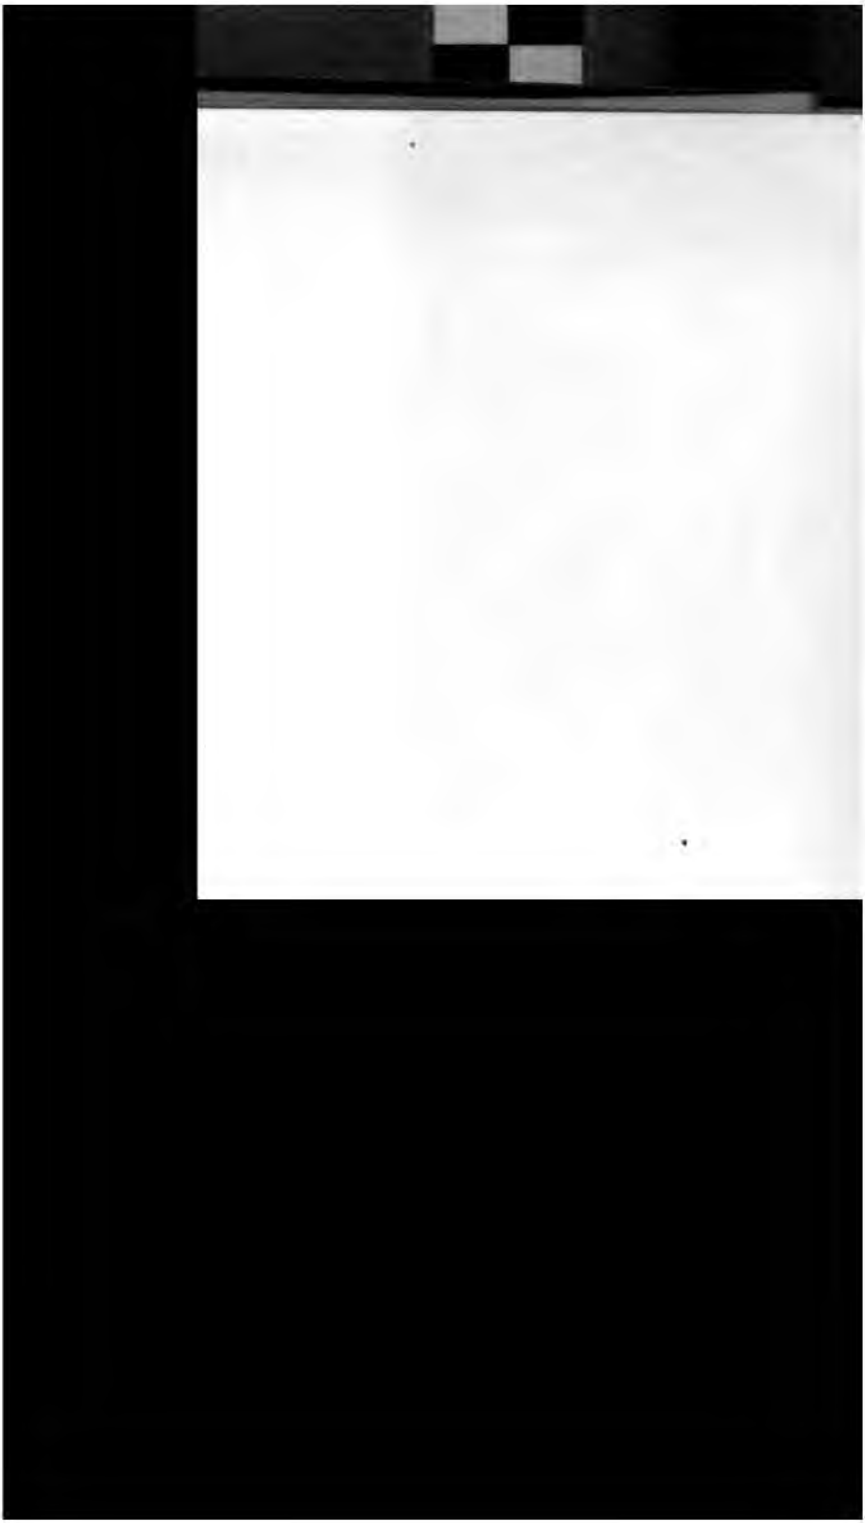
MATERIALS OF HISTORY.

BEFORE attempting a brief sketch of Japanese history, it may be interesting to the reader to know something of the sources of such history, and the character and amount of the materials. A dynasty of rulers who ostentatiously boast of twenty-five centuries of unbroken succession should have solid foundation of fact for their boast. The august representatives of the mikado Mutsŭhito,* the one hundred and twenty-third of the imperial line of Dai Nippon, who, in the presence of the President and Congress of the United States, and of the sovereigns of Europe, claimed the immemorial antiquity of the Japanese imperial rule, should have credentials to satisfy the foreigner and silence the skeptic.

In this enlightened age, when all authority is challenged, and a century after the moss of oblivion has covered the historic grave of the doctrine of divine right, the Japanese still cling to the divinity of the mikado, not only making it the dogma of religion and the engine of government, but accrediting their envoys as representatives of, and asking of foreign diplomatists that they address his imperial Japanese majesty as the King of Heaven (Tennō). A nation that has passed through the successive stages of aboriginal migration, tribal government, conquest by invaders, pure monarchy, feudalism, anarchy, and modern consolidated empire, should have secreted the material for much interesting history. In the many lulls of peace, scholars would arise, and opportunities would offer, to record the history which previous generations had made. The foreign historian who will bring the

* Mutsŭhito ("meek man"), the present emperor, is the second son of the mikado Komei (1847–1867), whom he succeeded, and the Empress Fujiwara Asako. He was born November 3d, 1850. He succeeded his father Februar 3d, 1867; was crowned on the 28th day of the Eighth month, 1868; and was m ried on the 28th of the Twelth month, 1868, to Haruko, daughter of Ichijō Tada a noble of the second degree of the first rank. She was born on the 17th of Fourth month, 1850. The dowager-empress Asako, mother of the emperor of the house of Kujō, and was born on the 14th day of the Twelfth month, 1

His Imperial Japanese Majesty, Mutsŭhito, Emperor of Japan, and the 123d Mikado of the Line.



necessary qualifications to the task of composing a complete history of Japan, *i. e.*, knowledge of the languages and literature of Japan, China, Corea, and the dialects of the Malay Archipelago, Siberia, and the other islands of the North Pacific, historical insight, sympathy, and judicial acumen, has before him a virgin field.

The body of native Japanese historical writings is rich and solid. It is the largest and most important division of their voluminous literature. It treats very fully the period between the rise of the noble families from about the ninth century until the present time. The real history of the period prior to the eighth century of the Christian era is very meagre. It is nearly certain that the Japanese possessed no writing until the sixth century A.D. Their oldest extant composition is the *Kojiki*, or "Book of Ancient Traditions." It may be called the Bible of the Japanese. It comprises three volumes, composed A.D. 711, 712. It is said to have been preceded by two similar works, written respectively in A.D. 620 and A.D. 681; but neither of these has been preserved. The first volume treats of the creation of the heavens and earth; the gods and goddesses, called kami; and the events of the holy age, or mythological period. The second and third give the history of the mikados* from the year 1 (660 B.C.) to the 1288th of the Japanese era. It was first printed during A.D. 1624–1642. The *Nihongi*, completed A.D. 720, also contains the Japanese cosmogony, records of the mythological period, and brings down the annals of the mikado to A.D. 699. These are the oldest books in the language. Numerous and very valuable commentaries upon them have been written. They contain so much that is fabulous, mythical,

* "The term 'mikado' is in general adhered to throughout this work. Other titles found in the native literature, and now or formerly in common use, are, Tenshi (Son of Heaven); Tennō, or Ten Ō (Heaven-king); Kotei (Sovereign Ruler of Nations); Kinri (The Forbidden Interior); Dairi (Imperial Palace); Chotei (Hall of Audience); Ō-ō, or Dai Ō (Great King); Ō Uji (The Great Family); Gosho (Palace). In using these titles, the common people add *sama*, a respectful term, after them. Several of them, as is evident, were used originally to denote places. It was quite common for the people in later time to speak of the mikado as Miako sama, or Uyé sama (Superior Lord), in distinction from the shōgun, whom they designated as Yedo sama. The Chinese characters employed to express the term 'mikado' mean Honorable Gate, an idea akin to the Turkish Sublime Porte. Satow, however, derives it from *mi*, great, august, awful; and *to* (*do* in composition), place; the notion being that the mikado is too far above ordinary mortals to be spoken of directly. Hence the Gate of the Palace is used as a figure for him. So, also, Ren-ka (Base of the Chariot, or Below the Palanquin); and Heika (Foot of the Throne, or of the Steps leading to the Daïs), are used to denote the imperial person. A term anciently used was Nin Ō (King of Men)."

or exaggerated, that their statements, especially in respect of dates, can not be accepted as true history. According to the *Kojiki*, Jinmu Tennō was the first emperor; yet it is extremely doubtful whether he was a historical personage. The best foreign scholars and critics regard him as a mythical character. The accounts of the first mikados are very meagre. The accession to the throne, marriage and death of the sovereign, with notices of occasional rebellions put down, tours made, and worship celebrated, are recorded, and interesting glimpses of the progress of civilization obtained.

A number of works, containing what is evidently good history, illustrate the period between the eighth and eleventh centuries. A still richer collection of both original works and modern compilations treat of the mediæval period from the eleventh to the sixteenth century — the age of intestine strife and feudal war. The light which the stately prose of history casts upon the past is further heightened by the many poems, popular romances, founded on historic fact, and the classic compositions called *monogatari*, all of which help to make the perspective of by-gone centuries melt out into living pictures. That portion of the history which treats of the introduction, progress, and expulsion of Christianity in Japan has most interest to ourselves. Concerning it there is much deficiency of material, and that not of a kind to satisfy Occidental tastes. The profound peace which followed the victories of Iyeyasŭ, and which lasted from 1600–1868 — the scholastic era of Japan — gave the peaceful leisure necessary for the study of ancient history, and the creation of a large library of historical literature, of which the magnificent works called the *Dai Nihon Shi* ("History of Great Japan"), and *Nihon Guai Shi* ("Japanese Outer, or Military History"), are the best examples.

Under the Tokugawa shōguns (1603–1868) liberty to explore, chronicle, and analyze the past in history was given; but the seal of silence, the ban of censorship, and the mandate forbidding all publication were put upon the production of contemporary history. Hence, the peaceful period, 1600 to 1853, is less known than others in earlier times. Several good native annalists have treated of the post-Perry period (1853–1872), and the events leading to the Restoration.

In the department of unwritten history, such as unearthed relics, coins, weapons, museums, memorial stones, tablets, temple records, etc., there is much valuable material. Scarcely a year passes but some rich trover is announced to delight the numerous native archæologists.

The Japanese are intensely proud of their history, and take great

care in making and preserving records. Memorial-stones, keeping green the memory of some noted scholar, ruler, or benefactor, are among the most striking sights on the highways, or in the towns, villages, or temple-yards, betokening the desire to defy the ravages of oblivion and resist the inevitable tooth of Time.

Almost every large city has its published history; towns and villages have their annals written and preserved by local antiquarians; family records are faithfully copied from generation to generation; diaries, notes of journeys or events, dates of the erections of buildings, the names of the officiating priests, and many of the subscribing worshipers, are religiously kept in most of the large Buddhist temples and monasteries. The *bonzes* (Jap. *bōzŭ*) delight to write of the lives of their saintly predecessors and the mundane affairs of their patrons. Almost every province has its encyclopedic history, and every high-road its itineraries and guide-books, in which famous places and events are noted. Almost every neighborhood boasts its Old Mortality, or local antiquary, whose delight and occupation are to know the past. In the large cities professional story-tellers and readers gain a lucrative livelihood by narrating both the classic history and the legendary lore. The theatre, which in Japan draws its subjects for representation almost exclusively from the actual life, past or present, of the Japanese people, is often the most faithful mirror of actual history. Few people seem to be more thoroughly informed as to their own history: parents delight to instruct their children in their national lore; and there are hundreds of child's histories of Japan.

Besides the sober volumes of history, the number of books purporting to contain truth, but which are worthless for purposes of historical investigation, is legion. In addition to the motives, equally operative in other countries for the corruption or distortion of historical narrative, was the perpetual desire of the Buddhist monks, who were in many cases the writers, to glorify their patrons and helpers, and to damn their enemies. Hence their works are of little value. So plentiful are these garbled productions, that the buyer of books always asked for *jitsu-roku*, or "true records," in order to avoid the "*zu-zan*," or "editions of Zu," so called from Zu, a noted Chinese forger of history.

In the chapters on the history of Japan, I shall occasionally quote from the text of some of the standard histories in literal translation. I shall feel only too happy if I can imitate the terse, vigorous, and luminous style of the Japanese annalists. The vividness and pictorial

detail of the classic historians fascinate the reader who can analyze the closely massed syntax. Many of the pages of the *Nihon Guai Shi*, especially, are models of compression and elegance, and glow with the chastened eloquence that springs from clear discernment and conviction of truth, gained after patient sifting of facts, and groping through difficulties that lead to discovery. Many of its sentences are epigrams. To the student of Japanese it is a narrative of intensest interest.

The *Kojiki* and *Nihongi*, which give the only records of very ancient Japan, and on which all other works treating of this period are based, can not be accepted as sober history. Hence, in outlining the events prior to the second century of the Christian era, I head the chapters, not as the "Dawn of History," but the "Twilight of Fable." From these books, and the collections of ancient myths (*Koshi Seibun*), as well as the critical commentaries and explanations of the Japanese rationalists, which, by the assistance of native scholars, I have been able to consult, the two following chapters have been compiled.*

---

* In the following chapters, I use throughout the modern names of places and provinces, to avoid confusion. The ancient name of Kiushiu was Tsukushi, which was also applied to the then united provinces of Chikuzen and Chikugo. Buzen and Bungo were anciently one province, called Toyo. Higo and Hizen are modern divisions of Hi no kuni ("The Land of Fire"). Tamba, corrupted from Taniwa, and Tango ("Back of Taniwa") were formerly one. Kadzusa and Shimōsa, contracted from Kami-tsu-fusa and Shimo-tsu-fusa (*kami*, upper; *shimo*, lower; *tsu*, ancient form of *no; fusa*, a proper name, tassel), were once united. Kōdzuke and Shimotsuké, formed like the preceding, were "Upper" and "Lower" Ké. All the region north of Echizen, known and unknown, including Echizen, Etchiu, Echigo, Kaga, Noto, Uzen, and Ugo, was included under the name Koshi no kuni. Later synonyms for Kiushiu are Saikoku (Western Provinces), or Chinzei in books. Chiugoku (Central Provinces) is applied to the region from Tamba to Nagato. Kamigata is a vague term for the country around and toward Kiōto.

The Language.—The apparatus for the study of the Japanese language and the critical examination of its texts is now, thanks to Anglo-Japanese scholars, both excellent and easily accessible. The following are such: GRAMMARS—W. G. Aston's "Grammar of the Spoken Language" (Nagasaki, 1869), and "Grammar of the Written Language of Japan, with a short Chrestomathy;" London, 1872: second edition, 1877. E. Satow's "Kuaiwa Hen, 25 Exercises in the Yedo Colloquial, for the Use of Students, with Notes," 4 vols.; Yokohama, 1873. J. J. Hoffman, "A Japanese Grammar;" Leiden, 1868: second edition, 1876. S. R. Brown, "Colloquial Japanese;" Shanghae, 1863. "Prendergast's Mastery System, adapted to the Study of Japanese or English;" Yokohama, 1875. DICTIONARIES—J. C. Hepburn, "Japanese-English and English-Japanese;" Shanghae, 1867: second edition, with grammatical introduction; Shanghae, 1872: pocket edition, New York, 1873. Satow and Ishibashi, "English-Japanese Dictionary of the Spoken Language;" London, 1876. See also valuable papers by Messrs. Satow, Aston, Dallas, Edkins, and Chamberlain, in the "Transactions of the Asiatic Society of Japan."

IV.

JAPANESE MYTHOLOGY.

In the beginning all things were in chaos. Heaven and earth were not separated. The world floated in the cosmic mass, like a fish in water, or the yolk in an egg. The ethereal matter sublimed and formed the heavens, the residuum became the present earth, from the warm mold of which a germ sprouted and became a self-animate being, called Kuni-toko-tachi no mikoto.* Two other beings of like genesis appeared. After them came four pairs of beings (*kami*). These were all single (*hitori-gami*, male, sexless, or self-begotten).

* It will be seen at once that the Japanese scheme of creation starts without a Creator, or any First Cause; and that the idea of space apart from matter is foreign to the Japanese philosophical system. *Mikoto* (masc.), *mikami* (fem.), mean "augustness." It is *not* the same term as mikado. *No* is the particle *of*.

The opening sentence of the *Kojiki* is as follows: At the time of the beginning of heaven and earth there existed three *hashira-gami* (pillar or chief *kami*, or gods). The name of one kami was *Amé-no-naka-nushi-no-kami* (Lord of the Middle of Heaven); next, *Taka-mi-musubi-no-kami* (High Ineffable Procreator); next, *Kami-musubi-no-kami* (Ineffable Procreator). These three, existing single, hid their bodies (died, or passed away, or became pure spirit [?]). Next, when the young land floated like oil moving about, there came into existence, sprouting upward like the *ashi* (rush) shoot, a kami named *Umaji-ashikabi-kikoji-no-kami* (Delightful Rush-sprout); next, *Amé-no-toko-tachi-no-kami*. These two chief kami, existing single, hid their bodies. Next, came into existence these three, *Kuni-no-toko-tachi-no-mikoto*, etc., etc.

The *Nihongi* opens as follows: Of old, when heaven and earth were not yet separated, and the *in* (male, active, or positive principle) and the *yo* (female, passive, or negative principle) were not yet separated, chaos, enveloping all things, like a fowl's egg, contained within it a germ. The clear and ethereal substance expanding, became heaven; the heavy and thick substance agglutinating, became earth. The ethereal union of matter was easy, but the thickened substance hardened with difficulty. Therefore, heaven existed first; the earth was fixed afterward. Subsequently deity (*kami*) was born (*umaru*). Now, it is said that, "in the beginning of heaven and earth, the soil floated about like a fish floating on the top of the water," etc.

Evidently in the *Kojiki* we have the purely Japanese theory of creation, and in the *Nihongi* the same account, with Chinese philosophical ideas and terms added. In both, matter appears before mind, and the deities have no existence before matter.

Proceeding now to the work of creation, the kami separated the primordial substance into the five elements—wood, fire, metal, earth, and water—and ordained to each its properties and combination. As yet, the division into sexes had not taken place. In [Chinese] philosophical language, the male (*yo*) and female (*in*) principles that pervade all things had not yet appeared. The first manifestation of the male essence was *Izanagi;* of the female, *Izanami.* Standing together on the floating bridge of heaven, the male plunged his jeweled falchion, or spear, into the unstable waters beneath them, and withdrawing it, the trickling drops formed an island, upon which they descended. The creative pair, or divine man and woman, designing to make this island a pillar for a continent, separated—the male to the left, the female to the right—to make a journey round the island. At their meeting, the female spirit spoke first, "How joyful to meet a lovely man!" The male spirit, offended that the first use of the tongue had been by a woman, required the circuit to be repeated. On their second meeting, the man cried out, "How joyful to meet a lovely woman!" They were the first couple; and this was the beginning of the art of love, and of the human race. The island (Awaji), with seven other large, and many thousand small ones, became the Everlasting Great Japan.* At Izanami's first conception, the female essence

* The various names of Japan which I have found in the native literature, or have heard in colloquial use, are as follows: 1. *Nihon*, or *Nippon*, compounded of the words *ni*, *nichi*, or *nitsu* (sun, day) and *hon* (root, origin, beginning); hence Sunrise, Dawn, or Dayspring. Japan is the foreigner's corruption of the Chinese Ji-pun, or Ji-puan. The name may have been given by the Chinese or Coreans to the land lying east of them, whence the sun rose, or by the conquerors coming from Manchuria, by way of Corea, eastward. Or, it may have arisen anciently among the natives of the western provinces of Japan. It is found in Chinese books from the time of the Tang dynasty (618–905 A.D.). 2. *Dai Nihon Koku* (Country of Great Japan). 3. *Ō Yashima no Kuni* (Country of the Eight Great Islands), created by Izanagi and Izanami. 4. *Onogorojima* (Island of the Congealed Drops), which fell from the jeweled falchion or spear of Izanagi. 5. *Shiki Shima* (Outspread Islands), a name common in poetry, and referring to their being spread out like stepping-stones in a Japanese garden. 6. *Toyohara Akitsu Kuni* (Country between Heaven and Earth). 7. *Toyoakitsu Kuni* (Dragon-fly-shaped Country), from the resemblance to this insect with its wings outspread. 8. *Toyo Ashiwara Kuni* (Fertile Plain of Sweet Flags). 9. *Ō Yamato no Kuni* (Land of Great Peace). The same characters are read *Wa Koku* by the Chinese, and sometimes by the Japanese. 10. *Fuso Koku.* Fuso is the name of a tree which is fabled to petrify; hence, an emblem of national stability. 11. *On Koku* (Honorable Country). 12. *Shin Koku* (Land of the Holy Spirits). 13. *Kami no Kuni* (The God-land, or Land of the Gods). 14. *Horai no Kuni* (Land of the Elixir of Immortality), an allusion to the legend that a Chinese courtier came to

in being more powerful, a female child was born, greatly to the chagrin of the father, who wished for male offspring. The child was named Ama-terasŭ ō mikami, or, the Heaven-illuminating Goddess. She shone beautifully, and lighted the heavens and the earth. Her father, therefore, transferred her from earth to heaven, and gave her the ethereal realm to rule over. At this time the earth was close to heaven, and the goddess easily mounted the pillar, on which heaven rested, to her kingdom.

The second child was also a female, and was called Tsuki no kami, and became the Goddess of the Moon. The third child, Hiruko (leech), was a male, but not well formed. When three years old, being still unable to stand, his parents made an ark of camphor-wood, and set him adrift at sea. He became the first fisherman, and was the God of the Sea and of Storms.

After two girls and a cripple had thus been born, the father was delighted with the next fruit of his spouse, a fine boy, whom they named Sosanoö no mikoto. Of him they entertained the highest hopes. He grew up, however, to be a most mischievous fellow, killing people, pulling up their trees, and trampling down their fields. He grew worse as he grew up. He was made ruler over the blue sea; but he never kept his kingdom in order. He let his beard grow down over his bosom. He cried constantly; and the land became a desert, the rivers and seas dried up, and human beings died in great numbers. His father, inquiring the reason of his surly behavior, was told that he wished to go to his mother, who was in the region under the earth. He then made his son ruler over the kingdom of night. The august scape-grace still continued his pranks, unable to refrain from mischief. One day, after his sister, the Sun-goddess, had planted a field with rice, he turned a wild horse loose, which trampled down and spoiled all her work. Again, having built a store-house for the new rice, he defiled it so that it could not be used. At another time, his sister was sitting at her loom, weaving. Sosanoö, having skinned a live horse by drawing its skin off from the tail to the head, flung the reeking hide over the loom, and the carcass in the room. The goddess was so frightened that she hurt herself with the shuttle, and, in her wrath, retired to a

---

Japan in search of the elixir of immortality. He brought a troop of young men and maidens with him. Dying in Japan, he was buried in Kii, and the young couples, marrying, colonized Japan. 15. *Ko Koku* (The Mikado's Empire), Land ruled by a Theocratic Dynasty. 16. *Tei Koku Nihon* (The Empire ruled by a Theocratic Dynasty, or, Japan, the Empire governed by Divine Rulers).

cave, closing the mouth with a large rock. Heaven, earth, and the four quarters became enshrouded in darkness, and the distinction between day and night ceased. Some of the turbulent and ill-mannered gods took advantage of the darkness to make a noise like the buzzing of flies, and the confusion was dreadful.

Then all the gods (eight hundred thousand in number) assembled on the heavenly river-plain of Yasu, to discuss what was to be done to appease the anger of the great goddess. The wisest of the gods was intrusted with the charge of thinking out a stratagem to entice her forth. The main part of the plan was to make an image of the self-imprisoned goddess, which was to be more beautiful than herself, and thus excite at once her curiosity and her jealousy. It was to be a round mirror like the sun.

A large rock from near the source of the river was taken to form an anvil. To make the bellows, they took the whole skin of a deer, and, with iron from the mines of heaven, the blacksmith-god made two mirrors, which successively failed to please the gods, being too small. The third was large and beautiful, like the sun.

The heavenly artisans now prepared to make the finest clothes and jewelry, and a splendid palace for the Sun-goddess, when she should come out. Two gods planted the paper-mulberry and hemp, and prepared bark and fibre; while three other gods wove them into coarse, striped, and fine cloth, to deck her dainty limbs. Two gods, the first carpenters, dug holes in the ground with a spade, erected posts, and built a palace. Another deity, the first jeweler, made a string of *magatama* (curved jewels), the material for a necklace, hair-pins, and bracelets. Two other gods held in their hands the sacred wands, called *tama-gushi.*

Two gods were then appointed to find out, by divination, whether the goddess was likely to appear. They caught a buck, tore out a bone from one of its forelegs, and set it free again. The bone was placed in a fire of cherry-bark, and the crack produced by the heat in the blade of the bone was considered a satisfactory omen.

A sakaki-tree was then pulled up by the roots. To the upper branches was hung the necklace of jewels, to the middle was attached the mirror, and from the lower branches depended the coarse and fine cloth. This was called a *gohei.* A large number of perpetually crowing cocks was obtained from (what had been) the region of perpetual day. These irrepressible chanticleers were set before the cave, and began to crow lustily in concert. The God of Invincibly Strong Hands

was placed in concealment near the rocky door, ready to pull the goddess out at her first peering forth. A goddess with a countenance of heavenly glossiness, named Uzumé, was appointed manager of the dance. She first bound up her flowing sleeves close to her body, under the armpits, by a creeping plant, called *masaki*, and donned a headdress made of long moss. While she blew a bamboo tube, with holes pierced in it between the joints, the other deities kept time to the music with two flat, hard pieces of wood, which they clapped together. Another kami took six bows, and, from the long moss hanging from the pine-trees on the high hills, she strung the bows, and made the harp called the *koto*. His son made music on this instrument by drawing across the strings grass and rushes, which he held in both hands. Bonfires were now lighted before the door of the cavern, and the orchestra of fifes, drums, cymbals, and harp began. The goddess Uzumé now mounted the circular box, having a bâton of twigs of bamboo grass in one hand, with a spear of bamboo twined with grass, on which small bells tinkled. As she danced, the drum-like box prepared for her resounded, and she, becoming possessed by a spirit of folly, sung a song in verses of six syllables each, which some interpret as the numerals, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 100, 1000, 10,000. The goddess, as she danced, loosened her dress, exposing her nude charms. All this was caused by the spirit which possessed her. It so excited the mirth of the gods that they laughed so loudly that heaven shook. The song and its interpretations are:

"Hito, futa, miyo.....One, two, three, four,
Itsu, muyu, nana.....Five, six, seven,
Ya, koko-no, tari.....Eight, nine, ten,
Momo, chi, yorodzu .....Hundred, thousand, ten thousand."

"Ye gods, behold the cavern doors!
Majesty appears—hurra!
Our hearts are quite satisfied;
Behold my charms."

or,

"Gods, behold the door!
Lo! the majesty of the goddess!
Shall we not be filled with rapture?
Are not my charms excellent?"

The Sun-goddess within, unable to account for the ill-timed mirth, since heaven and earth were in darkness, rose, and approaching the rocky door, listened to the honeyed words of one of the gods, who was praising her. Impelled further by curiosity, she opened the

door slightly, and asked why Uzumé danced and the gods laughed? Uzumé replied, "I dance because there is an honorable deity who surpasses your glory." As she said this, the exceedingly beauteous god Futodama showed the mirror. The Sun-goddess within, astonished at her own loveliness, which she now first beheld in the reflection, stepped out a little further to gratify her curiosity. The God of Invincibly Strong Hands, who stood concealed, pulled the rock door open, caught her by the hand, and dragged her forth. The wisest of the gods, who superintended the whole proceedings, took a rope of twisted rice-straw, passed it behind her, and said, "Do not go behind this." They then removed the Sun-goddess to her new palace, and put a straw rope around it to keep off evil gods. Her wicked brother was punished by having each particular hair of his head pulled out, and his finger and toe nails extracted. He was then banished.

Izanami's fifth child, the last in whose conception the two gods shared, was a son, called the God of Wild Fire. In bringing him forth the goddess suffered great pain; and from the matter which she vomited in her agony sprung the God and Goddess of Metal. She afterward created the gods of Clay and Fresh Water, who were to pacify the God of Fire when inclined to be turbulent. Izanami had enjoined her consort not to look at her during her retirement, but he disregarded her wish. She fled from him, and departed to the nether regions. Izanagi, incensed at the God of Fire, clove him in three pieces with his sword. From these fragments sprung the gods of Thunder, of Mountains, and of Rain. He then descended into the region of night to induce Izanami to come back to the earth. There he met his consort, who would not return. He found the region to be one of perpetual and indescribable foulness, and, before he left, he saw the body of his wife had become a mass of putrefaction. Escaping into the upper world, he washed himself in the sea, and, in the act of escape and purification, many gods were created. According to one version, Amaterasŭ was produced out of his left eye, and Sosanoö out of his nose. Those deities created out of the filth from which he cleansed himself became the wicked gods, who now war against the good gods and trouble mankind. The God of Clay and the Goddess of Fresh Water married. Their offspring was Naka musubi. From his head grew the mulberry and silk-worm, and from his navel sprung the five cereals, rice, wheat, beans, millet, and sorghum.

Another legend, changing the sex of Sosanoö, says the Sun-goddess spoke to Sosanoö (the Moon-goddess), who reigned jointly with her

over the high plain of heaven, and said, "I have heard that there is a food-possessing goddess in the central country of luxuriant reedy moors (Japan). Go and see." Descending from heaven, he came to the august abode of the Goddess of Food, and asked for refreshment. The goddess, creating various forms of food, such as boiled rice from the land, fish from the sea, beasts, with coarse and fine hair, from the hills, set them on a banqueting-table before Sosanoö, who, enraged at the manner of the creation of the food, killed her.

Reporting the matter in heaven, Amaterasŭ was angry at Sosanoö, and degraded her (the Moon-goddess) from joint rule, and condemned her to appear only at night, while she, the Sun-goddess, slept. Amaterasŭ then sent a messenger the second time to see whether the Food-goddess was really dead. This was found to be the case. Out of the dead body were growing, millet on the forehead; silk-worms and a mulberry-tree on the eyebrows; grass on the eyes; on the belly, rice, barley, and large and small beans. The head finally changed into a cow and horse. The messenger took them all, and presented them to Amaterasŭ. The Sun-goddess rejoiced, and ordained that these should be the food of human beings, setting apart rice as the seed of the watery fields, and the other cereals as the seed of the dry fields. She appointed lords of the villages of heaven, and began for the first time to plant the rice-seeds. In the autumn the drooping ears ripened in luxuriant abundance. She planted the mulberry-trees on the fragrant hills of heaven, and rearing silk-worms, and chewing coooons in her mouth, spun thread. Thus began the arts of agriculture, silk-worm rearing, and weaving.

When Sosanoö was in banishment, there was a huge eight-headed dragon that had devastated the land and eaten up all the fair virgins. Sosanoö enticed the monster to partake of an intoxicating liquor set in eight jars, and then slew him while in stupor. In the tail of the dragon he found a sword of marvelous temper, which he presented to Amaterasŭ. This sword, called "Cloud-cluster," afterward became one of the three sacred emblems constituting the regalia of the Japanese sovereigns. In these last days of commerce, Sosanoö's exploit is pictured on the national paper money. He is also said to have invented poetry. Being as irregularly amorous as the Jupiter of another mythology, he was the father of many children by various mothers. One of the most illustrious of his offspring was Daikokŭ, now worshiped in every household as the God of Fortune. In the later stages of the mythology, heaven and earth are found peopled with myriads

of whom have inhabited heaven from the beginning,
n the earth have been ruling or contending together
inite period. Finally, before ushering in the third or
the mythical history, there are general war and confu-
e gods on earth, and Amaterasŭ resolves to bring order
ıbles, and to subdue and develop the land for herself.
to make a son of her own a ruler over the terrestrial
ıad been produced from her necklace, called Oshi-ho-

eign countries were of course created by the power of the heavenly gods, but they were not begotten by Izanagi and Izanami, nor did they give birth to the Sun-goddess, which is the cause of their inferiority. Japan is superior to all the world for the reasons given above. The traditions current in other countries as to the origin of the world are of course incorrect, since, being so far from the sources of truth, they can not be accurate, and must be greatly distorted. From the fact of the divine descent of the Japanese people proceeds their immeasurable superiority to the natives of other countries in courage and intelligence. This opinion, long held by Japanese in general, still lingers among the fanatical Shintō scholars, and helps to explain the intense hatred and contempt manifested toward foreigners as late as within the last decade.

Ninigi no mikoto descended on Kirishima yama, and was received with due honors by one of the kami of the place. He had a son, who lived five hundred and eighty years. This son married a sea-monster, who appeared to him in the form of a woman, and by her he had a son, who became ruler, and was succeeded by a son born of an aunt. Ninigi, the heavenly descendant, was thus the great-grandfather of Jimmu Tennō, the first emperor of Japan.

It is not easy to weave into a continuous and consistent whole the various versions of the Japanese accounts of creation and the acts of the gods, or to be always safe in deciding their origin, sex, or relations to each other; for these spirits act like Milton's, and "as they please, they limb themselves." These myths arising among the primitive Japanese people of various localities, who never attempted to formulate them, are frequently at hopeless variance with each other; and the ingenuity and ability of the learned native commentators on the sacred books, especially the *Nihongi* and *Kojiki*, are exercised to the highest degree to reconcile them.

One author devotes twenty volumes of comment to two of the text of the *Kojiki* in these earnest efforts, making his works a rich mine to the student of Japanese antiquities. Translated into English, in the spirit of a devout Japanese, an exalted Biblical or Miltonic style should be used. Mr. Aston thus renders a passage from the *Nakatomi no harai*, one of the most ancient monuments of the language, describing the descent of the god Ninigi to the earth (Japan): "They caused him to thrust from him heaven's eternal throne, to fling open heaven's eternal doors, to cleave with might his way from out heaven's many-piled clouds, and then to descend from heaven."

the children of Nippon has transfigured into celestial regions. Thus, the prototype of "the dry bed of the river Ame no yasŭ" is now to be seen in front of the city of Kiōto, where the people still gather for pleasure or public ceremony. The "land of roots," to which Sosanoö was banished, is a region evidently situated a few miles north-west of Kiōto. The dancing of Suzumé before the cavern is imitated in the pantomimic dance still seen in every Japanese village and city street. The mirror made from iron in the mines of heaven by the Blacksmith-god was the original of the burnished disks before which the Japanese beauty of to-day, sitting for hours on knee and heels, and nude to the waist, heightens her charms. A mask of Suzumé, representing the laughing face of a fat girl, with narrow forehead, having the imperial spots of sable, and with black hair in rifts on her forehead, cheeks puffed out, and dimpled chin, adorns the walls of many a modern Japanese house, and notably on certain festival days, and on their many occasions of mirth. The stranger, ignorant of its symbolic import, could, without entering the palace, find its prototype in five minutes, by looking around him, from one of the jolly fat girls at the well or the rice-bucket. The *magatama* jewels, curved and perforated pieces of soap-stone occasionally dug up in various parts of Japan, show the work of the finger of man, and ancient pictures depict the chiefs of tribes decked with these adornments. In the preparations made to attract forth the Sun-goddess, we see the origin of the arts of music by wind and stringed instruments, dancing, divination, adornment, weaving, and carpentry. To this day, when the Japanese female is about to sweep, draw water, or perform household duties, she binds up her sleeves to her armpits, with a string twisted over her shoulders, like the sleeve-binder of the dancing goddess. Before Shintō shrines, trees sacred to the kami, at New-year's-day before gates and doors, and often in children's plays, one sees stretched the twisted ropes of rice-straw. In the month of August especially, but often at the fairs, festivals, and on holidays, the wand of waving jewels, made by suspending colored paper and trinkets to a branch of bamboo, and something like a Christmas-tree, is a frequent sight. The *gohei* is still the characteristic emblem seen on a Shintō shrine. All these relics, trivial and void of meaning to the hasty tourist, or the alien, whose only motive for dwelling on the island is purely sordid, are, in the eye of the native, and the intelligent foreigner, ancient, sacred, and productive of innocent joy, and to the latter, sources of fresh surprise and enjoyment of a people in themselves intensely interesting.

V.

THE TWILIGHT OF FABLE.

BETWEEN the long night of the unknown ages that preceded the advent of the conquerors, and the morning of what may be called real history, there lies the twilight of mythology and fabulous narration.

The mythology of Nippon, though in essence Chinese, is Japanese in form and coloring, and bears the true flavor of the soil from whence it sprung. The patriotic native or the devout Shintōist may accept the statements of the *Kojiki* as genuine history; but in the cold, clear eye of an alien they are the inventions of men shaped to exalt the imperial family. They are a living and luxurious growth of fancy around the ruins of facts that in the slow decay of time have lost the shape by which recognition is possible. Chinese history does indeed, at certain points, corroborate what the Japanese traditions declare, and thus gives us some sure light; but for a clear understanding of the period antedating the second century of the Christian era, the native mythology and the fabulous narrations of the *Kojiki* are but as moonlight.

Jimmu Tennō, the first mikado, was the fifth in descent from the Sun-goddess. His original name was Kan Yamato Iware Hiko no mikoto. The title Jimmu Tennō, meaning "spirit of war," was posthumously applied to him many centuries afterward. When the *Kojiki* was compiled, pure Japanese names only were in use. Hence, in that book we meet with many very long quaint names and titles which, when written in the Chinese equivalents, are greatly abbreviated. The introduction of the written characters of China at a later period enabled the Japanese to express almost all their own words, whether names, objects, or abstract ideas, in Chinese as well as Japanese. Thus, in the literature of Japan two languages exist side by side, or imbedded in each other. This applies to the words only. Japanese syntax, being incoercible, has preserved itself almost entirely unchanged.

The *Kojiki* states that Jimmu was fifty years old when he set out

upon his conquests. He was accompanied by his brothers and a few retainers, all of whom are spoken of as kami, or gods. The country of Japan was already populated by an aboriginal people dwelling in villages, each under a head-man, and it is interesting to notice how the inventors of the *Kojiki* account for their origin. They declare, and the Japanese popularly believe, that these aboriginal savages were the progeny of the same gods (Izanagi and Izanami) from whom Jimmu sprung; but they were wicked, while Jimmu was righteous.

The interpretation doubtless is, that a band of foreign invaders landed in Hiuga, in Kiushiu, or they were perhaps colonists, who had occupied this part of the country for some time previous. The territory of Hiuga could never satisfy a restless, warlike people. It is mountainous, volcanic, and one of the least productive parts of Japan.

At the foot of the famous mountain of Kirishima, which lies on the boundary between Hiuga and Ōzumi, is the spot where Jimmu resided, and whence he took his departure.

Izanagi and Izanami first, and afterward Ninigi, the fourth ancestor of Jimmu, had descended from this same height to the earth. Every Japanese child who lives within sight of this mountain gazes with reverent wonder upon its summit, far above the sailing clouds and within the blue sky, believing that here the gods came down from heaven.

The story of Jimmu's march is detailed in the *Kojiki*, and the numerous popular books based upon it. A great many wonderful creatures and men that resembled colossal spiders were encountered and overcome. Even wicked gods had to be fought or circumvented. His path was to Usa, in Buzen; thence to Okada; thence by ship through the windings of the Suwo Nada, a part of the Inland Sea,*

* The "Inland Sea" (Séto Uchi) is a name which has been given by foreigners, and adopted by the Japanese, who until modern times had no special name for it as a whole. Indeed, the whole system of Japanese geographical nomenclature proves that the generalizations made by foreigners were absent from their conceptions. The large bays have not a name which unifies all their parts and limbs into one body. The long rivers possess each, not one name, but many local appellations along their length. The main island was nameless, so were Shikokŭ and Kiushiu for many centuries. Yezo, to the native, is a region, not an island. Even for the same street in a city a single name, as a rule, is not in use, each block receiving a name by itself. This was quite a natural proceeding when the universe, or "all beneath heaven," meant Japan. The Séto Uchi has been in Japanese history what the Mediterranean was to the course of empire in Europe, due allowance being made for proportions, both physical and moral. It extends nearly east and west two hundred and forty miles, with a breadth varying from ten to

landing in Aki. Here he built a palace, and remained seven years. He then went to the region of Bizen, and, after dwelling there eight years, he sailed to the East. The waves were very rough and rapid at the spot near the present site of Ōzaka,* where he finally succeeded in landing, and he gave the spot the name *Nami Haya* (swift waves). This afterward became, in the colloquial, and in poetry, Naniwa.

Hitherto the career of the invaders had been one of victory and easy conquest, but they now received their first repulse. After severe fighting, Jimmu was defeated, and one of his brothers was wounded. A council of war was held, and sacred ceremonies celebrated to discover the cause of the defeat. The solemn verdict was that as children of the Sun-goddess they had acted with irreverence and presumption in journeying in opposition to the course of the sun from west to east, instead of moving, as the sun moves, from east to west. Thereupon they resolved to turn to the south, and advance westward. Leaving the ill-omened shores, they coasted round the southern point

---

thirty miles, with many narrow passages. It has six divisions (*nada*), taking their names from the provinces whose shores they wash. It contains a vast number of islands, but few known dangers, and has a sea-board of seven hundred miles, densely populated, abounding with safe and convenient anchorages, dotted with many large towns and provincial capitals and castled cities, and noted for the active trade of its inhabitants. It communicates with the Pacific by the channels of Kii on the east, Bungo on the south, and by the Straits of Shimonoséki ("the Gibraltar of Japan"), half a mile wide, on the west. It can be navigated safely at all seasons of the year by day, and now, under ordinary circumstances, by night, thanks to the system of light-houses thoroughly equipped with the latest instruments of optical science, including dioptric and catoptric, fixed and revolving, white and colored lights, in earthquake-proof towers, erected by English engineers in the service of the mikado's Government. The tides and currents of the Séto Uchi are not as yet perfectly known, but are found to be regular at the east and west entrances, the tide-waves coming from the Pacific. In many parts they run with great velocity. The cut on page 57 shows one of these narrow passages where the eddying currents rush past a rock in mid-channel, scouring the shores, and leaving just enough room for the passage of a large steamer.

A very destructive species of mollusk inhabits the Inland Sea, which perforates timber, making holes one-third of an inch in diameter. Sailing-vessels bound to Nagasaki sometimes find it better in winter to work through the Inland Sea rather than to beat round Cape Chichakoff against the Kuro Shiwo. This latter feat is so difficult that sailors are apt to drop the *o* from the Japanese name (Satano) of this cape (*misaki*) and turn it into an English or Hebrew word. Those who are trying to prove that the Japanese are the "lost tribes" might make one of their best arguments from this fact. Kaempfer, it may be stated, derived the Japanese, by rapid transit, from the Tower of Babel, across Siberia to the islands.

* The spelling of Ōzaka (accent on the ō) is in accordance with the requirements of Japanese rules of orthography, and the usage of the people in Ōzaka and Kiōto.

of Kii, and landed at Arasaka. Here a peaceful triumph awaited them, for the chief surrendered, and presented Jimmu with a sword. A representation of this scene, engraved on steel, now adorns the greenback of one of the denominations of the national bank-notes issued in 1872. The steps of the conqueror were now bent toward Yamato. The mountain-passes were difficult, and the way unknown; but by act of one of the gods, Michi no Omi no mikoto, who interposed for their guidance, a gigantic crow, having wings eight feet long, went before the host, and led the warriors into the rich land of Yamato. Here they were not permitted to rest, for the natives fought stoutly for their soil.

A Narrow Passage in the Inland Sea.

On one occasion the clouds lowered, and thick darkness brooded over the battle-field, so that neither of the hosts could discern each other, and the conflict stayed. Suddenly the gloom was cleft by the descent from heaven of a bird like a hawk, which, hovering in a flood of golden effulgence, perched upon the bow of Jimmu. His adversaries, dazzled to blindness by the awful light, fled in dismay. Jimmu, being now complete victor, proceeded to make his permanent abode, and fixed the *miako*, or capital, at Kashiwabara, some miles distant from the present site of Kiōto. Here he set up his government, and began to rule over all the lands which he had conquered. Peace was celebrated with rejoicings, and religious ceremonies of imposing magnificence. He distributed rewards to his soldiers and officers, and chose his chief captains to be rulers over provinces, apportioning them lands, to be held in return for military service. It will

be noticed that this primal form of general government was a species of feudalism. Such a political system was of the most rudimentary kind; only a little better than the Council of the Six Nations of the Iroquois, or was similar to that of the Aztecs of Mexico.

The country being now tranquilized, weapons were laid aside, and attention was given to the arts of peace. Among the first things accomplished was the solemn deposit of the three sacred emblems—mirror, sword, and ball—in the palace. Sacrifices were offered to the Sun-goddess on Torimino yama.

Jimmu married the princess Tatara, the most beautiful woman in Japan, and daughter of one of his captains. During his life-time his chief energies were spent in consolidating his power, and civilizing his subjects. Several rebellions had to be put down. After choosing an heir, he died, leaving three children, at the age of one hundred and twenty-seven years, according to the *Nihongi*, and of one hundred and thirty-seven, according to the *Kojiki*.

It is by no means certain that Jimmu was a historical character. The only books describing him are but collections of myths and fables, in which exists, perhaps, a mere skeleton of history. Even the Japanese writers, as, for instance, the author of a popular history (*Dai Nihon Koku Kai Biaku Yuraii Ki*), interpret the narratives in a rationalistic manner. Thus, the "eight-headed serpents" in the *Kojiki* are explained to be persistent arch-rebels, or valorous enemies; the "ground-spiders," to be rebels of lesser note; and the "spider-pits or holes," the rebels' lurking-places. The gigantic crow, with wings eight feet long, that led the host into Yamato was probably, says the native writer, a famous captain whose name was Karasŭ (crow), who led the advance-guard into Yamato, with such valor, directness, and rapidity, that it seemed miraculous. The myth of ascribing the guidance of the army to a crow was probably invented later. A large number of the incidents related in the *Kojiki* have all the characteristics of the myth.

Chinese tradition ascribes the peopling of Japan to the following causes: The grandfather (Taiko) of the first emperor (Buwo) of the Shu dynasty (thirty-seven emperors, eight hundred and seventy-two years, B.C. 1120–249) in China, having three sons, wished to bequeath his titles and estates to his youngest son, notwithstanding that law and custom required him to endow the eldest. The younger son refused to receive the inheritance; but the elder, knowing that his father Taiko would persist in his determination, and unwilling to cause trou-

ble, secretly left his father's house and dominions, and sailed away to the South of China. Thence he is supposed to have gone to Japan and founded a colony in Hiuga. His name was Taihaku Ki. From this legend the Chinese frequently apply the name Kishi Koku, or "country of the Ki family," to Japan.

Whatever may be the actual facts, Jimmu Tennō is popularly believed to have been a real person, and the first emperor of Japan. He is deified in the Shintō religion, and in thousands of shrines dedicated to him the people worship his spirit. In the official list of mikados, he is named as the first. The reigning emperor refers to him as his ancestor from whom he claims unbroken descent. The 7th day of the Fourth month (April 7th) is fixed as the anniversary of his ascension to the throne, and that day is a national holiday, on which the iron-clad navy of modern Japan fires salutes, from Krupp and Armstrong guns, in his honor, and the military, in French uni forms, from Snider and Remington rifles, burn *in memoriam* powder.

The era of Jimmu is the starting-point of Japanese chronology, and the year 1 of the Japanese era is that upon which he ascended the throne at Kashiwabara.* A large number of Japanese students and educated men who have been abroad, or who, though remaining at home, have shed their old beliefs, and imbibed the modern spirit of nihilism, regard Jimmu as a myth. The majority, however, cling to their old belief that the name Jimmu represents a historical verity, and hold it as the sheet-anchor of their shifting faith. A young Japanese, fresh from several years' residence in Europe, was recently rallied concerning his belief in the divinity of the mikado and in the truth of the *Kojiki*. His final answer was, "It is my duty to believe in them."

---

* Dr. J. J. Hoffman, who has written the best Japanese grammar yet published, in expressing the exact date given in the *Kojiki*, in terms of the Julian style, says the 19th of February (660 B.C.) was the day of Jimmu's ascension. Professor F. Kaiser has found out by calculation that at eight A.M. on that day of the said year there was a new moon at the *miako*. "Therefore," says this grammarian, leaping on the wings of his own logic to a tremendous conclusion, and settling down into assured satisfaction, "the correctness of the Japanese chronology may not be called in question." (See page 157, and note of "A Japanese Grammar," J. J. Hoffman, Leyden, 1868.)

VI.

SŪJIN, THE CIVILIZER.

FROM the death of Jimmu Tennō to that of Kimmei, in whose reign Buddhism was introduced (A.D. 571), there were, according to the *Dai Nihon Shi*, thirty-one mikados. During this period of twelve hundred and thirty-six years, believed to be historic by most Japanese, the most interesting subjects to be noted are the reforms of Sūjin Tennō, the military expeditions to Eastern Japan by Yamato Daké, the invasion of Corea by the Empress Jingu Kōgō, and the introduction of Chinese civilization and of Buddhism.

The *Nihongi* details the history and exploits of these ancient rulers with a minuteness and exactness of circumstance that are very suspicious. It gives the precise birthdays and ages of the emperors, who in those days attained an incredible longevity. Takénouchi, the Japanese Methusaleh, lived to be over three hundred and fifty years old, and served as prime minister to five successive emperors. Twelve mikados lived to be over one hundred years old. One of them ruled one hundred and one years. The reigns of the first seventeen averaged over sixty-one years. From the seventeenth to the thirty-first, the average reign is little over twelve years. In the list there are many whose deeds, though exaggerated in the mirage of fable, are, in the main, most probably historic.

Sūjin, also called Shūjin or Sunin (B.C. 97–30), was, according to the *Dai Nihon Shi*, a man of intense earnestness and piety. The traits of courage and energy which characterized his youth gave him in manhood signal fitness for his chosen task of elevating his people. He mourned over their wickedness, and called upon them to forsake their sins, and turn their minds to the worship of the gods. A great pestilence having broken out, and the people being still unrepentant, the pious monarch rose early in the morning, fasted, and purified his body with water, and called on the kami to stay the plague. After solemn public worship the gods answered him, and the plague abated. A revival of religious feeling and worship followed. In his reign dates the building of special shrines for the adoration of the gods.

Hitherto the sacred ceremonies had been celebrated in the open air. Further, the three holy regalia (mirror, sword, and ball) had hitherto been kept in the palace of the mikado. It was believed that the efficacy of the spirit was so great that the mikado dwelling with the spirit was, as it were, equal to a god. These three emblems had been placed within the palace, that it might be said that where they were dwelt the divine power. A rebellion having broken out during his reign, he was led to believe that this was a mark of the disfavor of the gods, and in consequence of his keeping the emblems under his own roof. Reverencing the majesty of the divine symbols, and fearing that they might be defiled by too close proximity to his carnal body, he removed them from his dwelling, and dedicated them in a temple erected for the purpose at Kasanui, a village in Yamato. He appointed his own daughter priestess of the shrine and custodian of the symbols—a custom which has continued to the present time.

The shrines of Uji, in Isé, which now hold these precious relics of the divine age, are always in charge of a virgin princess of imperial blood. Later, being warned by the goddess Amaterasŭ to do so, she carried the mirror from province to province, seeking a suitable locality; but having grown old in their search, Yamato himé* continued it, and finally, after many changes, they were deposited in their present place A.D. 4. Copies of the mirror and sword were, however, made by Sūjin, and placed in a separate building within the palace called the "place of reverence." This was the origin of the chapel still connected with the mikado's imperial palace.

From the most early time the dwelling and surroundings of the mikado were characterized by the most austere simplicity, quite like the Shintō temples themselves, and the name *miya* was applied to both. In imagining the imperial palace in Japan, the reader on this side the Pacific must dissolve the view projected on his mind at the mention of the term "palace." Little of the stateliness of architecture or the splendor and magnificence of the interior of a European palace belongs to the Japanese imperial residence. A simple structure, larger than an ordinary first-class dwelling, but quite like a temple in outward appearance, and destitute of all meretricious or artistic ornamentation within, marks the presence of royalty, or semi-divinity, in Japan. Even in Kiōto, for centuries, the palace, except for its size and slightly greater el-

* The suffix *himé* after female proper names means "princess." It is still used by the ladies of the imperial family, and by the daughters of the court nobles. *Maye*, with *no*, was also added to names of ladies of rank.

evation, could not be distinguished from the residences of the nobles, or from a temple. All this was in keeping with the sacredness of the personage enshrined within. For vain mortals, sprung from inferior or wicked gods, for upstart generals, or low traders bloated with wealth, luxury and display were quite seemly. Divinity needed no material show. The circumstances and attributes of deity were enough. The indulgence in gaudy display was opposed to the attributes and character of the living representative of the Heavenly Line. This rigid simplicity was carried out even after death. In striking contrast with the royal burial customs of the nations of Asia are those of Japan.

The Mikado's Method of Travel in very Ancient Times.

All over the East, the tombs of dead dynasties are edifices of all others the most magnificent. The durable splendor of the homes of the departed far exceed that of the palaces of the living. But in Japan, in place of the gorgeous mausoleums and the colossal masterpieces of mortuary architecture of continental Asia, the sepulchres of the mikados seem monuments of chaste poverty. Nearly all of the imperial tombs are within the three provinces of Yamato, Yamashiro, and Settsu. A simple base of stone, surmounted by a low shaft, set upon a hillock, surrounded by a trench, and inclosed with a neat railing of timber, marks the resting-places of the dead emperors. All this is in accordance with the precepts of Shintō.

The whole life of Sūjin was one long effort to civilize his half-savage subjects. He ordained certain days when persons of both sexes must lay aside their regular employment, and give the Government his or her quantum of labor. The term for the labor of the men means "bow-point," and of the women "hand-point," implying that in the one case military service was the chief requirement, and in the other that of the loom or the field. He endeavored, in order to secure just taxation, to inaugurate a regular periodical census, and to reform the methods of dividing and recording time.* He encouraged the building of boats, in order to increase the means of transportation, promote commerce, and to bring the people at the extremities of the country in contact with each other. Communication between Corea and Kiushiu was rendered not only possible, but promised to be regular and profitable. We read that, during his reign, an envoy, bringing presents, arrived from Mimana, in Corea, B.C. 33. Six years later, it is recorded that the prince, a chief of Shiraki, in Corea, came to Japan to live. It is evident that these Coreans would tell much of what they had seen in their own country, and that many useful ideas and appliances would be introduced under the patronage of this enlightened monarch. Sūjin may be also called the father of Japanese agriculture, since he encouraged it by edict and example, ordering canals to be dug, water-courses provided, and irrigation to be extensively carried on. Water is the first necessity of the rice-farmer of Asia. It is to him as precious a commodity as it is to the miner of California. Rice must be sown, transplanted, and grown under water. Hence, in a country where this cereal is the staple crop, immense areas of irrigated fields are necessary. One of the unique forms of theft in rice-countries, which, in popular judgment, equals in

---

* The twenty-four divisions of the solar year (according to the lunar calendar), by which the Japanese farmers have for centuries regulated their labors, are as follows:

"Beginning of Spring".....February 8.	"Beginning of Autumn".....August 7.
"Rain-water".....February 19.	"Local Heat".....August 23.
"Awakening of the Insects"...March 5.	"White Dew".....September 8.
"Middle of the Spring".....March 20.	"Middle of Autumn".....September 23.
"Clear Weather".....April 5.	"Cold Dew".....October 8.
"Seed Rain".....April 20.	"Fall of Hoar-frost".....October 23.
"Beginning of Summer".....May 5.	"Beginning of Winter".....November 7.
"Little Plenty".....May 20.	"Little Snow".....November 22.
"Transplanting the Rice".....June 5.	"Great Snow".....December 7.
"Height of the Summer".....June 21.	"Height of the Winter".....December 22.
"Little Heat".....July 6.	"Little Frost".....January 6.
"Great Heat".....July 23.	"Great Frost".....January 20.

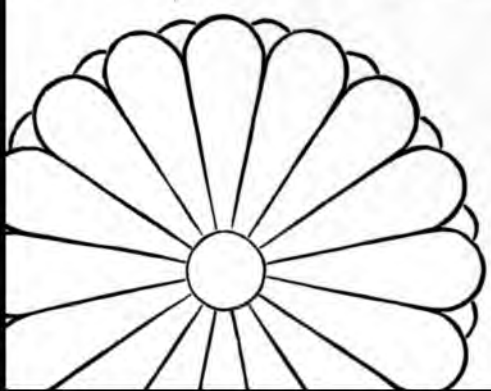
stealing of ore at the mines, or horses on the prairies,
g off water from a neighbor's field. In those old rude
panese water-thief, when detected, received but little more
he horse-robber in the West. The immense labor neces-
n the requisite water-supply can only be appreciated by
studied the flumes of California, the tanks of India, or
appliances in Southern Asia. In Japan, it is very com-
ce, with great labor, the mountain gulches, and utilize the
igating the platforms, thus changing a noisy, foaming
silent and useful servant. In many cases, the water is
along artificial canals, or ditches, to the fertile soil which
flat lands, at the base of mountains, huge reservoirs are
d tapped as often as desired. In the bosom of the Ha-
ins, between Sagami and Suruga, is a deep lake of pure
ver five thousand feet above the sea-level. On the plain
w or no natural streams. Centuries ago, but long after
the mountain wall was breached and tunneled by man-
l now through the rocky sluices flows a flood sufficient
millions of acres of Suruga province. The work begun
followed up vigorously by his successor, as we read that,
D. 6, a proclamation was issued ordering canals and sluices

upon the will or whim of the father, the councils of his chiefs, or the intrigues of courtiers.

The energies of this pious mikado were further exerted in devising and executing a national military system, whereby his peaceably disposed subjects could be protected and the extremities of his dominions extended. The eastern and northern frontiers were exposed to the assaults of the wild tribes of Ainōs who were yet unsubdued. Between the peaceful agricultural inhabitants who owned the sway of the ruler in Yamato, and the untamed savages who gloried in their freedom, a continual border-war existed. The military division of the empire into four departments was made, and a shōgun, or general, was appointed over each. These departments were the Tō, Nan, and Sai kai dō, and Hokŭrokudō, or the East, South, and West-sea Circuits, and the Northern-land Circuit. The strict division of the empire into *dō*, or circuits, according with the natural features and partitions of the country, which is still recognized, was of later time; but already, B.C. 25, it seems to have been foreshadowed by Sūjin.

One of these shōguns, or generals, named Obiko, who was assigned to the Northern Department, lying north of Yamato and along the west coast, holds a high place of renown among the long list of famous Japanese warriors. It is said that when, just after he had started to join his command, he heard of a conspiracy against the mikado, returning quickly, he killed the traitor, restored order, and then resumed his duties in the camp at the North. His son held command in the East. In the following reign, it is written that military arsenals and magazines were established, so that weapons and rations were ready at any moment for a military expedition to repel incursions from the wild tribes on the border, or to suppress insurrections within the pale of the empire. The half-subdued inhabitants in the extremes of the realm needed constant watching, and seem to have been as restless and treacherous as the Indians on our own frontiers. The whole history of the extension and development of the mikado's empire is one of war and blood, rivaling, if not exceeding, that of our own country in its early struggles with the Indians. This constant military action and life in the camp resulted, in the course of time, in the creation of a powerful and numerous military class, who made war professional and hereditary. It developed that military genius and character which so distinguish the modern Japanese, and mark them in such strong contrast with other nations of Eastern Asia. The long-sustained military operations also served to consolidate the empire.

nt days, however, there was no regular army, no special iors, as in later times. Until the eighth century, the xtemporized from the farmers and people generally, as anded. The war over, they returned to their daily em- The mikados were military chiefs, and led their armies, ir sons or near relatives only, the charge of expeditions. y purpose to follow in detail the long series of battles,



treatment. They are the *nai* and *guai*, the inner and the outer, the interior and exterior of the palace, or the throne and the empire. Thus the *Nihon Guai Shi*, by Rai Sanyo, or "External History of Japan," treats of the events, chiefly military, outside the palace. His other work, *Nihon Seiki*, treats rather of the affairs of the "forbidden interior" of the palace. In those early days this conception had not been elaborated.

Imperial Crest, or the Mikado's Seal, for Private or Palace Business. Leaf and Blossoms of the *Paulownia imperialis* (kiri.)

The mikado from ancient times has had two crests, answering to the coats of arms in European heraldry. One is a representation of a chrysanthemum (kiku), and is used for government purposes outside the palace. It is embroidered on flags and banners, and printed on official documents. Since the Restoration, in 1868, the soldiers of the imperial army wear it as a frontlet on their caps. The other crest, representing a blossom and leaves of the *Paulownia imperialis* (kiri), is used in business personal to the mikado and his family. The ancient golden chrysanthemum has, since 1868, burst into new bloom, like the flowering of the nation itself, and has everywhere displaced the trefoil of the parvenus of later feudalism—the Tokugawas, the only military vassals of the mikado who ever assumed the preposterous title of "Tycoon."

'O-DAKÉ, THE CONQUEROR OF THE KUANTŌ.*

appears in the second century, whose personality seems it is impossible to doubt that within the shell of fabu- is a rich kernel of history. This hero, a son of the r, Keiko (71–130 A.D.), is pictured as of fair mien, manly rriage. In his youth he led an army to put down a re- hiu; and, wishing to enter the enemy's camp, he dis- as a dancing-girl, and presented himself before the sen- d by the beauty and voluptuous figure of the supposed ping for a rich reward from his chief, admitted her to s tent. After dancing before him and his carousing ghted voluptuary drew his prize by the hand into his ead of a yielding girl, he found more than his match in

fight in ambush from behind trees, rocks, or in the rank undergrowth, using every artifice by which, as pursued, they could inflict the greatest damage upon an enemy with the least loss and danger to themselves. In the lore of the forest they were so well read that they felt at home in the most tangled wilds. They were able to take advantage of every sound and sign. They were accustomed to disguise themselves in bear-skins, and thus act as spies and scouts. Fire was one of their chief means of attack. On a certain occasion they kin-

dled the underbrush, which is still seen so densely covering the uncleared portions of the base of Fuji. The flames, urged by the wind, threatened to surround and destroy the Japanese army—a sight which the Ainōs beheld with yells of delight. The Sun-goddess then appeared to Yamato-Daké, who, drawing the divinely bestowed sword—Murakumo, or "Cloud-cluster"—cut the grass around him. So invincible was the blade that the flames ceased advancing and turned toward his enemies, who were consumed, or fled defeated. Yamato-Daké

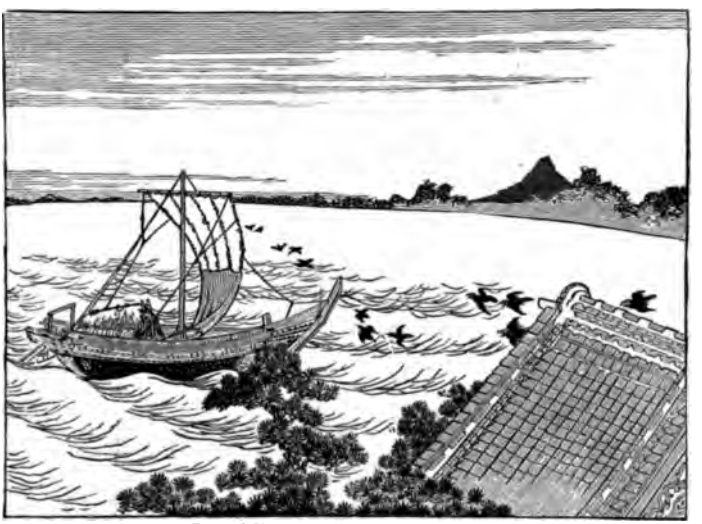
Hakoné Mountains, he descended into the great plain
later days called the Kuantō, which stretches from the
ntral ranges and table-land of Hondo to the shores of
from Sagami to Iwaki. On reaching the Bay of Yedo
zaki, near Uraga, off which Commodore Perry anchored
ers in 1853, the hills of the opposite peninsula of Awa
close at hand, that Yamato-Daké supposed it would be
r to cross the intervening channel. He did not know
so well now, that at these narrows of the bay the
urrents, and weather are most treacherous. Having
his host, a terrific storm arose, and the waves tossed
plessly about that death seemed inevitable. Then the
narch understood that the Sea-god, insulted by his dis-
k, had raised the storm to punish him. The only way
wrath of the deity was by the sacrifice of a victim.
fer? One was ready. In the boat with her lord was
bana himé. Bidding him farewell, she leaped into the
The blinding tempest drove on the helpless boat, and
the saved were parted. But the sacrifice was accepted.

Yamato-Daké landed than they came to the strand and surrendered. The hero kept the leaders as hostages, and having tranquilized the tribes, exacting promise of tribute, he set out on the homeward journey. His long absence from the capital in the wilds of the East doubtless disposed him to return gladly. He passed through Hitachi and Shimōsa, resting temporarily at Sakura, then through Musashi and Kai. Here he is said to have invented the distich, or thirty-one-syllable poem, so much used at the present day. After his army had been refreshed by their halt, he sent one of his generals into Echizen and Echigo to tranquilize the North-west and meet him in Yamato.



Junk in the Bay of Yedo, near the Shrine of Tachibana himé.

He himself marched into Shinano. Hitherto, since crossing the Hakoné range, he had carried on his operations on the plains. Shinano is a great table-land averaging twenty-five hundred, and rising in many places over five thousand, feet above the sea-level, surrounded and intersected by the loftiest peaks and mountain ranges in Japan. Ninety-five miles north-west of Tōkiō is the famous mountain pass of Usui Tōgé, the ascent of which from Sakamoto, on the high plain below, is a toilsome task. At this point, twenty-six hundred feet above Sakamoto, unrolls before the spectator a magnificent view of the Bay of Yedo and the plain below, one of the most beautiful and impressive in Japan. Here Yamato stood and gazed at the land and water,

draperied in the azure of distance, and, recalling the memory of his beloved wife, who had sacrificed her life for him, he murmured, sadly, "Adzuma, adzuma" (My wife, my wife). The plain of Yedo is still, in poetry, called Adzuma. One of the princes of the blood uses Adzuma as his surname; and the ex-Confederate iron-clad ram *Stonewall*, now of the Japanese navy, is christened Adzuma-kuan.

To cross the then almost unknown mountains of Shinano was a bold undertaking, which only a chief of stout heart would essay.* To travel in the thinly populated mountainous portions of Japan even at the present time, at least to one accustomed to the comfort of the palace-cars of civilization, is not pleasant. In those days, roads in the Kuantō were unknown. The march of an army up the slippery ascents, through rocky defiles, over lava-beds and river torrents, required as much nerve and caution as muscle and valor. To their superstitious fancies, every mountain was the abode of a god, every cave and defile the lurking-place of spirits. Air and water and solid earth were populous with the creatures of their imagination. Every calamity was the manifestation of the wrath of the local gods; every success a proof that the good kami were specially favoring them and their leaders. The clouds and fogs were the discomfiting snares of evil deities to cause them to lose their path. The asphyxiating exhalations from volcanoes, or from the earth, which to this day jet out inflammable gas, were the poisonous breath of the mountain gods, insulted by the daring intrusion into their sacred domain. On one occasion the god of the mountain came to Yamato-Daké, in the form of a white deer, to trouble him. Yamato-Daké, suspecting the animal, threw some wild garlic in its eye, causing it to smart so violently that the deer died.

* The cold in winter in the high mountain regions of Shinano is severe, and fires are needed in the depth of summer. Heavy falls of snow in winter make traveling tedious and difficult. I went over this part of Yamato-Daké's journey in 1873, completing a tour of nine hundred miles. As I have gone on foot over the mountain *toge's* (passes) from Takata, in Echigo, to Tōkiō, in Musashi, and likewise have been a pedestrian up and over the pass of St. Bernard, I think, all things considered, the achievement of Yamato-Daké fully equal in courage, skill, daring, patience, and romantic interest to that of Napoleon. The tourist to-day who makes the trip over this route is rewarded with the most inspiring views of Fuji, Asama yama, Yatsugadaké, and other monarchs in this throne-room of nature in Japan. In the lowlands of Kodzuké also is the richest silk district in all Japan, the golden cocoons, from which is spun silver thread, covering the floors of almost every house during two summer months, while the deft fingers of Japanese maidens, pretty and otherwise, may be seen busily engaged in unraveling the shroud of the worm, illustrating the living proverb, "With time and patience even the mulberry-leaf becomes silk."

Immediately the mountain was shrouded in mist and fog, and the path disappeared. In the terror and dismay, a white dog—a good kami in disguise—appeared, and led the way safely to the plains of Mino.

Again the host were stricken by the spirit of the white deer. All the men and animals of the camp were unable to stand, stupefied by the mephitic gas discharged among them by the wicked kami. Happily, some one bethought him of the wild garlic, ate it, and gave to the men and animals, and all recovered. At the present day in Japan, partly in commemoration of this incident, but chiefly for the purpose of warding off infectious or malarious diseases, garlic is hung up before gates and doors in time of epidemic, when an attack of disease is apprehended. Thousands of people believe it to be fully as efficacious as a horseshoe against witches, or camphor against contagion. Descending to the plains of Mino, and crossing through it, he came to Ibuki yama, a mountain shaped like a truncated sugar-loaf, which rears its colossal flat head in awful majesty above the clouds. Yamato-Daké attempted to subdue the kami that dwelt on this mountain. Leaving his sword, "Grass-mower," at the foot of the mountain, he advanced unarmed. The god transformed himself into a serpent, and barred his progress. The hero leaped over him. Suddenly the heavens darkened. Losing the path, Yamato-Daké swooned and fell. On drinking of a spring by the way, he was able to lift up his head. Henceforward it was called Samé no idzumi, or the Fountain of Recovery. Reaching Ōtsu, in Isé, though still feeble, he found, under the pine-tree, the sword which he had taken off before, and forthwith composed a poem: "O pine, were you a man, I should give you this sword to wear for your fidelity." He had been absent in the Kuantō three years. He recounted before the gods his adventures, difficulties, and victories, made votive offerings of his weapons and prisoners, and gave solemn thanks for the deliverance vouchsafed him. He then reported his transactions to his father, the mikado, and, being weak and nigh to death, he begged to see him. The parent sent a messenger to comfort his son. When he arrived, Yamato-Daké was dead. He was buried at Nobono, in Isé. From his tomb a white bird flew up; and on opening it, only the chaplet and robes of the dead hero were found. Those who followed the bird saw it alight at Koto-hiki hara (Plain of the Koto-players) in Yamato, which was henceforth called Misazaki Shiratori (Imperial Tomb of the White Bird). His death took place A.D. 113, at the age of thirty-six. Many temples in the Kuantō and in various parts of Japan are dedicated to him.

VIII.

THE INTRODUCTION OF CONTINENTAL CIVILIZATION.

If Japan is to Asia what Great Britain is to Europe—according to the comparison so often made by the modern Japanese—then Corea was to Dai Nippon what Norman France was to Saxon England. Through this peninsula, and not directly from China, flowed the influences whose confluence with the elements of Japanese life produced the civilization which for twelve centuries has run its course in the island empire. The comparison is not perfect, inasmuch as Japan sent the conqueror to Corea, whereas Normandy sent William across the Channel. In the moral and æsthetic conquest of Rome by Greece, though vanquished by Roman arms, we may perhaps find a closer resemblance to the events of the second triad of the Christian centuries in the history of Japan.

Is it true among historic nations that anciently the position of woman was higher than in later times? It has been pointed out by more than one writer on Greece "that in the former and ruder period women had undoubtedly the higher place, and their type exhibited the highest perfection." This is certainly the case in Japan. The women of the early centuries were, according to Japanese history, possessed of more intellectual and physical vigor, filling the offices of state, religion, and household honors, and approaching more nearly the ideal cherished in those countries in which the relation of the sexes is that of professed or real equality. Certain it is that, whereas there are many instances of ancient Japanese women reaching a high plane of social dignity and public honor, in later ages the virtuous woman dwelt in seclusion; exemplars of ability were rare; and the courtesan became the most splendid type of womanhood. This must be more than the fancy of poets. As in the Greece of Homer and the tragedians, so in early Nippon, woman's abilities and possibilities far surpassed those that were hers in the later days of luxury and civilization. To a woman is awarded the glory of the conquest of Corea, whence came letters, religion, and civilization to Japan.

ese tradition or history, there is no greater female char-
empress Jingu (godlike exploit). Her name was Okina-
é, but she is better known by her posthumous title of
r Jingu, the wife or spouse of the mikado. She was
ed for her beauty, piety, intelligence, energy, and mar-
e was not only very obedient to the gods, but they de-
or her by their inspiration. She feared neither the
a, the arrows of the battle-field, nor the difficulties that
eat enterprises. Great as she was in her own person,
n the Japanese eyes as the mother of the god of war.
193 a rebellion broke out at Kumaso, in Kiushiu. The
(191–200) headed his army, and marched to subdue
ngu Kōgō, or Jingu, the empress, followed him by ship,
n Tsuruga, in Echizen—a port a few miles north-west
Lake Biwa—meeting her husband at Toyo no ura, near
imonoséki, of indemnity fame. While worshiping on
nds of the Inland Sea, the god spoke to her, and said,
so deeply concerned to conquer Kumaso? It is but a
gion, not worth conquering with an army. There is a
d richer country, as sweet and lovely as the face of a
is dazzling bright with gold, silver, and fine colors, and

corpse back to Toyo no ura, in Nagato. The brave Jingu, with the aid of Takénouchi, suppressed the rebellion, and then longed for conquest beyond the sea.

While in Hizen, in order to obtain a sign from the gods she went down to the sea-shore, and baited a hook with a grain of boiled rice, to catch a fish. "Now," said she, "I shall conquer a rich country if a fish be caught with this grain of rice." The bait took. A fish was caught, and Jingu exultingly accepted the success of her venture as a token of celestial approval of her design. "Médzurashiki mono!" (wonderful thing), exclaimed the royal lady. The place of the omen is still called Matsura, corrupted from the words she used. In further commemoration, the women of that section, every year, in the first part of the Fourth month, go fishing, no males being allowed the privilege on that day. The pious Jingu prepared to invade Corea; but wishing another indication of the will of the kami, she on one occasion immersed her hair in water, saying that, if the gods approved of her enterprise, her tresses would become dry, and be parted into two divisions. It was as she desired. Her luxuriant black hair came from the water dry, and parted in two. Her mind was now fixed. She ordered her generals and captains to collect troops, build ships, and be ready to embark. Addressing them, she said: "The safety or destruction of our country depends upon this enterprise. I intrust the details to you. It will be your fault if they are not carried out. I am a woman, and young; I shall disguise myself as a man, and undertake this gallant expedition, trusting to the gods, and to my troops and captains. We shall acquire a wealthy country. The glory is yours, if we succeed; if we fail, the guilt and disgrace shall be mine." Her captains, with unanimity and enthusiasm, promised to support her and carry out her plans. The enterprise was a colossal one for Japan at that time. Although the recruiting went on in the various provinces, and the ships were built, the army formed slowly. Chafing at the delay, but not discouraged, again she had recourse to the efficacy of worship and an appeal to the gods. Erecting a tabernacle of purification, with prayers and lustrations and sacrifices she prayed the kami to grant her speedy embarkation and success. The gods were propitious. Troops came in. The army soon assembled, and all was ready, A.D. 201.

Before starting, Jingu issued orders to her soldiers, as follows:

"No loot.

"Neither despise a few enemies nor fear many.

y to those who yield, but no quarter to the stubborn.
hall be apportioned to the victors; punishments shall be
leserters."
ords of the gods came, saying, "The Spirit of Peace will
you and protect your life. The Spirit of War will go

ticles of wealth, silk and precious goods of all kinds, and eighty hostages, men of high families, were put on board.

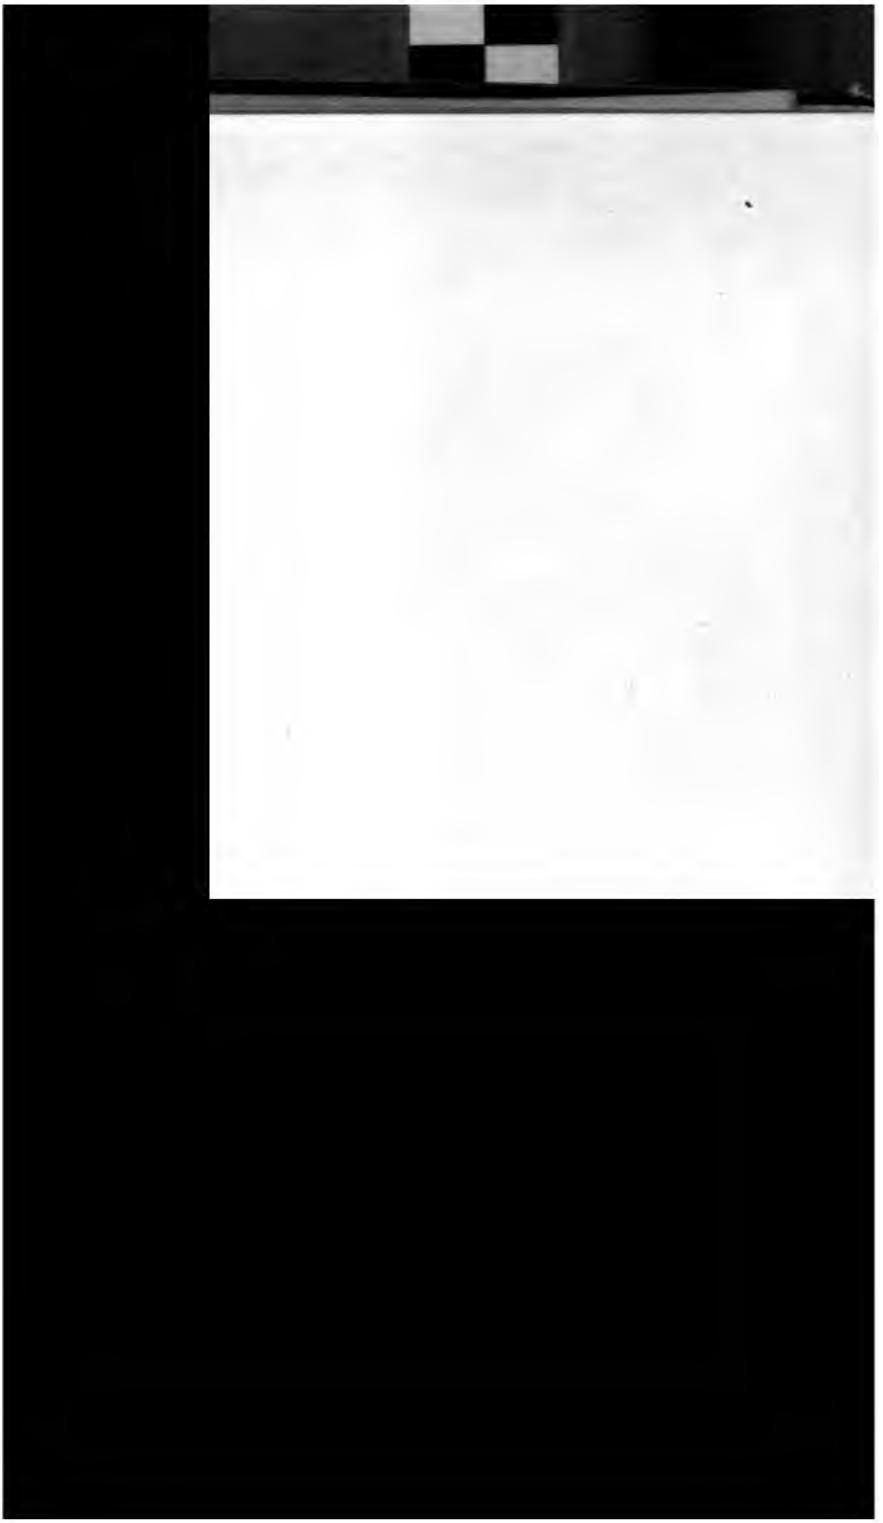
The stay of the Japanese army in Corea was very brief, and the troops returned in the Twelfth month. Jingu was, on her arrival, delivered of a son, who, in the popular estimation of gods and mortals, holds even a higher place of honor than his mother, who is believed to have conquered Southern Corea through the power of her yet unborn illustrious offspring. After leaving her couch, the queen-regent erected in Nagato (Chōshiu) a shrine, and in it dedicated the Spirit of War that had guided her army. She then attended to the funeral rites of her deceased husband, and returned to the capital.

The conquest of Corea, more correctly a naval raid into one of the southern provinces, took place A.D. 203. The motive which induced the invasion seems to have been the same as that carried out by Hideyoshi in 1583, and contemplated in 1873—mere love of war and conquest. The Japanese refer with great pride to this their initial exploit on foreign soil. It was the first time they had ever gone in ships to a foreign country to fight. For the first time it gave them the opportunity of displaying their valor in making "the arms of Japan shine beyond the seas"—a pet phrase which occurs in many documents in Japan, even in this 2536th year of the Japanese empire, and of our Lord 1876. Nevertheless, the honor of the exploit is given to the unborn son on whom dwelt the Spirit of War, rather than to the mother who bore him.

The queen-mother is worshiped in many temples as Kashii dai miō jin. The son, Ōjin, afterward a great warrior, was, at his death, 313 A.D., deified as the god of war; and down through the centuries he has been worshiped by all classes of people, especially by soldiers, who offer their prayers, pay their vows, and raise their votive offerings to him. Many of the troops, before taking steamer for Formosa, in 1874, implored his protection. In his honor some of the most magnificent temples in Japan have been erected, and almost every town and village, as well as many a rural grove and hill, has its shrine erected to this Japanese Mars. He is usually represented in his images as of frightful, scowling countenance, holding, with arms akimbo, a broad two-edged sword. One of the favorite subjects of Japanese artists of all periods is the group of figures consisting of the snowy-bearded Takénouchi, in civil dress, holding the infant of Jingu Kōgō in his arms, the mother standing by in martial robes. Jingu is the heroine and model for boys, not of the girls. In the collection of pictures,

lolls which in Japanese households on the 5th of May, ach to the children the names and deeds of the national nstill the lessons taught by their example, this warrior- ced among the male, and not among the female, groups. esses in all have sat upon the throne of Japan as rulers, reigned at the capital, Nara. None have won such mar- Jingu. It is not probable, however, that military enter- r again give the nation another ideal woman like the Corea. It is now, in modern days, given to the Empress levate the condition of her female subjects by graciously he education of the girls, and setting a noble example, womanly character and of active deeds of benevolence, scarding the foolish and barbarous customs of past ages, f blacking the teeth and shaving off the eyebrows. This mpress, Haruko, has done. Already this chief lady of the complished great reforms in social customs and fashions, he encouragement of her presence and by gifts from her has greatly stimulated the cause of the education and the woman in Japan. Haply, it may come to pass that this ful life may do more for the good and glory of the em- the renowned queen-regent, Jingu Kōgō.

Her Imperial Japanese Majesty, the Empress of Japan, Haruko, *née* Ichijō Haruko
(From a photograph taken at Tōkiō, 1874.)



forward. Chinese philosophy and Confucian morals were to form the basis of the education and culture of the Japanese statesman, scholar, and noble, to modify Shintō, and with it to create new ideals of government, of codes, laws, personal honor, and household ordering. Under their influence, and that of circumstances, have been shaped the unique ideals of the *samurai;* and by it a healthy skepticism, amidst dense superstition, has been maintained. The coming of many immigrants brought new blood, ideas, opinions, methods, improvements in labor, husbandry, social organization. Japan received from China, through Corea, what she is now receiving from America and Europe—a new civilization.

For nearly a century after the birth of Ōjin, the record of events is blank. In 249 A.D. a Japanese general, Arata, was sent to assist one state of Corea against another. Occasional notices of tribute-bearers arriving from Corea occur. In 283 a number of tailors, in 284 excellent horses, were sent over to Japan. In 285, Wani, a Corean scholar, came over to Japan, and, residing some time at the court, gave the mikado's son instruction in writing. If the *Nihongi*—the authority for the date of Wani's arrival in Japan — could be trusted in its chronology, the introduction of Chinese writing, and probably of Buddhism, would date from this time; but the probabilities are against positive certainty on this point. If it be true, it shows that the first missionary conquest of this nation was the work of four centuries, instead of as many decades. Wani died in Japan, and his tomb stands near Ōzaka. In A.D. 403 a court annalist was chosen. Envoys and tribute-bearers came, and presents were exchanged. In 462 mulberry-trees were planted—evidently brought, together with the silk-worm, for whose sustenance they were intended—from China or Corea. Again, tailors in 471, and architects in 493, and learned men in 512, arrived. An envoy from China came in 522. The arrival of fresh immigrants and presents from Corea in 543 is noted. In 551, during a famine in Corea, several thousand bushels of barley were dispatched thither by Japan. In 552, a company of doctors, diviners, astronomers, and mathematicians from Corea came to live at the Japanese court. With them came Buddhist missionaries. This may be called the introduction of continental civilization. Beginning with Jingu, there seems to have poured into the island empire a stream of immigrants, skilled artisans, scholars, and teachers, bringing arts, sciences, letters and written literature, and the Buddhist religion. This was the first of three great waves of foreign civilization in Japan.

from China, through Corea in the sixth; the second Europe, in the fifteenth century; the third was from pe, and the world, in the decade following the advent of erry. These innovations were destined to leaven mighty Japanese nation as a lump. Of these none was so powaching in effects as that in the sixth century, and no one ldhism. This mighty force was destined to exert a refying influence on the whole people. Nothing, among s that make up Japanese civilization, has been so potent Japanese character as the religion of Buddha. That these new civilizers may be fully appreciated, let us n Dai Nippon before their appearance.*

Jingu, after her return, made a very important change in the mpire. Seimu Tennō (A.D. 131–190) had divided the empire into mber of which was thirty-two in all, the land above the thirty- eing still unknown, and inhabited by the wild tribes of Ainōs. the Corean arrangement, divided the empire into five home even *dō*, or circuits, naming them in relation to their direction These are analogous to our "Eastern," "Middle," "South-" "Trans-Mississippi," and "Pacific-coast" divisions of States. provinces" (Go Kinai) are Yamashiro, Yamato, Kawachi, Idzu- The Tōkaidō, or Eastern-sea Circuit, comprised the provinces

feels a name to be a necessity. This necessity has given rise to the error of applying the term "Niphon" (Nihon, Nippon, or Nifon), first done by Kaempfer. The Japanese had no more necessity to apply a special name to the main island than the early American colonists had to give a name to the region beyond the Mississippi. Even now we have no name in general use for that now well-known part of our country. To foreigners, the absence of a name for the largest island seems an anomaly. In the Japanese mind it never existed. He rarely spoke even of Kiushiu or Shikokū as names of islands, always using the names of the *dō*, or circuits, just as an American speaks of the New England or the Eastern States. In modern times, native scholars who have, from their study, comparisons, and foreign methods of thought, felt the need of a distinctive name, have used Hondo (main continent or division), Honjima (main island), or Honjiu (main country). Of these, Hondo seems to be the best; and as it is used in the official geography recently issued by the War Department, I have made use of it. Nippon is not, nor ever was, the name of the main island, as Kaempfer first asserted. Nippon, or Dai Nippon, is the name of the whole empire. The word is Chinese, and must have been applied in very ancient times, as the *Nihongi* contains the three characters with which the name is written. The very name of the book, *Nipponji*, or, more elegantly, *Nihongi*, shows that the use of the term Nippon antedates the eighth century. Tenchi Tennō, in A.D. 670, first officially declared Nippon to be the name of Japan. It has been asserted that the use of Dai (Great) before Nippon is quite recent, and that the motive of the modern natives of Japan in thus designating their empire is "from a desire to imitate what they mistake for the pride or vainglory of Great Britain, not knowing that the term Great was used there to distinguish it from a smaller French province of the same name." To this remarkable statement it is sufficient to answer, that one of the most ancient names of Japan is Ō Yamato, the word *ō* meaning great, and the Japanese equivalent of the Chinese word *tai* or *dai*. When Chinese writing was introduced, the Japanese, in seeking an equivalent for Ō Yamato, found it in Dai Nippon, as may be seen in the *Nihongi*. The Chinese have always been in the habit of prefixing *dai* or *tai* to whatever relates to their country, government, or any thing which they in their pride consider very superior. Anciently they called China Dai Tō, and they now call it Dai Tsin (or Dai Chin), Great China. The Japanese have done the same analogous thing for at least twelve, probably for fifteen, centuries. That the use of Dai (Great) before Nippon is not the fashion of the present century is proved by the fact that the Japanese encyclopedia *San Sai Dzu Ye*, finished in 1712, contains the name with the pronunciation as now used, and that it is found in the very name *Dai Nihon Shi*, a book completed in 1715. The use of Nippon (or Niphon, or Nipon), applied to the main island, is altogether unwarrantable and confusing. The Japanese have very properly protested against this improper naming of their chief island, and, notwithstanding the long use of the name in Europe and America, I believe it should be expunged. The Japanese have some geographical rights which we are bound to respect.

Map of Japan.—The best map of Japan is that by Mr. R. Henry Brunton, C.E., F.R.G.S., late Engineer-in-chief of the Light-house Department of the Japanese Government. It is five feet by four, and drawn to a scale of twenty miles to the inch. It is well engraved, and gives also rules of pronunciation, explanation of terms, Japanese lineal measures, railways, highways, by-roads, telegraph lines, light-houses, depths of water along the coast, steamer routes, lists of principal mountains, rivers, islands, promontories, lakes, open ports, classes of population, provinces, *fu*, *ken*, and a comparative scale of English miles and Japanese *ri*.

from the Chinese, ethnologically, physically, and morally.

least modification, owing to later conquest and less mixture of foreign blood. In Southern and Central Japan, where the fusion of the races was more perfect, the oval face, oblique eyes, aquiline nose, prominent features, and light skin prevail. Yet even here are found comparatively pure specimens of the Malay and even Nigrito races, besides the Ainō and Corean types. The clod-hopper, with his flat, round face, upturned nose, expanded at the roots and wide and sunken at the bridge, nostrils round, and gaping like the muzzle of a proboscidian, bears in his veins the nearly pure blood of his aboriginal ancestors. Intellectually and physically, he is the developed and improved Ainō—the resultant of the action upon the original stock of the soil, food, climate, and agricultural life, prolonged for more than twenty centuries.

In the imperial family, and among the kugé, or court-nobles, are to be oftener found the nearest approach to the ideal Japanese of high birth. Yet even among these, who claim twenty-five centuries of semi-divine succession, and notably among the daimiōs, or territorial nobles—the parvenus of feudalism—the grossly sensual cast, the animal features, the beastly expression, the low type, the plebeian face of some peasant ancestor re-appear to plague the descendant, and to imbitter his cup of power and luxury. This phenomenon is made abundant capital of by the native fiction-writers, caricaturists, and dramatists. The diversity of the two types is shown, especially by the artists, in strongly marked contrast. In the pictures illustrative of legendary or historic lore, and notably on the Japanese fans, now so fashionably common among us, the noble hero, the chivalrous knight, or the doughty warrior, is delineated with oblique eyes, high eyebrows, rounded nose, oval face, and smooth skin; while the peasant, boor, vanquished ruffian, or general scape-goat, is invariably a man of round, flat face, upturned and depressed nose, gaping nostrils, horizontal eyes, and low eyebrows. In painting the faces of actors, singing-girls, and those public characters who, though the popular idols, are of low birth and blood, the fan-artist exaggerates the marks of beauty to the delight of his native, and to the disgust of his foreign, patrons. What depreciates the value of his wares in the eyes of the latter enhances it in those of the natives.

All savages worship heroes, and look upon their conquerors, who have been able apparently to overcome not only themselves, but even the gods in whom they trusted, if not as gods themselves, at least as imbued with divine power. The Ainōs of Yezo to this day adore the warrior Yoshitsuné. Their fathers doubtless considered Jimmu and

gods or men divinely assisted. The conquerors were
tivating such a belief for their own benefit, and thus
the fancy of savages became the dogma of religion
the magistrate. The reverence and obedience of the
ll further secured by making the government pure-
d its general procedure and ceremonial identical with
ip. The forms of local authority among the once
bes were but little interfered with, and the govern-
over them consisted at first chiefly in the exaction

the advent of Buddhism and Chinese philosophy,
moral codes, no systems of abstract doctrines, no
These were all later developments. There were then

At the court, a shrine of the Sun-goddess had been set up and sacrifices offered. Gradually in the towns and villages similar shrines were erected, and temples built; but for long centuries among the mountains, along the rivers and sea-coasts, the child of the soil set up his fetich, made the water-worn stone, the gnarled tree, or the storm-cloud his god. Wherever evil was supposed to lurk, or malignity reside, there were the emblems of the Ainō religion. On precipice, in gorge, in that primeval landscape, stood the plume of curled shavings to ward off the evil influences. In agony of terror in presence of the

Shintō Wayside Shrine in Modern Japan.

awful phenomenon of nature, earthquake, typhoon, flood, or tidal wave, the savage could but supplicate deified Nature to cease from wrath and tumult, and restore her face in peace of sunshine and calm.

The houses of the ancient Japanese were oblong huts, made by placing poles of young trees, with the bark on, upright in the ground, with transverse poles to make the frame, and fastened together with ropes made of rushes or vines. The walls were of matted grass, boughs, or rushes, the rafters of bamboo, and the sloping roof of grass-thatch, fastened down by heavy ridge-poles. The two larger rafters at each end projected and crossed each other, like two bayonets

ns. Across the ridge-pole, and beneath it and anoth-
id lengthwise on top of the thatch, projected at right
r side short, heavy logs, which by their weight, and
nly bound by withes running under the ridge-pole,
firmly in its place. This primeval hut is the model

ple consisted chiefly of fish, roots, and the flesh of ani-

system of reservoirs, ditches, and flumes, are the harvest of twenty centuries of toil. The face of nature has been smoothed; the unkempt luxuriance of forest and undergrowth has been sobered; the courses of rivers have been bridled; the once inaccessible sides of mountains graded, and their summits crossed by the paths of the traveler or pilgrim. The earth has been honey-combed by miners in quest of its metallic wealth.

The Peasant of To-day. (Carrying Home the Sheaves of Rice.) Hokusai.

In the primeval landscape of Japan there were no meadows, hedges, cattle, horses, prairies of ripening rice, irrigated fields, and terraced gulches. Then also, as now, the landscape was nude of domestic animal life. Instead of castled cities, fortified hills, gardens, and hedges, were only thatched villages, or semi-subterranean huts. There were no roads, no dikes. No water-courses had been altered, no slopes or hills denuded of timber. The plethora of nature was unpruned; the scrub bamboo, wild flowers, or grass covered the hills. The great plains of the East and North were luxuriant moors, covered with grass, reeds, or bamboo, populous with wild animal life. No laden junks moved up the rivers. The mulberry and tea plantations had not yet been set out. The conquerors found a virgin soil and a land of enrapturing beauty. They brought with them, doubtless, a knowledge of agriculture and metals. Gradually the face of nature changed. The hunter became a farmer. The women learned to spin and weave cotton and hemp. Division of labor began. The artisan and merchant appeared. Arts, sciences, skilled agriculture, changed the face of the land. Society emerged from its savage state, and civilization began.

As yet there was no writing. All communications were oral, all teachings handed down from father to son. Memory was the only treasury of thought. There is, indeed, shown in Japan at the present day a so-called ancient Japanese alphabet—the kami, or god, letters—which it is asserted the ancient Japanese used. This assertion is voided of truth by the testimony of the best native scholars to the contrary. No books or ancient inscriptions exist in this character. I

ught in vain, in the grave-yards of Kiōtō and other an-
discover any of these characters upon the old tombs.
rities, scholars who have investigated the subject, pro-

beings they simulated. For this reform, the originator was given the honorable designation, Haji (*ha*, clay; *shi*, *ji*, teacher = clay-image teacher, or artist).

The domestic life and morals of those days deserve notice. There were no family names. The institution of marriage, if such it may be called, was upon the same basis as that among the modern Ainōs or North American Indians. Polygamy was common. Marriage between those whom we consider brothers and sisters was frequent, and a thing not to be condemned. Children of the same fathers by different mothers were not considered fraternally related to each other, and hence could marry; but marriage between a brother and sister born of the same mother was prohibited as immoral.

The annexed illustration is taken from a native work, and represents a chief or nobleman in ancient Japan. It will be noticed that beards and mustaches were worn in those days. The artist has depicted his subject with a well-wrinkled face to make him appear venerable, and with protruding cheeks to show his lusty physique, recalling the ideals of Chinese art, in which the men are always portly and massive, while the women are invariably frail and slender. His pose, expression, folded arms, and dress of figured material (consisting of one long loose robe with flowing sleeves, and a second garment, like very wide trousers, girded at the waist with straps of the same material) are all to be seen, though in modified forms, in modern Japan. The fashions of twenty centuries have changed but slightly. Suspended from his girdle may be seen the *magatama* chatelaine, evidently symbolizing his rank. The *magatama* are perforated and polished pieces of soap-stone or cornelian, of various colors, shaped something like a curved seed-pod. They were strung

In the ancient mikadoate, called by the Japanese the Ōsei era, or the government of monarchs, there were several features tending to increase the power of the suzerain, or central chief. The first was the essentially theocratic form of the government. The sovereign was the centre of that superstitious awe, as well as of loyalty and personal reverence, which still exists. There grew into being that prestige, that sense of hedging divinity and super-mortal supremacy of the mikado that still forms the most striking trait of the Japanese character, and the mightiest political, as it is a great religious and moral, force in Japan, overshadowing even the tremendous power of Buddhism, which is, as Shintō is not, armed with the terrors of eternity In both a theological and political sense, in him dwelt the fullness of the gods bodily. He was their hypostasis. He was not only their chosen servant, but was himself a god, and the vicegerent of all the gods. His celestial fathers had created the very ground on which they dwelt. His wrath could destroy, his favor appease, celestial anger, and bring them fortune and prosperity. He was their preserver and benefactor. In his custody were the three sacred symbols. It was by superior intellect and the dogmatism of religion, as well as with superior valor, weapons, and skill, that a handful of invaders conquered and kept a land populated by millions of savages.

To the eye of a foreigner and a native of Japan, this imperfect picture of primitive Japan which I have given appears in very different lights. The native who looks at this far-off morning of Great Japan, the Holy Country, sees his ancestors only through the atmosphere in which he has lived and breathed. The dim religious light of reverent teaching of mother, nurse, father, or book falls on every object to reveal beauty and conceal defects. The rose-tints which innocent childhood casts upon every object here makes all things lovely. Heaven lies about his country's infancy. The precepts of his religion make the story sacred, and forbid the prying eye and the sandaled foot. The native loves, with passionate devotion, the land that nursed his holy ancestors, and thrills at the oft-told story of their prowess and their holy lives. He makes them his model of conduct.

The foreigner, in cold blood and with critical eye, patiently seeks the truth beneath, and, regarding not the dogma which claims to rest upon it, looks through dry light. To the one Nippon is the Land of the Gods, and the primal ages were holy. To the other, Japan is merely a geographical division of the earth, and its beginnings were from barbarism.

X.

THE ANCIENT RELIGION.

t religion of the Japanese is called *Kami no michi* (way f the gods; *i. e.*, theology). The Chinese form of the ō. Foreigners call it Shintōism, or Sintooism. Almost n writers* who have professed to treat of Shintō have the impure form which has resulted from the contact ddhism and Chinese philosophy, and as known to them enth century. My purpose in this chapter is to give a of ancient Shintō in its purity. A sketch of its tradi- ctrinal basis has been given. Only a very few Shintō l *miya*, have preserved the ancient purity of the rites uring the overshadowing influences of Buddhism.

mythology the universe is Japan, the legends relating

The chief characteristic, which is preserved in various manifestations, is the worship of ancestors, and the deification of emperors, heroes, and scholars. The adoration of the personified forces of nature enters largely into it. It employs no idols, images, or effigies in its worship. Its symbols are the mirror and the *gohei*—strips of notched white paper depending from a wand of wood. It teaches no doctrine of the immortality of the soul, though it is easy to see that such a dogma may be developed from it, since all men (Japanese) are descended from the immortal gods. The native derivation of the term for man is *hito* ("light-bearer"); and the ancient title of the mikado's heir-apparent was "light-inheritor." Fire and light (sun) have from earliest ages been the objects of veneration.

Shintō has no moral code, no accurately defined system of ethics or belief. The leading principle of its adherents is imitation of the illustrious deeds of their ancestors, and they are to prove themselves worthy of their descent by the purity of their lives. A number of salient points in their mythology are recognized as maxims for their guidance. It expresses great detestation of all forms of uncleanness, and is remarkable for the fullness of its ceremonies for bodily purification. Birth and death are especially polluting. Anciently, the corpse and the lying-in woman were assigned to buildings set apart, which were afterward burned. The priest must bathe and don clean garments before officiating, and bind a slip of paper over his mouth, lest his breath should pollute the offerings. Many special festivals were observed for purification, the ground dedicated for the purpose being first sprinkled with salt. The house and ground were defiled by death, and those who attended a funeral must also free themselves from contamination by the use of salt. The ancient emperors and priests in the provinces performed the actual ablution of the people, or made public lustrations. Later on, twice a year, at the festivals of purification, paper figures representing the people were thrown into the river, allegorical of the cleansing of the nation from the sins of the past six months. Still later, the mikado deputized the chief minister of religion at Kiōto to perform the symbolical act for the people of the whole country.

After death, the members of a family in which death had occurred must exclude themselves from all intercourse with the world, attend no religious services, and, if in official position, do no work for a specified number of days.

Thanksgiving, supplication, penance, and praise are all represented

to the gods, which are offered by both sexes. The em-
es often met in the temple gardens to compose hymns
ns to the gods. Usually in prayer the hands are clap-
head or the knees bowed, and the petition made in
worshiper does not enter the temple, but stands before
lls a rope dangling down over a double gong, like a
l, with which he calls the attention of the deity. The
ved to hear the prayer when as yet but in thought, be-
the lips. Not being intended for human ears, elo-
needed. The mikado in his palace daily offers up peti-
s people, which are more effectual than those of his sub-
ng the hands and rinsing out the mouth, the worshiper
s, of which the following is an example: "O God, that
high plain of heaven, who art divine in substance and
d able to give protection from guilt and its penalties,
urity, and to cleanse us from uncleanness — hosts of
and listen to these our petitions." Or this: "I say with
bless me by correcting the unwitting faults which, seen
you, I have committed; by blowing off and clearing
nities which evil gods might inflict; by causing me to
the hard and lasting rock; and by repeating to the

coppered its posts, curved its top-piece, made it of stone or bronze, and otherwise altered its character. Resembling two crosses with their ends joined, the *torii* is a conspicuous object in the landscape, and a purely original work of Japanese architecture.

All the *miyas* were characterized by rigid simplicity, constructed of pure wood, and thatched. No paint, lacquer, gilding, or any meretricious ornaments were ever allowed to adorn or defile the sacred structure, and the use of metal was avoided. Within, only the *gohei* and the daily offerings were visible. Within a closet of purest wood is a case of wood containing the "august spirit-substitute," or "gods'-seed," in which the deity enshrined in the particular temple is believed to reside. This spirit-substitute is usually a mirror, which in some temples is exposed to view. The principal Shintō temples are at Isé, in which the mirror given by Amaterasŭ to Ninigi, and brought down from heaven, was enshrined. Some native writers assert that the mirror was the goddess herself; others, that it merely represented her. All others in Japan are imitations or copies of this original.

The priests of Shintō are designated according to their rank. They are called *kannushi* (shrine-keepers). Sometimes they receive titles from the emperor, and the higher ranks of the priesthood are court nobles. They are, in the strictest sense of the word, Government officials. The office of chief minister of religion was hereditary in the Nakatomi family. Ordinarily they dress like other people, but are robed in white when officiating, or in court-dress when at court. They marry, rear families, and do not shave their heads. The office is usually hereditary. Virgin priestesses also minister at the shrines.

After all the research of foreign scholars who have examined the claims of Shintō on the soil, and by the aid of the language, and the sacred books and commentators, many hesitate to decide whether Shintō is "a genuine product of Japanese soil," or whether it is not closely allied with the ancient religion of China, which existed before the period of Confucius. The weight of opinion inclines to the latter belief. Certain it is that many of the Japanese myths are almost exactly like those of China, while many parts of the cosmogony can be found unaltered in older Chinese works. The *Kojiki* (the Bible of the Japanese believers in Shintō) is full of narrations; but it lays down no precepts, teaches no morals or doctrines, prescribes no ritual. Shintō has very few of the characteristics of a religion, as understood by us. The most learned native commentators and exponents of Shintō expressly maintain the view, that Shintō has no moral code. Mo-

t modern revivalist of Shintō, teaches, with polemic em-
orals were invented by the Chinese because they were
ople; but in Japan there was no necessity for any sys-

XI.

THE THRONE AND THE NOBLE FAMILIES.

From the beginning of the Japanese empire, until the century after the introduction of Buddhism, the mikados were the real rulers of their people, having no hedge of division between them and their subjects. The palace was not secluded from the outer world. No screen hid the face of the monarch from the gaze of his subjects. No bureaucracy rose, like a wall of division, between ruler and ruled. No hedge or net of officialdom hindered free passage of remonstrance or petition. The mikado, active in word and deed, was a real ruler, leading his armies, directing his Government. Those early days of comparative national poverty when the mikado was the warrior-chief of a conquering tribe; and, later, when he ruled a little kingdom in Central Japan, holding the distant portions of his quasi-empire in tribute; and, still later, when he was the head of an undivided empire—mark the era of his personal importance and energy. Then, in the mikado dwelt a manly soul, and a strong mind in a strong body. This era was the golden age of the imperial power. He was the true executive of the nation, initiating and carrying out the enterprises of peace or war. As yet, no military class had arisen to make themselves the arbiters of the throne; as yet, that throne was under no proprietorship; as yet, there was but one capital and centre of authority.

Gradually, however, there arose families of nobility who shared and dictated the power, and developed the two official castes of civilian and military officials, widening the distance between the sovereign and his subjects, and rendering him more and more inaccessible to his people. Then followed in succession the decay of his power, the creation of a dual system of government, with two capitals and centres of authority; the domination of the military classes; the centuries of anarchy; the progress of feudalism; the rending of the empire into hundreds of petty provinces, baronies, and feudal tenures. Within the time of European knowledge of Japan, true national unity has scarcely been known. The political system has been ever in a state

uilibrium, and the nation but a conglomeration of units, rces of repulsion ever threatened to overcome the forces Two rulers in two capitals gave to foreigners the im- here were two "emperors" in Japan—an idea that has ted into most of the text-books and cyclopedias of Let it be clearly understood, however, that there never mperor in Japan, the mikado, who is and always was

to Gotoba (A.D. 1198) fifty-three emperors reigned, averaging eleven years each. (See list of emperors, p. 123.)

In A.D. 603, the first attempt to create orders of nobility for the nobles, already numerously existing, was made by the Empress Suiko. Twelve orders were instituted, with symbolic names, after the Chinese custom — such as Virtue, Humanity, Propriety, etc.— distinguished by the colors of the caps worn. In 649, this system was changed for that having nine ranks, with two divisions. In each of the last six were two subdivisions, thus in reality making thirty grades. The first grade was a posthumous reward, given only to those who in life had held the second. Every officer, from the prime minister to the official clerks, had a rank attached to his office, which was independent of birth or age. All officers were presented, and all questions of precedence were settled, in accordance with this rank.

The court officials, at first, had been very few, as might be imagined in this simple state of society without writing. The Jin Gi Kuan, which had existed from very ancient times, supervised the ceremonies of religion, the positions being chiefly held by members of the Nakatomi family. This was the highest division of the Government. In A.D. 603, with the introduction of orders of nobility, the form of government was changed from simple feudalism to centralized monarchy, with eight ministries, or departments of state, as follows:

1. Nakatsukasa no Shō (Department of the Imperial Palace).
2. Shiki bu Shō (Department of Civil Office and Education).
3. Ji bu Shō (Department of Etiquette and Ceremonies).
4. Mim bu Shō (Department of Revenue and Census).
5. Hiō bu Shō (Department of War).
6. Giō bu Shō (Department of Justice).
7. Ō kura Shō (Department of Treasury).
8. Ku nai Shō (Department of Imperial Household).

The Jin Gi Kuan (Council of Religion; literally, Council of the Gods of Heaven and Earth), though anciently outranking the Dai Jō Kuan (Great Government Council), lost its prestige after the introduction of Buddhism. The Dai Jō Kuan, created A.D. 786, superintended the eight boards and ruled the empire by means of local governors appointed from the capital. In it were four ministers:

1. Dai Jō Dai Jin (Great Minister of the Great Government).
2. Sa Dai Jin (Great Minister of the Left).
3. U Dai Jin (Great Minister of the Right).
4. Nai Dai Jin (Inner Great Minister).

departments, that of War ultimately became the most special department was necessary to attend to the pub- d forms of society, etiquette being more than morals, terary education. The foreign relations of the empire o little importance that they were assigned to a bureau department. The treasury consisted of imperial store- naries, as money was not then in general use. Rice rd of value, and all taxes were paid in this grain.

ction of these orders of nobility and departments of na brought about the change from the species of feu- existing to centralized monarchy, the rise of the noble he fixing of official castes composed, not, as in most es, of the priestly and warrior classes, but, as in China, and military.

f the mediæval and modern complex feudalism, which 72, were planted about this time. A division of all males into three classes was now made, one of which of regular soldiers permanently in service. This was class," from which the legions kept as garrisons in the es were recruited. The unit of combination was the of five men. Two *go* formed a *kua*, five *kua* a *tai*,

upon, orders were sent to the provinces along the line of march to be ready to obey the imperial command, and compare the quota required with the local muster-rolls. An army would thus be quickly assembled at the capital, or, starting thence, could be re-enforced on the route to the rebellious province. All that was necessary were the orders of the emperor. When war was over, the army was dissolved, and the army corps, regiments, and companies were mustered out of service into their units of combination, *go* of five men. The general, doffing helmet, made his votive offering to the gods, and returned to garrison duty.

Until about the twelfth century, the Japanese empire, like the old Roman, was a centre of civilization surrounded by barbarism, or, rather, like a wave advancing ever farther northward. The numerous revolts in Kiushiu, Shikokŭ, and even in the North and East of Hondo, show that the subjugation of these provinces was by no means complete on their first pacification. The Kuantō needed continual military care, as well as civil government; while the northern provinces were in a chronic state of riot and disorder, being now peaceful and loyally obedient, and anon in rebellion against the mikado. To keep the remote provinces in order, to defend their boundaries, and to collect tribute, military occupation became a necessity; and, accordingly, in each of the distant provinces, especially those next to the frontier, beyond which were the still unconquered savages, an army was permanently encamped. This, in the remote provinces, was the permanent military force. Throughout the country was a reserve militia, or latent army; and in the capital was the regular army, consisting of the generals and "the Six Guards," or household troops, who formed the regular garrison of Kiōto in peace, and in war became the nucleus of the army of chastisement.

This system worked well at first, but time showed its defects, and wherein it could be improved. Among that third of the population classed as soldiers, some naturally proved themselves brave, apt, and skillful; others were worthless in war, while in the remaining two-thirds many who were able and willing could not enter the army. About the end of the eighth century a reform was instituted, and a new division of the people made. The court decided that all those among the rich peasants who had capacity, and were skilled in archery and horsemanship, should compose the military class, and that the remainder, the weak and feeble, should continue to till the soil and apply themselves to agriculture. The above was one of the most sig-

A Japanese Farmer. (Seed-beds of rice protected from the birds by strings and slips of wood.)*

overmeddlesome officialdom touches his land to transfer, sell, or redivide it: then he rises as a rebel. In time of war, he is a disinterested and a passive spectator, and he does not fight. He changes masters with apparent unconcern. Amidst all the ferment of ideas induced by the contact of Western civilization with Asiatic within the last two decades, the farmer stolidly remains conservative: he knows not, nor cares to hear, of it, and hates it because of the heavier taxes it imposes upon him.

* In the above sketch by Hokusai, the farmer, well advanced in life, bent and bald, is looking dubiously over a piece of newly tilled land, perhaps just reclaimed, which he defends from the birds by the device of strings holding strips of thin wood and bamboo stretched from a pole. With his ever-present bath-towel and headkerchief on his shoulders, his pipe held behind him, he stands in meditative attitude, in his old rice-straw sandals, run down and out at the heels, his well-worn cotton coat, darned crosswise for durability and economy, wondering whether he will see a full crop before he dies, or whether he can pay his taxes, and fill his children's mouths with rice. The writing at side is a proverb which has two meanings: it may be read, "A new field gives a small crop," or "Human life is but fifty years." In either case, it has pregnant significance to the farmer. The pathos and humor are irresistible to one who knows the life of these sons of toil.

mmemorial antiquity, and claiming descent from the
gement that at times seems irreconcilable has grown.

to the throne or a husband of the mikado's daughter might be sought. In either case the chosen one became mikado. Only those sons, brothers, or grandsons of the sovereign, to whom the title was specially granted by patent, were called princes of the blood. There were five grades of these. Surnames were anciently unknown in Japan; individuals only having distinguishing appellatives. In 415, families were first distinguished by special names, usually after those of places. Younger sons of mikados took surnames and founded cadet families. The most famous in the Japanese peerage are given below. By long custom it came to pass that each particular family held the monopoly of some one high office as its prerogative. The Nakatomi family was formerly charged with the ceremonies of Shintō, and religious offices became hereditary in that family. The Fujiwara (Wistaria meadow) family is the most illustrious in all Japan. It was founded by Kamatari, who was regent of the empire (A.D. 645–649), who was said to have been descended from Amé no ko yané no mikoto, the servant of the grandfather of Jimmu. The influence of this family on the destinies of Japan, and the prominent part it has played in history, will be fully seen. At present ninety-five of the one hundred and fifty-five families of *kugé* are of Fujiwara name and descent. The office of Kuambaku, or Regent, the highest to which a subject could attain, was held by members of this family exclusively. The Sugawara family, of which six families of *kugé* are descendants, is nearly as old as the Fujiwara. Its members have been noted for scholarship and learning, and as teachers and lecturers on religion.

The Taira family was founded by Takamochi, great grandson of the Emperor Kuammu (A.D. 782–805), and became prominent as the great military vassals of the mikado. But five *kugé* families claim descent from the survivors.

The Minamoto family was founded by Tsunémoto, grandson of the Emperor Seiwa (839–880). They were the rivals of the Taira. Seventeen families of *kugé* are descended from this old stock. The office of Sei-i Tai Shōgun, or Barbarian-chastising Great General, was monopolized by the Minamoto, and, later, by other branches of the stock, named Ashikaga and Tokugawa.

Though so many offices were created in the seventh century, the *kugé* were sufficiently numerous to fill them. The members of the Fujiwara family gradually absorbed the majority, until almost all of the important ones at court, and the governorships of many provinces, were filled by them. When vacancies occurred, no question was

his or that man's fitness for the position: it was simply
escent, and a man of Fujiwara blood was sure to get the
whether he had abilities or not. This family, in spite
ous name and deeds, are to be credited with the forma-
ing" around the mikado, which his people could not
th the creation of one of the most accursed systems of
r seen in any country. Proceeding step by step, with
al ability, they gradually obtained the administration of
ent in the mikado's name. Formerly it had been the
very subject to petition the sovereign. The Fujiwara
dually assumed the right to open all such petitions, and
them. They also secured the appointment of younger
, nephews, and kinsmen to all the important positions.

was first used and bestowed on a Fujiwara noble. The

(*kinai*) of Yamato, Yamashiro, or Settsu. So long as the course of empire was identified with that of a central military chief, who was the ruler of a few provinces and suzerain of tributaries, requiring him to be often in camp or on the march, government was by the sword rather than by the sceptre, and the permanent location of a capital was unnecessary. As the area of dominion increased and became more settled the government business grew apace, in amount and complexity, and division of labor was imperative, and a permanent capital was of prime importance. The choice was most felicitous. The ancient city of Heianjō, seven miles south-west of the southern end of Lake Biwa, was chosen. The Japanese word meaning capital, or large city, is *miako*, of which *kiō* or *kiōto* is the Chinese equivalent. The name Heianjō soon fell into disuse, the people speaking of the city as the miako. Even this term gave way in popular usage to Kiōto. Miako is now chiefly used in poetry, while the name most generally applied has been and is Kiōto, *the* miako by excellence. Kiōto remained the capital of Japan until 1868, when the miako was removed to Yedo, which city having become the kiō, was re-named Tōkiō, or Eastern capital. The name Yedo is no longer in use among the Japanese. No more eligible site could have been chosen for the purpose. Kiōto lies not mathematically, but geographically and practically in respect of the distribution of population and habitable area, in the centre of Japan. It is nearly in the middle of the narrowest neck of land between the Sea of Japan and the Pacific Ocean. It lies at the foot, and stands like a gate between the great mountain ranges, diverging north and south, or east and west. Its situation at the base of the great central lake of Biwa, or Ōmi, forty miles from whose northern point is the harbor and sea-port of Tsuruga, makes it

708–782. Their reigns were prosperous and glorious, and were distinguished for the cultivation of the arts, literature, and religion. Here, in 711, the *Kojiki* was written, and in 713, by orders of the imperial court, sent to all the governors of provinces; a book, in sixty-six volumes, descriptive of the provinces, cities, mountains, rivers, valleys, and plains, plants, trees, birds, and quadrupeds, was begun, and finished in 1634. Only fragments of this fine work are now extant. In the period 708–715 copper was discovered. In 739, the colossal gilded copper image of Buddha, fifty-three feet high, was cast and set up. Many envoys from China, and Buddhist priests from Siam, India, and China, visited Nara, one of the latter bringing a library of five thousand volumes of Buddhist literature. In 749 it was forbidden by imperial edict to slaughter animals in Japan. A large collection of the personal and household articles in the possession of the mikados of the eighth century was exhibited at Nara in June, 1875, the inventories made at that ancient period being accessible for comparison.

the ships coming from the entire west coast and from

is beautiful for situation, the joy of the whole empire
The tone of reverential tenderness, of exulting joy, the
the eyes with which Japanese invariably speak of Kiōto,
e fact of its natural beauty, its sacred and classic associa-
place in the affections of the people. The city stands
cal plain walled in on all sides by evergreen hills and
ke the floor of a huge flattened crater no longer choked
t mantled with flowers. On the south the river Kamo,
orth, east, and west, flowing in crystal clearness, the afflu-
curve around the city, nearly encircle it, uniting at the
form the Yodo River. Through the centre and in sev-
reets the branches of the river flow, giving a feeling of
ness in the heats of summer, and is the source of the
aracteristic of Kiōto. The streets run parallel and cross
es, and the whole plan of the city is excellent. The

fealty of the distant princes was measured not only by their tribute and military assistance, but by their close conformity to the customs of the miako, which naturally became the centre of learning and civilization.

Previous to the era of Sūjin, the observance of the time of beginning the new year, as well as the celebration of the sacred festivals to the gods, was not the same throughout the provinces. The acceptance of a uniform calendar promulgated from the capital was then, as now, a sign of loyalty of far greater significance than would appear to us at first sight. This was forcibly shown in Yokohama, as late as 1872, after the mikado had abolished the lunar, and ordered the use of the solar, or Gregorian, calendar in his dominions. The resident Chinese, in an incendiary document, which was audaciously posted on the gates of the Japanese magistrate's office, denounced the Japanese for having thus signified, by the adoption of the barbarians' time, that they had yielded themselves up to be the slaves of the "foreign devils."

The mikado has no family name. He needs none, because his dynasty never changes. Being above ordinary mortals, no name is necessary to distinguish him from men. He need be personally distinguished only from the gods. When he dies, he will enter the company of the gods. He is deified under some name, with Tennō (son, or king, of heaven) affixed. It was not proper (until 1872, when the custom was abrogated) for ordinary people to pronounce the name of the living mikado aloud, or to write it in full: a stroke should be left out of each of the characters.

Previous to the general use of Chinese writing, the mikados, about fifty in all, had long names ending in "mikoto," a term of respect equivalent to "augustness," and quite similar to those applied to the gods. These extremely long names, now so unmanageable to foreign, and even to modern native, tongues, gave place in popular use to the greatly abbreviated Chinese equivalents. A complete calendar of the names of the gods and goddesses, mikados and empresses and heroes, was made out in Chinese characters. It is so much more convenient to use these, that I have inserted them in the text, even though to do so seems in many an instance an anachronism. The difference in learned length and thundering sound of the Japanese and the Chinese form of some of these names will be easily seen and fully appreciated after a glance, by the Occidental reader who is terrified at the uncouthness of both, or who fears to trust his vocal organs to attempt their pro-

ince, was ordered. The abdication after short reigns

XII.

THE BEGINNING OF MILITARY DOMINATION.

With rank, place, and power as the prizes, there were not wanting rival contestants to dispute the monopoly of the Fujiwara. The prosperity and domineering pride of the scions of this ancient house, instead of overawing those of younger families that were forming in the capital, served only as spurs to their pride and determination to share the highest gifts of the sovereign. It may be easily supposed that the Fujiwara did not attain the summit of their power without the sacrifice of many a rival aspirant. The looseness of the marriage tie, the intensity of ambition, the greatness of the prize—the throne itself—made the court ever the fruitful soil of intrigue, jealousies, proscription, and even the use of poison and the dagger. The fate of many a noble victim thus sacrificed on the altars of jealousy and revenge forms the subject of the most pathetic passages of the Japanese historians, and the tear-compelling scenes of the romance and the drama. The increase of families was the increase of feuds. Arrogance and pride were matched by craft and subtlety that finally led to quarrels which rent the nation, to civil war, and to the almost utter extinction of one of the great families.

The Sugawara were the most ancient rivals of the Fujiwara. The most illustrious victim of court intrigue bearing this name was Sugawara Michizané. This polished courtier, the Beauclerc of his age, had, by the force of his talents and learning, risen to the position of inner great minister. As a scholar, he ranked among the highest of his age. At different periods of his life he wrote, or compiled, from the oldest records various histories, some of which are still extant. His industry and ability did not, however, exempt him from the jealous annoyances of the Fujiwara courtiers, who imbittered his life by poisoning the minds of the emperor and courtiers against him. One of them, Tokihira, secured an edict banishing him to Kiushiu. Here, in the horrors of poverty and exile, he endeavored to get a petition to the mikado, but failed to do so, and starved to death, on the 25th

Second month, 903. Michizané is now known by his name of Tenjin. Many temples have been erected in his udents worship his spirit, as the patron god of letters Children at school pray to him that they may become and win success in study. Some of his descendants are

hizané died, the Sugawara were no longer to be dreaded ily. Another brood were springing up, who were des- me the most formidable rivals of the Fujiwara. More y before, one of the concubines, or extra wives, of the mmu had borne a son, who, having talents as well as im- rose to be head of the Board of Civil Office, and master monies — an office similar to the lord high chamberlain To his grandson Takamochi was given the surname of —one hundred and one years before the banishment of

offices being already monopolized by the Fujiwara, the he family of Taira early showed a fondness and special litary life, which, with their experience, made them most commands of military expeditions. The Fujiwara had y wedded to palace life, and preferred the ease and lux-

while Taira and Minamoto generals lusted after the high offices held by Fujiwara courtiers, Taira and Minamoto ladies aspired to become empresses, or at least imperial concubines, where they might, for the glory of their family, beard the dragon of power in his own den. They had so far increased in influence at court, that in 1008, the wife of the boy-emperor, Ichijō, was chosen from the house of Minamoto.

The Minamoto family, or, as the Chinese characters express the name, Genji, was founded by Tsunémoto, the grandson of Seiwa (859–880) and son of the minister of war. His great-grandson Yoriyoshi became a shōgun, and was sent to fight the Ainōs; and the half-breeds, or rebels of mixed Ainō and Japanese blood, in the east and extreme north of Hondo. Yoriyoshi's son, Yoshiiyé, followed his father in arms, and was likewise made a shōgun. So terrible was Yoshiiyé in battle that he was called Hachiman tarō. The name Tarō is given to the first-born son. Hachiman is the Buddhist form of Ōjin, the deified son of Jingu Kogō, and the patron of warriors, or god of war. After long years of fighting, he completely tranquilized the provinces of the Kuanto. His great-grandson Yoshitomo* became

* The family name (*uji*) precedes the personal, or what we call the baptismal or Christian name. Thus the full name of the boy Kotarō, son of Mr. Ota, would be Ota Kotarō. Family names nearly always have a topographical meaning, having been taken from names of streets, villages, districts, rivers, mountains, etc. The following are specimens, taken from the register of my students in the Imperial College in Tōkiō, many of whom are descendants of the illustrious personages mentioned in this book, or in Japanese history. The great bulk of the Samurai claim descent from less than a hundred original families: Plain-village, Crane-slope, Hill-village, Middle-mountain, Mountain-foot, Grove-entrance, High-bridge, East-river, River-point, Garden-mountain, River-meadow, Pine-village, Great-tree, Pine-well, Shrine-promontory, Cherry-well, Cedar-bay, Lower-field, Stone-pine, Front-field, Bamboo-bridge, Large-island, Happy-field, Shrine-plain, Temple-island, Hand-island, North-village, etc., etc. It was not the custom to have godparents, or namesakes, in our sense of these words. Middle names were not given or used, each person having but a family and a personal name. Neither could there be a senior and junior of exactly the same name in the same family, as with us. The father usually bestowed on his son half of his name; that is, he gave him one of the Chinese characters with which his own was written. Thus, Yoriyoshi named his first-born son Yoshiiyé, *i. e.*, Yoshi (*good*) and iyé (*house* or *family*). Yoshiiyé had six sons, named, respectively, Yoshimuné, Yoshichika, Yoshikuni, Yoshitada, Yoshitoki, and Yoshitaka. The Taira nobles retained the *mori* in Tadamori, in their own personal names. Female names were borrowed from those of beautiful and attractive objects or of auspicious omens, and were usually not changed at marriage or throughout life. Males made use during life of a number of appellations given them, or assumed on the occasions of birth, reaching adult age, official promotion, change of life;

val of the Taira, and the father of Yoritomo, one of the Japanese history. The star of Minamoto was in the

the Taira shōguns, who had the military oversight of l West, achieved a succession of brilliant victories. As his services, the court bestowed the island of Tsŭshima the head of the house. It being a time of peace, Ta- to Kiōto to live, and while at court had a *liaison* with lace lady attendants, whom he afterward married. The nion was a son, who grew to be a man of stout physique. e gave equal indications of his future greatness and his

time the seas swarmed with pirates, who ravaged the coasts and were the scourge of Corea as well as Japan. Kiyomori, a boy full of fire and energy, thirsting for fame, asked to be sent against the pirates. At the age of eighteen he cruised in the Sea of Iyo, or the Suwo Nada, which is part of the Inland Sea, a sheet of water extremely beautiful in itself, and worthy, in a high degree, to be called the Mediterranean of Japan. While on shipboard, he made himself a name by attacking and capturing a ship full of the most desperate villains, and by destroying their lurking-place. His early manhood was spent alternately in the capital and in service in the South. In 1153, at the age of thirty-six, he succeeded his father as minister of justice. The two families of Minamoto and Taira, who had together emerged from comparative obscurity to fame, place, and honor, had dwelt peacefully together in Kiōto, or had been friendly rivals as soldiers in a common cause on distant battle-fields, until the year 1156, from which time they became implacable enemies. In that year the first battle was fought between the adherents of two rival claimants of the throne. The Taira party was successful, and obtained possession of the imperial palace, which gave them the supreme advantage and prestige which have ever since been possessed by the leader or party in whose hands the mikado is. The whole administration of the empire was now at Kiyomori's disposal. The emperor, who thus owed his elevation to the Taira, made them the executors of his policy. This was the beginning of the domination of the military classes that lasted until 1868. The ambition of Kiyomori was now not only to advance himself to the highest position possible for a subject to occupy, but also to raise the influence and power of his family to the highest pitch. He further determined to exterminate the only rivals whom he feared — the Minamoto. Not content with exercising the military power, he filled the offices at court with his own relatives, carrying the policy of nepotism to a point equal to that of his rivals, the Fujiwara. In 1167, at the age of fifty years, having, by his energy and cunning, made himself the military chief of the empire, having crushed not only the enemies of the imperial court, but also his own, and having tremendous influence with the emperor and court, he received the appointment of Dai Jō Dai Jin.

Kiyomori was thus, virtually, the ruler of Japan. In all his measures he was assisted, if not often instigated to originate them by the ex-emperor, Go-Shirakawa, who ascended the throne in 1156, and abdicated in 1159, but was the chief manager of affairs during the

son and two grandsons. This mikado was a very im
nd the evident reason of his resigning was that he might
self to debauchery, and wield even more actual power
the throne. In 1169, he abdicated, shaved off his hair,
title of Hō-ō, or "cloistered emperor," and became a
nk, professing to retire from the world. In industrious
granted the ranks and titles created by his predecessor
fusion. He thus exercised, as a monk, even more influ-
en in actual office. The head of the Taira hesitated not
ese rewards for his own and his family's private ends.
al offices were held by one person. He argued that as

cubine, and afterward the wife, of the Emperor Takakura, a boy eleven years old. Of his children one was now empress, and his two sons were generals of highest rank. His cup of power was full.

The fortunes of the Fujiwara and Minamoto were under hopeless eclipse, the former having no military power, the latter being scattered in exile. Yoshitomo, his rival, had been killed, while in his bath, by Osada, his own traitorous retainer, who was bribed by Kiyomori to do the deed. The head of Yoshitomo's eldest son had fallen under the sword at Kiōto, and his younger sons—the last of the Minamoto, as he supposed—were in banishment, or immured in monasteries.

Tamétomo defying the Taira men, after sinking their Ship. (From the vignette on the greenback national-bank notes, drawn by a native artist.)

The most famous archer, Minamoto Tamétomo, took part in many of the struggles of the two rival families. His great strength, equal to that of many men (fifty, according to the legends), and the fact that his right arm was shorter than his left, enabled him to draw a bow which four ordinary warriors could not bend, and send a shaft five feet long, with enormous bolt-head. The court, influenced by the Taira, banished him, in a cage, to Idzu (after cutting the muscles of his arm), under a guard. He escaped, and fled to the islands of Ōshima and Hachijō, and the chain south of the Bay of Yedo. His arm having healed, he ruled over the people, ordering them not to send tribute to Idzu or Kiōto. A fleet of boats was sent against him. Tamétomo, on the strand of Ōshima, sped a shaft at one of the

approaching vessels that pierced the thin gunwale and sunk it. He then, after a shout of defiance, shut himself up, set the house on fire, and killed himself. Another account declares that he fled to the Liu Kiu Islands, ruled over them, and founded the family of Liu Kiu kings, being the father of Sunten, the first historical ruler of this group of islands. A picture of this doughty warrior has been chosen to adorn the greenback currency of the banks of modern Japan.

"Woe unto thee, O land, when thy king is a child!" The mikados* during the Taira period were nearly all children. Toba began to reign at six, abdicating at seventeen in behalf of his son Shiutoku, four years old; who at twenty-four resigned in favor of Konoyé, then four years old. The latter died at the age of sixteen, and was succeeded by Go-Shirakawa, who abdicated after three years in favor of Nijō, sixteen years old, who died after six years, when Rokujō, one year old, succeeded. After three years, Takakura, eight years old, ruled thirteen years, resigning to Antoku, then three years of age. It is easily seen that the real power lay not with these boys and babies, but with the august wire-pullers behind the throne.

The *Heiké Monogatari*, or the "Historic Romance of the Taira," is one of the most popular of the many classic works of fiction read by all classes of people in Japan. In this book the chief events in the lives, and even the manners and personal appearance, of the principal actors of the times of the Taira are seen, so that they become more than shadows of names, and seem to live before us, men of yesterday. The terms Heiké and Genji, though Chinese forms of the names Taira and Minamoto, were, from their brevity, popularly used in preference to the pure native, but longer, forms of Taira and Minamoto.

* For convenience of reference, the following chronological list of the sovereigns of Japan is here appended. It is based on the list given in the *Nihon Riyaku Shi* (Abridgment of Japanese History), Tōkiō, 1874—a book from which I have drawn freely in this work. The dates of their reigns, in terms of the Gregorian calendar, are obtained chiefly from a comparative almanac of Chinese, Japanese, and Western dates, compiled by a learned native scholar, who brings down this invaluable chronological harmony to the third day of the Twelfth month of Meiji (January 1st, 1874), when the solar or Gregorian calendar was adopted in Japan. The year dates approximate to within a few weeks of exactness. The names in italics denote female sovereigns. In two instances (37 and 39, 48 and 50), one empress reigned twice, and has two posthumous titles. I have put the name of Jingu Kōgō in the list, though the *Dai Nihon Shi* does not admit it, she having never been crowned or formally declared empress by investiture with the regalia of sovereignty. In several cases the duration of the reign was less than a year. The five "false emperors," printed in black spaces, are omitted from this list. Only the posthumous titles under which the mikados were apotheosized are here

given, though their living names, and those of their parents, are printed in the *Nihon Riyaku Shi.* Including Jingu, there were 123 sovereigns. The average length of the reigns of 122 was nearly twenty-one years. There has been but one dynasty in Japan. In comparison, the present emperor of China is the 273d, and the dynasty the 23d or 24th.

ORITOMO AND THE MINAMOTO FAMILY.

rtraying the beauties of nature, there is no class of sub-
the native artists delight more than in the historical
in their classics. Among these there are none treated
quency and spirit than the flight of Yoshitomo's concu-
after the death of her lord at the hands of bribed trai-
he fight with the Taira in Kiōto, in 1159, he fled east-
killed in a bath-room by three hired assassins at Ut-
i. Tokiwa was a young peasant-girl of surpassing beau-
itomo had made his concubine, and who bore him three
fled, to escape the minions of Taira. Her flight was
snow lay on the ground. She knew neither where to
subsist; but, clasping her babe to her bosom, her two

her shelter, and fed her with his own rations. Tokiwa heard of her mother's durance at Kiōto. Then came the struggle between maternal and filial love. To enter the palace would be the salvation of her mother, but the death of her children. What should she do? Her wit showed her the way of escape. Her resolution was taken to go to the capital, and trust to her beauty to melt the heart of Kiyomori. Thus she would save her mother and the lives of her sons.

Her success was complete. Appearing in the presence of the dreaded enemy of her children, Kiyomori was dazed by her beauty, and wished to make her his concubine. At first she utterly refused; but her mother, weeping floods of tears, represented to her the misery of disobedience, and the happiness in store for her, and Tokiwa was obliged to yield. She consented on condition of his sparing her offspring.

Kiyomori's retainers insisted that these young Minamotos should be put to death; but by the pleadings of the beautiful mother, backed by the intercession of Kiyomori's aunt, their lives were spared. The babe grew to be a healthy, rosy-cheeked boy, small in stature, with a ruddy face and slightly protruding teeth. In spirit he was fiery and impetuous. All three of the boys, when grown, were sent to a monastery near Kiōto, to be made priests: their fine black hair was shaved, and they put on the robes of Buddhist neophytes. Two of them remained so, but Yoshitsuné gave little promise of becoming a grave and reverend bonze, who would honor his crape, and inspire respect by his bald crown and embroidered collar. He refused to have his hair shaved off, and in the monastery was irrepressibly merry, lively, and self-willed. The task of managing this young ox (Ushi-waka, he was then called) gave the holy brethren much trouble, and greatly scandalized their reverences. Yoshitsuné, chafing at his dull life, and longing to take part in a more active one, and especially in the wars in the North, of which he could not but hear, determined to escape. How to do it was the question.

Among the outside lay-folk who visited the monastery for trade or business was an iron-merchant, who made frequent journeys from Kiōto to the north of Hondo. In those days, as now, the mines of Ōshiu were celebrated for yielding the best iron for swords and other cutting implements. This iron, being smelted from the magnetic oxide and reduced by the use of charcoal as fuel, gave a steel of singular purity and temper which has never been rivaled in modern times.

Yoshitsuné begged the merchant to take him to Mutsu. He, be-

offending the priest, would not at first consent. Yoshi-
ded him by saying that the priests would be only too
d of such a troublesome boy. The point was won, and
went off. The boy's surmises were correct. The priest

memory were unlocked when the officer said, "Yoritomo resembles Prince Uma." She had borne one son of great promise, on whom she had lavished her affection, and who had been named Uma. The mother's bosom heaved under the robes of the nun, and, pitying Yoritomo, she resolved to entreat Kiyomori to spare him. After importunate pleadings, the reluctant son yielded to his mother's prayer, but condemned the youth to distant exile—a punishment one degree less than death, and Yoritomo was banished to the province of Idzu. He was advised by his former retainers to shave off his hair, enter a monastery, and become a priest; but Morinaga, one of his faithful servants, advised him to keep his hair, and with a brave heart await the future. Even the few that still called themselves vassals of Minamoto did not dare to hold any communication with him, as he was under the charge of two officers who were responsible to the Taira for the care of their ward. Yoritomo was a shrewd, self-reliant boy, gifted with high self-control, restraining his feelings so as to express neither joy nor grief nor anger in his face, patient, and capable of great endurance, winning the love and respect of all. He was as "Prince Hal." He afterward became as "bluff King Harry," barring the latter's bad eminence as a marrier of many wives.

Such was the condition of the Minamoto family. No longer in power and place, with an empress and ministers at court, but scattered, in poverty and exile, their lives scarcely their own. Yoritomo was fortunate in his courtship and marriage, the story of which is one of great romantic interest.* His wife, Masago, is one of the many fe-

* Yoritomo had inquired which of the daughters of Hōjō Tokimasa was most beautiful. He was told the eldest was most noted for personal charms, but the second, the child of a second wife, was homely. Yoritomo, afraid of a step-mother's jealousy (though fearing neither spear nor sword), deemed it prudent to pay his addresses to the homely daughter, and thus win the mother's favor also. He sent her a letter by the hand of Morinaga, his retainer, who, however, thought his master's affection for the plain girl would not last; so he destroyed his master's letter, and, writing another one to Masago, the eldest, sent it to her. It so happened that on the previous night the homely daughter dreamed that a pigeon came to her, carrying a golden box in her beak. On awaking, she told her dream to her sister, who was so interested in it that, after eager consideration, she resolved "to buy her sister's dream," and, as a price, gave her toilet mirror to her sister, saying, as the Japanese always do on similar occasions, "The price I pay is little." The homely sister, perhaps thinking some of Masago's beauty might be reflected to hers, gladly bartered her unsubstantial happiness. Scarcely had she done this, than Yoritomo's (Morinaga's) letter came, asking her to be his bride. It turned out to be a true love-match. Masago was then twenty-one years of age—it being no ungallantry to state the age of a Japanese lady, living

male characters famous in Japanese history. She contributed not a little to the success of her husband and the splendor of the Kamakura court, during her life, as wife and widow. She outlived her husband many years. Her father, Hōjō Tokimasa, an able man, in whose veins ran imperial blood, made and fulfilled a solemn oath to assist Yoritomo, and the Hōjō family subsequently rose to be a leading one in Japan.

The tyranny and insolence of Kiyomori at Kiōto had by this time (1180), one year before his death, become so galling and outrageous that one of the royal princes, determining to kill the usurper, conspired with the Minamoto men to overthrow him. Letters were sent to the clansmen, and especially to Yoritomo, who wrote to Yoshitsuné and to his friends to join him and take up arms. Among the former retainers of his father and grandfather were many members of the Miura family. Morinaga personally secured the fealty of many men of mark in the Kuantō; but among those who refused to rise against the Taira was one, Tsunétoshi, who laughed scornfully, and said, "For an exile to plot against the Heishi [Taira] is like a mouse plotting against a cat."

At the head of the peninsula of Idzu is a range of mountains, the outjutting spurs of the chain that trends upward to the table-lands of Shinano, and thus divides Eastern from Western Japan. This range is called Hakoné, and is famous not only as classic ground in history, but also as a casket enshrining the choicest gems of nature. It is well known to the foreign residents, who resort hither in summer to enjoy the pure air of its altitudes. Its inspiring scenery embraces a lake of intensely cold pure water, and of great depth and elevation above the sea-level, groves of aromatic pines of colossal size, savage gorges, sublime mountain heights, overcrowned by cloud-excelling Fuji, foaming cataracts, and boiling springs of intermittent and rhythmic flow, surrounded by infernal vistas of melted sulphur enveloped in clouds of poisonous steam, or incrusted with myriad glistening crystals of the same mineral. Over these mountains there is a narrow pass, which is the key of the Kuantō. Near the pass, above the vil-

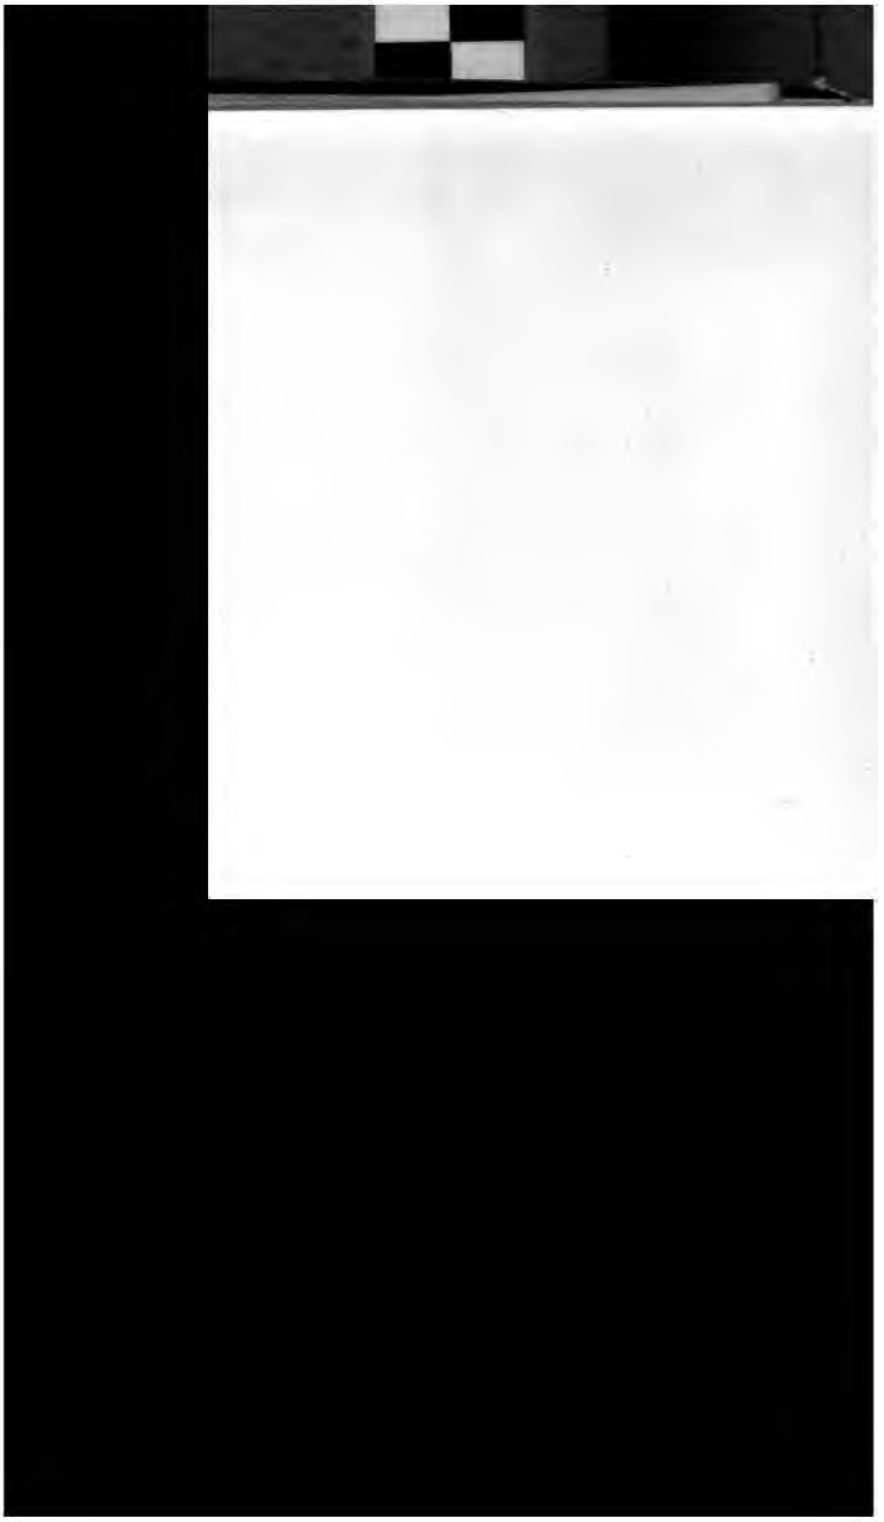
or dead. Masago's father, on his way home from Kiōto, not knowing of the betrothal of the young couple, promised Masago to Kanétaka, a Taira officer. On coming home, *he* would not break *his* word, and so married her to Kanétaka. But early on the wedding night Masago eloped with Yoritomo, who was at hand. Kanétaka searched in vain for the pair. Tokimasa outwardly professed to be very angry with Yoritomo, but really loved him.

The Mountains and Lake of Hakoné.



lage of Yumoto, is Ishi Bashi Yama (Stone-bridge Mountain), and here Yoritomo's second battle was fought, and his first defeat experienced. "Every time his bowstring twanged an enemy fell," but finally he was obliged to flee. He barely escaped with his life, and fortunately eluded pursuit, secreting himself in a hollow log, having first sent his father-in-law to call out all his retainers and meet again. He afterward hid in the priest's wardrobe, in one of the rooms of a temple. Finally, reaching the sea-shore, he took ship and sailed across the bay to Awa. "At this time the sea and land were covered with his enemies." Fortune favored the brave. Yoritomo, defeated, but not discouraged, while on the water met a company of soldiers, all equipped, belonging to the Miura clan, who became his friends, and offered to assist him. Landing in Awa, he sent out letters to all the Minamoto adherents to bring soldiers and join him. He met with encouraging and substantial response, for many hated Kiyomori and the Taira; and as Yoritomo's father and grandfather had given protection and secured quiet in the Kuantō, the prestige of the Minamoto party still remained. The local military chieftains had fought under Yoritomo's father, and were now glad to join the son of their old leader. He chose Kamakura as a place of retreat and permanent residence, it having been an old seat of the Minamoto family. Yoriyoshi had, in 1063, built the shrine of Hachiman at Tsurugaōka, near the village, in gratitude for his victories. Yoritomo now organized his troops, appointed his officers, and made arrangements to establish a fixed commissariat. The latter was a comparatively easy thing to do in a fertile country covered with irrigated rice-fields and girdled with teeming seas, and where the daily food of soldier, as of laborer, was rice and fish. Marching up around the country at the head of the Bay of Yedo through Kadzusa, Shimōsa, Musashi, and Sagami, crossing, on his way, the Sumida River, which flows through the modern Tōkiō, many men of rank, with their followers and horses, joined him. His father-in-law also brought an army from Kai. In a few months he had raised large forces, with many noted generals. He awakened new life in the Minamoto clan, and completely turned the tide of success. Many courtiers from Kiōto, disappointed in their schemes at court, or in any way chagrined at the Taira, flocked to Yoritomo as his power rose, and thus brought to him a fund of experience and ability which he was not slow to utilize for his own benefit. Meanwhile the Taira had not been idle. A large army was dispatched to the East, reaching the Fuji River, in Suruga, about the

ing in Kiōto, praying for Yoritomo's head to be laid on his new tomb, this same head, safely settled on vigorous shoulders, was devising the schemes, and seeing them executed, of fixing the Minamoto power permanently at Kamakura, and of wiping the name of Taira from the earth.

The long night of exile, of defeat, and defensive waiting of the Minamoto had broken, and their day had dawned with sudden and unexpected splendor. Henceforward they took the initiative. While Yoritomo carried on the enterprises of peace and the operations of war from his sustained stronghold, his uncle, Yukiiyé, his cousin, Yoshinaka, and his brother, Yoshitsuné, led the armies in the field.

Meanwhile, in 1181, Kiyomori fell sick at Kiōto. He had been a monk, as well as a prime minister. His death was not that of a saint. He did not pray for his enemies. The *Nihon Guai Shi* thus describes the scene in the chamber where the chief of the Taira lay dying: In the Second leap-month, his sickness having increased, his family and high officers assembled round his bedside, and asked him what he would say. Sighing deeply, he said, "He that is born must necessarily die, and not I alone. Since the period of Heiji (1159), I have served the imperial house. I have ruled under heaven (the empire) absolutely. I have attained the highest rank possible to a subject. I am the grandfather of the emperor on his mother's side. Is there still a regret? My regret is only that I am dying, and have not yet seen the head of Yoritomo of the Minamoto. After my decease, do not make offerings to Buddha on my behalf; do not read the sacred books. Only cut off the head of Yoritomo of the Minamoto, and hang it on my tomb. Let all my sons and grandsons, retainers and servants, each and every one, follow out my commands, and on no account neglect them." So saying, Kiyomori died at the age of sixty-four. His tomb, near Hiōgo, is marked by an upright monolith and railing of granite. Munémori, his son, became head of the Taira house. Strange words from a death-bed; yet such as these were more than once used by dying Japanese warriors. Yoritomo's head was on his body when, eighteen years afterward, in 1199, he died peacefully in his bed.

Nevertheless, while in Kamakura, his bed-chamber was nightly guarded by chosen warriors, lest treachery might cut off the hopes of the Minamoto. The flames of war were now lighted throughout the whole empire. From Kamakura forces were sent into the provinces of Hitachi, in the East, and of Echizen and Kaga, North and West,

e authority of the Kiōto bureaucracy. Victory and in-
he army of the rising clan invincible. After numerous
ishes, the victors advanced through Ōmi, and swooped
rize, and Kiōto, the coveted capital, was in their hands.

alous of his superior, Yoritomo, who was in Kamakura,
miles away. He acted in such an arbitrary and over-
that the wrath of the cloistered emperor Goshirakawa
ainst him. Being able to command no military forces,

eased, and the reigning emperor set free from the terrorism under which he had been put.

Meanwhile the Taira men, in their fortified palace at Fukuwara, were planning to recover their lost power, and assembling a great army in the South and West. The Minamoto, on the other hand, were expending all their energies to destroy them. The bitter animosity of the two great families had reached such a pitch that the extermination of one or the other seemed inevitable. In 1184, Yoshitsuné laid siege to the Fukuwara palace, and, after a short time, set it on fire. The son of Kiyomori and his chief followers fled to Sanuki, in Shikokŭ. Thither, as with the winged feet of an avenger, Yoshitsuné followed, besieged them at the castle of Yashima, burned it, and drove his enemies, like scattered sheep, to the Straits of Shimonoséki.

Both armies now prepared a fleet of junks, for the contest was to be upon the water. In the Fourth month of the year 1185, all was ready for the struggle. The battle was fought at Dan no ura, near the modern town of Shimonoséki, where, in 1863, the combined squadrons of England, France, Holland, and the United States bombarded the batteries of the Chōshiu clansmen. In the latter instance the foreigner demonstrated the superiority of his artillery and discipline, and, for the sake of trade and gain, wreaked his vengeance as savage and unjust as any that stains the record of native war.

In 1185, nearly seven centuries before, the contest was between men of a common country. It was the slaughter of brother by brother. The guerdon of ambition was supremacy. The Taira clan were at bay, driven, pursued, and hunted to the sea-shore. Like a wounded stag that turns upon its pursuers, the clan were about to give final battle; by its wager they were to decide their future destiny—a grave in a bloody sea, or peace under victory. They had collected five hun-

---

among the enemy that his lord was dead, said, "My business is done," and, putting his sword in his mouth, fell skillfully from his horse so that the blade should pierce him, and died. His beautiful sister, Tomoyé, was a concubine of Yoshinaka; and being of great personal strength, constantly followed her lord in battle, sheathed in armor and riding a swift horse. In this last battle she fought in the van, and, among other exploits, cut off the head of Iyéyoshi, one of Yoshitsuné's best men. When her lord fled, she asked to be allowed to die with him. He refused to allow her, and, in spite of her tears, persisted in his refusal. Doffing her armor, she reached Shinano by private paths, and thence retired into Echigo, shaved off her hair, became a nun, and spent the remainder of her life praying for the eternal happiness of Yoshinaka.

They hurried on board their aged fathers and mothers, nd children. Among them were gentle ladies from the silken robes seemed sadly out of place in the crowded re were mothers, with babes at breast, and little children, know the awful passions that kindle man against man. crowd were the widow and daughter of Kiyomori, the , the latter the empress-dowager, with the dethroned mi- six years old. With them were the sacred insignia of er, the sword and ball.

moto host was almost entirely composed of men, unin- th women or families. They had seven hundred junks.

Both fleets were gayly fluttering with flags and streamers. The Taira pennant was red, the Minamoto white, with two black bars near the top. The junks, though clumsy, were excellent vessels for fighting purposes — fully equal to the old war-gal-

another warrior. The Minamoto were ashamed. "Shoot it back!" thundered Yoshitsuné. The archer, plucking it out and coolly examining it, said, "It is short and weak." Drawing from his quiver an arrow of fourteen fists' length, and fitting it to the string, he shot it. The five-feet length of shaft leaped through the air, and, piercing the armor and flesh of the Taira bowman who reshot the first arrow, fell, spent, into the sea beyond. Elated with the lucky stroke, Yoshitsuné emptied his quiver, shooting with such celerity and skill that many Taira fell. The Minamoto, encouraged, and roused to the highest pitch of enthusiasm, redoubled their exertions with oar and arrow, and the tide of victory turned. The white flag triumphed. Yet the Taira might have won the day had not treachery aided the foe. The pages of Japanese history teem with instances of the destruction of friends by traitors. Perhaps the annals of no other country are richer in the recitals of results gained by treachery. The Arnold of the Taira army was Shigéyoshi, friend to Yoshitsuné. He had agreed upon a signal, by which the prize could be seen, and when seen could be surrounded and captured. Yoshitsuné, eagerly scanning the Taira fleet, finally caught sight of the preconcerted signal, and ordered the captains of a number of his junks to surround the particular one of the Taira. In a trice the junks of the white pennant shot along-side the devoted ship, and her decks were boarded by armed men. Seeing this, a Taira man leaped from his own boat to kill Yoshitsuné in close combat. Yoshitsuné jumped into another junk. His enemy, thus foiled, drowned himself. In the hand-to-hand fight with swords, Tomomori and six other Taira leaders were slain.

Seeing the hopeless state of affairs, and resolving not to be captured alive, the nun, Kiyomori's widow, holding her grandson, the child emperor, in her arms, leaped into the sea. Taigo, the emperor's mother, vainly tried to save her child. Both were drowned. Munémori, head of the Taira house, and many nobles, gentlemen, and ladies, were made prisoners.

The combat deepened. The Minamoto loved fighting. The Taira scorned to surrender. Revenge lent its maddening intoxication. Life, robbed of all its charms, gladly welcomed glorious death. The whizzing of arrows, the clash of two-handed swords, the clanging of armor, the sweep of churning oars, the crash of colliding junks, the wild song of the rowers, the shouts of the warriors, made the storm-chorus of battle. One after another the Taira ships, crushed by the prows of their opponents, or scuttled by the iron bolt-heads of the

chers, sunk beneath the bubbling waters, leaving red whirl-
od. Those that were boarded were swept with sword and
r human freight. The dead bodies clogged the decks, on
imic tides of blood ebbed and flowed and splashed with
of the waves, while the scuppers ran red like the spouts
ir. The warriors who leaped into the sea became tar-
avenger's arrows. Noble and peasant, woman and babe,
cher, lifting imploring arms, or sullenly spurning mercy,
hundreds.

morning looked upon a blue sea laughing with unnum-
s, and glinting with the steel of warriors decked in all
battle-array, and flaunting with the gay pennants of the
t seemed proud to bear. At night, heaving crimson like
dyer, defiled by floating corpses, and spewing its foul cor-
miles along the strand, it bore awful though transient
e hate of man.

driven off the face of the earth, were buried with war's
eneath the sea, that soon forgot its stain, and laughed
ity of golden gleam and deep-blue wave. The humble
sting his nets, or trudging along the shore, in astonish-
e delicate corpses of the court lady and the tiny babe,

A few of the Taira escaped and fled to Kiushiu. There, secluded in the fastnesses of deep valleys and high mountains, their descendants, who have kept themselves apart from their countrymen for nearly seven hundred years, a few hundred in number, still live in poverty and pride. Their lurking-place was discovered only within the last century. Of the women spared from the massacre, some married their conquerors, some killed themselves, and others kept life in their defiled bodies by plying the trade in which beauty ever finds ready customers. At the present day, in Shimonoséki,* the courtesans descended from the Taira ladies claim, and are accorded, special privileges.

The vengeance of the Minamoto did not stop at the sea. They searched every hill and valley to exterminate every male of the doomed clan. In Kiōto many boys and infant sons of the Taira family were living. All that were found were put to death. The Herod of Kamakura sent his father-in-law to attend to the bloody business.

In the Fourth month the army of Kamakura returned to Kiōto, enjoying a public triumph, with their spoils and prisoners, retainers of the Taira. They had also recovered the sacred emblems. For days the streets of the capital were gay with processions and festivals, and the coffers of the temples were enriched with the pious offerings of the victors, and their walls with votive tablets of gratitude.

Munémori was sent to Kamakura, where he saw the man whose head his father had charged him on his death-bed to cut off and hang on his tomb. His own head was shortly afterward severed from his body by the guards who were conducting him to Kiōto.

---

* Shimonoséki is a town of great commercial importance, from its position at the entrance of the Inland Sea. It consists chiefly of one long street of two miles, at the base of a range of low steep hills. It lies four miles from the western entrance of Hayato no séto, or strait of Shimonoséki. The strait is from two thousand to five thousand feet wide, and about seven miles long. Mutsuré Island (incorrectly printed as "Rockuren" on foreign charts) lies near the entrance. On Hiku Island, and at the eastern end of the strait, are light-houses equipped according to modern scientific requirements. Four beacons, also, light the passage at night. The current is very strong. A submarine telegraphic cable now connects the electric wires of Nagasaki, from Siberia to St. Petersburg; and of Shanghae (China) to London and New York, with those of Tōkiō and Hakodaté. On a ledge of rocks in the channel is a monument in honor of Antoku, the young emperor who perished here in the arms of his grandmother, Tokiko, the *Nii no ama*, a title composed of *Nii*, noble of the second rank, and *ama*, nun, equal to "the noble nun of the second rank."

XIV.

...N OF THE DUAL SYSTEM OF GOVERNMENT.

Yoritomo was strengthening his power at Kamakura, ...hat dual system of government which has puzzled sc ...riters on Japan, and has given rise to the supposition ..." two emperors, one temporal, the other spiritual." ... at this time was distracted with the disturbances of ...ears; robbers were numerous, and the Buddhist mon... ...ten nests of soldiers. Possessed of wealth, arms, and ...ents, the bonzes were ever ready to side with the par... ... them. The presence of such men and institutions ...cult for any one ruler to preserve tranquillity, since it ...wn at what moment these professedly peaceful men ... as trained bands of military warriors. To restore or-

than the news of the destruction of the Taira family at Dan no ura was received. Then Yoritomo prayed the mikado that five men of his family name might be made governors of provinces. The petition was granted, and Yoshitsuné was made governor of Iyo by special decree.

Here may be distinctly seen the first great step toward the military government that lasted nearly seven centuries.

The name of the shōgun's government, and used especially by its opposers, was *bakufu*—literally, curtain government, because anciently in China, as in Japan, a curtain (*baku*) surrounded the tent or headquarters of the commanding general. *Bakufu*, like most technical military terms in Japan, is a Chinese word.

The appointing of five military men as governors of provinces was a profound innovation in Japanese governmental affairs. Hitherto it had been the custom to appoint only civilians from the court to those offices. It does not appear, however, that Yoritomo at first intended to seize the military control of the whole empire; but his chief minister, Ōyé no Hiromoto, president of the Council of State, conceived another plan which, when carried out, as it afterward was, threw all real power in Yoritomo's hands. As the Kuantō was tranquil and prosperous under vigorous government, and as the Kuantō troops were used to put down rebels elsewhere, he proposed that in all the circuits and provinces of the empire a special tax should be levied for the support of troops in those places. By this means a permanent force could be kept, by which the peace of the empire could be maintained without the expense and trouble of calling out the Eastern army. Also—and here was another step to military government and feudalism—that a *shiugo*—a military chief, should be placed in each province, dividing the authority with the *kokushiu*, or civil governor, and a *jito*, to be appointed from Kamakura, should rule jointly with rulers of small districts, called *shōyen*. Still further — another step in feudalism—he proposed that *his own relations* who had performed meritorious service in battle should fill these offices, and that they should all be under his control from Kamakura. This was done, and Yoritomo thus acquired the governing power of all Japan.

It seems, at first sight, strange that the mikado and his court should grant these propositions; yet they did so. They saw the Kuantō—half the empire—tranquil under the strong military government of Yoritomo. Hōjō, his father-in-law, was commanding the garrison at Kiōtō. The mikado, Gotoba, may be said to have owed his throne to

se ancestors had conquered, almost added to the realm,
Northern and Eastern parts of Japan. This portion,
y before, was now actually settled and governed like
of the empire.

itomo made a campaign in that part of Japan north of
nth parallel, then called Mutsu and Déwa. On his re-
w all-victorious, he visited the court at Kiōto. The
was now the foremost subject in the empire. His re-
atment by the reigning and cloistered emperors were in
ssible scale of magnificence. The splendor of his own
hed even the old courtiers, accustomed to the gay pag-
pital. They could scarcely believe that such wealth ex-
knowledge of the art of display was cultivated in the
tary shows, athletic games, and banquets were held for
d the costliest presents exchanged, many of which are
Kamakura and Kiōto. Yoritomo returned, clothed
st honor, and with vastly greater jurisdiction than had
usted to a subject. With all the civil functions ever
nce rival Fujiwara, he united in himself more military
Taira had ever wielded.

consummate ability, many regard him as a cruel tyrant, and a heartless and selfish man. His treatment of his two brothers, Noriyori and Yoshitsuné, are evidences that this opinion is too well founded. Certain it is that the splendor of Yoritomo's career has never blinded the minds of posterity to his selfishness and cruelty; and though, like Napoleon, he has had his eulogists, yet the example held up for the imitation of youth is that of Yoshitsuné, and not Yoritomo. Mori says of the latter: "He encouraged each of his followers to believe himself the sole confidant of his leader's schemes, and in this cunning manner separated their interests, and made them his own. Nearly all of those around him who became possible rivals in power or popularity were cruelly handled when he had exhausted the benefit of their service." His simple tomb stands at the top of a knoll on the slope of hills a few hundred yards distant from the great temple at Kamakura, overlooking the fields on which a mighty city once rose, when called into being by his genius and energy, which flourished for centuries, and disappeared, to allow luxuriant Nature to again assert her sway. The rice-swamps and the millet-fields now cover the former sites of his proudest palaces. Where metropolitan splendor and luxury once predominated, the irreverent tourist bandies his jests, or the toiling farmer stands knee-deep in the fertile ooze, to win from classic soil his taxes and his daily food.

The victory over the Taira was even greater than Yoritomo had supposed possible. Though exulting in the results, he burned with jealousy that Yoshitsuné had the real claim to the honor of victory. While in this mood, there were not wanting men to poison his mind, and fan the suspicions into fires of hate. There was one Kajiwara, who had been a military adviser to the expedition to destroy the Taira. On one occasion, Yoshitsuné advised a night attack in full force on the enemy. Kajiwara opposed the project, and hindered it. Yoshitsuné, with only fifty men, carried out his plan, and, to the chagrin and disgrace of Kajiwara, he won a brilliant victory. This man, incensed at his rival, and consuming with wrath, hied to Yoritomo with tales and slanders, which the jealous brother too willingly believed. Yoshitsuné, returning as a victor, and with the spoils for his brother, received peremptory orders not to enter Kamakura, but to remain in the village of Koshigoyé, opposite the isle of Enoshima. While there, he wrote a touching letter, recounting all his toils and dangers while pursuing the Taira, and appealing for clearance of his name from slander and suspicion. It was sent to Oyé no Hiromoto, chief

Yoritomo, whom Yoshitsuné begged to intercede to his
him. This letter, still extant, and considered a model of

Nevertheless, the immortality of Yoshitsuné is secured. Worshiped as a god by the Ainōs, honored and beloved by every Japanese youth as an ideal hero of chivalry, his features pictured on boys' kites, his mien and form represented in household effigies displayed annually at the boys' great festival of flags, glorified in art, song, and story, Yoshitsuné, the hero warrior and martyr, will live in unfading memory so long as the ideals of the warlike Japanese stand unshattered or their traditions are preserved.*

---

* The struggles of the rival houses of Gen and Hei form an inexhaustible mine of incidents to the playwright, author, poet, and artist. I can not resist the temptation of giving one of these in this place. The artist's representation of it adorns many a Japanese house. At the siege of Ichinotani, a famous captain, named Naozané, who fought under the white flag, while in camp one day investing the Taira forces, saw a boat approach the beach fronting the fort. Shortly after, a Taira soldier rode out of the castle-gate into the waves to embark. Naozané saw, by the splendid crimson armor and golden helmet of the rider, that he was a Taira noble. Here was a prize indeed, the capture of which would make the Kuantō captain a general. Naozané thundered out the challenge: "Do my eyes deceive me? Is he a Taira leader; and is he such a coward that he shows his back to the eye of his enemy? Come back and fight!" The rider was indeed a Taira noble, young Atsumori, only sixteen years of age, of high and gentle birth, and had been reared in the palace. Naozané was a bronzed veteran of forty years. Both charged each other on horseback, with swords drawn. After a few passes, Naozané flung away his sword, and, unarmed, rushed to grasp his foe. Not yet to be outdone in gallantry, Atsumori did the same. Both clinched while in the saddle, and fell to the sand, the old campaigner uppermost. He tore off the golden helmet, and, to his amazement, saw the pale, smooth face and noble mien of a noble boy that looked just like his own beloved son of the same age. The father was more than the soldier. The victor trembled with emotion. "How wretched the life of a warrior to have to kill such a lovely boy! How miserable will those parents be who find their darling is in an enemy's hand! Wretched me, that I thought to destroy this life for the sake of reward!" He then resolved to let his enemy go secretly away, and make his escape. At that moment a loud voice shouted angrily, "Naozané is double-hearted: he captures an enemy, and then thinks to let him escape." Thus compelled, Naozané steeled his heart, took up his sword, and cut off Atsumori's head. He carried the bloody trophy to Yoshitsuné, and, while all stood admiring and ready to applaud, Naozané refused all reward, and, to the amazement of his chief and the whole camp, begged leave to resign. Doffing helmet, armor, and sword, he shaved off his hair, and became a disciple of the holy bonze Hōnen, learned the doctrines of Buddha, and, becoming profoundly versed in the sacred lore, he resolved to spend the remnant of his days in a monastery. He set out for the Kuantō, riding with his face to the tail of the animal, but in the direction of paradise. Some one asked him why he rode thus. He replied,

"In the Clear Land, perchance they're me reputing
A warrior brave,
Because I turn my back, refusing
Fame, once so dear."

XV.

GLORY AND THE FALL OF THE HŌJŌ FAMILY.

here may be some slight justification of Yoritomo's set
ual system of government to control and check the in-
ourtiers at Kiōto, yet at best it was a usurpation of the
ging only to the mikado. The creation of a duarchy was
l sure result of Japan having no foreign enemies.
s the peace or existence of the empire was threatened by
on the frontier, or by invading fleets on the sea-coast,
impelling cause to bind together the throne and people;
e barbarians were tranquilized, China and Corea gave no
; and especially when the nobility were divided into the
litary classes, and the mikado was no longer a man of
mental vigor, a division of the governing power natural-

spectacle of a great house decaying through the inanity or supineness of sons is constantly repeated in their history. The theme also forms the basis of their standard novels. Yoritomo's sons, not inheriting their father's ability, failed to wield his personal power of administration. From the day of his death, it may be said that the glory of the Minamoto family declined, while that of the Hōjō began.

Yet it seemed strange that the proverb should be verified in this case. Yoritomo had married no ordinary female. His wife, Masago, was a woman of uncommon intellectual ability, who had borne him a son, Yoriiyé. This young man, who was eighteen years old at his father's death, was immediately appointed chief of all the military officers in the empire, and it was expected he would equal his father in military prowess and administrative skill. His mother, Masago, though a shorn nun, who had professed retirement from the world, continued to take a very active part in the government.

The parental authority and influence in Japan, as in China, is often far greater than that of any other. Not even death or the marriage relation weakens, to any great extent, the hold of a father on a child. With affection on the one hand, and cunning on the other, an unscrupulous father may do what he will. We have seen how the Fujiwara and Taira families controlled court, throne, and emperor, by marrying their daughters to infant or boy mikados. We shall now find the Hōjō dispensing the power at Kamakura by means of a crafty woman willing to minister to her father's rather than to her son's aggrandizement.

Hōjō Tokimasa was the father of Masago, wife of Yoritomo. The latter always had great confidence in and respect for the abilities of his father-in-law. At his death, Tokimasa became chief of the council of state. Instead of assisting and training Yoriiyé in government affairs, giving him the benefit of his experience, and thus enabling the son to tread in his father's footsteps, he would not allow Yori iyé to hear cases in person, or to take active share in public business. When the youth plunged into dissipation and idleness, which terminated in a vicious course of life, his mother often reproved him, while Tokimasa, doubtless rejoicing over the fact, pretended to know nothing of the matter. All this time, however, he was filling the offices of government, not with the Minamoto adherents, but with his own kindred and partisans. Nepotism in Japan is a science; but cursed as the Japanese have been, probably none exceeded in this subtle craft the master, Tokimasa; though Yoriiyé, receiving his fa-

ad been appointed Sei-i Tai Shōgun, with the rank ju-
ivision of the second rank), his grandfather still kept
. When twenty-two years of age, while he was suffer-
ness — probably the result of his manner of life — his
okimasa, who instigated her, attempted to compel him
ffice, and to give the superintendency of the provincial

brother of Yoriiyé, succeeded in office. The boy was
ars old, and very unlike his father. He cared nothing
r military exercises. His chief occupation was in play-
—a very mild game, compared with that played in this
composing poetry. His time was spent with fair girls
f whom he had as many as he wished. All this was in
th the desire and plans of the Hōjō family, who mean-

kado. It must not be supposed that the emperor at Kiōto calmly looked on, caring for none of these things at Kamakura. The meshes of the Minamoto had been woven completely round the imperial authority. Now the Hōjō, like a new spider, was spinning a more fatal thread, sucking from the emperor, as from a helpless fly, the life-blood of power.

The Hōjō family traced their descent from the mikado Kuammu (782–805) through Sadamori, a Taira noble, from whom Tokimasa was the seventh in descent. Their ancestors had settled at Hōjō, in Idzu, whence they took their name. While the Minamoto rose to power, the Hōjō assisted them, and, by intermarriage, the two clans had become closely attached to each other.

The names of the twelve rulers, usually reckoned as seven generations, were: Tokimasa, Yoshitoki, Yasutoki, Tsunétoki, Tokiyori, Masatoki, Tokimuné, Sadatoki, Morotoki, Hirotoki, Takatoki, and Moritoki. Of these, the third, fourth, and fifth were the ablest, and most devoted to public business. It was on the strength of their merit and fame that their successors were so long able to hold power. Yasutoki established two councils, the one with legislative and executive, and the other with judicial powers. Both were representative of the wishes of the people. He promulgated sixty regulations in respect to the method of judicature. This judicial record is of great value to the historian; and long afterward, in 1534, an edition of Yasutoki's laws, in one volume, with a commentary, was published. In later times it has been in popular use as a copy-book for children. He also took an oath before the assembly to maintain the same with equity, swearing by the gods of Japan, saying, "We stand as judges of the whole country; if we be partial in our judgments, may the Heavenly Gods punish us." In his private life he was self-abnegative and benevolent, a polite and accomplished scholar, loving the society of the learned. Tsunétoki faithfully executed the laws, and carried out the policy of his predecessor. Tokiyori, before he became regent, traveled, usually in disguise, all over the empire, to examine into the details of local administration, and to pick out able men, so as to put them in office when he should need their services. In his choice he made no distinction of rank. Among the upright men he elevated to the judges' bench was the Awodo, who, for conscientious reasons, never wore silk garments, nor a lacquered scabbard to his sword, nor ever held a bribe in his hand. He was the terror of venal officials, injustice and bribery being known to him as if by sorcery; while every detected

re to be disgracefully cashiered. Hōjō Akitoki estab-
y, consisting of Chinese, Confucian, Buddhistic, and na-
, at Kanazawa, in Sagami. Here scholars gathered,

osed as soon as they were old enough to be trouble-
of the Hōjō ever seized the office of Shōgun, but in
ielded all and more of the power attaching to the office,
e of *shikken*. It was an august game of state-craft, in
hildren with colossal names were set up like nine-pins,
own as suited the playful fancies of subordinates who
e and titles, and kept the reality of power. The count-

my in 1308, and put up Morikuni, his eldest son. This was the last shōgun of imperial blood. The game of the players was now nearly over.

The ex-emperor, Gotoba, made a desperate effort to drive the usurping Hōjō from power. A small and gallant army was raised; fighting took place; but the handful of imperial troops was defeated by the overwhelming hosts sent from Kamakura. Their victory riveted the chains upon the imperial family. To the arrogant insolence of the usurper was now added the cruelty of the conscious tyrant.

Never before had such outrageous deeds been committed, or such insults been heaped upon the sovereigns as were done by these upstarts at Kamakura. Drunk with blood and exultation, the Hōjō wreaked their vengeance on sovereign and subject alike. Banishment and confiscation were the order of their day. The ex-emperor was compelled to shave off his hair, and was exiled to the island of Ŏki. The reigning mikado was deposed, and sent to Sado. Two princes of the blood were banished to Tajima and Bizen. The ex-emperor Tsuchimikado — there were now three living emperors — not willing to dwell in palace luxury while his brethren were in exile, expressed a wish to share their fate. He was sent to Awa. To complete the victory and the theft of power, the Hōjō chief Yasutoki confiscated the estates of all who had fought on the emperor's side, and distributed them among his own minions. Over three thousand fiefs were thus disposed of. No camp-followers ever stripped a dead hero's body worse than these human vultures tore from the lawful sovereign the last fragment of authority. All over Japan the patriots heard, with groans of despair, the slaughter of the loyal army, and the pitiful fate of their emperors. The imperial exile died in Sado of a broken heart. A nominal mikado at Kiōto, and a nominal shōgun at Kamakura, were set up, but the Hōjō were the keepers of both.

The later days of the Hōjō present a spectacle of tyranny and misgovernment such as would disgrace the worst Asiatic bureaucracy. The distinguished and able men such as at first shed lustre on the name of this family were no more. The last of them were given to luxury and carousal, and the neglect of public business. A horde of rapacious officials sucked the life-blood and paralyzed the energies of the people. To obtain means to support themselves in luxury, they increased the weight of taxes, that ever crushes the spirit of the Asiatic peasant. Their triple oppression, of mikado, shōgun, and people, became intolerable. The handwriting was on the wall. Their days were numbered.

riyoshi, son of the Emperor Go-Daigo, began to mature
ecovery of imperial power. By means of the ubiqui-

party was resting at night, Kojima scraped off the bark of a cherry-tree, and wrote in ink, on the inner white membrane, this poetic stanza,

> "*Ten Kōsen wo horobosū nakaré*
> *Toki ni Hanrei naki ni shimo aradzu.*"
>
> (O Heaven! destroy not Kōsen,
> While Hanrei still lives.)

The allusion, couched in delicate phrase, is to Kōsen, an ancient king in China, who was dethroned and made prisoner, but was afterward restored to honor and power by the faithfulness and valor of his retainer, Hanrei.

Kojima Writing on the Cherry-tree. (Vignette upon the greenback national-bank notes.)

The next morning, the attention of the soldiers was excited by the fresh handwriting on the tree. As none of them were able to read, they showed it to the Emperor Go-Daigo, who read the writing, and its significance, in a moment. Concealing his joy, he went to banishment, keeping hope alive during his loneliness. He knew that he was not forgotten by his faithful vassals. Kojima afterward fought to restore the mikado, and perished on the battle-field. The illustration given above is borrowed from a picture by a native artist, which now adorns the national-bank notes issued under the reign of the present mikado

This darkest hour of the mikado's fortune preceded the dawn. Already a hero was emerging from obscurity who was destined to be the destroyer of Kamakura and the Hōjō. This was Nitta Yoshisada.

The third son of Minamoto Yoshi-iyé, born A.D. 1057, had two sons. The elder son succeeded his father to the fief of Nitta, in the province of Kōdzuké. The second inherited from his adopted father, Tawara, the fief of Ashikaga, in Shimotsuké. Both these sons founded families which took their name from their place of hereditary possession. At this period, four hundred years later, their illustrious descendants became conspicuous. Nitta Yoshisada, a captain in the army of Hōjō, had been sent to besiege Kusunoki, one of the mikado's faithful vassals; but, refusing to fight against the imperial forces, Nitta deserted with his command. He sent his retainer to Ōtō no miya, son of the emperor, then hiding in the mountains, who gave him a commission in the name of his exiled father. Nitta immediately returned to his native place, collected all his retainers, and before the shrine of the village raised the standard of revolt against Hōjō. His banner was a long white pennant, crossed near the top by two black bars, beneath which was a circle bisected with a black zone. Adopting the plan of attack proposed by his brother, and marching down into Sagami, he appeared at Inamura Saki, on the outskirts of Kamakura, in thirteen days after raising his banner as the mikado's vassal.

At this point, where the road from Kamakura to Enoshima strikes the beach, a splendid panorama breaks upon the vision of the beholder. In front is the ocean, with its rolling waves and refreshing salt breeze. To the south, in imposing proportions, and clothed in the blue of distance, is the island of Ōshima; and farther on are the mountains of the peninsula of Idzu. To the right emerges, fair and lovely, in perpetual green, the island of Enoshima. Landward is the peak of Oyama, with its satellites; but, above all, in full magnificence of proportion, stands Fuji, the lordly mountain. Here Nitta performed an act that has become immortal in song and poem, and the artist's colors.

On the eve before the attack, Nitta, assembling his host at the edge of the strand, and removing his helmet, thus addressed his warriors: "Our heavenly son (mikado) has been deposed by his traitorous subject, and is now in distant exile in the Western Sea. I, Yoshisada, being unable to look upon this act unmoved, have raised an army to punish the thieves yonder. I humbly pray thee, O God of

the Sea, to look into my loyal heart; command the tide to ebb and open a path." Thus saying, he bowed reverently, and then, as Rai says, with his head bare (though the artist has overlooked the statement), and in the sight of heaven cast his sword into the waves as a prayer-offering to the gods that the waves might recede, in token of their righteous favor. The golden hilt gleamed for a moment in the air, and the sword sunk from sight. The next morning the tide had ebbed, the strand was dry, and the army, headed by the chief whom the soldiers now looked upon as the chosen favorite of Heaven, marched

Nitta Yoshisada casting the Sword into the Sea. (Vignette from the national-bank notes.)

resistlessly on. Kamakura was attacked from three sides. The fighting was severe and bloody, but victory everywhere deserted the banners of the traitors, and rested upon the pennons of the loyal. Nitta, after performing great feats of valor in person, finally set the city on fire, and in a few hours Kamakura was a waste of ashes.

Just before the final destruction of the city, a noble named Andō, vassal of the house of Hōjō, on seeing the ruin around him, the soldiers slaughtered, and the palaces burned, remarking that for a hundred years no instance of a retainer dying for his lord had been known, resolved to commit *hara-kiri*. The wife of Nitta was his niece. Just as he was about to plunge his dirk into his body, a serv-

him a letter from her, begging him to surrender. The old
antly exclaimed: "My niece is the daughter of a samurai
hy did she make so shameless a request? And Nitta, her
a samurai. Why did he allow her to do so?" He then
tter, wrapped it round his sword, which he plunged into
nd died. A great number of vassals of Hōjō did likewise.

the empire the people rose up against their oppressors and
hem. The Hōjō domination, which had been paramount
ne hundred and fifty years, was utterly broken.
. 1219 until 1333, the mikados at Kiōto were:

u	1211–1221
ō (reigned four months)	1222
ikawa	1222–1232
	1233–1242

The Hōjō have never been forgiven for their arbitrary treatment of the mikados. The author of the *Nihon Guai Shi* terms them "serpents, fiends, beasts," etc. To this day, historian, dramatist, novelist, and story-teller delight to load them with vilest obloquy. Even the peasants keep alive the memory of the past. One of the most voracious and destructive insects is still called the "Hōjō bug." A great annual ceremony of extermination of these pests keeps alive the hated recollection of their human namesakes. The memory of the wrongs suffered by the imperial family goaded on the soldiers in the revolution of 1868, who wreaked their vengeance on the Tokugawas, as successors of the Hōjō. In fighting to abolish forever the hated usurpation of six hundred years, and to restore the mikado to his ancient rightful and supreme authority, they remembered well the deeds of the Hōjō, which the *Nihon Guai Shi* so eloquently told. In 1873, envoys sent out from the imperial court in Tōkiō, proceeded to the island of Sado, and solemnly removing the remains of the banished emperor, who had died of a broken heart, buried them, with due pomp, in the sacred soil of Yamato, where sleep so many of the dead mikados.

I have given a picture of the Hōjō rule and rulers, which is but the reflection of the Japanese popular sentiment, and the opinion of native scholars. There is, however, another side to the story. It must be conceded that the Hōjō were able rulers, and kept order and peace in the empire for over a century. They encouraged literature, and the cultivation of the arts and sciences. During their period, the resources of the country were developed, and some branches of useful handicraft and fine arts were brought to a perfection never since surpassed. To this time belong the famous image-carver, sculptor, and architect, Unkei, and the lacquer-artists, who are the "old masters" in this branch of art. The military spirit of the people was kept alive, tactics were improved, and the methods of governmental administration simplified. During this period of splendid temples, monasteries, pagodas, colossal images, and other monuments of holy zeal, Hōjō Sadatoki erected a monument over the grave of Kiyomori at Hiōgo. Hōjō Tokimuné raised and kept in readiness a permanent war-fund, so that the military expenses might not interfere with the revenue reserved for ordinary government expenses. To his invincible courage, patriotic pride, and indomitable energy are due the vindication of the national honor and the repulse of the Tartar invasion.

XVI.

BUDDHISM IN JAPAN.

gion founded by Buddha, which is older by six centuries
ounded by Christ, which is professed by nearly one-third
an race, which has a literature perhaps larger than all other
eratures combined, I shall not attempt to treat of except in
t terms. My object in this chapter is to portray the en-
levelopment of Buddhism in Japan, to outline its rise and
d to show its status in that now fermenting nation in
test fruits are found.

s must surely be interested in knowing of the faith they
ring to destroy, or, at least, to displace. When it is con-
Buddhist temples are already erected upon American soil,

The total extinction of being, personality, and consciousness is the aspiration of the vast majority of true believers, as it should be of every suffering soul, *i. e.*, of all mankind. The true estate of the human soul, according to the Buddhist of the Buddhists, is blissful annihilation. The morals of Buddhism are superior to its metaphysics. Its commandments are the dictates of the most refined morality. Besides the cardinal prohibitions against murder, stealing, adultery, lying, drunkenness, and unchastity, "every shade of vice, hypocrisy, anger, pride, suspicion, greediness, gossiping, cruelty to animals, is guarded against by special precepts. Among the virtues recommended, we find not only reverence of parents, care of children, submission to authority, gratitude, moderation in time of prosperity, submission in time of trial, equanimity at all times; but virtues such as the duty of forgiving insults, and not rewarding evil with evil." Whatever the *practice* of the people may be, they are taught, as laid down in their sacred books, the rules thus summarized above.

Such, we may glean, was Buddhism in its early purity. Besides its moral code and philosophical doctrines, it had almost nothing. An "ecclesiastical system" it was not in any sense. Its progress was rapid and remarkable. Though finally driven out of India, it swept through Burmah, Siam, China, Thibet, Manchuria, Corea, Siberia, and finally, after twelve centuries, entered Japan. By this time the bare and bald original doctrines of Shaka (Buddha) were glorious in the apparel with which Asiatic imagination and priestly necessity had clothed and adorned them. The ideas of Shaka had been expanded into a complete theological system, with all the appurtenances of a stock religion. It had a vast and complicated ecclesiastical and monastic machinery, a geographical and sensuous paradise, definitely located hells and purgatories, populated with a hierarchy of titled demons, and furnished after the most approved theological fashion. Of these the priests kept the keys, regulated the thermometers, and timed or graded the torture or bliss. The system had, even thus early, a minutely catalogued hagiology. Its eschatology was well outlined, and the hierarchs claimed to be as expert in questions of casuistry as they were at their commercial system of masses still in vogue. General councils had been held, decrees had been issued, dogmas defined or abolished; Buddhism had emerged from philosophy into religion. The Buddhist missionaries entered Japan having a mechanism perfectly fitted to play upon the fears and hopes of an ignorant people, and to bring them into obedience to the new and aggressive faith.

as one country in which the success of Buddhism as a gion seemed foreordained, that country was Japan. It oil for any thing that could be called a religion. Before ame, very little worthy of the name existed. Day by ew ray of the light of research that now falls upon that of Japanese history shows that Shintō was a pale and t, that consisted essentially of sacrificing to the spirits of oes and ancestors, with ceremonies of bodily purification, coming of Buddhism quickened it, by the force of oppo- something approaching a religious system. Swarms of , who have human passions, and are but apotheosized his- s, fill the pantheon of Shintō. The end and aim of even cere adherents and teachers is political. Strike out the e divinity of the mikado and the duty of all Japanese to plicity, and almost nothing is left of modern Shintō but nogony, local myth, and Confucian morals.*

art of the ancient Japanese longed after a solution of the hence? whither? why?—if it yearned for religious truth, of all men doubtless do—it must have been ready to wel- hing more certain, tangible, and dogmatic than the bland

conscious existence seems the very rapture of joy, and whose soul yearns for an eternity of life, may not understand how a human soul could ever long for utter absorption of being and personality, even in God, much less for total annihilation.

But, among the Asiatic poor, where ceaseless drudgery is often the lot for life, where a vegetable diet keeps the vital force low, where the tax-gatherer is the chief representative of government, where the earthquake and the typhoon are so frequent and dreadful, and where the forces of nature are feared as malignant intelligences, life does not wear such charms as to lead the human soul to long for an eternity of it. No normal Japanese would thrill when he heard the unexplained announcement, "The gift of God is eternal life," or, "Whosoever believeth on me, though he were dead, yet shall he live." Such words would be painful to him, announcing only a fateful fact. To him life is to be dreaded; not because death lies at the end of it, but because birth and life again follow death, and both are but links in an almost endless chain. Herein lies the power of Buddhist preaching: "Believe in the true doctrine, and live the true believer's life," says the bonze, "and you will be born again into higher states of existence, thence into higher and higher heavens, until from paradise you rise as a purified and saintly soul, to be absorbed in the bosom of holy Buddha. Reject the truth, or believe false doctrine (*e. g.*, Christianity), and you will be born again thousands of times, only to suffer sickness and pain and grief, to die or be killed a thousand times, and, finally, to sink into lower and lower hells, before you can regain the opportunity to rise higher." This is really the popular form of Shaka's doctrine of metempsychosis. The popular Buddhism of Japan, at least, is not the bare scheme of philosophy which foreign writers seem to think it is. It is a genuine religion in its hold on man. It is a vinculum that binds him to the gods of his fathers. This form of Buddhism commended itself to both the Japanese sage and the ignorant boor, to whom thought is misery, by reason of its definiteness, its morals, its rewards, and its punishments.

Buddhism has a cosmogony and a theory of both the microcosm and the macrocosm. It has fully as much, if not more, "science" in it than our mediæval theologians found in the Bible. Its high intellectuality made noble souls yearn to win its secrets, and to attain the conquests over their lusts and passions, by knowledge.

Among the various sects of Buddhism, however, the understanding of the doctrine of Nirvana varies greatly. Some believe in the total

the human soul, the utter annihilation of consciousness; on the contrary, hold that, as part of the divine whole, ul enjoys a measure of conscious personality.

and opposition at first united together the adherents of , but success and prosperity gave rise to schisms. New unded in Japan, while many priests traveled abroad to ina, and came back as new lights and reformers, to found of thought and worship. Of these the most illustrious med not only as a scholar in Pali, Sanskrit, and Chinese,

the same century several other important sects originated, and the number of brilliant intellects that adorned the priesthood at this period is remarkable. Of these, only two can be noticed, for lack of space.

In A.D. 1222, there was born, in a suburb of the town of Kominato, in Awa, a child who was destined to influence the faith of millions, and to leave the impress of his character and intellect indelibly upon the minds of his countrymen. He was to found a new sect of Buddhism, which should grow to be one of the largest, wealthiest, and most influential in Japan, and to excel them all in proselyting zeal, polemic bitterness, sectarian bigotry, and intolerant arrogance. The Nichiren sect of Buddhists, in its six centuries of history, has probably furnished a greater number of brilliant intellects, uncompromising zealots, unquailing martyrs, and relentless persecutors than any other in Japan. No other sect is so fond of controversy. The bonzes of none other can excel those of the Nichiren *shiu* (sect) in proselyting zeal, in the bitterness of their theological arguments, in the venom of their revilings, or the force with which they hurl their epithets at those who differ in opinion or practice from them. In their view, all other sects than theirs are useless. According to their vocabulary, the adherents of Shin Gon are "not patriots;" those of Ritsu are "thieves and rascals;" of Zen, are "furies;" while those of certain other sects are sure and without doubt to go to hell. Among the Nichirenites are to be found more prayer-books, drums, and other noisy accompaniments of revivals, than in any other sect. They excel in the number of pilgrims, and in the use of charms, spells, and amulets. Their priests are celibates, and must abstain from wine, fish, and all flesh. They are the Ranters of Buddhism. To this day, a revival-meeting in one of their temples is a scene that often beggars description, and may deafen weak ears. What with prayers incessantly repeated, drums beaten unceasingly, the shouting of devotees who work themselves into an excitement that often ends in insanity, and sometimes in death, and the frantic exhortation of the priests, the wildest excesses that seek the mantle of religion in other lands are by them equaled, if not excelled. To this sect belonged Kato Kiyomasa, the bloody persecutor of the Christians in the sixteenth century, the "vir ter execrandus" of the Jesuits, but who is now a holy saint in the calendar of canonized Buddhists.

Nichiren (sun-lotus) was so named by his mother, who at conception had dreamed that the sun (*nichi*) had entered her body. This

e distinctive prayer of the Nichiren sect. It is inscribed
curtains, on their tombstones and wayside shrines, and

it to run more violently than ever against other sects, especially decrying the great and learned priests of previous generations. Hōjō Tokiyori again arrested him, confined him in a dungeon below ground, and condemned him to death.

The following story is told, and devoutly believed, by his followers: On a certain day he was taken out to a village on the strand of the bay beyond Kamakura, and in front of the lovely island of Enoshima. This village is called Koshigoyé. At this time Nichiren was forty-three years old. Kneeling down upon the strand, the saintly bonze calmly uttered his prayers, and repeated "*Namu miō hō ren gé kiō*" upon his rosary. The swordsman lifted his blade, and, with all his might, made the downward stroke. Suddenly a flood of blinding light burst from the sky, and smote upon the executioner and the official inspector deputed to witness the severed head. The sword-blade was broken in pieces, while the holy man was unharmed. At the same moment, Hōjō, the Lord of Kamakura, was startled at his revels in the palace by the sound of rattling thunder and the flash of lightning, though there was not a cloud in the sky. Dazed by the awful signs of Heaven's displeasure, Hōjō Tokiyori, divining that it was on account of the holy victim, instantly dispatched a fleet messenger to stay the executioner's hand and reprieve the victim. Simultaneously the official inspector at the still unstained blood-pit sent a courier to beg reprieve for the saint whom the sword could not touch. The two men, coming from opposite directions, met at the small stream which the tourist still crosses on the way from Kamakura to Enoshima, and it was thereafter called Yukiai (meeting on the way) River, a name which it retains to this day. Through the pitiful clemency and intercession of Hōjō Tokimuné, son of the Lord of Kamakura, Nichiren was sent to Sado Island. He was afterward released by his benefactor in a general amnesty. Nichiren founded his sect at Kiōto, and it greatly flourished under the care of his disciple, his reverence Nichizo. After a busy and holy life, the great saint died at Ikégami, a little to north-west of the Kawasaki railroad station, between Yokohama and Tōkiō, where the scream of the locomotive and the rumble of the railway car are but faintly heard in its solemn shades. There are to be seen gorgeous temples, pagodas, shrines, magnificent groves and cemeteries. The dying presence of Nichiren has lent this place peculiar sanctity; but his bones rest on Mount Minobu, in the province of Kai, where was one of his homes when in the flesh. See *Frontispiece.*

While in Japan, I made special visits to many of the places rendered

Nichiren, of his birth, labors, triumph, and death, and
e impressions of his work and followers which I have
set forth. So far as I am able to judge, none of the
ns has stamped his impress more deeply on the relig-
Japan than has Nichiren. It may be vain prophecy,
hat Christianity in Japan will find its most vigorous
pposers among this sect, and that it will be the last to
w triumphing faith that seems clasping the girdle of
Japan.

hing success and tremendous power, and their intoler-
y, are to be ascribed to the same cause—the precision,
l exclusiveness of the teachings of their master. In
ks, and in the sermons of their bonzes, the Nichirenites
reflect diligently upon the peculiar blessings vouch-
as a chosen sect, and to understand that they are fa-
others in privilege, that their doctrines are the only

invocation). I shall call it "the mother's memorial." It is practiced chiefly by the followers of Nichiren, though it is sometimes employed by other sects.

A sight not often met with in the cities, but in the suburbs and country places frequent as the cause of it requires, is the *nagaré kanjō* (flowing invocation). A piece of cotton cloth is suspended by its four corners to stakes set in the ground near a brook, rivulet, or, if in the city, at the side of the water-course which fronts the houses of the better classes. Behind it rises a higher, lath-like board, notched several times near the top, and inscribed with a brief legend. Resting on the cloth at the brookside, or, if in the city, in a pail of water, is a wooden dipper. Perhaps upon the four corners, in the upright bamboo, may be set bouquets of flowers. A careless stranger may not notice the odd thing, but a little study of its parts reveals the symbolism of death. The tall lath tablet is the same as that set behind graves and tombs. The ominous Sanskrit letters betoken death. Even the flowers in their bloom call to mind the tributes of affectionate remembrance which loving survivors set in the sockets of the mon uments in the grave-yards. On the cloth is written a name such as is given to persons after death, and the prayer, "*Namu miō hō ren gé kiō*" (Glory to the salvation-bringing Scriptures). Waiting long enough, perchance but a few minutes, there may be seen a passer-by who pauses, and, devoutly offering a prayer with the aid of his rosary, reverently dips a ladleful of water, pours it upon the cloth, and waits patiently until it has strained through, before moving on.

All this, when the significance is understood, is very touching. It is the story of vicarious suffering, of sorrow from the brink of joy, of one dying that another may live. It tells of mother-love and mother-woe. It is a mute appeal to every passer-by, by the love of Heaven, to shorten the penalties of a soul in pain.

The Japanese (Buddhists) believe that all calamity is the result of sin either in this or a previous state of existence. The mother who dies in childbed suffers, by such a death, for some awful transgression, it may be in a cycle of existence long since passed. For it she must leave her new-born infant, in the full raptures of mother-joy, and sink into the darkness of Hades, to wallow in a lake of blood. There must she groan and suffer until the "flowing invocation" ceases, by the wearing-out of the symbolic cloth. When this is so utterly worn that the water no longer drains, but falls through at once, the freed spirit of the mother, purged of her sin, rises to resurrection among

ings of a higher cycle of existence. Devout men, as everently pour a ladleful of water. Women, especial- ave felt mother-pains, and who rejoice in life and lov- repeat the expiatory act with deeper feeling; but the pathy are fathomed only by those who, being mothers, ed. Yet, as in presence of nature's awful glories the is shocked by the noisy importunity of the beggar, so l and touching memorial the proofs of sordid priest- warm sympathy which the sight even from the heart ht evoke.

takes the place of monkish seclusion. Devout prayer, purity, and earnestness of life, and trust in Buddha himself as the only worker of perfect righteousness, are insisted upon. Other sects teach the doctrine of salvation by works. Shinran taught that it is faith in Buddha that accomplishes the salvation of the believer.

Buddhism seems to most foreigners who have studied it but Roman Catholicism without Christ, and in Asiatic form. The Shin sect hold a form of the Protestant doctrine of justification by faith, believing in Buddha instead of Jesus. Singleness of purpose characterizes this sect. Outsiders call it Ikkō, from the initial word of a text in their chief book, *Muriōju Kiō* ("Book of Constant Life"). By others it is spoken of as Monto (gate-followers), in reference to their unity of organization. The Scriptures of other sects are written in Sanskrit and Chinese, which only the learned are able to read.

Those of Monto are in the vernacular Japanese writing and idiom. Other sects build temples in sequestered places among the hills. The Shin-shiuists erect theirs in the heart of cities, on main streets, in the centres of population. They endeavor, by every means in their power, to induce the people to come to them. In Fukui their twin temples stood in the most frequented thoroughfares. In Tōkiō, Ōzaka, Kiōto, Nagasaki, and other cities, the same system of having twin temples in the heart of the city is pursued, and the largest and finest ecclesiastical structures are the duplicates of this sect. The altars are on a scale of imposing magnificence, and gorgeous in detail. A common saying is, "As handsome as a Monto altar." The priests marry, rear families, and their sons succeed them to the care of the temples. In default of male issue, the husband of the daughter of the priest, should he have one, takes the office of his father-in-law. Many members of the priesthood and their families are highly educated, perhaps more so than the bonzes of any other sect. Personal acquaintance with several of the Monto priests enables me to substantiate this fact asserted of them.

The followers of Shinran have ever held a high position, and have wielded vast influence in the religious development of the people. Both for good and evil they have been among the foremost of active workers in the cause of religion. In time of war the Monto bonzes put on armor, and, with their families and adherents, have in numerous instances formed themselves into military battalions. We shall hear more of their martial performances in succeeding chapters.

After the death of Shinran, Renniō, who died in 1500, became the

Monto, and wrote the *Ofumi*, or sacred writings, which
read by the disciples of this denomination. With the
object of reaching the masses, they are written in the

---

ace, new missionaries were invited from Corea, and in 624 two bonzes were given official rank, as primate and vice-primate. Temples were erected, and, at the death of a bonze, in 700, his body was disposed of by cremation—a new thing in Japan. In 741, an imperial decree, ordering the erection of two temples and a seven-storied pagoda in each province, was promulgated. In 765, a priest became Dai Jō Dai Jin. In 827, a precious relic—one of Shaka's (Buddha's) bones—was deposited in the palace. The master-stroke of theological dexterity was made early in the ninth century, when Kōbō, who had studied three years in China, achieved the reconciliation of the native belief and the foreign religion, made patriotism and piety one, and laid the foundation of the permanent and universal success of Buddhism in Japan. This Japanese Philo taught that the Shintō deities, or gods, of Japan were manifestations, or transmigrations, of Buddha in that country, and, by his scheme of dogmatic theology, secured the ascendency of Buddhism over Shintō and Confucianism. Until near the fourteenth century, however, Buddhism continued to be the religion of the official, military, and educated classes, but not of the people at large. Its adoption by all classes may be ascribed to the missionary labors of Shinran and Nichiren, whose banishment to the North and East made them itinerant apostles. Shinran traveled on foot through every one of the provinces north and east of Kiōto, glorying in his exile, everywhere preaching, teaching, and making new disciples. It may be safely said that it required nine hundred years to convert the Japanese people from fetichism and Shintō to Buddhism.

It is extremely difficult to get accurate statistics relating to Japanese Buddhism. The following table was compiled for me by a learned bonze of the Shin denomination, in the temple of Nishi Honguanji, in Tsŭkiji, Tōkiō. I have compared it with data furnished by an ex-priest in Fukui, and various laymen.

The ecclesiastical centre of Japan has always been at Kiōto. The chief temples and monasteries of each sect were located there.

TABULAR LIST OF BUDDHIST SECTS IN JAPAN.

Chief Sects (Shiu).	Total Number of Temples.
I. Tendai. Founded by Chisha, in China: 3 sub-sects	6,891
II. Shingon. Founded by Kōbō, in Japan, A.D. 813: 3 sub-sects	15,503
III. Zen. Founded by Darma, in Japan: 6 sub-sects	21,547
IV. Jōdō. Founded by Hōnen, in Japan, 1173: 2 sub-sects	9,819
V. Shin. Founded by Shinran, in Japan, 1213: 5 sub-sects	13,718
VI. Nichiren. Founded by Nichiren, in Japan, 1262: 2 sub-sects	
VII. Ji. Founded by Ippen, in Japan, 1288	586

Besides the above, there are twenty-one "irregular," "local," or "independent" sects, which act apart from the others, and in some cases have no temples or monasteries. A number of other sects have originated in Japan, flourished for a time, decayed, and passed out of existence. According to the census of 1872, there were in Japan 211,846 Buddhist *religieux* of both sexes and all grades and orders. Of these, 75,925 were priests, abbots, or monks, 9 abbesses; 37,327 were reckoned as novices or students, and 98,585 were in monasteries or families (mostly of Shin sect); 151,677 were males, 60,159 were females, and 9,621 were nuns. By the census of 1875, the returns gave 207,669 Buddhist *religieux*, of whom 148,807 were males, and 58,862 females.

XVII.

THE INVASION OF THE MONGOL TARTARS.

he early centuries of the Christian era, friendly intercourse y kept up between Japan and China. Embassies were o and fro on various missions, but chiefly with the mutual aring the congratulations to an emperor upon his accession e. It is mentioned in the "Gazetteer of Echizen" (*Echi-Tei Seiki Kō*) that embassadors from China, with a retinue f one hundred and seventy-eight persons, came to Japan bear congratulations to the mikado, Kōnin Tennō. The wrecked in a typhoon off the coast of Echizen, and but the company were saved. They were fed and sheltered in n A.D. 779, the Japanese embassy, returning from China, ikuni, the sea-port of Fukui. In 883, orders were sent to the provinces north of the capital to repair the bridges

cutting off their heads at the village of Tatsu no kuchi (Mouth of the Dragon), near the city. The Japanese now girded themselves for the war they knew was imminent. Troops from the East were sent to guard Kiōto. Munitions of war were prepared, magazines stored, castles repaired, and new armies levied and drilled. Boats and junks were built to meet the enemy on the sea. Once more Chinese envoys came to demand tribute. Again the sword gave the answer, and their heads fell at Daizaifu, in Kiushiu, in 1279.

Meanwhile the armada was preparing. Great China was coming to crush the little strip of land that refused homage to the invincible conqueror. The army numbered one hundred thousand Chinese and Tartars, and seven thousand Coreans, in ships that whitened the sea as the snowy herons whiten the islands of Lake Biwa. They numbered thirty-five hundred in all. In the Seventh month of the year 1281, the tasseled prows and fluted sails of the Chinese junks greeted the straining eyes of watchers on the hills of Daizaifu. The armada sailed gallantly up, and ranged itself off the castled city. Many of the junks were of immense proportions, larger than the natives of Japan had ever seen, and armed with the engines of European warfare, which their Venetian guests had taught the Mongols to construct and work. The Japanese had small chance of success on the water; as, although their boats, being swifter and lighter, were more easily managed, yet many of them were sunk by the darts and huge stones hurled by the catapults mounted on their enemy's decks. In personal prowess the natives of Nippon were superior. Swimming out to the fleet, a party of thirty boarded a junk, and cut off the heads of the crew; but another company attempting to do so, were all killed by the now wary Tartars. One captain, Kusanojiro, with a picked crew, in broad daylight, sculled rapidly out to an outlying junk, and, in spite of a shower of darts, one of which took off his left arm, ran his boat along-side a Chinese junk, and, letting down the masts, boarded the decks. A hand-to-hand fight ensued, and, before the enemy's fleet could assist, the daring assailants set the ship on fire and were off, carrying away twenty-one heads. The fleet now ranged itself in a cordon, linking each vessel to the other with an iron chain. They hoped thus to foil the cutting-out parties. Besides the catapults, immense bow-guns shooting heavy darts were mounted on their decks, so as to sink all attacking boats. By these means many of the latter were destroyed, and more than one company of Japanese who expected victory lost their lives. Still, the enemy could not effect a

rce. Their small detachments were cut off or driven into
on as they reached the shore, and over two thousand
nong the trophies of the defenders in the skirmishes. A
cations many miles long, consisting of earth-works and
ling of planks, was now erected along-shore. Behind
fenders watched the invaders, and challenged them to

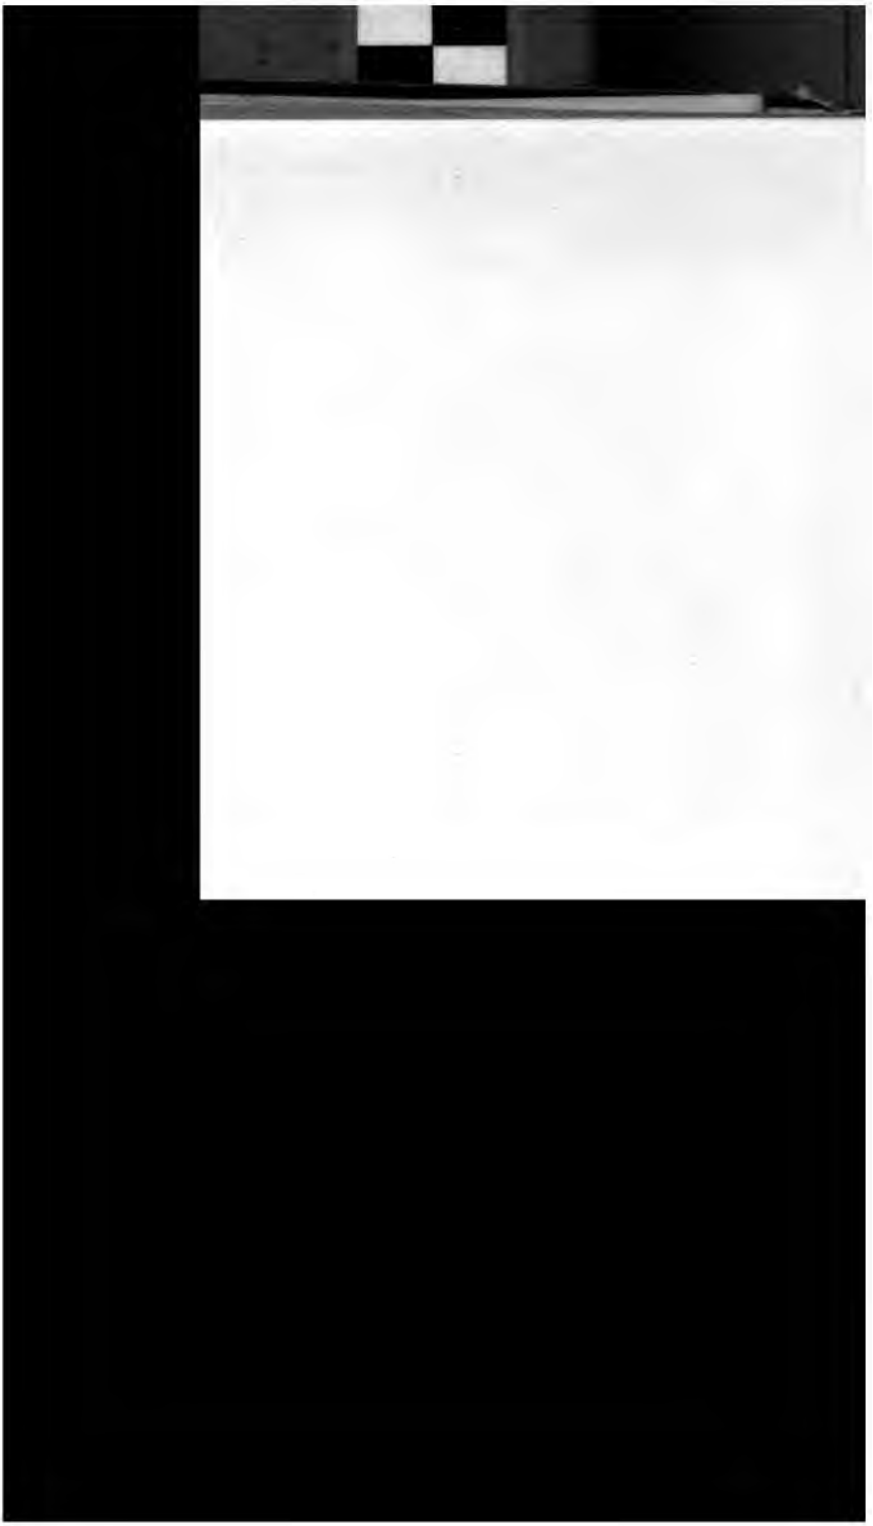
The Repulse of the Mongol Tartars. (From a painting by a Japanese who had studied under a Dutch master.)



burst upon the Chinese fleet. Nothing can withstand these maelstroms of the air. We call them typhoons; the Japanese say *tai-fu*, or *ōkazé* (great wind). Iron steamships of thousands of horse-power are almost unmanageable in them. Junks are helpless: the Chinese ships were these only. They were butted together like mad bulls. They were impaled on the rocks, dashed against the cliffs, or tossed on land like corks from the spray. They were blown over till they carecned and filled. Heavily freighted with human beings, they sunk by hundreds. The corpses were piled on the shore, or floating on the water so thickly that it seemed almost possible to walk thereon. Those driven out to sea may have reached the main-land, but were probably overwhelmed. The vessels of the survivors, in large numbers, drifted to or were wrecked upon Taka Island, where they established themselves, and, cutting down trees, began building boats to reach Corea. Here they were attacked by the Japanese, and, after a bloody struggle, all the fiercer for the despair on the one side and the exultation on the other, were all slain or driven into the sea to be drowned, except three, who were sent back to tell their emperor how the gods of Japan had destroyed their armada. The Japanese exult in the boast that their gods and their heaven prevailed over the gods and the heaven of the Chinese.

This was the last time that China ever attempted to conquer Japan, whose people boast that their land has never been defiled by an invading army. They have ever ascribed the glory of the destruction of the Tartar fleet to the interposition of the gods at Isé, who thereafter received special and grateful adoration as the guardian of the seas and winds. Great credit and praise were given to the lord of Kamakura, Hōjō Tokimuné, for his energy, ability, and valor. The author of the *Guai Shi* says, "The repulse of the Tartar barbarians by Tokimuné, and his preserving the dominions of our Son of Heaven, were sufficient to atone for the crimes of his ancestors."

Nearly six centuries afterward, when "the barbarian" Perry anchored his fleet in the Bay of Yedo, in the words of the native annalist, "Orders were sent by the imperial court to the Shintō priests at Isé to offer up prayers for the sweeping-away of the barbarians." Millions of earnest hearts put up the same prayers as their fathers had offered, fully expecting the same result.

To this day the Japanese mother in Kiushiu hushes her fretful infant by the question, "Do you think the Mogu (Mongols) are coming?" This is the only serious attempt at invasion ever made by any nation upon the shores of Japan.

XVIII.

THE TEMPORARY MIKADOATE.

THE first step taken after the overthrow of the military usurpation at Kamakura was to recall the mikado Go-Daigo from exile. With the sovereign again in full power, it seemed as though the ancient and rightful government was to be permanently restored. The military or dual system had lasted about one hundred and fifty years, and patriots now hoped to see the country rightly governed, without intervention between the throne and the people. The rewarding of the victors who had fought for him was the first duty awaiting the restored exile. The methods and procedure of feudalism were now so fixed in the general policy of the Government, that Go-Daigo, falling into the ways of the Minamoto and Hōjō, apportioned military fiefs as guerdons to his vassals. Among them was Ashikaga Takauji, to whom was awarded the greatest prize, consisting of the rich provinces of Hitachi, Musashi, and Shimōsa. To Kusunoki Masashigé were given Settsu and Kawachi; and to Nitta, Kōdzuké and Harima, besides smaller fiefs to many others.

This unfair distribution of spoils astounded the patriots, who expected to see high rank and power conferred upon Nitta and Kusunoki, the chief leaders in the war for the restoration, and both very able men. It would have been well had the emperor seen the importance of disregarding the claims and privileges of caste, and exalted to highest rank the faithful men who were desirous of maintaining the dignity of the throne, and whose chief fear was that the duarchy would again arise. Such a fear was by no means groundless, for Ashikaga, elated at such unexpected favor, became inflamed with a still higher ambition, and already meditated refounding the shōgunate at Kamakura, and placing his own family upon the military throne. Being of Minamoto stock, he knew that he had prestige and popularity in his favor, should he attempt the re-erection of the shōgunate. Most of the common soldiers had fought rather against Hōjō than against duarchy. The emperor was warned against this man by his ministers;

but in this case a woman's smiles and caresses and importunate words were more powerful than the advice of sages. Ashikaga had bribed the mikado's concubine Kadoko, and had so won her favor that she persuaded her imperial lord to bestow excessive and undeserved honor on the traitor.

The distribution of spoils excited discontent among the soldiers, who now began to lose all interest in the cause for which they had fought, and to murmur privately among themselves. "Should such an unjust government continue," said they, "then are we all servants of concubines and dancing-girls and singing-boys. Rather than be the puppets of the mikado's amusers, we would prefer a shōgun again, and become his vassals." Many of the captains and smaller clan-leaders were also in bad humor over their own small shares. Ashikaga Takauji took advantage of this feeling to make himself popular among the disaffected, especially those who clung to arms as a profession and wished to remain soldiers, preferring war to peace. Of such inflammable material the latent traitor was not slow to avail himself when it suited him to light the flames of war.

Had the mikado listened to his wise counselor, and also placed Kusunoki in an office commensurate with his commanding abilities, and rewarded Nitta as he deserved, the century of anarchy and bloodshed which followed might have been spared to Japan.

Go-Daigo, who in the early years of his former reign had been a man of indomitable courage and energy, seems to have lost the best traits of his character in his exile, retaining only his imperious will and susceptibility to flattery. To this degenerate Samson a Delilah was not wanting. He fell an easy victim to the wiles of one man, though the shears by which his strength was shorn were held by a woman. Ashikaga was a consummate master of the arts of adulation and political craft. He was now to further prove his skill, and to verify the warnings of Nitta and the ministers. The emperor made Moriyoshi, his own son, shōgun. Ashikaga, jealous of the appointment, and having too ready access to the infatuated father's ear, told him that his son was plotting to get possession of the throne. Moriyoshi, hating the flatterer, and stung to rage by the base slander, marched against him. Ashikaga now succeeded by means of his ally in the imperial bed in making himself, in the eyes of the mikado, the first victim to the conspiracies of the prince. So great was his power over the emperor that he obtained from the imperial hand a decree to punish his enemy Moriyoshi as a *chōtéki*, or rebel, against the mikado.

ave a striking instance of what, in the game of Japanese ay be called the checkmate move, or, in the native idiom, hand." It is difficult for a foreigner to fully appreciate ttaching to the mikado's person—a prestige never dimin- natter how low his actual measure of power, the meanness er, or the insignificance of his personal abilities, he was eaven, his word was law, his command omnipotent. He ain of all rank and authority. No military leader, how- s resources or ability, could win the popular heart or nate success unless appointed by the emperor. He who of Heaven in his power was master. Hence it was the of all the military leaders, even down to 1868, to obtain e imperial person. However wicked or villainous the mikado, he was master of the situation. His enemies or rebels against the Son of Heaven; his own soldiers *-gun*, or loyal army. Even might could not make right. the divine person was more than nine-tenths—it was f the law.

then, being *chōtéki*, was doomed. Ashikaga, having the r, had the *kuan-gun*, and was destined to win. The sad mperor's son awakens the saddest feelings, and brings

clothed with authority. He was, in popular estimation, a rebel of the deepest dye. In such a predicament he could not safely remain a day. The people would take the side of the emperor. What should he do? His vigor, acuteness, and villainy were equal. The Hōjō had deposed and set up emperors. It was Ashikaga who divided the allegiance of the people, gave Japan a War of the Roses (or Chrysanthemums), tilled the soil for feudalism, and lighted the flames of war that made Kiōto a cock-pit, abandoned the land for nearly two centuries and a half to slaughter, ignorance, and paralysis of national progress. To clothe his acts with right, he made a new Son of Heaven. He declared Kogen, who was of the royal family, emperor. In 1336, this new Son of Heaven gave Ashikaga the title of Sei-i Tai Shōgun. Kamakura again became the military capital. The duarchy was restored, and the War of the Northern and the Southern Dynasties began, which lasted fifty-six years.

Ashikaga Takauji, Sei-i Tai Shōgun. (From a photograph taken from a wooden statue in a temple in Kiōto.)

The period 1333–1336, though including little more than two years of time, is of great significance as marking the existence of a temporary mikadoate. The fact that it lasted so short a time, and that the duarchy was again set up on its ruins, has furnished both natives and foreigners with the absurd and specious, but strongly urged, argument that the Government of Japan, by a single ruler from a single centre, is an impossibility, and that the creation of a dual system with a "spiritual" or nominal sovereign in one part of the empire, and a military or "secular" ruler in another, is a necessity.

tation of the question concerning the abolition of the d the restoration of the mikado in 1860–1868, one of nents of the adherents of the shōgunate against the gitators, was the assertion that the events of the period ved that the mikado could not alone govern the coun- must have duarchy. Even after the overthrow of the 1868, foreigners, as well as natives, who had studied y, fully believed and expected that in a year or two ado's Government would be overthrown, and the "Ty- power, basing their belief on the fact that the mika- -1336 did not last. Whatever force such an argu- ve had when Japan had no foreign relations, and no oil to disturb the balance between Kiōto and Kama- n that it counts for naught when, under altered condi- n the united front of the whole empire* is now re- with the political pressure from without.

rs, and one as late as 1873, dispute the right of Japan to be ," and the mikados to be styled "emperor," "inasmuch as they t tribute to the Emperor of China." As matter of fact, none r did this, though one shōgun (Ashikaga Yoshimitsŭ, page 195) ks, and even the official gazettes of Peking, speak of all nations

XIX.

THE WAR OF THE CHRYSANTHEMUMS.

THE dynasty of the imperial rulers of Japan is the oldest in the world. No other family line extends so far back into the remote ages as the nameless family of mikados. Disdaining to have a family name, claiming descent, not from mortals, but from the heavenly gods, the imperial house of the Kingdom of the Rising Sun occupies a throne which no plebeian has ever attempted to usurp. Throughout all the vicissitudes of the imperial line, in plenitude of power or abasement of poverty, its members deposed or set up at the pleasure of the upstart or the political robber, the throne itself has remained unshaken. Unclean hands have not been laid upon the ark itself. As in the procession of life on the globe the individual perishes, the species lives on, so, though individual mikados have been dethroned, insulted, or exiled, the prestige of the line has never suffered. The loyalty or allegiance of the people has never swerved. The soldier who would begin revolution, or who lusted for power, would make the mikado his tool; but, however transcendent his genius and abilities, he never attempted to write himself mikado. No Japanese Cæsar ever had his Brutus, nor Charles his Cromwell, nor George his Washington. Not even, as in China, did one dynasty of alien blood overthrow another, and reign in the stead of a destroyed family. Such events are unknown in Japanese annals. The student of this people and their unique history can never understand them or their national life unless he measures the mightiness of the force, and recognizes the place of the throne and the mikado in the minds and hearts of its people.

There are on record instances in which the true heirship was declared only after bitter intrigue, quarrels, or even bloodshed. In the tenth century, Taira no Masakado, disappointed in not being appointed Dai Jō Dai Jin, left Kiōto, went to Shimōsa in the Kuanto, and set himself up as Shinnō, or cadet of the imperial line, and temporarily

provinces of the East as a pseudo-mikado.* In 1139,

sakado, or, as we should say, Masakado Taira, was a man of great
scrupulous character. He was at first governor of Shimōsa, but
ver all the East. He built a palace on the same model as that
Sajima, in Shimotsuké, and appointed officers similar to those
ourt. He killed his uncle, who stood in the way of his ambition,

then made heir. Go-Daigo's third son Moriyoshi, however, as he grew up, showed great talent, and his father regretted that he had consented to the choice of Kogen, and wished his own son to succeed him. He referred the matter to Hōjō at Kamakura, who disapproved of the plan. Those who hated Hōjō called Kogen the "false emperor," refusing to acknowledge him. When Nitta destroyed Kamakura, and Go-Daigo was restored, Kogen retired to obscurity. No one for a moment thought of or acknowledged any one but Go-Daigo as true and only mikado. When, however, Ashikaga by his treachery had alienated the emperor from him, and was without imperial favor, and liable to punishment as a rebel, he found out and set up Kogen as mikado, and proclaimed him sovereign. Civil war then broke out.

Into the details of the war between the adherents of the Northern emperor, Ashikaga, with his followers, on the one side, and Go-Daigo, who held the insignia of authority, backed by a brilliant array of names famous among the Japanese, on the other, I do not propose to enter. It is a confused and sickening story of loyalty and treachery, battle, murder, pillage, fire, famine, poverty, and misery, such as make up the picture of civil wars in every country. Occasionally in this period a noble deed or typical character shines forth for the admiration or example of succeeding generations. Among these none have exhibited more nobly man's possible greatness in the hour of death than Nitta Yoshisada and Kusunoki Masashigé.

On one occasion the army of Nitta, who was fighting under the flag of Go-Daigo, the true emperor, was encamped before that of Ashikaga. To save further slaughter, Nitta sallied out alone, and, approaching his enemy's camp, cried out: "The war in the country continues long. Although this has arisen from the rivalry of two emperors, yet its issue depends solely upon you and me. Rather than millions of the people should be involved in distress, let us determine the question by single combat." The retainers of Ashikaga prevailed on their commander not to accept the challenge. In 1338, on the second day of the Seventh month, while marching with about fifty followers to assist in investing a fortress in Echizen, he was suddenly attacked in a narrow path in a rice-field near Fukui by about three thousand of the enemy, and exposed without shields to a shower of arrows. Some one begged Nitta, as he was mounted, to escape. "It is not my desire to survive my companions slain," was his response. Whipping up his horse, he rode forward to engage with his sword, making himself the target for a hundred archers. His horse, struck when at full

arrow, fell. Nitta, on clearing himself and rising, was hit
eyes with a white-feathered shaft, and mortally wounded.
s sword, he cut off his own head—a feat which the war-
time were trained to perform—so that his enemies might
ze him. He was thirty-eight years old. His brave little
lain by arrows, or killed themselves with their own hand,
ight die with their master. The enemy could not recog-
until they found, beneath a pile of corpses of men who
ted *hara-kiri*, a body on which, inclosed in a damask bag,
containing the imperial commission in Go-Daigo's hand-
invest you with all power to subjugate the rebels." Then
he corpse to be that of Nitta. His head was carried to
in possession of Ashikaga, and exposed in public on a
e tomb of this brave man stands, carefully watched and

ed it in my walks, when living in Fukui in 1871, and no-
esh blooming flowers were almost daily laid upon it—the
admiring people. A shrine and monument *in memoriam*
in his native place during the year 1875.
Kusunoki, after a lost battle at Minatogawa, near Hiōgo,
red continual defeat, his counsels having been set at

his twelfth year he cut off the head of an enemy, and at fifteen studied the Chinese military art, and made it the solemn purpose of his life to overthrow the Kamakura usurpation, and restore the mikado to power. In 1330, he took up arms for Go-Daigo. He was several times besieged by the Hōjō armies, but was finally victorious with Nitta and Ashikaga. When the latter became a rebel, defeated Nitta, and entered Kiōto in force, Kusunoki joined Nitta, and thrice drove out the troops of Ashikaga from the capital. The latter then fled to the West, and Kusunoki advised the imperialist generals to follow them up and annihilate the rebellion. His superiors, with criminal levity, neglecting to do this, the rebels collected together, and again advanced, with increased strength by land and water, against Kiōto, having, it is said, two hundred thousand men. Kusunoki's plan of operations was rejected, and his advice ignored. With Nitta he was compelled to bear the brunt of battle against overwhelming forces at Minato gawa, near Hiōgo, and was there hopelessly defeated. Kusunoki, now feeling that he had done all that was possible to a subordinate, and that life was no longer honorable, retired to a farmer's house at the village of Sakurai, and there, giving him the sword bestowed on himself by the mikado, admonished his son Masatsura to follow the soldier's calling, cherish his father's memory, and avenge his father's death. Sixteen of his relatives, with unquailing courage, likewise followed their master in death.

Of all the characters in Japanese history, that of Kusunoki Masashigé stands pre-eminent for pureness of patriotism, unselfishness of devotion to duty, and calmness of courage. The people speak of him in tones of reverential tenderness, and, with an admiration that lacks fitting words, behold in him the mirror of stainless loyalty. I have more than once asked my Japanese students and friends whom they considered the noblest character in their history. Their unanimous answer was "Kusunoki Masashigé." Every relic of this brave man is treasured up with religious care; and fans inscribed with poems written by him, in fac-simile of his handwriting, are sold in the shops and used by those who burn to imitate his exalted patriotism.* His son Masatsura lived to become a gallant soldier.

* I make no attempt to conceal my own admiration of a man who acted according to his light, and faced his soldierly ideal of honor, when conscience and all his previous education told him that his hour had come, and that to flinch from the suicidal thrust was dishonor and sin. No enlightened Japanese of today would show himself brave by committing *hara-kiri*, as the most earnest writers,

which at first was waged with the clearly defined object
he question of the supremacy of the rival mikados, gradual-
ue character, and finally degenerated into a *mêlée* and free
national scale. Before peace was finally declared, all the
lers had died, and the prime object had been, in a great
gotten in the lust for land and war. Even the rival em
much of their interest, as they had no concern in brawls
tty chieftains sought to exalt their own name, and increase
ry by robbing their neighbors. In 1392, an envoy from
ersuaded Go-Kaméyama to come to Kiōto and hand over
to Go-Komatsu, the Northern emperor. The basis of
that Go-Kaméyama should receive the title of Dai Jō
mperor), Go-Komatsu be declared emperor, and the throne
alternately by the rival branches of the imperial family.
ny of abdication and surrender of regalia, on the one
of investiture, on the other, were celebrated with due
olemnity in one of the great temples in the capital, and
fifty-six years' duration ceased. All this redounded to
d power of the Ashikaga.

d 1336–1392 is of great interest in the eyes of all native

XX.

THE ASHIKAGA PERIOD.

THE internal history of Japan during the period of time covered by the actual or nominal rule of the thirteen shōguns of the Ashikaga family, from 1336 until 1573, except that portion after the year 1542, is not very attractive to a foreign reader. It is a confused picture of intestine war.

Ashikaga Takauji, the founder of the line, was a descendant of the Minamoto Yoshikuni, who had settled at Ashikaga, a village in Shimotsuké, in the eleventh century. He died in 1356. His grandson Yoshimitsu, called the Great Ashikaga, was made shōgun when ten years old, and became a famous warrior in the South and West. After the union of the two dynasties, he built a luxurious palace at Kiōto, and was made Dai Jō Dai Jin. He enjoyed his honors for one year. He then retired from the world to become a shaven monk in a Buddhist monastery.

Under the Hōjō, the office of shōgun was filled by appointment of the imperial court; but under the Ashikaga the office became hereditary in this family. As usual, the man with the title was, in nearly every case, but a mere figure-head, wielding little more personal power than that of the painted and gilded simulacrum of the admiral that formerly adorned the prow of our old seventy-four-gun ships. During this period the term Kubō sama, applied to the shōguns, and used so frequently by the Jesuit fathers, came into use. The actual work of government was done by able men of inferior rank. The most noted of these was Hosokawa Yoriyuki, who was a fine scholar as well as a warrior. It was through his ordering that the young shōgun Yoshimitsu was well trained, and had for his companions noble youths who excelled in literary and military skill. This was vastly different from Hōjō Tokimasa's treatment of the sons of Yoritomo. He attempted the reform of manners and administration. He issued five mottoes for the conduct of the military and civil officers. They were: 1. Thou shalt not be partial in amity or enmity. 2. Thou shalt return neither

geance. 3. Thou shalt not deceive, either with a right
[motive]. 4. Thou shalt not hope dishonestly [for a
ou shalt not deceive thyself.

um of power during this period oscillated between Kiō-
kura; a tai (or "great") shōgun ruling at the former,
at the latter place. An officer called the *shikken* was
of the capital and the central provinces; and another
n-rei (Governor of the Kuantō), of Kamakura and the
as the rule, peace the exception. Feudal fights; border
eizure of lands; the rise of great clans; the building,
the destruction of castles, were the staple events. Every
s now a stronghold, an arsenal, or a camp. The issue
r a campaign was often decided by the support which
ve to one or the other party. The most horrible ex-
mmitted, the ground about Kiōto and Kamakura, both
captured and recaptured many times, became like the
l-pits) of the execution-ground. Villages, cities, temples,
nd libraries were burned. The fertile fields lay waste,
fire, or covered from sight, as with a cloth, by dense

ly frequent during this period. The public morals became frightfully corrupted, religion debased. All kinds of strange and uncouth doctrines came into vogue. Prostitution was never more rampant. It was the Golden Age of crime and anarchy.

The condition of the emperors was deplorable. With no revenues, and dwelling in a capital alternately in the possession of one or the other hostile army; in frequent danger from thieves, fire, or starvation; exposed to the weather or the dangers of war, the narrative of their sufferings excites pity in the mind of even a foreign reader, and from the native draws the tribute of tears. One was so poor that he depended upon the bounty of a noble for his food and clothing; another died in such poverty that his body lay unburied for several days, for lack of money to have him interred. The remembrance of the wrongs and sufferings of these poor emperors fired the hearts and nerved the arms of the men who in 1868 fought to sweep away forever the hated system by which such treatment of their sovereign became possible.

So utterly demoralized is the national, political, and social life of this period believed to have been, that the Japanese people make it the limbo of all vanities. Dramatists and romancers use it as the convenient ground whereon to locate every novel or play, the plot of which violates all present probability. The chosen time of the bulk of Japanese dramas and novels written during the last century or two is that of the late Ashikagas. The satirist or writer aiming at contemporary folly, or at blunders and oppression of the Government, yet wishing to avoid punishment and elude the censor, clothes his characters in the garb and manners of this period. It is the potter's field where all the outcasts and Judases of moralists are buried. By common consent, it has become the limbo of playwright and romancer, and the scape-goat of chronology.

The act by which, more than any other, the Ashikagas have earned the curses of posterity was the sending of an embassy to China in 1401, bearing presents acknowledging, in a measure, the authority of China, and accepting in return the title of Nippon Ō, or King of Japan. This, which was done by Ashikaga Yoshimitsu, the third of the line, was an insult to the national dignity for which he has never been forgiven. It was a needless humiliation of Japan to her arrogant neighbor, and done only to exalt the vanity and glory of the usurper Ashikaga, who, not content with adopting the style and equipage of the mikado, wished to be made or called a king, and yet dared

imperial throne.* The punishment of Ashikaga is the
rity. In 1853, when the treaty with the United States
imilar insult to the sovereign and the nation, as well as
e deception of the American envoy and foreigners, was
he shōgun calling himself "Tycoon" (Great King, or
Japan). In this latter instance, as we know, came not
thema of future generations, but the swift vengeance of
nent humiliation, the exile to obscurity, of the Tokugawa
abolition of the shōgunate and the dual system forever.
ng the first of the last three decades of the Ashikaga
apan became known to the nations of Europe; while
owder, and a new and mighty faith were made known
e nation.

XXI.

LIFE IN THE MIDDLE AGES.

History, as usually written, gives the impression that the normal condition of mankind is that of war. Japanese students who take up the history of England to read, lay it down convinced that the English people are a blood-loving race that are perpetually fighting. They contrast their own peaceful country with the countries of Europe, to the detriment of the latter. They turn most gladly from the monotonous story of battle, murder, and sieges, to Buckle, Guizot, or Lecky, that they may learn of the victories no less renowned than those of war which mark as mile-stones the progress of the race. I greatly fear that from lack of literary skill my readers will say that my story of Japan thus far is a story of bloody war; but such, indeed, it is as told in their own histories. Permanent, universal peace was unknown in Japan until, by the genius of Iyéyasŭ in the sixteenth century, two centuries and a half of this blessing were secured. Nevertheless, in the eight centuries included between the eighth and the sixteenth of our era were many, and often lengthened, intervals of peace. In many sequestered places the sandal of the warrior and the hoof of the war-horse never printed the soil. Peace in the palace, in the city, in the village, allowed the development of manners, arts, manufactures, and agriculture. In this period were developed the characteristic growths of the Japanese intellect, imagination, social economy, and manual skill that have made the hermit nation unique in the earth and Japanese art productions the wonder of the world.

In this chapter, I shall simply glance at some of the salient features of life in Japan during the Middle Ages.

The introduction of continental or Chinese civilization into Japan was not a simple act of adoption. It was rather a work of selection and assimilation. As in this nineteenth century, the Japanese is no blind copyist, he improves on what he borrows. Although the traveler from China entering Japan can see in a moment whence the Japanese have borrowed their civilization, and though he may believe the

an inferior type to that of the Chinese, he will ac-
the Japanese have improved upon their borrowed ele-
much as the French have improved upon those of
ion. Many reflecting foreigners in Japan have asked
hy the Japanese are so unlike the Chinese, and why
ure, laws, customs, dress, workmanship, all bear a stamp
emselves, though they received so much from them?
to be found in the strength and persistence of the
e type of character, as influenced by nature, enabling
ous alteration and radical change. The greatest con-
any of the imparted elements of continental civiliza-
of Buddhism, which became within ten centuries the
ular religion. Yet even its conquests were but partial.
s secured only by its adulteration. Japanese Buddhism
oduct among the many forms of that Asiatic religion.
ired life and growth on Japanese soil only by being
being grafted on the original stock of ideas in the Japa-
hus, in order to popularize the Indian religion, the an-
eroes and the local gods were all included within the
heon, and declared to be the incarnations of Buddha in

the warrior after war, the prince and the minister leaving the palace, the honors and pomp of the world, could retire to spend the remnant of their days in prayer, worship, and the offices of piety. Often the murderer, struck with remorse, or the soldier before his bloody victim, would resolve to turn monk. Not rarely did men crossed in love, or the offspring of the concubine displaced by the birth of the legitimate son, or the grief-stricken father, devote himself to the priestly life. In general, however, the ranks of the bonzes were recruited from orphans or piously inclined youth, or from overstocked families. To the nunneries, the fertile soil of bereavement, remorse, unrequited love, widowhood furnished the greater number of sincere and devout nuns. In many cases, the deliberate choice of wealthy ladies, or the necessity of escaping an uncongenial marriage planned by relatives, undesirable attentions, or the lusts of rude men in unsettled times, gave many an inmate to the convents.

In general, however, natural indolence, a desire to avoid the round of drudgery at the well, the hoe, or in the kitchen, or as nurse, sent the majority of applicants to knock at the convent doors. Occasionally a noble lady was won to recluse life from the very apartments of the emperor, or his ministers, by the eloquence of a bonze who was more zealous than loyal. In a few of the convents, only ladies of wealth could enter. The monk and nun, in Japanese as in European history, romance, and drama, and art, are staple characters. The rules of these monastic institutions forbade the eating of fish or flesh, the drinking of saké, the wearing of the hair or of fine clothes, indulgence in certain sensuous pleasures, or the reading of certain books. Fastings, vigils, reflection, continual prayer by book, bell, candle, and beads, were enjoined. Pious pilgrimages were undertaken. The erection of a shrine, image, belfry, or lantern by begging contributions was a frequent and meritorious enterprise. There stand today thousands of these monuments of the piety, zeal, and industry of the mediæval monks and nuns. Those at Nara and Kamakura are the most famous. The Kamakura Dai Butsŭ (Great Buddha) has been frequently described before. It is a mass of copper 44 feet high, and a work of high art. The image at Nara was first erected in the eighth century, destroyed during the civil wars, and recast about seven hundred years ago. Its total height is 53½ feet; its face is 16 feet long, and 9½ feet wide. The width of its shoulders is $28\frac{7}{10}$ feet. Nine hundred and sixty-six curls adorn its head, around which is a halo 78 feet in diameter, on which are sixteen images, each 8 feet long. The

dol is said to have been tried seven times before it was
omplished, and 3000 tons of charcoal were used in the
e metal, said to weigh 450 tons, is a bronze composed

6,080 pounds). Many millions of tons of copper were
ted to make these idols. Equally renowned were the
lls of Kiōto, and of Miidera, and various other monas-
of these were ten feet high, and adorned with sacred

the mellow music of a Japanese temple-bell. On a still night, a circumference of twenty miles was flooded by the melody of the great bell of Zōzōji. The people learned to love their temple-bell as a dear friend, as its note changed with the years and moods of life.

The casting of a bell was ever the occasion of rejoicing and public festival. When the chief priest of the city announced that one was to be made, the people brought contributions in money, or offerings of bronze gold, pure tin, or copper vessels. Ladies gave with their own hands the mirrors which had been the envy of lovers, young girls laid their silver hair-pins and *bijouterie* on the heap. When metal enough and in due proportion had been amassed, crucibles were made, earth-furnaces dug, the molds fashioned, and huge bellows, worked by standing men at each end, like a seesaw, were mounted; and, after due prayers and consultation, the auspicious day was appointed. The place selected was usually on a hill or commanding place. The people, in their gayest dress, assembled in picnic parties, and with song and dance and feast waited while the workmen, in festal uniform, toiled, and the priests, in canonical robes, watched. The fires were lighted, the bellows oscillated, the blast roared, and the crucibles were brought to the proper heat and the contents to fiery fluidity, the joy of the crowd increasing as each stage in the process was announced. When the molten flood was finally poured into the mold, the excitement of the spectators reached a height of uncontrollable enthusiasm. Another pecuniary harvest was reaped by the priests before the crowds dispersed, by the sale of stamped kerchiefs or paper containing a holy text, or certifying to the presence of the purchaser at the ceremony, and the blessing of the gods upon him therefor. Such a token became an heir-loom; and the child who ever afterward heard the solemn boom of the bell at matin or evening was constrained, by filial as well as holy motives, to obey and reverence its admonitory call. The belfry was usually a separate building apart from the temple, with elaborate cornices and roof. (See page 172.)

In addition to the offices of religion, many of the priests were useful men, and real civilizers. They were not all lazy monks or idle bonzes. By the Buddhist priests many streams were spanned with bridges, paths and roads made, shade or fruit trees planted, ponds and ditches for purposes of irrigation dug, aqueducts built, unwholesome localities drained, and mountain passes discovered or explored. Many were the school-masters, and, as learned men, were consulted on subjects beyond the ken of their parishioners. Some of them, having a

medicine, acted as physicians. The sciences and arts in much to the bonzes who from Corea personally introseful appliances or articles of food. Several edible vegll named after the priests, who first taught their use. nces, astronomy and mathematics, as well as the humanh of their cultivation and development to clerical scholnonasteries, the brethren exercised their varied gifts in ly, calligraphy, carving, sculpture, or on objects of ec-

nents by which the memory of many a saintly bonze is n exist to-day as treasures on the altars, or in the temy precincts, in winged words or material substance. A uddhist Scriptures, a sacred classic, in roll or bound volcupy a holy penman before his brush and ink-stone for anuscript texts which I have often seen in the hall of lky paper bound in damask, in Japanese monasteries, mproved in elegance and accuracy by the printer's art. ion of a sutra on silk, made to adorn the wall of a shrine, performed its mission for centuries.

onk excelled in improvisation of sacred stanzas, another ctures and scrolls by which the multitude were taught

cation of violet lacquer, and the ancient *cloisonné* enamel. The delicacy of tact, freedom of movement, and perfection of finish visible on Japanese work, are the result of long hereditary application and concentrated skill. Hidden away in sequestered villages, or occupying the same workshop in cities for centuries, generations of craftsmen wrought upon one class of objects, until from the workman's hand is born the offspring of a long pedigree of thought and dexterity. Japanese antiquarians fix the date of the discovery of lacquer-ware variously at A.D. 724 and 900. Echizen, from the first, has been noted for the abundance and luxuriant yield of lacquer-trees, and the skill of her

Chasing Floral Designs from Nature on Copper.

workmen in extracting the milk-white virgin sap, which the action of the air turns to black, and which by pigments is changed to various colors. In the thirteenth century the art of gold-lacquering attained the zenith of perfection. Various schools of lacquer art were founded, one excelling in landscape, another in marine scenery, or the delineation, in gold and silver powder and varnish, of birds, insects, and flowers. The masters who flourished during the Hōjō period still rule the pencil of the modern artist.

Kiōto, as the civil and military as well as ecclesiastical capital of the empire, was the centre and standard of manners, language, and

rt, literature, religion, and government. No people are
and polished in their manners than the Japanese, and
ōto in 1873 impressed me with the fact that the citizens
miako surpass all others in Japan in refined manners,
s of address and etiquette. The direct influences of
made themselves perceptibly felt on the inhabitants of

immortal classic. Almost every mansion of the nobles had its "looking-room," or "Chamber of Inspiring View," whence to gaze upon the landscape or marine scenery. Rooms set apart for this æsthetic pleasure still form a feature of the house of nearly every modern native of means. On many a coigne of vantage may be seen also the summer-houses or rustic booths, where gather pleasure parties on picnics.

Picnic Booth, overlooking Lake Biwa.

In the civil administration of the empire, the chief work was to dispense justice, punish offenders, collect taxes, and settle disputes. After the rude surveys of those days, the boundaries of provinces and departments were marked by inscribed posts of wood or stone. Before the days of writing, the same end was secured by charcoal buried in the earth at certain points, the durability of which insured the mark against decay. The peasants, after the rice-harvest was over, brought their tribute, or taxes, with joyful ceremony, to the government granaries in straw bags, packed on horses gayly decorated with scarlet housings, and jingling with clusters of small bells. A relic of this custom is seen in the bunches of bells suspended by red cotton

e rear of the pack-saddle, which dangle musically from haunches of the native sumpters.

est times there existed *séki* (guard gates or barriers) be- ious provinces at mountain passes or strategic points. developed, they grew more numerous. A fence of pal- ed across the road, guarded the path through which, ac- ne, or orders of the keepers, none could pass with arms, e pass-word or passport. Anciently they were erected at nd other mountain passes, to keep up the distinction be- ōs and the pure Japanese. The possession of these bar- an important object of rival military commanders, and ices, and extraordinary artifices resorted to by refugees, hies, and forbidden characters, furnish the historian, the dramatist with some of their most thrilling episodes.

d of Yoshitsuné, after he had incurred the wrath of t, with Benkei, his servant, he arrived at a guard gate Genji soldiers, who would have been sure to arrest him overed his august personality. Disguised as wandering Buddhist sect Yama-bushi, they approached the gate, llenged by the sentinel, who, like most of his class at ignorant of writing. Benkei, with great dignity, draw-

tion of needles into living tissues for remedial purposes, was much improved by the Japanese. The puncturing needles, as fine as a hair, were made of gold, silver, or tempered steel, by experts. The bones, large nerves, or blood-vessels were carefully avoided in the process, which enjoyed great repute in cases of a peculiar violent colic, to which the natives are subject, and which sometimes becomes endemic. On the theory that this malady was caused by wind, holes were made in the stomach or abdomen, to the mystic number of nine—corresponding to the nine apertures of the body. Moxa (Japanese, *mokusa; mo*, fire, from *moyeru*, to burn, and *kusa*, herb, grass), or the burning of a small cone of cottony fibres of the artemisia, on the back or feet, was practiced as early as the eleventh century, reference being made to it in a poem written at that time. A number of ancient stanzas and puns relating to Mount Ibuki, on the sides of which the mugwort grows luxuriantly, are still extant. To this day it is an exception to find the backs of the common people unscarred with the spots left by the moxa. The use of mercury in corrosive sublimate was very anciently known. The dō-sha powder, however, which was said to cure various diseases, and to relax the rigid limbs of a corpse, was manufactured and sold only by the bonzes (Japanese, *bōzu*) of the Shin Gon sect. It is, and always was, a pious fraud, being nothing but unefficacious quartz sand, mixed with grains of mica and pyrites.*

Of the mediæval sports and pastimes within and without of doors, the former were preferred by the weak and effeminate, the latter by the hale and strong. Banquets and carousals in the palace were frequent. The brewing of saké from rice was begun, according to record,

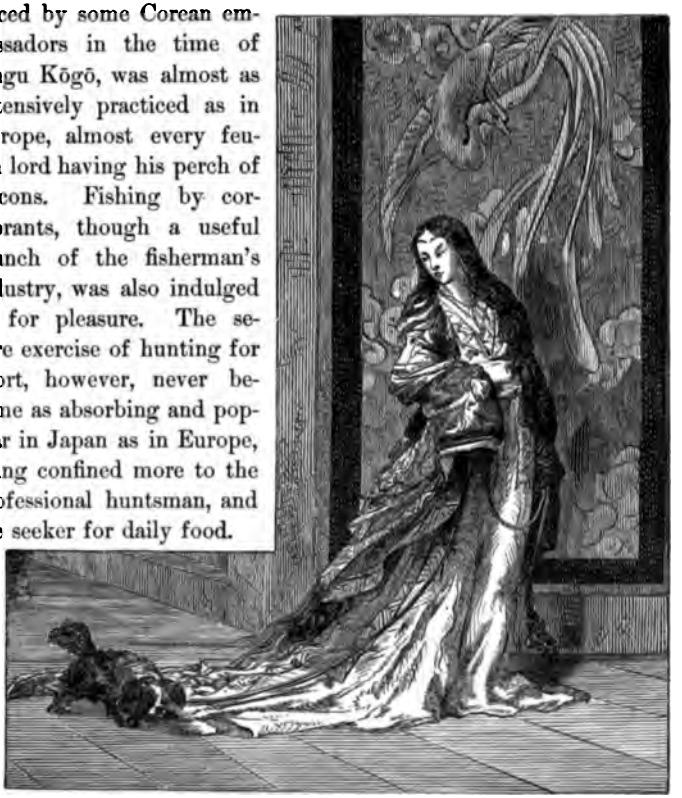
* See in Titsingh a long account of the wonderful virtues and effects claimed for the dō-sha ("dosia") powder, and in various other old writers on Japan, who have gravely described this humbug. I once tested this substance thoroughly by swallowing a tea-spoonful, without experiencing any effects. It might cause, but not cure, a headache. I also used up a packageful of the holy sand, purchased at an orthodox Shin Gon temple, upon a stiffened corpse that had but a short time previous become such, but no unlimbering of the rigid body took place. I also fused a quantity of the certified "drug" with some carbonate of soda, dissolved the resultant mass in distilled water, and upon adding a few drops of hydrochloric acid, a precipitate of gelatinous silica was the result. I also subjected the dō-sha to careful microscopic examination, finding it only quartz sand, with flakes of other minerals. That the "corpse" in my experiment was that of an old dog does not affect the validity of the test. It may be remembered also that gelatinous silica is the substance sometimes used to adulterate butter. The main objection to such butter is that one can buy sand in a cheaper form; and the same may be said of that nostrum in the ecclesiastical quackery and *materia theologica* of Japan called *dō-sha*.

entury, and the office of chief butler even earlier. The *shō-yu*, made of fermented wheat and beans, with salt which the cunning purveyors of Europe use as the basis priced piquant sauces, was made and used as early as the ry. The name of this saline oil (*shō*, salt; *yu*, oil) ap- " in our dictionaries, it being one of the three words noxa) which we have borrowed from the Japanese. At ides the wine and delicacies to please the palate, music, ce made the feast of reason and the flow of soul, while utiful women lent grace and added pleasure to the fes-

Japanese ladies have ted for neatness, good taste, and, on proper occasions, luxuriance of dress. With fan, and waving long sleeve,

or skill at the *koto*, the *geisha*, or singing-girl, then as now, served the saké, danced, sung, and played, and was rewarded by the gold or gifts of the host, or perhaps became his Hagar. The statement that the empress was attended only by "vestals who had never beheld a man" is disproved by a short study of the volumes of poetry, amorous and otherwise, written by them, and still quoted as classic. As to the standard of virtue in those days, I believe it was certainly not below that of the later Roman empire, and I am inclined to believe it was far above it.

In the court at Kiōto, besides games of skill or chance in the house, were foot-ball, cock-fighting, falconry, horsemanship, and archery. The robust games of the military classes were hunting the boar, deer, bear, and smaller game. Hunting by falcons, which had been introduced by some Corean embassadors in the time of Jingu Kōgō, was almost as extensively practiced as in Europe, almost every feudal lord having his perch of falcons. Fishing by cormorants, though a useful branch of the fisherman's industry, was also indulged in for pleasure. The severe exercise of hunting for sport, however, never became as absorbing and popular in Japan as in Europe, being confined more to the professional huntsman, and the seeker for daily food.



Court Lady in Kiōto.

containing fifty-four chapters in all, which she finished in a few weeks. She presented it to the empress-dowager, who gave it to the mikado. To this day it is a classic.

Sei Shonagon was the daughter of Kiyowara no Motosŭké. She was one of the imperial concubines. She was well read in Japanese and Chinese literature, and composed poetry almost from infancy, having a wonderful facility of improvisation. One day, after a fall of snow, she looked out from the southern door of the palace. The emperor, having passed round the wine-cup to his lords and ladies at the usual morning assembly of the courtiers and maids of honor, said, "How is

---

hands, shrugging the shoulders, and the contemptuous gyratory motion of the thumb set against the nose, with the fingers upright. Flirtation is practiced not by the use of the fan or the handkerchief (which is of paper), but with a wave of the right hand, with palms downward, or by the fair charmer waving her long sleeve. Instead of winking, they convey the same meaning by twitching the left corner of the mouth, or rolling the eyeballs to the right or left. The girls simper by letting their eyelids fall, and the language of woman's eyes is in other respects the same as with us, as Japanese poetry shows. Jealousy is indicated by the erecting the two forefingers on the forehead, in allusion to the monster which in Japan has horns and black hide, but not green eyes. A jilt who wishes to give her lover "the mitten" sends him a branch of maple, the color (*iro*) of whose leaves has changed, like her love (*iro*).

Turning up the nose and curling the lip in scorn are achieved with masterly skill. In agony, the hands are not clasped, but put upright, palm to palm, at length. People shake their heads to mean "no," and nod them to mean "yes."

Among the peculiarities in their code of etiquette, eructation is permissible in company at all times, and after a hearty meal is rather a compliment to the host. On the other hand, to attend to the requirements of nasal etiquette, except with face apart from the company, is very bad manners. Toothpicks must not be used, but in a semi-secret way, and with the left hand covering the mouth. At banquets, the fragrant bark on these is carved ornamentally, and under a shaving loosened from the white wood is written in tiny script a pun, witticism, bon-mot, or sentimental proposal, like that on the "secret papers" on bonbons at our refreshments. At feasts or daily meals, all such matters as carving, slicing, etc., are looked upon as out of place, and properly belonging to servant's work and in the kitchen. In clothing, the idea that garments ought to be loose and flowing, so as to conceal the shape of the body and its parts, and give no striking indication of sex, as among us, was never so general as in China. In hair-dressing, besides marking age and sex, the female coiffure had a language of its own. Generally a keen observer could distinguish a maiden, a married wife, a widow who was willing to marry the second time, and the widow who intended never to wed again. As marks of beauty, besides the ideals spoken of on page 30, large ears were thought desirable, especially those with long lobes. Fat people were much admired, and a rotund physique considered a good gift of nature. Many of the striking details of military and social etiquette, such as falling on hands and knees, with forehead on the floor or on the prone hand, and the simultaneous noisy sucking-in of the breath, which sounds and seems so ridiculous to the foreigner, are very ancient.

Kuroho?" No one else understood the meaning, but instantly stepped forward and drew up the curtains, mountains decked in fresh-fallen snow. The emperor and bestowed upon her a prize. Sei Shonagon had allusion to the line in an ancient poem which ran thus:

he snow of Kuroho is seen by raising the curtains."

a certain kugé was traveling in a province, he came, on ight, to a poor village in which the cottages had fallen ie decay, the roofs of which gleamed like silver. The lorified huts inspired the noble with such a fine frenzy all night gazing rapturously on the scene, anon compos- He was so delighted that he planned to remain in the days. The next morning, however, the villagers, hear- sence of so illustrious a guest among them, began busily ruin, and to rethatch the roofs. The kugé, seeing all ons dispelled by this vandal industry, ordered his bullock- ff, disgusted.

first centuries of writing in Japan, the spoken and the ge were identical. With the study of the Chinese liter- composition of works by the native literati almost ex-

find exact equivalents for many expressions desirable in technical theology, or for what may fairly be termed pious slang, but will not use them, for fear of misleading the reader, or rather of failing to lead him out of his old notions into the new faith which it is desired to teach. So general have the use and affectation of Chinese become, that in many instances the pedantic Chinese name or word has been retained in the mouths of the people, while the more beautiful native term is almost lost. In general, however, only the men were devoted to Chinese, while the cultivation of the Japanese language was left to the women. This task the women nobly discharged, fully maintaining the credit of the native literature. Mr. W. G. Aston says, "I believe no parallel is to be found in the history of European letters, to the remarkable fact that a very large proportion of the best writings of the best age of Japanese literature was the work of women." The *Genji Monogatari* is the acknowledged standard of the language for the period to which it belongs, and the parent of the Japanese novel. This, with the classics *Isé Monogatari* and *Makura Zoshi*, and much of the poetry of the time, are the works of women.

It is to be noted that the borrowed Chinese words were taken entirely from the written, not the colloquial, language of China, the latter having never been spoken by the Japanese, except by a few interpreters at Nagasaki. The Japanese literary style is more concise, and retains archaic forms. The colloquial abounds in interjectional and onomatopoetic words and particles, uses a more simple inflection of the verb, and makes profuse use of honorific and polite terms. Though these particles defy translation, they add grace and force to the language. As in the English speech, the child of the wedded Saxon and Norman, the words which express the wants, feelings, and concerns of every-day life—all that is deepest in the human heart—are for the most part native; the technical, scientific, and abstract terms are foreign. Hence, if we would find the fountains of the musical and beautiful language of Japan, we must seek them in the hearts, and hear them flow from the lips, of the mothers of the Island Empire. Among the anomalies with which Japan has surprised or delighted the world may be claimed that of woman's achievements in the domain of letters. It was woman's genius, not man's, that made the Japanese a literary language. Moses established the Hebrew, Alfred the Saxon, and Luther the German tongue in permanent form; but in Japan, the mobile forms of speech crystallized into perennial beauty under the touch of woman's hand.

XXII.

THE GROWTH AND CUSTOMS OF FEUDALISM.

of all the Asiatic nations, seems to have brought the feu-
n to the highest state of perfection. Originating and devel-
the same time as in Europe, it became the constitution of
n and the condition of society in the seventeenth century.
Europe the nations were engaged in throwing off the feudal
inaugurating modern government, Japan was riveting the
feudalism, which stood intact until 1871. From the begin-
he thirteenth century, it had come to pass that there were
two rulers in Japan, and as foreigners, misled by the Hol-
Déshima, supposed, two emperors.

rowth of feudalism in Japan took shape and form from the

caught the tone of life at court, where every man was striving for rank and his own glory, and they were not slow to imitate their august examples. Returning to their homes with the prestige of having been in the capital, they intrigued for power in their native districts, and gradually obtained rule over them, neglecting to go when duty called them to Kiōto, and ignoring the orders of their superiors in the War Department. The civil governors of the provinces dared not to molest, or attempt to bring these petty tyrants to obedience. Having armor, horses, and weapons, they were able to train and equip their dependents and servants, and thus provide themselves with an armed following.

Thus was formed a class of men who called themselves warriors, and were ever ready to serve a great leader for pay. The natural consequence of such a state of society was the frequent occurrence of village squabbles, border brawls, and the levying of black-mail upon defenseless people, culminating in the insurrection of a whole province. The disorder often rose to such a pitch that it was necessary for the court to interfere, and an expedition was sent from Kiōto, under the command of a Taira or Minamoto leader. The shōgun, instead of waiting to recruit his army in the regular manner—a process doubtful of results in the disorganized state of the War Department and of the country in general—had immediate recourse to others of these veteran "warriors," who were already equipped, and eager for a fray.

Frequent repetition of the experience of the relation of brothers in arms, of commander and commanded, of rewarder and rewarded, gradually grew into that of lord and retainers. Each general had his special favorites and followers, and the professional soldier looked upon his commander as the one to whom his allegiance was directly due. The distant court at Kiōto, being utterly unable to enforce its authority, put the whole power of quieting the disturbed districts, whenever the disorder increased beyond the ability of the civil magistrate to repress it, into the hands of the Minamoto and Taira. These families thus became military clans and acquired enormous influence, enjoyed the monopoly of military patronage, and finally became the virtual rulers of the land.

The power of the sword was, as early as the twelfth century, lost to the court, which then attempted, by every means in its power, to check the rising influence of the military families and classes. They began by denying them high rank, thus putting them under social ban.

npted to lay an interdict upon the warriors by forbid-
lly themselves with either the Taira or the Minamoto.

Uyésugi, Sataké, Takéda, the "later Hōjō of Odawara," Mōri, Ōtomo, Shimadzŭ, Riuzoji, Ōta, and Tokŭgawa.

As the authority of the court grew weaker and weaker, the allegiance which all men owed to the mikado, and which they theoretically acknowledged, was changed into loyalty to the military chief. Every man who bore arms was thus attached to some "great name" (daimiō), and became a vassal (kérai). The agricultural, and gradually the other classes, also put themselves, or were forcibly included, under the protection of some castle lord or nobleman having an armed following. The taxes, instead of being collected for the central government, flowed into the treasury of the local rulers. This left the mikado and court without revenue. The kugé, or Kiōto nobles, were thus stripped of wealth, until their poverty became the theme for the caricaturist. Nevertheless, the eye of their pride never dimmed. In their veins, they knew, ran the blood of the gods, while the daimiōs were only "earth-thieves," and the parvenus of feudalism. They still cherished their empty titles; and to all students of history their poverty was more honorable than all the glitter of the shōgun's train, or the splendor of the richest daimiō's mansion.

The daimiōs spent their revenues on their retainers, their personal pleasures, and in building castles. In almost every feudal city, or place of strategic importance, the towers, walls, and moats of these characteristic specimens of Japanese architecture could be seen. The strictest vigilance was maintained at the castle-gates, and a retainer of another daimiō, however hospitably entertained elsewhere, was never allowed entrance into the citadel. A minute code of honor, a rude sort of chivalry, and an exalted sense of loyalty were the growth of the feudal system.

Many of the mediæval military customs were very interesting. During this period the habit originated of the men shaving the hair off their temples and from the middle of the scalp, and binding the long cue into a top-knot, which was turned forward and laid on the scalp. The object of this was to keep the hair out of the eyes during battle, and also to mark the wearer as a warrior. Gradually it became a universal custom, extending to all classes.

When, in 1873, the reformers persuaded the people to cut off their knots and let their hair grow, the latter refused to "imitate the foreigners," and supposed they were true conservatives, when, in reality, the ancient Japanese knew nothing of shaven faces and scalps, or of top-knots. The ancient warriors wore mustaches, and even beards,

f keeping the face scrupulously bare, until recently so

off the head of his antagonist and holding it up

er, and battle-axes—were set on their butts on the porch or vestibule in front of the house. Within doors, in the *tokonoma*, or recess, were ranged in glittering state the cuirass, helmet, greaves, gauntlets, and chain-mail. Over the sliding partitions, on racks, were the long halberds, which the women of the house were trained to use in case of attack during the absence of the men.

The gate of a samurai, or noble's, house was permanently guarded by his armed retainers, who occupied the porter's lodge beside it. Standing upright and ready were three long instruments, designed to entangle, throw down, and pin to the earth a quarrelsome applicant. Familiar faces passed unchallenged, but armed strangers were held at bay till their business was known. A grappling-iron, with barbed tongues turned in every direction, making a ball of hooks like an iron hedgehog, mounted on a pike-staff ten feet long, thrust into the Japanese loose clothing, sufficed to keep at a wholesome length any swashbuckler whose sword left its sheath too easily. Another spiked weapon, like a double rake, could be thrust between his legs and bring him to the earth. A third, shaped like a pitchfork, could hold him helpless under its wicket arch. Three heavy quarter staves were also ready, to belabor the struggling wight who would not yield, while swords on the racks hung ready for the last resort, or when intruders came in numbers. On rows of pegs hung wooden tickets about three inches square, branded or inscribed with the names of the retainers and servants of the lord's house, which were handed to the keeper of the gate as they passed in or out.

The soldiers wore armor made of thin scales of iron, steel, hardened hide, lacquered paper, brass, or shark-skin, chain-mail, and shields. The helmet was of iron, very strong, and lined within by buckskin. Its flap of articulated iron rings drooped well around the shoulders. The visor was of thin lacquered iron, the nose and mouth pieces being removable. The eyes were partially protected by the projecting front piece. A false mustache was supposed to make the upper lip of the warrior dreadful to behold. On the frontlet were the distinguishing symbols of the man, a pair of horns, a fish, an eagle, dragon, buckhorns, or flashing brass plates of various designs. Some of the helmets were very tall. Kato Kiyomasa's was three feet high. On the top was a hole, in which a pennant was thrust, or an ornament shaped like a pear inserted. The "pear-splitter" was the fatal stroke in combat and the prize-cut in fencing. Behind the corslet on the back was another socket, in which the clan flag was inserted. The breastplate

d tough; the arms, legs, abdomen, and thighs were pro-
tes joined by woven chains. Shields were often used;
n-hopes or assaults, cavalrymen made use of a stuffed bag
bolster, to receive a volley of arrows. Besides being
it held the arrows as spoils. On the shoulders, hanging
unusually wide and heavy brassarts, designed to deaden
he two-handed sword-stroke. Greaves and sandals com-
it, which was laced and bound with iron clamps, and
skin and silk, and decorated with crests, gilt tassels, and
gnia. Suits of armor were of black, white, purple, crim-
en, golden, or silver colors.

paths, infantry were usually depended upon. In besieging a castle, the intrenchments of the investing army consisted chiefly of a line of palisades or heavy planks, propped up from within by hinged supports, at an angle of forty-five degrees, behind which the besiegers fought or lived in camp life, while sentinels paced at the gates. Lookouts were posted on overlooking hills, in trees, or in towers erected for the purpose. Sometimes huge kites able to sustain a man were flown, and a bird's-eye view of the interior of the enemy's castle thus obtained. Fire, treachery, stratagem, starvation, or shooting at long range having failed to compel surrender, an assault took place, in which the gates were smashed in, or the walls scaled. Usually great loss resulted before the besiegers were driven off, or were victorious. Rough surgery awaited the wounded. An arrow-barb was usually pulled out by a jerk of the pincers. A sabre-cut was sewed or bound together with tough paper, of which every soldier carried a supply. The wonderfully adhesive, absorptive, and healing power of the soft, tough, quickly wet, easily hardening, or easily kept pliable, Japanese paper made excellent plasters, bandages, tourniquets, cords, and towels. In the dressing of wounds, the native doctors to this day, as I have often had occasion to witness, excel.

Seppuku (belly-cut) or *hara-kiri* also came into vogue about the time of the beginning of the domination of the military classes. At first, after a battle, the vanquished wounded fell on their swords, drove them through their mouth or breast, or cut their throats. Often a famous soldier, before dying, would flay and score his own face beyond recognition, so that his enemies might not glory over him. This grew into a principle of honor; and frequently the unscathed survivors, defeated, and feeling the cause hopeless, or retainers whose master was slain, committed suicide. Hence arose, in the Ashikaga period, the fashion of wearing two swords; one of which, the longer, was for enemies; the other, shorter, for the wearer's own body. The practice of *hara-kiri* as a judicial sentence and punishment did not come into vogue until in the time of the Tokugawas.

Thrust into a tiny scabbard at the side of the dirk, or small sword, was a pair of chopsticks to eat with in camp. Anciently these were skewers, to thrust through the top-knot of a decapitated enemy, that the head might be easily carried. Besides, or in lieu of them, was a small miniature sword, *ko-katana* (little sword), or long, narrow knife. Although this was put to various trivial uses, such as those for which we employ a penknife, yet its primary purpose was that of the card of

told by Mitford. Fuwa Banzaëmon—he of the robe marked with the *nurétsubami* (swallow in a shower)—and Nagoya Sanzaburo—he of the coat figured with the device of lightning—both enemies, and *rōnin*, as their straw hats show, meet, and intentionally turn back to back and clash scabbards, holding their hands in tragic attitude. In a moment more, so the picture tells us, the insulted scabbards will be empty, and the blades crossed in deadly combat. In the story, which has been versified and dramatized, and which on the boards will hold an audience breathless, Nagoya finally kills Fuwa The writing at the side of the sketch gives the clue to the incident: *saya-até* (scabbard-collision), equivalent to our "flinging down the gauntlet."

To turn the sheath in the belt as if about to draw was tantamount to a challenge. To lay one's weapon on the floor of a room, and kick the guard toward a person, was an insult that generally resulted in a combat to the death. Even to touch another's weapon in any way was a grave offense. No weapon was ever exhibited naked for any

genuine. In later times, the practice of counterfeiting the marks of well-known makers came into vogue. Certain swords considered of good omen in one family were deemed unlucky in others.

I had frequent opportunities of examining several of the master-pieces of renowned sword-makers while in Japan, the property of kugés, daimiōs, and old samurai families, the museum at Kamakura being especially rich in famous old blades. The ordinary length of a sword was a fraction over two feet for the long and one foot for the short sword. All lengths were, however, made use of, and some of the old warriors on horseback wore swords over six feet long.

The Japanese sword-blade averages about an inch in width, about seven-eighths of which is a backing of iron, to which a face of steel is forged along its entire length. The back, about one-fourth of an inch thick, bevels out very slightly to near the centre of the blade, which then narrows to a razor edge. The steel and the forging line are easily distinguished by a cloudiness on the mirror-like polish of the metal. An inch and a quarter from the point, the width of the blade having been decreased one-fourth, the edge is ground off to a semi-parabola, meeting the back, which is prolonged, untouched; the curve of the whole blade, from a straight line, being less than a quarter of an inch. The guard is often a piece of elaborate workmanship in metal, representing a landscape, water-scene, or various emblems. The hilt is formed by covering the prolonged iron handle by shark-skin and wrapping this with twisted silk. The ferule, washers, and cleets are usually inlaid, embossed, or chased in gold, silver, or alloy. The rivets in the centre of the handle are concealed by designs, often of solid gold, such as the lion, dragon, cock, etc.

In full dress, the color of the scabbard was black, with a tinge of green or red in it, and the bindings of the hilt of blue silk. The taste of the wearer was often displayed in the color, size, or method of wearing his sword, gay or proud fellows affecting startling colors or extravagant length. Riven through ornamental ferules at the side of the scabbards were long, flat cords of woven silk of various tints, which were used to tie up the flowing sleeves, preparatory to fighting. Every part of a sword was richly inlaid, or expensively finished. Daimiōs often spent extravagant sums on a single blade, and small fortunes on a collection. A samurai, however poor, would have a blade of sure temper and rich mountings, deeming it honorable to suffer for food, that he might have a worthy emblem of his social rank as a samurai. A description of the various styles of blade and scab-

ornaments, and the rich vocabulary of terms minutely
h piece entering into the construction of a Japanese
iquette to be observed, the names, mottoes, and legends
em, would fill a large volume closely printed. A consid-
of native literature is devoted to this one subject.

er. The average length of the war-arrow was three feet. The "turnip-head," "frog-crotch," "willow-leaf," "armor-piercer," "bowel-raker," were a few of the various names for arrows. The "turnip-top," so named from its shape, made a singing noise as it flew. The "frog-crotch," shaped like a pitchfork, or the hind legs of a leaping-frog, with edged blades, was used to cut down flags or sever helmet lacings. The "willow-leaf" was a two-edged, unbarbed head, shaped like the leaf of a willow. The "bowel-raker" was of a frightful shape, well worthy of the name; and the victim whose diaphragm it penetrated was not likely to stir about afterward. The "armor-piercer" was a plain bolt-head, with nearly blunt point, well calculated to punch through a breastplate. Barbs of steel were of various shape; sometimes very heavy, and often handsomely open-worked. The shaft was of cane bamboo, with string-piece of bone or horn, whipped on with silk. Quivers were of leather, water-proof paper, or thin lacquered wood, and often splendidly adorned. Gold-inlaid weapons were common among the rich soldiers, and the outfit of an officer often cost many hundreds of dollars. Not a few of these old tools of war have lost their significance, and have become household adornments, objects of art, or symbols of peace. Such especially are the emblems of the carpenter's guilds, which consist of the half-feathered "turnip-head" arrow, wreathed with leaves of the same succulent, and the "frog-crotch," inserted in the mouth of a dragon, crossed upon the ancient mallet of the craft. These adorn temples or houses, or are carried in the local parades and festivals.

Symbols of the Carpenter's Guild: the Singing or "Turnip-top," and Cutting or Knife-prong, Arrows, and Mallet.

XXIII.

NOBUNAGA, THE PERSECUTOR OF THE BUDDHISTS.

In the province of Echizen, a few miles from Fukui, on the sea-coast, stands the mountain of Ochi, adorned with many a shrine and sacred portal, and at its foot lies the village of Ota. Tradition states that nearly a thousand years ago the pious bonze, Tai Chō, ascended and explored this mountain, which is now held sacred and resorted to by many a pilgrim. Here, in uninterrupted harmony, dwelt for centuries priests of both the native Shintō and Buddhist *cultus*, until 1868, when, in the purification, all Shintō shrines were purged of Buddhist symbolism and influences, as of a thing unclean. The priests were wont to make occasional journeys to Kiōto, the ecclesiastical centre of the country. Centuries before the troublous times of Ashikaga, and during the period of the Taira and Minamoto, one of the Shintō priests, while on his way through Ōmi, stopped at Tsuda, and lodged with the *nanushi*, or head-man of the village, and asked him for one of his sons for the priesthood. The host gave him his step-son, whom the priest named Ota Chikazané.

That boy was of Taira blood, the great-grandson of Kiyomori. His father, Sukémori, had been killed by the Minamoto, but his mother had fled to Ōmi, and the head-man of the village of Tsuda had married her.

The mother, though grieving for the loss of her son, doubtless, as a pious woman, rejoiced to see him in such excellent hands. The lad was returned to Ota, and lived in the village. He grew up, married as became a *kannushi* (custodian of a Shintō shrine), and founded a family of Shintō priests. He was the common ancestor of the famous hero of Echizen, Shibata Katsuiyé, and of the renowned Nobunaga, who deposed the Ashikaga, persecuted the Buddhists, encouraged the Jesuits, and restored, to a great extent, the supremacy of the mikado. In the "History of the Church," a portrait is given of Nobunaga, which is thus translated by Dr. Walter Dixon. He is described as "a prince of large stature, but of a weak and delicate complexion, with a

ministrative power, and was never able to follow up in peace the victories gained in war.

He met his death in Kiōto, when in the fullness of his power and fame, in the following manner. Among his captains was Akéchi, a brave, proud man, who had taken mortal offense at his leader. One day, while in his palace, being in an unusually merry and familiar mood, Nobunaga put Akéchi's head under his arm, saying he would make a drum of it, struck it with his fan, like a drumstick, playing a tune. Akéchi did not relish the joke, and silently waited for revenge. His passion was doubtless nursed and kept warm by a previous desire to seize the place and power and riches of his chief.

In those days treachery was a common and trivial occurrence, and the adherent of to-day was the deserter of to-morrow. The opportunity did not delay. Nobunaga had sent so large a re-enforcement into the west, to Hidéyoshi, who was fighting with Mōri, that the garrison at the capital was reduced to a minimum. Akéchi was ordered to the Chiugoku, and pretended to march thither. Outside the city he disclosed his plan of killing Nobunaga, whom he denounced to his officers, and promised them rich booty. They returned to Kiōto, and surrounded the temple of Honnōji, where their victim was then residing. Hearing of the unexpected presence of so many soldiers in armor around his dwelling, he drew aside the window of his room to ascertain the cause. He was struck by an arrow, and instantly divined the situation, and that escape was impossible. He then set the temple on fire, and committed suicide. In a few minutes the body of the great hero was a charred crisp.

An uninscribed tomb of polygonal masonry, built in his honor, stands in the *ten-shiu*, or keep, of his most famous castle, Azuchi yama, on a high hill looking out upon the white walls of the fortress of Hikoné, the blue lake of Biwa, and the towering grandeur of Ibuki yama. He died at the age of forty-nine.

The position of Ota Nobunaga in Japanese history would be illy understood were the reader to regard him merely as a leader in clan fights, who by genius and vigor rose above the crowd of petty military adventurers, or even as one who wished to tranquilize and unify all Japan for the mikado. We must inquire why it is that no man has won more execration and anathemas from the Buddhists in Japan than he. They look upon him as an incarnate demon sent to destroy their faith.

The period of the Ashikaga was that in which the Buddhist priests

me of power. Their monasteries were often enormous
nd moated fortresses. The bonzes kept armor and ar-
weapons to don and use themselves, or to equip the
r pay when it suited their pleasure to cope with or as-
the changing sides, or to take spoil of both. Many
took place between rival sects, in which temples were
villages fired, and hundreds on both sides killed. Part

onzes Nobunaga had no respect. His early life among

when Yoshikagé [Daimiō of Echizen] and Nagamasa [Daimiō of Ōmi] attacked my rear, and I was obliged to raise the siege and retrace my steps. My allowing the priests to remain on this mountain was in order that I might destroy them. I once dispatched a messenger to the priests, and set before them happiness and misery. The bonzes never obeyed my word, but stoutly assisted the wicked fellows, and so resisted the imperial army [*ōshi*, or *kuangun*]. Does this act not make them [*kokuzoku*] country-thieves? If I do not now take them away, this great trouble will continue forever. Moreover, I have heard that the priests violate their own rules; they eat fish and stinking vegetables [the five odorous plants prohibited by Buddhism—common and wild leek, garlic, onions, scallions], keep concubines, and roll up the sacred books [never untie them to read them or pray]. How can they be vigilant against evil, or preserve justice? Then surround their dwellings, burn them down, suffer no one to live."

The generals, incited by the speech of their commander, agreed. On the next day an awful scene of butchery and conflagration ensued. The soldiers set fire to the great shrines and temples; and while the stately edifices were in flames, plied sword, lance, and arrow. None were permitted to escape. Without discrimination of age or sex, the toothless dotard, abbot, and bonze, maid-servant and concubine and children, were speared or cut down without mercy. This was the first great blow at Buddhism.

In 1579, the two great sects of Nichiren and Jōdō held a great discussion upon religious subjects, which reached such a point of acrimony that the attention of the Government was called to it, and it was continued and finished before Nobunaga, at his castle at Azuchi yama, on the lands of which he had already allowed the Jesuits to build churches. A book called *Azuchi Ron*, still extant, contains the substance of the argument on both sides. One result of the wordy contest was the suppression of a sub-sect of Jōdō, whose doctrines were thought to be dangerous to the State.

The immense fortified temple and monastery called Honguanji, in Ōzaka, was the property of the Monto, or Shin sect of Buddhists, and the retreat and hiding-place of Nobunaga's enemies. The bonzes themselves were his most bitter haters, because he had so encouraged the Jesuits. They had taken the side of his enemies for over twelve years. At last, when some of his best captains had been killed by "grass-rebels," or ambuscaders, who fled into the monastery, he laid siege to it in earnest, with the intention of serving the inmates as he

son to yield. A conference of the abbot and elders was called, and a surrender decided upon. The castle was turned over to Nobunaga, and from that day until the present has remained in the hands of the Government. Pardon was granted to the survivors, and the bonzes scattered to the other large monasteries of their sect. To this day, the great sects in Japan have never fully recovered from the blows dealt by Nobunaga. Subsequently, rulers were obliged to lay violent hands upon the strongholds of ecclesiastical power that threatened so frequently to disturb the peace of the country; but they were able to do it with comparative ease, because Nobunaga had begun the work with such unscrupulous vigor and thoroughness.

...hundreds of *mura*, or villages, in Japan, called Nakamu... ...lle; *mura*, village), for the same reason that there are ...owns in English-speaking countries, but none of them ...e birthplace of Hidéyoshi except that in the district of ...i. There, in 1536, lived a peasant called Yasuké, whose ...zen-faced, pithecoid baby, who grew up to be a cunning ...oy. Instead of going out to the hill-sides, grass-hook ...asket on back, to cut green fodder for horses, or standing knee-deep in the mud-pulp of the rice-fields weeding the young plants, re-

is perplexed, among the multitude of names and titles, to distinguish the personage to whom they belong. When there are many actors in the scene, and each is known by a half-dozen aliases, confusion becomes confounded, and the patience is sorely taxed.

In this work I designate one person by one name, although apparent anachronisms must thereby be committed, and the eyes of the scholar be often annoyed. It has, until recently, in Japan been the custom for every samurai to be named differently in babyhood, boyhood, manhood, or promotion, change of life or residence, in commemoration of certain events, or on account of a vow, or from mere whim. Thus, at his birth, Hidéyoshi's mother having, as it is said, dreamed that she had conceived by the sun, called him Hiyoshi marō (good sun). Others dubbed him Ko chiku (small boy), and afterward Saru matsŭ (monkey-pine). As a soldier, he enlisted as Kinoshita Tokichiro, the first being an assumed name. As he grew famous, he was nicknamed Momen Tokichi ("Cotton" Tokichi). When a general, from a mere whim, he made himself a name by uniting two syllables, *ha* and *shiba*, making Hashiba, from the names of two of his generals, Ni-wa or ha, and Shibata, which the Jesuits wrote, as the Portuguese orthography required, Faxiba.

When, in 1586, he attained the rank of Kuambaku (Cambaku dono of the Jesuits), or premier, his enemies, who were jealous of the parvenu, spoke of him as Saru Kuan ja, or crowned monkey. How he obtained this high office, even with all the limitless store of cunning impudence and egotism, is not known, for no one except nobles of Fujiwara blood had ever filled that office, it being reserved exclusively for members of that family. He obtained from the emperor the patent of a family name, and he and his successors are known in history as the Toyotomi family, he being Toyotomi Hidéyoshi. In 1591 he resigned his high office, and was succeeded by his son. Hence he took the title of *taikō*, and the people referred to him as Tai' ō sama, just as they put the term *sama* (Mr., or Sir, Honorable, etc.) after the titles of emperor, shōgun, other titled officials, or after the name of any person. Japanese address foreigners as "Smith sama," or "Smith san," or an infant as "baby san," instead of "Mr. Smith," "the baby," etc. The term *sama* fulfills, in a measure, the function of the definite article or demonstrative pronoun, or serves as a social handle. Hence, in foreign works, Hidéyoshi, the taikō; or that one of the many taikō, called Hidéyoshi, is referred to as Taikō sama.

Hidéyoshi was a man of war from his youth up. His abilities and

ities made him a favorite commander. His banner con-
ister of gourds. At first it was a single gourd. After
nother was added, until at last it became an imposing
tandard-bearer carried aloft at the head of the columns a
entation of the original model, and wherever Hidéyoshi's
there was the centre of victory.

picked up after the fire. Other relics saved from the ashes were shown me. The story, as it fell from the old bonze's lips, and was translated by my interpreter, is substantially that given by the native historians.

Having fled, after many defeats, he reached the place now called Fukui. Hidéyoshi, in hot pursuit, fixed his camp on Atagoyama, a mountain which overlooks the city, and began the siege, which he daily pressed closer and closer. Being hopelessly surrounded, and succor hopeless, Shibata, like a true Epicurean, gave a grand feast to all his captains and retainers, in anticipation of the morrow of death. All within the doomed walls eat, drank, sung, danced and made merry, for the mor-

to see them in this world. At the height of the ban-
, quaffing the parting cup before death, addressed his

, on his return to Kiōto, began a career of usefulness, devel-
ources of the empire and strengthening the power of the
nowing it was necessary to keep his captains and soldiers
of inaction, and having a genius for the works of peace as
e built splendid palaces at Kiōto, improved the city, and

homage to the emperor; and the two rivals becoming friends, Iyéyasŭ married the taikō's sister. Mōri, lord of the Western provinces, also came to the capital, and acknowledged him as his superior.

Among his other works, Hidéyoshi followed out the policy of Nobunaga, destroyed the great monastery at Kumano, the bonzes of which claimed the province of Kii. He was never made shōgun, not being of Minamoto blood; but having become Kuambaku, and being surrounded by nobles of high birth and the lofty etiquette of the court, he felt the need of a pedigree. No one at court knew who his grandfather was, if, indeed, he was aware himself. He made out that his mother was the daughter of a kugé, who, in the disturbed times of Ashikaga, had fled from Kiōto, and, while in poverty and great distress, had married his father, but had conceived him before her marriage.

In his youth he had wedded a peasant girl; but as he rose step by step to eminence, he kept on marrying until he had a number equal to that of the polygamous English king, Henry VIII.; but, unlike that monarch, he enjoyed them all at once, and caused none of them to lose her head. The last two of his spouses were, respectively, a daughter of the house of Maëda, of the rich province of Kaga, and the Princess Azai, from Ōmi, daughter of the wife of Shibata Katsuiyé, whom the Jesuits, under the name of Kita Mandocoro, say was the first wife of the taikō, "sweetest and best beloved." He had no son until in old age.

Image of Japanese Deified Hero, seen in Shintō Shrines.

The immoderate ambition of Hidéyoshi's life was to conquer Corea, and even China. It had been his dream when a boy, and his plan when a man. When under Nobunaga, he had begged of him the revenue of Kiushiu for one year and weapons, while he himself would provide the ships and provisions, offering to subdue Corea, and with an army of Coreans to conquer China, and thus make the three countries one. His master laughed, but he kept thinking of it. When in the Kuantō, he visited Kamakura, and saw an image of Yoritomo, such as one

it." The Japanese copper and iron *zeni*, or *kas*, have Chinese characters representing the chronological period of coinage on one side, and waves representing their circulation as money on the reverse. The lettered side is "head," the reverse is "tail." All the coins which the taikō flung up came down heads. The soldiers were delighted with the omen. Maps of Corea were distributed among the commanders of the eight divisions, and the plan of the expedition and their co-operation explained.

Kato Kiyomasa, who hated the Christians, and who afterward became their bitterest persecutor, was commander of the first; and Konishi Yukinaga, the Christian leader, and a great favorite of the Jesuits, of the second. These divisions were alternately to lead the van. The naval and military force that embarked is set down in the *Guai Shi* at five hundred thousand men. A reserve of sixty thousand was kept ready in Japan as re-enforcements. Many of the generals, captains, and private soldiers were of the Christian faith. Kato despised Konishi, and they were not friends. The latter was the son of a druggist, and persisted, to the disgust of the high-born Kato, in carrying a banner representing a paper medicine-bag, such as can be seen swinging in front of a native drug-shop to-day. He probably took his cue from the august parvenu, the taikō.

Hidéyoshi expected to lead the army himself; but being sixty years old, and infirm, and his aged mother sorrowing so that she could not eat on account of it, he remained behind. He gave Kato a flag, saying, "This was given me by Ota [Nobunaga] when I marched against Mōri [Chōshiu]." To Konishi he presented a fine horse, saying, "With this gallop over the bearded savages [Coreans]." All being ready, the fleet set sail amidst the shouts of the army and the thunder of cannon on the shore. Hidéyoshi had attempted to buy or charter two Portuguese ships, but was unsuccessful, and the fleet consisted of large junks. They were detained off Iki Island by stormy weather. As soon as it was calm, Konishi, well acquainted with the route, sailed away with his division, arrived at Fusan, in Southern Corea, first, and seized the castle. Without allowing his troops to rest, he urged them on to other triumphs, that the glory might be theirs alone, and not be shared by the other troops, who would soon arrive. Another large castle was stormed, several towns captured, and brilliant victories won. Three days later, Kato arrived, and heard, to his chagrin, of his rival's advance into the interior. He exclaimed, "The boy has taken my route; I shall not follow in his tracks." He then burned the town,

knowledge him as his father's successor. As Iyéyasŭ was the rising man, the taikō hoped thus to gain his influence, so that the power might descend in his own family. The last thoughts of the hero were of strengthening the citadel at Ōzaka. The old hero was buried in the grounds of Kodaiji, in Kiōto.

The victorious army, returning from Corea, brought much spoil, and fine timber to build a memorial temple to the memory of the dead hero. Among other trophies were several thousands of ears, which, instead of heads, the Japanese carried back to raise a barrow in Kiōto. The temple was erected on a hill on the west side of Kiōto by his wife, who, after the death of her husband, became a nun. This splendid edifice was afterward burned, and the site of the taikō's remains is uncertain.

Mimidzuka (Ear Monument), in Kiōto. (From a photograph.)

In the city still stands the Mimidzuka (ear-tomb), a monument of characteristic appearance. It consists of a cube, sphere, and pagoda-curve, surmounted by two spheroids, the top-stone rising to a point. The mound is seven hundred and twenty feet in circumference, and ninety feet in height; the pedestal at the top being twelve feet square, and the monument twelve feet high. As usual on Buddhist tombs or ecclesiastical edifices, a Sanskrit letter is carved on each side of the four faces of the cube. Beneath this tomb is a barrow, covering the dissevered ears of thousands of Coreans; but the most enduring monuments of the great taikō were the political institutions, and the works of peace reared by his genius and labor.

ifficult to account for the tone of admiration and pride modern Japanese speaks of "the age of Taikō." There o hold that he was the real unifier of the empire, and merely followed in his footsteps, perfecting the work oshi began. Certain it is that in many of the most s of national administration, and notably in bestowing sals grants of land, and making the conditions of tenure mself and family, Iyéyasū was but the copyist of the is time, the arts and sciences were not only in a very ondition, but gave promise of rich development. XXV.

CHRISTIANITY AND FOREIGNERS.*

It seems now nearly certain that when Columbus set sail from Spain to discover a new continent, it was not America he was seeking; for of that he knew nothing. His quest was the land of Japan. Marco Polo, the Venetian traveler, had spent seventeen years (1275–1292) at the court of the Tartar emperor, Kublai Khan, and while in Peking had heard of a land lying to the eastward called, in the language of the Chinese capital, Jipangŭ, from which our modern name, Japan, has been corrupted. Columbus was an ardent student of Polo's book, which had been published in 1298. He sailed westward across the Atlantic to find this kingdom of the sun-source. He discovered, not Japan, but an archipelago in America, on whose shores he eagerly inquired concerning Jipangŭ. The torch of modern discovery thus kindled by him was handed on by Vasco da Gama, and a host of brave Portuguese navigators, who drove their keels into the once unknown seas of the Orient, and came back to tell of densely populated empires enriched with the wealth that makes civilization possible, and of which Europe had scarcely heard. Their accounts fired the hearts of the zealous who longed to convert the heathen, aroused the cupidity of traders who thirsted for gold, and kindled the desire of monarchs to found empires in Asia.

As the Spaniards had founded an empire in America, Portugal was then nearing the zenith of her maritime glory. Mendez Pinto, a Portuguese adventurer, seems to have been the first European who landed on Japanese soil. On his return to Europe, he told so many wonderful stories that he was dubbed, by a pun on his Christian name, "the

* In compiling this chapter, I have made use of Hildreth's "Japan as it Was and Is;" Léon Pagés' "Histoire de la Religion Chrétienne au Japon;" Charlevoix's "Histoire du Christianisme au Japon;" Dixon's "Japan;" "*Shimabara:* A Japanese Account of the Christian Insurrection in 1637;" the Japanese Encyclopædia, *San Sai Dzu Yé;* and the able paper of Herr Von Brandt (Minister of the North German Confederation in Japan) read before the German Asiatic Society of Japan.

His narrative was, however, as we now know, substan-

authority of the Ashikaga shōguns had before this time been cast off, and each chief was striving for local supremacy.

The missionary followed the merchant. Already the Portuguese priests and Franciscan friars were numerous in India and the straits. A native of Satsuma named Anjiro, who, having killed a man, had fled to Pinto's boat, and was carried off by him, after the long sufferings of remorse reached Goa, becoming a convert to Christianity. Learning to read and write Portuguese, and having mastered the whole Christian doctrine, he became Xavier's interpreter. To the question whether the Japanese would be likely to accept Christianity, Anjiro answered—in words that seem fresh, pertinent, and to have been uttered but yesterday, so true are they still—that "his people would not immediately assent to what might be said to them, but they would investigate what I might affirm respecting religion by a multitude of questions, and, above all, by observing whether my conduct agreed with my words. This done, the king (daimiō), the nobility, and adult population would flock to Christ, being a nation which always follows reason as a guide." The words are recorded by Xavier himself.

In 1549, the party of two Jesuits and two Japanese landed at Kagoshima, in Satsuma. Xavier, after studying the rudiments of the language, beyond which he never advanced, and making diligent use of the pictures of the Virgin and Child, soon left the capital of this warlike clan, for the city had not been favored with the commerce of the Portuguese; and, as the missionaries had not come to improve the material resources of the province, they were not warmly welcomed. He then went to Bungo and Nagato. Besides having an interpreter, though unable to preach, he used to read the Gospel of Matthew translated by Anjiro into Japanese, and Romanized. Though unable to understand much of it, he read it in public with great effect. There trade was flourishing and enriching the daimiōs, and he was warmly received by them. His next step was a journey to Kiōto. There, instead of the extraordinary richness of the sovereign's palace, which he had expected to see plated with gold on the roofs and ceilings, with tables of the same metal, and all the other wonders as related by Marco Polo, he found it but a city which wars and fires had rendered desolate, and almost uninhabitable, except as a camp. Here he employed the policy of austerity and poverty, his appearance being that of a beggar, though later he used wealth and great display in his ministrations, with marked effect. The mikado's (dairi) authority, he found, was merely nominal; the shōgun, Ashikaga Yoshitéru, ruled only over a

dies of the households of Hidéyoshi, Hidéyori, and Iyéyasŭ, besides influential women of noble blood in many provinces whose rulers were not Christians, added to their power, while at the seat of government the chief interpreter was a Jesuit father. Churches, chapels, and residences of the fathers were numbered by thousands, and in some provinces crosses and Christian shrines were as numerous as the kindred evidences of Buddhism had been before. The fathers and friars had traveled or preached from one end of the western half of Hondo to the other; northward in Echizen, Kaga, Echigo, and Ōshiu, and in the provinces of the Tōkaidō. They had also one church in Yedo.

The causes of this astonishingly rapid success of the Jesuits are to be sought in the mental soil which the missionaries found ready prepared for their seed. It was in the later days of the Ashikaga, when Xavier arrived in Japan. Centuries of misrule and anarchy had reduced the people, on whom the burdens of war fell, to the lowest depths of poverty and misery. The native religions then afforded little comfort or consolation to their adherents. Shintō had sunk to a myth almost utterly unknown to the people, and so overshadowed by Buddhism that only a few scholars knew its origin. Buddhism, having lost its vitalizing power, had degenerated into a commercial system of prayers and masses, in which salvation could be purchased only by the merit of the deeds and prayers of the priests. Nevertheless, its material and outward splendor were never greater. Gorgeous vestments, blazing lights, imposing processions, altars of dazzling magnificence, and a sensuous worship captivated the minds of the people, while indulgences were sold, and saints' days and holidays and festivals were multiplied.

The Japanese are an intensely imaginative people; and whatever appeals to the æsthetics of sense, or fires the imagination, leads the masses captive at the will of their religious leaders. The priests of Rome came with crucifixes in their hands, eloquence on their lips, and with rich dresses, impressive ceremonies, processions, and mysteries out-dazzled the scenic display of the Buddhists. They brought pictures, gilt crosses, and images, and erected gorgeous altars, which they used as illuminated texts for their sermons. They preached the doctrine of an immediate entrance into paradise after death to all believers, a doctrine which thrilled their hearers to an uncontrollable pitch of enthusiasm. Buddhism promises rest in heaven only after many transformations, births, and the repeated miseries of life and death, the very thought of which wearies the soul. The story of the Cross, made vivid by fervid eloquence, tears, and harrowing pictures

images, which bridged the gulf of remoteness, and made Calvary near and intensely real, melted the hearts of the natives. Furthermore, the transition from the religion of t of Rome was extremely easy. lars) for the support of his mission. This abundance of the foreign precious metal was noticed especially by the native rulers. In Kiushiu the daimiōs themselves became Christians, and they compelled their subjects to embrace their religion. The people of whole districts of country were ordered to become Christians, or to leave their land and the homes of their fathers, and go into banishment. The bonzes were exiled or killed; and fire and sword, as well as preaching, were employed as instruments of conversion. Furthermore, fictitious miracles were frequently got up to utilize the credulity of the superstitious in furthering the spread of the faith, glowing accounts of which may be found in Léon Pagés' "Histoire de la R. C." Not only do the native Japanese writers record these things as simple matter of fact, but the letters of the Jesuits themselves, and the books written by them, teem with instances of ferocious cruelty and pious fraud wrought in their behalf, or at their instigation. The following passages from the Jesuit Charlevoix's "Histoire du Christianisme au Japon" are translated by Dr. Walter Dixon in his "Japan:" "Sumitanda, King of Ōmura, who had become a Christian in 1562, declared open war against the devils [bonzes]. He dispatched some squadrons through his kingdom to ruin all the idols and temples without any regard to the bonzes' rage."... "In 1577, the lord of the island of Amacusa [Amakusa] issued his proclamation, by which his subjects—whether bonzes or gentlemen, merchants or tradesmen—were required either to turn Christians, or to leave the country the very next day. They almost all submitted, and received baptism, so that in a short time there were more than twenty churches in the kingdom. God wrought miracles to confirm the faithful in their belief." The Daimiō of Takatsŭki, Settsu, "labored with a zeal truly apostolic to extirpate the idolaters out of his states. He sent word that they should either receive the faith, or be gone immediately out of his country, for he would acknowledge none for his subjects but such as acknowledged the true God. The declaration obliged them all to accept instruction, which cut out work enough for all the fathers and missionaries at Meaco [Miako]."

The Daimiō of Bungō at one time, during war, destroyed a most prodigious and magnificent temple, with a colossal statue, burning three thousand monasteries to ashes, and razing the temples to the ground. The comment of the Jesuit writer on this is, "This ardent zeal of the prince is an evident instance of his faith and charity." This does not, however, sound like an echo of the song once heard

to preach in public, but carried on their proselyting work in private as vigorously as ever, averaging ten thousand converts a year, until 1590. The Spanish mendicant friars, pouring in from the Philippines, openly defied the Japanese laws, preaching in their usual garb in public, and in their intemperate language. This aroused Hidéyoshi's attention, and his decree of expulsion was renewed. Some of the churches were burned. In 1596, six Franciscan, three Jesuit, and seventeen Japanese converts were taken to Nagasaki, and there crucified. Still the Jesuits resided in the country, giving out to the people that the Spaniards nourished the political designs against Japan, and that the decrees of expulsion had been directed against the priests of that nation, and that the late outburst of persecution was an explosion of zeal on the part of a few subordinate officials. Several of the generals of the army in Corea still openly professed the Christian faith.

When the taikō died, affairs seemed to take a more favorable turn, but only for a few years. The Christians looked to Hidéyori for their friend and quasi-leader. The battle of Sékigahara, and the defeat of Hidéyori's following, blew their hopes to the winds; and the ignominious death of Ishida, Konishi, and Otani, the Christian generals who had witnessed a good confession both as warriors and as upholders of the faith in Corea and at home, drove their adherents to the verge of despair. Iyéyasŭ re-adjusted the feudal relations of his vassals in Kiushiu; and as the taikō had also re-arranged the fiefs, the political status of the Christians was profoundly altered. The new daimiōs, carrying the policy of their predecessors as taught them by the Jesuits, but reversing its direction, began to persecute their Christian subjects, and to compel them to renounce their faith. The native converts resisted even to blood and the taking-up of arms. This was an entirely new thing under the Japanese sun. Hitherto the attitude of the peasantry to the Government had been one of passive obedience and slavish submission. The idea of armed rebellion among the farmers was something so wholly new that Iyéyasŭ suspected foreign instigation. Color was given to this idea by the fact that the foreigners still secretly or openly paid court to Hidéyori, and at the same time freely dispersed gold and gifts, in addition to religious comfort, to the persecuted. Iyéyasŭ became more vigilant as his suspicions increased, and, resolving to crush this spirit of independence and intimidate the foreign emissaries, met every outbreak with bloody reprisals. In 1606, an edict from Yedo forbade the exercise of the Christian religion, but an outward show of obedience warded off active persecu-

yéyasŭ pushed matters to an extreme with Hidéyori, who
ertaining some Jesuit priests; and, calling out the troops
nd the Kuantō laid siege to the castle of Ōzaka. A bat-

junk. Fresh persecutions followed, many apostate lords and gentry now favoring the Government. Fire and sword were used to extirpate Christianity, and to paganize the same people who in their youth were Christianized by the same means. Thousands of the native converts fled to China, Formosa, and the Philippines. All over the empire, but especially at Ōzaka and in Kiushiu, the people were compelled to trample on the cross, or on a copper plate engraved with the representation of "the Christian criminal God." The Christians suffered all sorts of persecutions. They were wrapped in straw sacks, piled in heaps of living fuel, and set on fire. All the tortures that barbaric hatred or refined cruelty could invent were used to turn thousands of their fellow-men into carcasses and ashes. Yet few of the natives quailed, or renounced their faith. They calmly let the fire of wood cleft from the crosses before which they once prayed consume them, or walked cheerfully to the blood-pit, or were flung alive into the open grave about to be filled up. Mothers carried their babes at their bosoms, or their children in their arms to the fire, the sword, or the precipice's edge, rather than leave them behind to be educated in the pagan faith. If any one doubt the sincerity and fervor of the Christian converts of to-day, or the ability of the Japanese to accept a higher form of faith, or their willingness to suffer for what they believe, they have but to read the accounts preserved in English, Dutch, French, Latin, and Japanese, of various witnesses to the fortitude of the Japanese Christians of the seventeenth century. The annals of the primitive Church furnish no instances of sacrifice or heroic constancy, in the Coliseum or the Roman arenas, that were not paralleled on the dry river-beds and execution-grounds of Japan.

Finally, in 1637, at Shimabara, the Christians rose by tens of thousands in arms, seized an old castle, repaired and fortified it, and raised the flag of rebellion. Armies from Kiushiu and the Kuantō, composed mainly of veterans of Corea and Ōzaka, were sent by the shōgun to besiege it. Their commanders expected an easy victory, and sneered at the idea of having any difficulty in subduing these farmers and peasants. A siege of two months, by land and water, was, however, necessary to reduce the fortress.* Thousands of the rebels, were hurled from the rock of Pappenburg, or were banished to va-

nese count the scourge of the venereal virus, and the permanent addition to that catalogue of terrors which priest and magistrate in Asiatic countries ever hold as weapons to overawe the herd. For centuries the mention of that name would bate the breath, blanch the cheek, and smite with fear as with an earthquake shock. It was the synonym of sorcery, sedition, and all that was hostile to the purity of the home and the peace of society. All over the empire, in every city, town, village, and hamlet; by the roadside, ferry, or mountain pass; at every entrance to the capital, stood the public notice-boards, on which, with prohibitions against the great crimes that disturb the relations of society and government, was one tablet, written with a deeper brand of guilt, with a more hideous memory of blood, with a more awful terror of torture, than when the like superscription was affixed at the top of a cross that stood between two thieves on a little hill outside Jerusalem. Its daily and familiar sight startled ever and anon the peasant to clasp hands and utter a fresh prayer, the bonze to add new venom to his maledictions, the magistrate to shake his head, and to the mother a ready word to hush the crying of her fretful babe. That name was Christ. So thoroughly was Christianity, or the "*Jashiu mon*" (corrupt sect), supposed to be eradicated before the end of the seventeenth century, that its existence was historical, remembered only as an awful scar on the national memory. No vestiges were supposed to be left of it, and no knowledge of its tenets was held, save by a very few scholars in Yedo, trained experts, who were kept, as a sort of spiritual blood-hounds, to scent out the adherents of the accursed creed.

So perfect was the work done, that the Government believed fully, as Europeans, and among them Mr. Lecky, who uses the example to strengthen his argument, that "persecution had extirpated Christianity in Japan." It was left to our day, since the recent opening of Japan, for them to discover that a mighty fire had been smoldering for over two centuries beneath the ashes of persecutions. As late as 1829, seven persons, six men and an old woman, were crucified in Ōzaka, on suspicion of being Christians and communicating with foreigners. When the French brethren of the Mission Apostolique, of Paris, came to Nagasaki in 1860, they found in the villages around them over ten thousand people who held the faith of their fathers of the seventeenth century.

A few interesting traces and relics of the century of Christianity and foreigners still exist in Japan. In the language the names of

Holy Spirit (*Espiritu Santo*), Jesus (*Yesu*), and Christ ave remained. Castira is still the name of sponge-cake, used, and the making of which was first taught by the e; and the Japanese having no *l*, change that letter into *r*. have no word for bread; they use the Latin *pan*. The (table), *Dontakŭ* (Sunday), *cuppŭ* (cup), *rauda* (lauda- (electricity), *bouton* (button), *briki* (tin), and many of drugs and medicines, and rare metals and substances, nce, etc., and even some in common use, are but the Jap- of the Dutch words. I have seen "Weird Specifica"

there was in Suruga a cave, to which the country people resorted in large numbers, on account of the great efficacy believed to reside in an image of the mother of Shaka (Buddha), with her infant in her arms. The idol was reputed to have healed many diseases. An educated samurai, who hated all foreigners and their ways and works, especially the "Jesus doctrine," happening to enter the cave, perceived in a moment that the image was a relic of the old Christian worship. It was nothing else than an image of the Virgin Mary and the infant Jesus. The samurai dashed it to pieces.

The attempts of the English and French to open a permanent trade with Japan are described in Hildredth's "Japan as It Was and Is." Captain John Saris, with the ships *Clove*, *Thomas*, and *Hector*, left England in April, 1611, with letters from the king, James I. of England, to the "emperor" (shōgun) of Japan. Landing at Hirado, he was well received, and established a factory in charge of Mr. Richard Cocks. With Will Adams and seventeen of his company, Saris set out to see Iyéyasŭ, who was then living at the modern Shidzuōka. He touched at Hakata, traversed the Inland Sea, past Shimonoséki, to Ōzaka; thence by boat to Fushimi, thence by horse and palanquin to Sumpu (Shidzuōka). In the interview accorded the English captain, Iyéyasŭ invited him to visit his son, Hidétada, the ruling shōgun at Yedo. Saris went to Yedo, visiting, on his way, Kamakura and the great copper image of Dai Butsu, some of the Englishmen going inside of it and shouting in it for the fun of the thing. They also wrote their own names inside of it, as foreign tourists, visitors, and even personal friends of republican rulers do to this day, and as the natives have always done, to immortalize themselves. After a stay in Yedo, they touched at Uraga; thence returned to Sumpu, where a treaty, or privileges of trade, in eight articles, was signed and given to Saris. It bore the signature of Minamoto Iyéyasŭ.

After a tour of three months, Saris arrived at Hirado again, having visited Kiōto, where he saw the splendid Christian churches and Jesuit colleges, on his way. After discouraging attempts to open a trade with Siam, Corea, and China, and hostilities having broken out between them and the Dutch, the English abandoned the project of permanent trade with Japan; and all subsequent attempts to reopen it failed.

Will Adams, who was an English pilot, and the first of his nation in Japan, is spoken of frequently, and in no flattering terms, by the Jesuit fathers. He arrived in Japan in 1607, and lived in or near

amined him, asking many questions and gaining much information concerning foreign countries. In another building near by, an old man and woman who had professed Christianity, and had been compelled to recant, were confined. After the abbé's arrival, exhorted by him, they again embraced their old faith. The abbé gave his name as Jean Baptiste. He made a cross of red paper, which he pasted on the wall of his room. He was kept prisoner, living for several years after his arrival, in Yedo, and probably died a natural death.

About ten years ago, the Rev. S. R. Brown, D.D., discovered a book called *Sei Yō Ki Bun* (Annals of Western Nations), in three volumes, written by the Japanese scholar who examined the abbé. The books contain a summary of the history and judicial proceedings in the case, and the information gained from the Italian. The whole narrative is of intensest interest. While in Tōkiō, in 1874, I endeavored to find the site of the Inquisition, and the martyr's tomb.

Tradition says that the abbé was buried on the opposite slope of the valley corresponding to that on which he lived, under an old pine-tree, near a spring. Pushing my way through scrub bamboo along a narrow path scarcely perceptible for the undergrowth, I saw a nameless stone near a hollow, evidently left by a tree that had long since fallen and rotted away. A little run of water issued from a spring hard by. At the foot was a rude block of stone, with a hollow for water. Both were roughly hewn, and scarcely dressed with the chisel. Such stones in Japan mark the graves of those who die in disgrace, or unknown, or uncared for. This was all that was visible to remind the visitor of one whose heroic life deserved a nobler monument.

The influence of a century of Papal Christianity in Japan on the national ethics and character was *nil.* A careful examination has not revealed any trace of new principles of morals adopted by the Japanese from foreigners in the sixteenth, as has been gained in the nineteenth century, though the literary, scientific, and material gains were great. The Japanese mental constitution and moral character have been profoundly modified in turn by Buddhism and Confucianism, but the successive waves of Christianism that passed over Japan left no sediment teeming with fertility, rather a barren waste like that which the river-floods leave in autumn. I should be glad to see these statements disproved. Let us hope that the Christianity of the present, whether Catholic, Protestant, or Russo-Greek, may work a profounder and more beneficent revolution in faith and moral practice, and that only that kingdom may be established which is not of this world.

XXVI.

IYÉYASŬ, THE FOUNDER OF YEDO.

struggles of rival military factions for the possession of
to be narrated, and the weary record of war and strife
e 1159, when the Taira and Minamoto came to blows in

orld have enjoyed peace so long.

ho now stood foremost among men, who was a legislator
rior, who could win a victory and garner the fruits of it,
a Iyéyasŭ, the hero of Sékigahara, the most decisive bat-

art, and local lore. A hill in the north of the city, a delightful picnic resort, bears his name, and the neighborhood of Shiba was his favorite drill-ground and rendezvous before setting out on forays or campaigns.

One romantic incident, in which a maiden of equal wit and beauty bore chief part, has made him immortal, though the name of the fair one has been forgotten. One day, while out hawking near Yedo, a heavy shower of rain fell. Dismounting from his horse, he, with his attendant, approached a house, and in very polite terms begged the loan of a grass rain-coat (*mino*). A pretty girl, daughter of the man of the house, came out, listened, blushing, to the request, but, answering not a word, ran to the garden, plucked a flower, handed it, with mischief in her eyes, to the hero, and then coquettishly ran away. Ōta, chagrined and vexed at such apparently frivolous manners and boorish inhospitality, and the seeming slight put upon his rank, returned in wrath, and through the rain, to his castle, inwardly cursing the "Adzuma Ebisŭ," who did not know how to treat a gentleman. It happened that, shortly after, some court nobles from Kiōto were present, sharing the hospitalities of the castle at Yedo, to whom he related the incident. To his own astonishment, the guests were delighted. "Here," said they, "in the wilderness, and among the 'Adzuma Ebisŭ,' is a gentle girl, who is not only versed in classic poetry, but had the wit and maidenly grace to apply it in felicitous style." Ōta had asked for a rain-coat (*mino*); the little coquette was too polite to acknowledge she had none. How could she say "no" to such a gallant? Rather, to disguise her negative, she had handed him a mountain camellia; and of this flower the poet of Yamato had, centuries ago, sung: "Although the mountain camellia has seven or eight petals, yet I grieve to say it has no seed" (*mino*).

After the death of Ōta, no name of any great note is attached to the unimportant village or fortress; but in 1590, at the siege of Odawara, Hidéyoshi suggested to his general, Iyéyasŭ, Yedo as the best site for the capital of the Kuantō. After the overthrow of the "later Hōjō" clan, and the capture of their castle at Odawara, Iyéyasŭ went to Yedo and began to found a city. He set up his court, and watched his chances.

Iyéyasŭ was born at Okasaki, in Mikawa, in 1542; he served with Nobunaga and with Hidéyoshi; again fought with the latter, and again made terms with him. His first possessions were Mikawa and Suruga. In the latter province he built a fine castle at Sumpu (now

öka), and made it his residence for many years. He
e had little to do with the Corean expedition. While
ng Yedo in 1598, he received news of the taikō's sick-
his death-bed, and was urged to swear to protect the
idéyori, then six years old. He evasively declined.
ts of the boy were not very fine. In the first place, few

andonment of the Corean invasion brought back a host
eaders, flushed with victory and ambition. Differences
ong the five governors. With such elements at work—
men, idle, to whom war was pastime and delight, princes
ay in which land was the spoil, more than one man aspir-

and soldiers who had served in the Corean campaigns. Among them were the clans of Satsuma, Chōshiu, Uyésugi, and Ukita, with the famous Christian generals, Konishi and Ishida. This army, one hundred and eighty thousand strong, was a heterogeneous mass of veterans, acting under various leaders, and animated by various interests. As the leaders lacked unity of purpose, so the army was made the victim of discordant counsels and orders. On the other hand, the army of one man, Iyéyasŭ, had one soul, one discipline, and one purpose. The Castle of Gifu, in Mino, was captured by one of his captains. On the 1st of October, 1600, Iyéyasŭ marched from Yedo over the Tōkaidō with a re-enforcement of thirty thousand troops. His standard was a golden fan and a white flag embroidered with hollyhocks. The diviners had declared "the road to the West was shut." Iyéyasŭ answered, "Then I shall open it by knocking." On the thirteenth day he arrived at Gifu, where he effected a junction with his main body. Some one offered him a persimmon (ōgaki). He said, as it fell in his hand, "Ōgaki waga te ni otsuru" ("Ōgaki has fallen into my hand"). He threw it down, and allowed his attendants to eat the good-omened and luscious pieces.

The battle-field at Sékigahara is an open, rolling space of ground, lying just inside the eastern slope of hills on the west wall of Lake Biwa, and part of the populous plain drained by the Kiso gawa, a branch of which crosses the field and winds round the hill, on which, at that time, stood a residence of the Portuguese missionaries. The Nakasendō,* one of the main roads between Yedo and Kiōto, enters from Ōmi, and bisects the field from west to east, while from the northwest, near the village of Sékigahara, the road enters from Echizen. By

* The Nakasendō (Central Mountain Road) is three hundred and eighty-one miles long. It begins at the Bridge of Sanjo, over the river at Kiōto, and ends at Nihon Bridge in Tōkiō. It was used, in part, as early as the second century, but was more fully opened in the early part of the eighth century. It passes through Ōmi, Mino, Shinano, Kōdzuké, terminating in Musashi. It can be easily traversed in fourteen days; but the tourist who can understand and appreciate all he sees would be reluctant to perform the tour, if for pleasure, in less than a month. There are on the route nine *togé* (mountain passes). It carries the traveler through the splendid scenery of Shinano, which averages twenty-five hundred feet above the sea-level, along Lake Biwa, and nearly its whole length is classic ground. The Nakasendō is sometimes called the Kisokaidō. An excellent guide-book, in seven volumes, full of good engravings, published in 1805, called *Kisoji Meishō Dzuyé* ("Collection of Pictures of Famous Places on the Nakasendō"), furnishes the information that makes a sight of the famous places very enjoyable. The heights of the *togé* are as follows: 620, 2150, 3060, 4340, 3680, 5590, 3240, and 4130 feet, respectively.

writer, in 1872, came to reach the classic site and study
d which cluster so many stirring memories. The lead-
y of the league, having arranged their plans, marched
Castle of Ōgaki at early morn on the fifteenth day of
th. They built a fire on a hill overlooking the narrow
them as they walked without keeping step. It was
e armor and clothes of the soldiers were very wet. At
y reached the field, the Satsuma clan taking up their
foot of a hill facing east. Konishi, the Christian hero
nanded the left centre, Ishida the extreme left. Four
nders formed, with their corps, the right wing. Re-
tioned on and about the hills facing north. The cav-
try, according to the *Guai Shi* figures, numbered one
wenty-eight thousand.
rn of the same day one of the pickets of Iyéyasŭ's out-
to the tent of his general and reported that all the en-
ne Castle of Ōgaki. Other pickets, from other points,
same reports simultaneously. Iyéyasŭ, in high glee,
he enemy has indeed fallen into my hand." He order-
s to advance and take positions on the field, himself
tre. His force numbered seventy-five thousand.

acried each other. After a few moments' waiting, the drums and conchs of the centre of each army sounded, and a sharp fire of matchlocks and a shower of arrows opened the battle. The easterners at first wavered, and till noon the issue was doubtful. Cannon were used during the battle, but the bloodiest work was done with the sword and spear. One of the corps in the army of the league deserted and joined the side of Iyéyasŭ. At noon, the discipline and unity of the eastern army and the prowess and skill of Iyéyasŭ triumphed. Ordering his conch-blowers and drummers to beat a final charge, and the reserves having joined the main body, a charge was made along the whole line. The enemy, routed, broke and fled. Nearly all the wounded, and hundreds of unscathed on the battle-field, committed *hara-kiri* in order not to survive the disgrace. The pursuers cut off the heads of all overtaken, and the butchery was frightful. The grass was dyed red, and the moor became literally, not only an Aceldama, but a Golgotha. According to the *Guai Shi's* exaggerated figures, forty thousand heads were cut off. Of the Eastern army four thousand were slain, but no general was killed. The soldiers assembled, according to custom, after the battle in the centre of the field, to show their captives and heads. On this spot now stands a memorial mound of granite masonry within a raised earthen embankment, surrounded and approached from the road by rows of pine-trees. On the Kiōto side of the village, near the shrine of Hachiman, may be seen a *kubidzuka* (barrow, or pile of heads), the monument of this awful slaughter, and one of the many such evidences of former wars which careful travelers in Japan so often notice.

Iyéyasŭ went into the fight bare-headed. After the battle he sat down upon his camp-stool, and ordered his helmet to be brought. All wondered at this. Donning it with a smile, and fastening it securely, he said, quoting the old proverb, "After victory, knot the cords of your helmet." The hint was taken and acted upon. Neither rest nor negligence was allowed.

The Castle of Hikoné, on Lake Biwa, was immediately invested and captured. Ōzaka was entered in great triumph. Fushimi and Kiōto were held; Chōshiu and Satsuma yielded. Konishi and Mitsuda were executed on the execution-ground in Kiōto. The final and speedy result was that all Japan submitted to the hero who, after victory, had knotted the cords of his helmet.

XXVII.

PERFECTION OF DUARCHY AND FEUDALISM.

traced the rise and fall of no fewer than six families that ng power in their persons or in reality. These were in ie Sugawara, Fujiwara, Taira, Minamoto, Hōjō, and Ashi- last half of the sixteenth century witnessed the rise, not ilies, but of individuals, the mark of whose genius and en- ped upon Japanese history. These three individuals were idéyoshi, and Iyéyasŭ. Who and what were they?

well as personal names — claimed descent from the mikado Seiwa through the Minamoto Yoshiiyé, thence through that of Nitta Yoshisada. Tokugawa Shiro, the father of Iyéyasŭ, lived in the village of Matsudaira, in Mikawa. Iyéyasŭ always signed the documents sent to foreigners, Minamoto no Iyéyasŭ.

As it is the custom in Japan, as in Europe, to name families after places, the name of this obscure village, Matsudaira, was also taken as a family name by nearly all vassals, who held their lands by direct grant from Iyéyasŭ. In 1867, no fewer than fifty-four daimiōs were holding the name Matsudaira. The title of the daimiō in whose capital the writer lived in 1871, was Matsudaira Echizen no Kami.

Crest of the Tokugawa Family.

The Tokugawa crest was a circle inclosing three leaves of the *awoi* (a species of mallow, found in Central Japan) joined at the tips, the stalks touching the circle. This gilded trefoil gleamed on the Government buildings and property of the shōgun, and on the official documents, boats, robes, flags, and tombs. On Kaempfer's and Hildreth's books there is printed under it the misleading legend, "Insignia *Imperatoris* Japonici." The trefoil flag fluttered in the breeze when Commodore Perry made his treaty under its shadow. To this day many foreigners suppose it to be the national flag of Japan. It was simply the family crest of the chief daimiō in Japan.

The imperial court, yearning for peace, and finding in Iyéyasŭ the person to keep the empire in order, command universal obedience, and

lood requirements of precedent to the office, created him
ōgun, and it was left to Minamoto Tokugawa Iyéyasŭ to
erfection of duarchy and Japanese feudalism.

how he arranged the chess-board of the empire. There

whom he had not conquered, but conciliated; the lesser
had joined him in his career; his own retainers of every
a vast and miscellaneous array of petty feudal superiors,
s of land and retinues of from three to one hundred fol-
e long hereditary occupation of certain lands had given
a right which even Iyéyasŭ could not dispute. Out of
xity and chaos, how was such a motley array of proud
t men to be reduced to discipline and obedience? Upon
psest, how was an accurate map to be drawn, or a durable
d to be written? Iyéyasŭ had force, resources, and pa-
was master of the arts of conciliation and of letting alone.
it for time to do its work. He would give men the op-
being conquered by their own good sense.

ŭ's twelve children, three daughters married the daimiōs
, Sagami, and Hida. Of his nine sons, Nobuyasŭ died

stances of such immolation, or the more horrible test of loyalty in the burial of living retainers to their necks in the earth, with only the head above ground, who were left to starve slowly to death. Burying a man alive under the foundations of a castle about to be built or in the pier of a new bridge, was a similar instance of lingering superstitions.

In the *Bu Kan* ("Mirror of the Military Families of Japan"), a complete list of the "Yedo nobility," or clans, no record is given of Iyéyasŭ's sixth and ninth male children. On his three last sons were bestowed the richest fiefs in the empire, excepting those of Satsuma, Kaga, Mutsu, Higo, and a few others — all-powerful daimiōs, whose lands Iyéyasŭ could not touch, and whose allegiance was only secured by a policy of conciliation. These three sons were invested with the principalities of Owari, Kii, and Mito. They founded three families, who were called Gosanké (the three illustrious families), and from these, in case of failure of heirs in the direct line, the shōgun was to be chosen. The assessed revenue of these families were 610,500, 555,000, and 350,000 koku of rice, respectively. They were held in great respect, and wielded immense influence. Their yashikis in Yedo were among the largest, and placed in the most conspicuous and commanding sites of the city. At the tombs of the shōguns at Shiba and Uyéno, the bronze memorial lanterns presented in honor of the deceased ruler are pre-eminent above all others for their size and beauty.

In the course of history down to 1868, it resulted that the first seven shōguns were descendants of Iyéyasŭ in the line of direct heirs.* From the eighth, and thence downward to the sixteenth, or next to the last, the shōguns were all really of the blood of Kii. The Owari family was never represented on the seat of Iyéyasŭ. It was generally believed, and is popularly stated, that as the first Prince of Mito had

Islands—revenue, 710,000 koku; chief city, Kagoshima.
one cadet of the house of Shimadzŭ, with a revenue of
The crest was a white cross within a circle.

The Asano family ruled Aki; chief city, Hiroshima; revenue, 426,000; one cadet.

The Mōri family ruled Chōshiu; chief city, Hagi; revenue, 369,000. Of three cadet families, two were in Nagato, one was in Suwo. Their united incomes, 100,000 koku; crest, a kind of water-plant.

The above are a few specimens from the thirty-six families outside of the Tokugawa, and the subject (*fudai*) clans, who, though not of the shōgunal family, took the name of Matsudaira. There were, in 1862, two hundred and sixty-seven feudal families, and as many daimiōs of various rank, income, and landed possessions. Japan was thus divided into petty fragments, without real nationality, and utterly unprepared to bear the shock of contact with foreigners.

The Tozama [outside (of the shōgunal family) nobility] were cadet families of the Kokushiu, or the smaller landed lords, who held hereditary possessions, and who sided with Iyéyasŭ in his rise to power. There were, in 1862, ninety whose assessed revenue ranged from ten to one hundred thousand koku each.

The Fudai (literally, successive generations) were the generals, captains, and retainers, both civil and military, on whom Iyéyasŭ bestowed land as rewards. They were the direct vassals of the Tokugawa family. The shōgun could order any of them to exchange their fiefs, or could increase or curtail their revenues at will. They were to the shōgun as the old "Six Guards" of Kiōto, or household troops of the mediæval mikadoate. There were, in 1862, one hundred and fifteen of this class, with lands assessed at from ten to one hundred thousand koku. It was only the fudai, or lower-grade daimiōs, who could hold office under the Yedo bakufu, and one became regent, as we shall see.

When once firmly seated on the throne, Iyéyasŭ found himself master of almost all Japan. His greatest care was to make such a disposal of his lands as to strike a balance of power, and to insure harmony among the host of territorial nobility, who already held or were about to be given lands. It must not be forgotten that Iyéyasŭ and his successors were, both in theory and reality, vassals of the emperor, though they assumed the protection of the imperial person. Neither the shōgun nor the daimiōs were acknowledged at Kiōto as nobles of the empire. The lowest kugé was above the shōgun in rank. The shōgun could obtain his appointment only from the mikado. He was simply the most powerful among the daimiōs, who had won that pre-eminence by the sword, and who, by wealth and

skillfully wrought plan of division of land among the
, was able to rule for over two and a half centuries.
he was *primus inter pares;* in actuality, he was supreme
The mikado was left with merely nominal power, de-
the Yedo treasury for revenue and protection, but he
ountain of honor and preferment, and, with his court,
was the lawful, and, in the last analysis, the only true
was formed at Yedo the *de facto*, actual administrative

es, and rule them by the strong hand of military force.
eal titles were bestowed only by the emperor; and an
, however empty of actual power, from the Son of
ōto was considered immeasurably superior to any gift
-compelling chief daimiō in Yedo could bestow. The
ank and official title is the ruling passion of a Japanese.
imiōs, not content with their power and revenue, spent
money, and used every influence at the Kiōto court, to
e, indeed, the exponent of a reality that existed, but,

vassals, while Owari and Kii were assigned to his sons. His fudai vassals, or "household troops," were also ranged on the west, while to the south-west was Ōzaka, a city in the government domain, ruled by his own officials. Thus the capital was completely walled in by friends of Tokugawa, and isolated from their enemies.

Mōri, once the lord of ten provinces, and the enemy of Tokugawa, was put away into the extreme south-west of Hondo, all his territories except Nagato and Suwo being taken from him, and given to Tokugawa's direct vassals. Opposite to Nagato were Kokura and Chikuzen, enemies of Nagato. We shall see the significance of this when we treat of events leading to the Restoration (1853–1868). Shikokŭ was properly divided, so as to secure a preponderance of Tokugawa's most loyal vassals. Kiushiu was the weakest part of the system; yet even here Satsuma was last and farthest away, and Higo, his feudal rival and enemy, was put next, and the most skillful disposition possible made of the vassals and friends of Tokugawa.

In the daimiōates succession to their lands was hereditary, but not always to the oldest son, since the custom of adoption was very prevalent, and all the rights of a son were conferred on the adopted one. Often the adopted child was no relation of the ruler. Sickly infants were often made to adopt a son, to succeed to the inheritance and keep up the succession. One of the most curious sights on occasions of important gatherings of samurai, was to see babies and little boys dressed in men's clothes, as "heads of families," sustaining the dignity of representing the family in the clan. I saw such a sight in 1871.

One great difference between the Japanese system and that of entails in Europe lay in this, that the estate granted to each daimiō could not be added to, or diminished, either by marriage, or by purchase, or by might, except by express permission and grant from the shōgun, the superior of all.

Next to the daimiōs ranked the *hatamoto*, or flag-supporters (*hata*, flag; *moto*, root, under), who were vassals of the shōgun—his special dependence in war time—having less than ten thousand koku revenue. Each had from three to thirty retainers in his train. They were, in most cases, of good family, descendants of noted warriors. They numbered eighty thousand in various parts of the empire, but the majority lived in Yedo. They formed the great body of military and civil officials. The *gokenin*, many of the descendants of Iyéyasŭ's private soldiers, were inferior in wealth and rank to the hatamoto, but with them formed the hereditary personal following of the shō-

ituted the Tokugawa clan proper, whose united reve-
to nearly nine million koku. The shōgun, or chief
mpire, has thus unapproachable military resources, fol-
venue, and could overawe court and emperor above,
sals beneath.

within the above classes and their military retainers

or engage in any business. His only duty was to keep
tch at the castle or his lord's house, walk in his lord's
stated occasions appear in ceremonial dress. His life
ness and ease; and, as may be imagined, the long cent-
served only to develop the dangerous character of this
rmed idlers. Some, indeed, were studious, or engaged
artial exercises, or became teachers; but the majority

drunk their fill, would leave without paying, swaggering, drunk, and singing between their tipsy hiccoughs. Remonstrances from the landlord would be met with threats of violence, and it was no rare thing for them, in their drunken fury, to slash off his head. Yet these same non-producers and genteel loafers were intensely sensitive on many points of honor, and would be ready at any moment to die for their master. The possession of swords, and the arrogance bred of their superiority as a privileged class, acted continually as a temptation to brawls and murder.

Edinburgh, in the old days of the clans, is perhaps the best illustration of Yedo during the Tokugawa times. Certain localities in Yedo at night would not suffer by a comparison with the mining regions of California during the first opening of the diggings, when to "eat" a man, or to kill an Indian before breakfast, was a feather in the cap of men who lived with revolvers constantly in their belts. As there were always men in the gulches of whom it was a standing prophecy that they would "die with their boots on," so there was many a man in every city of Japan of whom it would be a nine days' wonder should he die with his head on. Of such men it was said that their death would be *inujini* (in a dog's place).

Yet the merchant and farmer were not left utterly helpless. The Otokodaté were gallant and noble fellows, not of the samurai class, but their bitter enemies. The swash-bucklers often met their match in these men, who took upon themselves to redress the grievances of the unarmed classes. The Otokodaté were bound together into a sort of guild to help each other in sickness, to succor each other in peril, to scrupulously tell the truth and keep their promises, and never to be guilty of meanness or cowardice. They lived in various parts of Japan, though the most famous dwelt in Yedo. They were the champions of the people, who loved and applauded them. Many a bitter conflict took place between them and the overbearing samurai, especially the "white-hilts." The story of their gallant deeds forms the staple of many a popular story, read with delight by the common people.

Below the samurai, or gentry, the three great classes were the farmers, artisans, and merchants. These were the common people. Beneath them were the *etas*, who were skinners, tanners, leather-dressers, grave-diggers, or those who in any way handled raw-hide or buried animals. They were the pariahs, or social outcasts, of Japan. They were not allowed to enter a house, or to eat or drink, sit or cook at

with other persons. These people were said by some to
s of Corean prisoners; by others, to have been original-
who killed animals for feeding the imperial falcons. As
hibited the eating of animals as food, the eta were left
e of society. The *hinin* (not human) were the lowest
rs, the squatters on waste lands, who built huts along the
ed by soliciting alms. They also attended to the execu-
als and the disposal of their corpses. In general, they

books, in stereotyped phrase, told us, 2,500,000 souls. It is probable that, in 1857, when Mr. Townsend Harris, the American envoy, first entered it, it had as many as 1,000,000. In 1872, by official census, the population of Tōkiō, including that of the villages around it and under the municipal jurisdiction, was 925,000; of the city proper, 790,000 permanent residents, to which should be added nearly 100,000 floating population.

Outside of Yedo, the strength of the great unifier was spent on the public roads and highways, especially the Tōkaidō, or road skirting the Eastern Sea, which begins at Kiōto and ends at Tōkiō. He arranged fifty-three stations (*shiku*, relays, or post-stations), at which were hotels, pack-horses, baggage-coolies, and palanquin-bearers. A regular code of regulations to govern the movements of the daimiōs and nobles when traveling—the etiquette to be observed, the scale of prices to be charged—was duly arranged, and continued in force until 1868. The roads, especially the mountain-passes, bridges, and ferries, were improved, and one *ri* (measure of two and two-fifth miles) hillocks to mark the distances set up. The regulations required that the main roads should be thirty-six feet wide, and be planted with pine-trees along their length. Cross-roads should have a width of eighteen feet; foot-paths, six; and of by-paths through the fields, three feet. At the ferry-landing on either bank of a river there was to be an open space of about three hundred and sixty feet. Various other regulations, pertaining to minute details of life, sumptuary laws, and feudal regulations, were promulgated, and gradually came into force throughout the empire.

To defend the Kuantō, and strengthen his position as military ruler of the empire, he built or improved the nine castles of Mito, Utsunomiya, Takasaki, Odawara, and five others in the Kuantō. At Sumpu, Ōzaka, and Nijo, in Kiōto, were also fine castles, and to their command officers were assigned. All these, and many other enterprises, required a vast outlay of money. The revenue of the empire amounted to nearly 30,000,000 koku (165,000,000 bushels) of rice. Of this, nearly 9,000,000 koku were retained as the revenue of the Tokugawas. The mines were government property; and at this time the gold of Sado was discovered, which furnished Iyéyasŭ with the sinews of war and peace. This island may be said to be a mass of auriferous quartz, and has ever since been the natural treasure-house of Japan.

Iyéyasŭ had now the opportunity to prove himself a legislator, as well as a warrior. He began by granting amnesty to all who would

wished the past forgotten. He regretted that so much
n spilled. He entered upon a policy of conciliation that
his side all the neutral and nearly all the hostile clans.

through Japanese poetry and impassioned rhetoric ever sparkle the glories of the morning's mirror in Chiuzenji, and the golden floods of light that bathe Nantaizan. The water-fall of Kiri Furi (falling mist); and of Kégon, the lake's outlet, over seven hundred feet high; the foaming river, grassy green in its velocity; the colossal forests and inspiring scenery, made it the fit resting-place of the greatest character in Japanese history.

In 1617, his remains were removed from Kuno, and in solemn pageantry moved to Nikkō, where the imperial envoy, vicar of the mikado, court nobles from Kiōto, many of his old lords and captains, daimiōs, and the shōgun Hidétada, awaited the arrival of the august ashes. The corpse was laid in its gorgeous tomb, before which the vicar of majesty presented the gohei, significant of the apotheosis of the mighty warrior, deified by the mikado as the divine vice-regent of the gods of heaven and earth, under the title Sho ichi i Tō Shō Dai Gongen, or "Noble of the first Degree of the first Rank, Great Light of the East, Great Incarnation of Buddha." During three days, a choir of Buddhist priests, in their full canonical robes, intoned the *Hokké* sacred classic ten thousand times. It was ordained that ever afterward the chief priest of Nikkō should be a prince of the imperial blood, under the title of Rinnoji no miya.

Of Hidétada, the successor of Iyéyasŭ, there is little to record. The chief business of his life seems to have been to follow out the policy of his father, execute his plans, consolidate the central power, establish good government throughout the empire, and beautify, strengthen, and adorn Yedo.

Iyémitsŭ, the grandson of Iyéyasŭ, is acknowledged to have been the ablest ruler of all the Tokugawas after the founder, whose system he brought to perfection. In 1623, he went to Kiōto to do homage to the mikado, who invested him with the title of Sei-i Tai Shōgun. By this time many of the leaders and captains who had fought under Iyéyasŭ, or those who most respected him for his prowess, were dead or superannuated, and had been succeeded by their sons, who, as though fated to follow historical precedent, failed to possess the vigor of their fathers, their associations being those of peace, luxury, and the effeminacy which follows war.

Iyémitsŭ was a martinet as well as a statesman. He proposed that all the daimiōs should visit and reside in Yedo during half the year. Being at first treated as guests, the shōgun coming out to meet them in the suburbs, they swore allegiance to his rules, sealing their signa-

ing to custom, with blood drawn from the third finger of and. Gradually, however, these rules became more and ive, until the honorable position degenerated into a con- nount to mere vassalage. Their wives and children were ages in Yedo, and the rendition of certain tokens of re- equivalent to homage to the shōgun, became imperative. ule the Christian insurrection and massacre at Shimabara The Dutch were confined to Déshima. Yedo was vastly improved. Aqueducts, still in excellent use, were laid, to supply the city with water. To guard against the ever-threatening enemy, fire, watch-towers, or lookouts, such as are to be seen in every city, were erected in great numbers. Bells are hung at the top and a code of signals, and a prescribed number of taps give the lo-

was intended to overawe the "barbarian" Coreans. It is best explainable in the light of the Virgilian phrase, *magna pars fui*, or the less dignified "Big Indian I."

The building of the fine temples of Toyeizan, at Uyéno, in Yedo, and at Nikkō, were completed in Iyémitsŭ's time, he making five journeys thither. He died in 1649, after a prosperous rule of twenty-six years, and was buried with his grandfather at Nikkō.

The successors of Iyéyasŭ, the shōguns of the Tokugawa dynasty, fourteen in all, were, with one exception, buried alternately in the cemeteries of Zōzōji and Tōyeizan, in the city districts of Shiba and Uyéno. These twin necropolises of the illustrious departed were the chief glories of Yedo, which was emphatically the city of the Tokugawas. The remains of six of them lie in Uyéno, and six in Shiba, while two are at Nikkō.

During the summer of 1872, in company with an American friend and three of my brightest students, I made a journey to Nikkō, and for nearly a week reveled in its inspiring scenery and solemn associations. During my three years' residence in Tōkiō, I visited these twin sacred places many times, spending a half-day at a visit. No one has described these places better than Mr. Mitford, in his "Tales of Old Japan." He says: "It is very difficult to do justice to their beauty in words. I have the memory before me of a place green in winter, pleasant and cool in the hottest summer, of peaceful cloisters, of the fragrance of incense, of the subdued chant of richly robed priests, and the music of bells of exquisite designs, harmonious coloring, and rich gilding. The hum of the vast city outside is unheard here. Iyéyasŭ himself, in the mountains of Nikkō, has no quieter resting-place than his descendants in the heart of the city over which he ruled."

Passing through an immense red portal on the north side of Shiba, we enter the precincts of the sacred place through a long, wide avenue, lined by overarching firs, and rendered solemnly beautiful by their shade. A runner is usually on hand to conduct visitors to the gate, inside of which a priest is waiting. We enter a pebbled courtyard, in which are ranged over two hundred large stone lanterns. These are the gifts of the fudai daimiōs. Each lantern is inscribed with the name of the donor, the posthumous title of the deceased shōgun, the name of the temple at Shiba, and the province in which it is situated, the date of the offering, and a legend, which states that it is reverently offered. On the following page is the reading on one, and will serve as a specimen:

hrough a handsomely gilt and carved gate-way, we enter urt-yard, the sides of which are gorgeously adorned. area are bronze lanterns, the gift of the Kokushiu daimiōs. y large gilded lanterns standing by themselves are from

study. The glory of motion, the passionate life of the corolla, and the perfection of nature's colors have been here reproduced in inanimate wood by the artist. At the extremity of the nave is a short flight of steps. Two massive gilt doors swing asunder at the touch of priestly hands, and across the threshold we behold an apocalypse of splendor. Behind the sacred offertories, on carved and lacquered tables, are three reliquaries rising to the ceiling, and by their outer covering simulating masses of solid gold. Inside are treasured the tablets and posthumous titles of the august deceased. Descending from this sanctum into the transept again, we examine the canonical rolls, bell, book, and candles, drums and musical instruments, with which the Buddhist rites are celebrated and the liturgies read. Donning our shoes, we pass up a stone court fragrant with blossoming flowers, and shaded with rare and costly trees of every variety, form, and height, but overshadowed by the towering firs. We ascend a flight of steps, and are in another pebbled and stone-laid court, in which stands a smaller building, called a *haiden*, formerly used by the living shōgun as a place of meditation and prayer when making his annual visit to the tombs of his forefathers. Beyond it is still another flight of stone steps, and in the inclosure is a plain monumental urn, "This is the simple ending to so much magnificence"—the solemn application of the gorgeous sermon.

The visitor, on entering the cemetery by the small gate to the right of the temple, and a few feet distant from the great belfry, will see three tombs side by side. The first to the left is that of Iyénobu, the sixth of the line, who ruled in 1709–1713. The urn and gates of the tomb are of bronze. The tomb in the centre is that of Iyéyoshi, the twelfth, who ruled 1838–1854. The third, to the right, is that of Iyémochi, the fourteenth shōgun, who ruled 1858–1866, and was the last of his line who died in power.

From the tomb of Iyémochi, facing the east and looking to the left, we may see the tombs of Iyétsugu (1713–1716), the seventh, and of Iyéshigé (1745–1762), the ninth, shōgun. Descending the steps and reaching the next stone platform, we may, by looking down to the left, see the tombs of a shōgun's wife and two of his children. The court-yards and shrines leading to the tombs of Iyétsugu and Iyéshigé are fully as handsome as the others. Hidétada (1606–1623), the second prince of the line, is buried a few hundred yards south of the other tombs. The place is easily found. Passing down the main avenue, and turning to the right, we have a walk of a fur-

› up a hill, on the top of which, surrounded by camellia ithin a heavy stone palisade, is a handsome octagon edi- same material. A mausoleum of gold lacquer rests up- pedestal. XXVIII.

THE RECENT REVOLUTIONS IN JAPAN.*

It is the popular impression in the United States and in Europe that the immediate cause of the fall of the shōgun's Government, the restoration of the mikado to supreme power, and the abolition of the dual and feudal systems was the presence of foreigners on the soil of Japan. No one who has lived in Dai Nippon, and made himself familiar with the currents of thought among the natives, or who has studied the history of the country, can share this opinion. The foreigners and their ideas were the occasion, not the cause, of the destruction of the dual system of government, which would certainly have resulted from the operation of causes already at work before the foreigners arrived. Their presence served merely to hasten what was already inevitable.

I purpose in this chapter to expose the true causes of the recent marvelous changes in Japan. These comprise a three-fold political revolution within, a profound alteration in the national policy toward foreigners, and the inauguration of social reforms which lead us to hope that Japan has rejected the Asiatic, and adopted the European, ideal of civilization. I shall attempt to prove that these causes operated mainly *from within*, not from without; from impulse, not from impact; and that they were largely intellectual.

The history of Japan, as manifested in the current of events since the advent of Commodore Perry, has its sources in a number of distinct movements, some logically connected, others totally distinct from the rest. These were intended to effect: 1. The overthrow of the shōgun, and his reduction to his proper level as a vassal; 2. The restoration of the true emperor to supreme power; 3. The abolition of the feudal system and a return to the ancient imperial régime; 4. The abolition of Buddhism, and the establishment of pure Shintō as

* Reprinted and enlarged from the *North American Review* of April, 1875.

faith and the engine of government. These four move-
historically and logically connected. The fifth was the
the foreign "barbarians," and the dictatorial isolation
m the rest of the world; the sixth, the abandonment of
he adoption of Western civilization, and the entrance of
e comity of nations. The origin of the first and second
nust be referred to a time distant from the present by a
a half; the third and fourth, to a period within the past
fifth and sixth, to an impulse developed mainly within
of young men now living.

ted, long before the advent of Perry, definite conceptions
s to be accomplished. These lay in the minds of earnest
whom life under the dual system was a perpetual winter
, like snow upon the hills. In due season the spring
ome that was to make the flood. The presence of Perry

nile might suggest. The mikado and the ancient ark of
into power. Buddhism stood as upon a rock, damaged,

seem to imply that the bombardment of Kagoshima was the paramount cause that impelled Japan to adopt the foreign civilization.

Much, also, has been said and written in praise of Japan for her abolition of the feudal system by a "stroke of the pen," and thus "achieving in one day what it required Europe centuries to accomplish." An outsider, whose knowledge of Dai Nippon is derived from our old text-books and cyclopedias, or from non-resident book-makers, may be so far dazed as to imagine the Japanese demi-gods in statecraft, even as the American newspapers make them all princes. To the writer, who has lived in a daimiō's capital before, during, and after the abolition of feudalism, the comparison suggests the reason why the Irish recruit cut off the leg instead of the head of his enemy. Long before its abolition, Japanese feudalism was ready for its grave. The overthrow of the shōgun left it a headless trunk. To cut off its legs and bury it was easy, and in reality this was what the mikado's Government did, as I shall show.

As it would be vain to attempt to comprehend our own late civil war by beginning at Sumter, or even with the Compromise measures of 1851; so one will be misled who, in attempting to understand the Japan of to-day, looks only at events since Perry's time. The roots of the momentous growth of 1868 are to be found within the past centuries.

Yoritomo's acts were in reality the culmination of a long series of usurpations, begun by the Taira. Under the plea of military necessity, he had become an arch-usurper. In the period 1184–1199 A.D. began that dual system of government which has been the political puzzle of the world; which neither Kaempfer, nor the Déshima Hollanders, nor the Portuguese Jesuits seem ever to have fully understood; which has filled our cyclopedias and school-books with the misleading nonsense about "two emperors," one "spiritual" and the other "secular;" which led the astute Perry and his successors to make treaties with an underling; which gave rise to a vast mass of what is now very amusing reading, embracing much prophecy, fiction, and lamentations, in the Diplomatic Correspondence from Japan; and which keeps alive that venerable solecism heard among a few Rip Van Winkles in Japan, who talk, both in Japanese and English, about the "return of the tycoon to power." There never was but one emperor in Japan; the shōgun was a military usurper, and the bombastic title "tycoon" a diplomatic fraud.

We have seen how the policy of Yoritomo was continued by the

ikaga, and the Tokugawas, who consummated the per-
tion of the throne and the camp. The custom of the
to Kiōto to do the mikado homage fell into desuetude
of Iyémitsŭ. The iron-handed rule of the great com-
lo was felt all over the empire, and after centuries of
rfect peace. Learning flourished, the arts prospered.

d within a plaster wall, in a city which was the chosen
s of simple life, highest rank, and purest blood, men of
s, and priests, and noted for its classic history and
ions, monasteries, gardens, and people of courtly man-
e life. The shōgun lived in a fortified and garrisoned
king an upstart city full of arsenals, vassal princes, and
ers. The feelings of the people found truest expression
"The shōgun all men fear; the mikado all men love."
rs of Iyévasŭ, carrying out his policy, having extermi-

study ancient history, which might expose the origin of the shōgunate, was forbidden to the vulgar, and discouraged among the higher. A rigid censorship dried the life-blood of many a master spirit, while the manufacture and concoction of false and garbled histories which extolled the reigning dynasty, or glorified the dual system of government as the best and only one for Japan, were encouraged. There were not wanting poets, fawning flatterers, and even historians, who in their effusions styled the august usurper the Ō-gimi (Chinese, *tai-kun*, or "tycoon"), a term meaning great prince, or exalted ruler, and properly applied only to the mikado. The blunders, cruelties, and oppressions of the Tokugawa rulers were, in popular fiction and drama, removed from the present, and depicted in plots laid in the time of the Ashikagas, and the true names changed. One of the most perfect systems of espionage and repression ever devised was elaborated to fetter all men in helpless subjection to the great usurper. An incredibly large army of spies was kept in the pay of the Government. Within such a hedge, the Government itself being a colossal fraud, rapidly grew and flourished public and private habits of lying, and deceit in all its forms, until the love of a lie apparently for its own sake became a national habit. When foreigners arrived in the Land of the Gods during the decade following Perry's arrival, they concluded that the lying which was everywhere persistently carried on in the Government and by private persons with such marvelous facility and unique originality was a primal characteristic of Japanese human nature. The necessity of hoodwinking the prying eyes of the foreigners, lest they should discover the fountain of authority, and the true relation of the shōgun, gave rise to the use of official deception that seemed as variegated as a kaleidoscope and as regular as the laws of nature. The majority of the daimiōs who had received lands and titles from the shōgun believed their allegiance to be forever due to him, instead of to the mikado, a belief stigmatized as rank treason by the students of history. As for the common people, the great mass of them forgot, or never knew, that the emperor had ever held power or governed his people; and being officially taught to believe him to be a divine personage, supposed he had lived thus from time immemorial. Knowing only of the troubled war times before the "great and good" Tokugawas, they believed devoutly in the infallibility, paternal benevolence, and divine right of the Yedo rulers.

The line of shōguns, founded by Iyéyasŭ, was the last that held, or ever will hold, the military power in Japan. To them the Japanese

blessing of nearly two hundred and seventy years of their firm rule the dual form of government seemed unchangeable, and the feudal system in eternal stabili- not exist, nor was it possible there should arise, causes ined the feudalism of Europe. The ghty thousand retainers of the Tokugawas, backed by f some of the richest clans, such as Owari, Kii, Mito, ee Appendix), who were near relatives of the shōgunal

What were the causes of these three distinct results? When began the first gathering of the waters which burst into flood in 1868, sweeping away the landmarks of centuries, floating the old ship of state into power, impelling it, manned with new men and new machinery, into the stream of modern thought, as though Noah's ark had been equipped with engines, steam, and propellers? To understand the movement, we must know the currents of thought, and the men who produced the ideas.

There were formerly many classes of people in Japan, but only three of these were students and thinkers. The first comprised the court nobles, the literati of Kiōto; the second, the priests, who brought into existence that mass of Japanese Buddhistic literature, and originated and developed those phases of the India cultus which have made Japanese Buddhism a distinct product of thought and life among the manifold developments of the once most widely professed religion in the world. This intellectual activity and ecclesiastical growth culminated in the sixteenth century. Since that time Japanese thought has been led by the samurai, among whom we may include the priests of Shintō. The modern secular intellectual activity of Japan attained its highest point during the latter part of the last and the first quarter of the present century. Even as far back as the seventeenth century, the students of ancient history began to understand clearly the true nature of the duarchy, and to see that the shōgunate could exist only while the people were kept in ignorance. From that time Buddhism began to lose its hold on the intellect of the samurai and lay educated classes. The revival of Chinese learning, especially the Confucian and Mencian politico-ethics, followed. Buddhism was almost completely supplanted as a moral force. The invasion of Corea was one of the causes tributary to this result, which was greatly stimulated by the presence of a number of refugee scholars, who had fled from China on the overthrow of the Ming dynasty. The secondary influence of the fall of Peking and the accession of the Tartars became a parallel to the fall of Constantinople and the dispersion of the Greek scholars through Europe in the thirteenth century. The relation between the sovereign (mikado) and vassal (shōgun) had become so nearly mythical, that most Japanese fathers could not satisfy the innocent and eager questions of their children as to who was sovereign of Japan. The study of the Confucian moral scheme of "The Five Relations" (*i. e.*, sovereign and minister, parent and child, husband and wife, elder and younger brother, and between

ch the first and great requirement is the obedience of
s lord, aroused an incoercible desire among the samurai

was born 1622, and died 1700, is to be considered, as
ed out by Mr. Ernest Satow, as "the real author of the
ch culminated in the revolution of 1868." Assembling
ost of scholars from all parts of Japan, he began the
the *Dai Nihon Shi*, or "History of Japan." It is writ-

period of the decadence of the mikados. This work had to pass the ordeal of the censorate at Yedo, and some of the volumes were repeatedly purged by the censors before they were allowed to be published. The unmistakable animus of this great book is to show that the mikado is the only true ruler, in whom is the fountain of power, and to whom the allegiance of every Japanese is due, and that even the Tokugawas were not free from the guilt of usurpation.

The long peace of two centuries gave earnest patriots time to think. Though the great body of the people, both the governing and the governed classes, enervated by prolonged prosperity and absence of danger, cared for none of these things, the serious students burned to see the mikado again restored to his ancient authority. *This motive alone would have caused revolution in due time.* They felt that Japan had retrograded, that the military arts had sunk into neglect, that the war spirit slumbered. Yet on all sides the "greedy foreigners" were eying the Holy Country. Already the ocean, once a wall, was a highway for wheeled vessels. The settlement of California and the Pacific coast made the restless Americans their neighbors on the east, with only a wide steam ferry between. American whalers cruised in Japanese waters, and hunted whales in sight of the native coasters. American ships repeatedly visited their harbors to restore a very few of the human waifs which for centuries in unintermitted stream had drifted up the Kuro Shiwo and across the Pacific, giving to America wrecks and spoils, her tribes men, her tongues words, and perhaps the civilization which in Peru and Mexico awoke the wonder and tempted the cupidity of the Spanish marauders (see Appendix). Defying all precedent, and trampling on Japanese pride and isolation, the American captains refused to do as the Hollanders, and go to Nagasaki, and appeared even in the Bay of Yedo. The long scarfs of coal-smoke were becoming daily matters of familiar ugliness and prognostics of doom. The steam-whistle heard by the junk sailors—as potent as the rams' horns of old — had already thrown down their walls of exclusion. The "black ships" of the "barbarians" passing Matsumaë in one year numbered eighty-six. Russia, on the north, was descending upon Saghalin; the English, French, Dutch, and Americans were pressing their claims for trade and commerce. The bakufu was idle, making few or no preparations to resist the fierce barbarians. Far-sighted men saw that, in presence of foreigners, a collision between the two centres of government, Yedo and Kiōto, would be immediate as it was inevitable. When it should come, in the nature of the case, the shō-

fall. The samurai would adhere to the mikado's side, uction of the feudal system would follow as a logical ne- as the time of luxury, carousal, and the stupor of licen- with most of the daimiōs, but with others of gloomy

to this religion, Japan is pre-eminently the Land of the e mikado is their divine representative and vicegerent. ty of all Japanese implicitly to obey him. During the the shōguns, and of Buddhism, which they favored and , indeed, knew what pure Shintō was. Its Bible is the led A.D. 712. Several other works, such as the *Nihongi*, re nearly as old and as valuable in the eyes of Shintō e *Kojiki*. They are written in ancient Japanese, and can by special students of the archaic form of the language.

conception of the "millennium" among Christians, were synonymous with the mikado and his return to power. The arguments of the Shintōists helped to swell the tide that came to its flood at Fushimi. Throughout and after the war of 1868–1870, there were no more bitter partisans who urged to the last extremes of logic and severity the issues of the war and the "reformation." It was the study of the literature produced by the Shintō scholars and the historical writers that formed the public opinion that finally overthrew the shōgunate, the bakufu, and feudalism.

Long before foreigners arrived, the seeds of revolution were above the soil. The old Prince of Mitō, a worthy descendant of his illustrious ancestor, tired of preaching Shintō and of persuading the shōgun to hand over his authority to the mikado, resolved, in 1840, to take up arms and to try the wager of battle. To provide the sinews of war, he seized the Buddhist monasteries, and melted down their enormous bronze bells and cast them into cannon. By prompt measures the bakufu suppressed his preparations for war, and imprisoned him for twelve years, releasing him only in the excitement consequent upon the arrival of Perry.

Meanwhile Satsuma, Chōshiu, and other Southern clans were making extensive military preparations, not merely to be in readiness to drive out the possible foreign invaders, but, as we now know, and as events proved, to reduce the shōgun to his proper level as one of many of the mikado's vassals. The ancestors of these most powerful clans had of old held equal rank and power with Iyéyasŭ, until the fortunes of war turned against them. They had been overcome by force, or had sullenly surrendered in face of overwhelming odds. Their adhesion to the Tokugawas was but nominal, and only the strong pressure of superior power was able to wring from them a haughty semblance of obedience. They chafed perpetually under the rule of one who was in reality a vassal like themselves. On more than one occasion they openly defied and ignored the bakufu's orders; and the purpose, scarcely kept secret, of the Satsuma and Chōshiu clans was to destroy the shōgunate, and acknowledge no authority but that of the mikado.

From the Southern clans rose, finally, the voice in council, the secret plot, the *coup d'état*, and the arms in the field that wrought the purpose for which Mito labored. Yet they would never have been successful, had not a public sentiment existed to support them, which the historical writers had already created by their writings. The scholars could never have gratified their heart's wish, had not the

and the power behind the throne which urged the movement to its logical consequences. At this moment, the annihilator of the Saga rebellion, crowned with diplomatic laurels, and the conqueror of a peace at Peking, he stands leader of the Cabinet, and the foremost man in Japan. Katsŭ advised the bakufu not to fight Chōshiu, and his master to resign his position, thus saving Yedo from destruction. The lesser men of note, pupils of Satsuma, who now hold positions of trust, or who have become disinterested Cincinnati, to show their patriotism, are too many to mention.

Familiarity with the facts above exposed will enable one to understand the rush of events that followed the arrival of the American envoy. The bakufu was apparently at the acme of power. The shōgun Iyéyoshi at Yedo was *fainéant*. The mikado at Kiōto, Koméi Tennō, father of the present emperor, was a man who understood well his true position, hated the bakufu as a nest of robbers, and all foreigners as unclean beasts. Within the empire, all was ripe for revolution. Beneath the portentous calm, those who would listen could hear the rumble of the political earthquake. From without came puffs of news, like atmospheric pulses portending a cyclone. On that 8th day of July, 1853, the natural sea and sky wearing perfect calm, the magnificent fleet of the "barbarian" ships sailed up the Bay of Yedo. It was the outer edge of the typhoon. The *Susquehanna* was leading the squadrons of seventeen nations.

There was one spectator upon the bluffs at Yokohama who was persuaded in his own mind that the men who could build such ships as those; who were so gentle, kind, patient, firm; having force, yet using it not; demanding to be treated as equals, and in return dealing with Japanese as with equals, could not be barbarians. If they were, it were better for the Japanese to become barbarous. That man was Katsŭ, now the Secretary of the Japanese Navy.

The barbarian envoy was a strange creature. He was told to leave the Bay of Yedo and go to Nagasaki. He impolitely refused, and staid and surveyed, and was dignified. This was anomalous. Other barbarians had not acted so; they had quietly obeyed orders. Furthermore, he brought letters and presents, all directed "To the Emperor of Japan." The shōgun was not emperor, but he must make believe to be so. It would not do to call himself the mikado's general only. This title awed sufficiently at home; but would the strangers respect it? A pedantic professor ("not the Prince of Dai Gaku") in

college (Dai Gaku Kō) at Yedo was sent to treat with
n Perry. A chopper of Chinese logic, and a stickler for
the pedant must, as in duty bound, exalt his master. He
at least allowed to be used in the treaties the title *tai-kun*,
nese word, which in those official documents signified that
upreme ruler of all Japan. This title had never been be-
the shōgun by the mikado, nor had it ever been used in
official documents. The bakufu and the pedantic pro-
shi, did not mean to lie to the true sovereign in Kiōto.

added an exceptional succession of destructive earthquakes, typhoons, floods, fires, and storms. In the midst of these calamities the shōgun, Iyésada, died.

An heir must be chosen. His selection devolved upon the tairō, or regent, Ii, a man of great ability, daring, and, as his enemies say, of unscrupulous villainy. Ii,* though socially of low rank, possessed almost supreme power. Ignoring the popular choice of Keiki (the seventh son of the Daimiō of Mito), who had been adopted by the house of Hitotsŭbashi, he chose the Prince of Kii, a boy twelve years of age. In answer to the indignant protests of the princes of Mito,† Echizen, and Owari, he shut them up in prison, and thus alienated from his support the near relatives of the house of Tokugawa. It was his deliberate intention, say his enemies, to depose the mikado, as the Hōjō did, and set up a boy emperor again. At the same time, all who opposed him or the bakufu, or who, in either Kiōto, Yedo, or elsewhere, agitated the restoration of the mikado, he impoverished, imprisoned, exiled, or beheaded. Among his victims were many noble scholars and patriots, whose fate excited universal pity.‡

---

* The premier, Ii, was the Daimiō of Hikoné, a castled town and fief on Lake Biwa, in Mino; revenue, three hundred and fifty thousand koku. He was at the head of the *fudai*. His personal name was Nawosŭké; his title at the emperor's court was *kamon no kami*—head of the bureau of the Ku Nai Shō (imperial household)—having in charge the hangings, curtains, carpets, mats, and the sweeping of the palace on state occasions. His rank at Kiōto was Chiujō, or "general of the second class." In the bakufu, he was prime minister, or "tairō." He had a son, who was afterward educated in Brooklyn, New York.

† It would be impossible in brief space to narrate the plots and counterplots at Yedo and Kiōto during the period 1860–1868. As a friendly critic (in *The Hiōgo News*, June 9th, 1875) has pointed out, I allow that the Prince of Mito, while wishing to overthrow the shōgunate, evidently wished to see the restoration accomplished with his son, Keiki, in a post of high honor and glory. While in banishment, secret instructions were sent from Kiōto, which ran thus: "The bakufu has shown great disregard of public opinion in concluding treaties without waiting for the opinion of the court, and in disgracing princes so closely allied by blood to the shōgun. The mikado's rest is disturbed by the spectacle of such misgovernment, when the fierce barbarian is at our very door. Do you, therefore, assist the bakufu with your advice; expel the barbarians; content the mind of the people; and restore tranquillity to his majesty's bosom."—*Kinsé Shiriaku*, p. 11, Satow's translation. This letter was afterward delivered up to the bakufu, shortly after which (September, 1861) the old prince died. The Mito clan was for many years afterward divided into two factions, the "Righteous" and the "Wicked." There is no proof that the Prince of Mito poisoned Iyésada, except the baseless guess of Sir Rutherford Alcock, which has a value at par with most of that writer's statements concerning Japanese history.

. His act gave the enemies of the bakufu a legal pretext
nd was the signal of the regent's doom. All over the

tion not to return to them until the mikado, restored to power, should sweep away the barbarians. Boiling over with patriotism, bands of assassins, mostly rōnins, roamed the country, ready to slay foreigners, or the regent, and to die for the mikado. On the 23d of March, Ii was assassinated in Yedo, outside the Sakurada gate of the castle, near the spot where now stand the offices of the departments of War and Foreign Affairs, and the Gothic brick buildings of the Imperial College of Engineering. Then followed the slaughter of insolent foreigners, and in some cases of innocent ones, and the burning of their legations, the chief object in nearly every case being to embroil the bakufu with foreign powers, and thus hasten its fall. Some of these amateurs, who in foreign eyes were incendiaries and assassins, and in the native view noble patriots, are now high officials in the mikado's Government.

The prestige of the bakufu declined daily, and the tide of influence and power set in steadily toward the true capital. The custom of the shōgun's visiting Kiōto, and doing homage to the mikado, after an interval of two hundred and thirty years, was revived, which caused his true relation to be clearly understood even by the common people, who then learned for the first time the fact that the rule existed, and had been so long insolently ignored. The Prince of Echizen, by a special and unprecedented act of the bakufu, and in obedience to orders from the Kiōto court, was made premier. By his own act, as many believe, though he was most probably only the willing cat's-paw of the Southern daimiōs, he abolished the custom of the daimiōs' forced residence in Yedo. Like wild birds from an opened cage, they, with all their retainers, fled from the city in less than a week. Yedo's glory faded like a dream, and the power and greatness of the Tokugawas came to naught. Few of the clans obeyed any longer the command of the bakufu, and gradually the hearts of the people fell away. "And so," says the native chronicler, "the prestige of the Tokugawa family, which had endured for three hundred years; which had been really more brilliant than Kamakura in the age of Yoritomo on a moonlight night when the stars are shining; which for more than two hundred and seventy years had forced the daimiōs to come breathlessly to take their turn of duty in Yedo; and which had, day and night, eighty thousand vassals at its beck and call, fell to ruin in the space of one morning."

The clans now gathered at the true *miako*, Kiōto, which became a scene of gayety and bustle unknown since the days of the Taira,

allegiance to the bakufu, they began to act either ac-
eir own will, or only at the bidding of the court. They
perial treasury with gold, and strengthened the hands of
eaven with their loyal devotion. Hatred of the foreign-
re to fill their empty coffers with the proceeds of com-
l the minds of many of them like the wind among reeds
l to open the ports in their fiefs, so as to pocket the prof-

ten their steps, the rōnins now began the systematic assassination of all who opposed their plans, pillorying their heads in the dry bed of the river in front of the city. As a hint to the Tokugawa "usurpers," they cut off the heads of wooden images of the first three Ashikaga shōguns, and stuck them on poles in public. The rōnins were arrested; Chōshiu espoused their side, while Aidzu, who was governor of the city, threw them into prison. The mikado, urged by the clamorous braves, and by kugé who had never seen one of the "hairy foreigners," nor dreamed of their power, issued an order for their expulsion from Japan. The Chōshiu men, the first to act, erected batteries at Shimonoséki. The bakufu, which was responsible to foreigners, commanded the clan to disarm. They refused, and in July, 1863, fired on foreign vessels. They obeyed the mikado, and disobeyed the shōgun. During the next month, Kagoshima was bombarded by a British squadron.

On the 4th of September, the Chōshiu cannoneers fired on a bakufu steamer, containing some men of the Kokura clan who were enemies of Chōshiu, and who had given certain aid and comfort to foreign vessels, and refused to fire on the latter. The Chōshiu men in Kiōto besought the mikado to make a progress to Yamato, to show to the empire his intention of taking the field in person against the barbarians. The proposal was accepted, and the preliminaries arranged, when suddenly all preparations were stopped, Chōshiu became an object of blackest suspicion, the palace gates were doubly guarded, the city was thrown into violent commotion; while the deliberations of the palace ended in the expulsion of Sanjō Sanéyoshi (now Dai Jō Dai Jin), Sawa (Minister of Foreign Affairs, 1870–'71), and five other court nobles, who were deprived of their rank and titles, while eighteen others were punished, and all retainers or members of the family of Mōri (Chōshiu) were peremptorily "forbidden to enter the capital"—a phrase that made them outlaws. An army was levied, and the city put in a state of defense.

The reason of this was, that the Chōshiu men were accused of plotting to get possession of the mikado's person, in order to dictate the policy of the empire. The eighteen kugé and the six ringleaders were suspected of abetting the plot. This, and the firing on the steamer containing their envoys, roused the indignation of the bakufu, and the clans loyal to it, especially Aidzu, to the highest pitch. The men of Chōshiu, accompanied by the seven kugé, fled, September 30th, 1863, to their province.

ow became the rendezvous of deserters and rōnins from Japan. In July of the following year, 1864, a body of d of irresponsible men of various clans, calling themselves arrived in Kiōto from the South, to petition the mikado ri and the seven nobles to honor, and to drive out the Aidzu and the shōgun's vassals were for attacking these ns at once. The mikado, not adopting the views of the turned them no answer. On July 30th, the "Irregulars" d by many hitherto calm, but now exasperated, Chōshiu camped in battle array in the suburbs, where they were st 15th, by two karōs, and two hundred men from Chōshiu, e Mōri to restrain his followers from violence. While waiting, a notification that they were to be punished was t 19th, to them by the court, then under the influence of eiki was put in command of the army of chastisement. and letters of sorrowful regret to their friends at court, men and the rōnins, in a written manifesto vindicated the heir cause, swore vengeance against Aidzu, whose troops ed in the imperial flower-garden, and then asking pardon f Heaven "for making a disturbance so near the base of

of flowers, entirely disappeared in one morning in the smoke of the flames of a war fire." The homeless city populace fled to the suburbs, dwelling on roofless earth, pestered by the heat and clouds of mosquitoes, while men in soldiers' dress played the robber without fear or shame. "The Blossom Capital became a scorched desert." The Chōshiu were utterly defeated, and driven out of the city. Thirty-seven of them were decapitated in prison.

The next month the bakufu begged the imperial court to deprive the Mōri family and all its branches of their titles. Elated with success, an order was issued to all the clans to march to the chastisement of the two provinces of Nagato and Suwo. The Tokugawa intended thus to set an example to the wavering clans, and give proof of the power it still possessed. During the same month, September 5th and 6th, 1864, Shimonoséki was bombarded by an allied fleet bearing the flags of four foreign nations. After great destruction of life and property, the generous victors demanded an "indemnity" of three million Mexican dollars (see Appendix). The brave clan, having defied the bakufu at Kiōto, dared the prowess of the "civilized world," and stood to their guns at Shimonoséki till driven away by overwhelming numbers of balls and men, now prepared to face the combined armies of the shōgunate.

Then was revealed the result of the long previous preparation in the South for war. The Chōshiu clansmen, united and alert, were lightly dressed, armed with English and American rifles, drilled in European tactics, and abundantly provided with artillery, which they fired rapidly and with precision. They had cast away armor, sword, and spear. Chōshiu had long been the seat of Dutch learning, and translations of Dutch military works were numerously made and used there. Their disciplined battalions were recruited from the common people, not from the samurai alone, were well paid, and full of enthusiasm. The bakufu had but a motley, half-hearted army, many of whom, when the order was given to march, straightway fell ill, having no stomach for the fight. Some of the most influential clans declined or refused outright to join the expedition, whose purpose was condemned by almost all the wisest leaders, notably by Katsŭ, the shōgun's adviser.

A campaign of three months, in the summer of 1866, ended in the utter and disgraceful defeat of the bakufu, and the triumph of Chōshiu. The clans not yet in the field refused to go to the front. The prestige of the shōgunate was now irretrievably ruined.

shōgun, worn out with ceaseless anxiety, died at Ōzaka,
h, 1866. He had secured the mikado's consent to the
condition that they should be revised, and that Hiōgo
e opened as a port of foreign commerce. He was suc-
ki, his former rival, who was appointed head of the To-
by the court October, 1866. On the 6th of January,

ind to one course of action, the keenest observers could
the change liable to ensue when new advisers appeared.
at the appointment of such a man at this crisis served
tate the issue. His popularity at the court most prob-
n the fact that he was opposed to the opening of Hiō-
to the foreigners.

1867, the Prince of Tosa openly urged the new shōgun
le many able samurai, Saigō, Ōkubo, Gotō, Kido, Hiro-

bakufu, and re-establish the Government on the ancient basis, with the young emperor at the head.

On the 3d of January, 1868, the troops of the combination (Satsuma, Tosa, Echizen, Aki, and Owari) suddenly took possession of the palace gates. The court nobles hitherto surrounding the boy emperor were dismissed, and only those favoring the views of the combination were admitted to the palace. The court, thus purged, issued an edict in the name of the mikado, which stated that the government of the country was now solely in the hands of the imperial court. The bakufu and office of shōgun were abolished. A provisional government, with three grades of office, was formed, and the positions were at once filled by men loyal to the new rulers. The family of Mōri was rehabilitated, and the seven banished nobles were recalled. Sanjō and Iwakura were made assistants to the supreme administrator, Arisugawa Miya, a prince of the blood.

The indignation of the retainers of Tokugawa knew no bounds. The vacillating shōgun now regretted his resignation, and wished himself back in power. He left Kiōto with the clans still loyal to him, with the professed intention of calming the passions of his followers, but in reality of seizing Ōzaka, and blocking up the communications of the Southerners. Shortly after, in Yedo, on the 19th of January, the yashikis of the Satsuma clan were stormed and burned by the bakufu troops. The Princes of Owari and Echizen were sent by the court to invite Keiki to join the new Government, and receive an appointment to office even higher than he had held before. He promised to do so, but no sooner were they gone than he yielded to Aidzu's warlike counsel to re-enter Kiōto in force, drive out the "bad counselors of the young emperor," and "try the issue with the sword." He was forbidden by the court to approach the city with a military following. Barriers were erected across the two roads leading to the capital, and the Southern clansmen, numbering about two thousand, posted themselves behind them, with artillery. Keiki set out from Ōzaka on the evening of the 27th of January, with the Aidzu and Kuwana clans in the front of his following, amounting to over ten, or, as some say, thirty thousand men. At Fushimi his messengers were refused passage through the barriers. The *kuan-gun* (loyal army, Kiōto forces) fired their cannon, and the war was opened. The shōgun's followers, by their last move on the political chess-board, had made themselves chōtéki. Their prestige had flown.

The battle lasted three days. In the presence of overwhelming

ıthern samurai showed not only undaunted valor, but revious years of military training. The battle was not It was to the side of intelligence, energy, coolness, e shōgun's army was beaten, and in wild disorder fled historic castle of which was burned by the loyal army. ecognized, found refuge upon an American vessel, and, on one of his own ships, sought the seclusion of his

this time the vassal was loyal, the waverer wavered no more. Refusing to listen to those who advised war, abhorring the very idea of being a chōtéki, he hearkened to the counsel of his two highest ministers, Katsŭ and Ōkubo Ichiō, and declaring that he would never take up arms against his lord, the mikado, he retired to private life. The comparison of this man with Washington because he refused to head an army, and thus save the country from a long civil war, does not seem to be very happy, though I have heard it made. Personally, Keiki is a highly accomplished gentleman, though ambitious and weak. Politically, he simply did his duty, and made discretion the better part of valor. It is difficult to see in him any exalted traits of character or evidences of genius; to Katsŭ and Ōkubo is due the last and best decision of his life. Katsŭ, the old pupil of Satsuma and comrade of Saigō, had long foreseen that the governing power must and ought of right to revert to the mikado, and, braving odium and assassination, he advised his master to resign. The victorious Southerners, led by Saigō, were in the southern suburb of Yedo, waiting to attack the city. To reduce a Japanese city needs but a torch, and the impatient victors would have left of Yedo little but ashes had there been resistance. Katsŭ, meeting Saigō, assured him of the submissive temper of the shōgun, and begged him to spare the city. It was done. The fanatical retainers of Keiki made the temple grounds of Uyéno their stronghold. On the 4th of July they were attacked and routed, and the magnificent temple, the pride of the city, laid in ashes. The theatre of war was then transferred to the highlands of Aidzu at Wakamatsŭ, and thence to Matsumaë and Hakodaté in Yezo. Victory everywhere perched upon the mikado's brocade banner. By July 1st, 1869, all vestiges of the rebellion had ceased, and "the empire was grateful for universal peace."

The mikado's party was composed of the heterogeneous elements which a revolution usually brings forth. Side by side with high-souled patriots were disreputable vagrants and scalawags of every description, rōnins, or low, two-sworded men, *jo-i*, or "foreigner-haters," "port-closers," and Shintō priests and students. There were a few earnest men whose darling hope was to see a representative government established, while fewer yet eagerly wished Japan to adopt the civilization of the West, and join the brotherhood of nations. These men had utilized every current and eddy of opinion to forward their own views and achieve their own purpose. The object common to all was the exaltation of the mikado. The bond of union which held the major

her was a determination to expel the foreigners or to revise
es so as to expunge the odious extra-territoriality clause—the
t still rankles in the side of every Japanese patriot. For
months the energies of the *jo-i*, or "foreigner-haters," were
n the camp in fighting the rebellious Tokugawa retainers.
over, the trials of the new Government began. The low,
led men clamored for the fulfillment of the promise that the
s should be expelled from Japan and the ports closed. The
fficials induced the Government to persecute the native
ns," demanded the abolition of Buddhism, the establishment
by edict, and the restoration of the Government on a purely
basis, and echoed the cry of "Expel the barbarian." Even
majority of the high officials there was no abandonment of
ose to expel foreigners. They intended to do it, but the
them knew that in their present condition they were not
ence they simply wished to bide their time, and gain strength.
matter of difficulty to keep patient thousands of swaggering

military resources of the empire. All this was done with
shed end in view of driving out the aliens, closing the ports

less helped the scales to fall from their eyes, but these were helps only. All such means had failed in China, though tried for half a century. They would have failed in Japan also. It was *an impulse from within* that urged the Japanese to join the comity of nations. The noblest trait in the character of a Japanese is his willingness to change for the better when he discovers his wrong or inferiority. This led the leaders to preach the faith they once destroyed, to destroy the faith they once preached.

The great work of enlightening the mikado's followers was begun by the Japanese leaders, Ōkubo, Kido, Gotō, all of them students, both of the ancient native literature and of foreign ideas. It was finished by Japanese writers. The kugé, or court nobles, wished to ignore the existence of foreigners, drive them out of the country, or worry them by appointing officers of low rank in the Foreign Office, then an inferior sub-bureau. Ōkubo, Gotō, and Kido promptly opposed this plan, and sent a noble of the imperial court, Higashi Kuzé, to Hiōgo with Datté, Prince of Uwajima (see Appendix), to give the mikado's consent to the treaties, and to invite the foreign ministers to an audience with the emperor in Kiōto. The British and Dutch ministers accepted the invitation; the others declined. The train of the British envoy was assaulted by fanatic assassins, one resisting bullet, lance, and sabre of the English dragoons, only to lose his head by the sweep of the sword of Gotō, who rode by the side of the foreigners, determined to secure their audience of the mikado. At first sight of the strangers, the conversion of the kugé was thorough and instantaneous. They made friends with the men they once thought were beasts.

In a memorial to the mikado, Ōkubo further gave expression to his ideas in a memorial that astounded the court and the wavering daimiōs, as follows: "Since the Middle Ages, our emperor has lived behind a screen, and has never trodden the earth. Nothing of what went on outside his screen ever penetrated his sacred ear; the imperial residence was profoundly secluded, and, naturally, unlike the outer world. Not more than a few court nobles were allowed to approach the throne, a practice most opposed to the principles of heaven. Although it is the first duty of man to respect his superior, if he reveres that superior too highly he neglects his duty, while a breach is created between the sovereign and his subjects, who are unable to convey their wants to him. This vicious practice has been common in all ages. But now let pompous etiquette be done away with, and simplicity become

bject. Kiōto is in an out-of-the-way position, and is unfit
eat of government. Let his majesty take up his abode tem-
Ōzaka, removing his capital hither, and thus cure one of
ed abuses which we inherit from past ages."

morial produced an immediate and lively effect upon the
he young mikado, Mutsuhito, came in person to the meet-
e council of state, and before the court nobles and daimiōs
th, as an actual ruler, promising that "a deliberative assem-
be formed; all measures be decided by public opinion; the
customs of former times should be broken through; and
iality and justice displayed in the workings of nature be
a basis of action; and that intellect and learning should be
throughout the world, in order to establish the foundations
ire." This oath is the basis of the new Government.

romises are either the pompous bombast of a puppet or the
tterances of a sovereign, who in magnanimity and wisdom
lead a nation into a higher life. That such words should
blime moment fall from the lips of the chief of an Oriental
excites our sympathetic admiration. They seem a sublime
ffirmation to the prophetic question of the Hebrew seer,
tion be born at once?" They sound like a glad harbinger

ern civilization. While Ōkubo, Kido, Gotō, Iwakura, Sanjō, Itagaki, Ōki, and the rising officials sought to purge and strengthen the political system, the work of enlightening the people and the upstarts raised suddenly to power was done by Japanese writers, who for the first time dared, without suffering death, to tell their thoughts. A large measure of freedom of the press was guaranteed; newspapers sprung up in the capital. Kido, one of the prime movers and leaders, himself established one of the most vigorous, still in existence — the *Shimbun Zasshi.* The new Government acted with clemency equal to the standard in Christian nations, and most generously to the literary and scientific men among the retainers of the Tokugawas, and invited them to fill posts of honor under the Government. They sent none of the political leaders to the blood-pit, but by the gracious favor of the mikado these were pardoned, and the conciliation of all sections of the empire wisely attempted. Many of those who fought the loyal forces at Fushimi, Wakamatsŭ, and Hakodaté are now the earnest advocates of the restoration and its logical issues. Even Enomoto is envoy of the court of Tōkiō to that of St. Petersburg. All of the defeated daimiōs were restored to rank and income. A complete and happy reunion of the empire was the result. Some of the scholars declined office until the time when even greater freedom of speech and pen was permitted.

There were men who in the old days, braving odium, and even death, at the hands of the bakufu, had begun the study of the English and Dutch languages, and to feed their minds at the Occidental fountains. They were obliged to copy their books in manuscript, so rare were printed copies. Later on, the bakufu, forced by necessity to have interpreters and men skilled in foreign arts and sciences, chose these students, and sent them abroad to study. When the civil war broke out, they were recalled, reaching Japan shortly after the fighting began. They returned, says one of their number, "with their faces flushed with enthusiastic sympathy with the modern civilization of Christendom." Then they began the preparation of those original works and translations, which were eagerly read by the new men in power. Edition after edition was issued, bought, read, lent, and circulated. In these books the history of the Western nations was faithfully told; their manners and customs and beliefs were explained and defended; their resources, methods of thought and education, morals, laws, systems of governments, etc., were described and elucidated. Notably pre-eminent among these writers was the school-master, Fu-

stern ideas were texts: he clothed them in Japanese
urther pointed out the weaknesses, defects, and errors
men, and showed how Japan, by isolation and the false
rned all knowledge derived from foreigners, had failed
e Europe or America, and that nothing could save his
conquest or decay but the assimilation of the ideas
ade the foreigners what they are. There is scarcely a
rising man in Japan but has read Fukuzawa's works, and
nowledges the stimulus and lasting benefit derived from
of the leaders of the movement toward restoration, who
the cry, "Expel the foreigners," found themselves, after
se works, "unconsciously involved in the advance, with-
vitation," and utterly unable to explain why they were
ent. Fukuzawa has declined every one of the many flat-
f office and power under the Government, and still de-
to his school and the work of teaching and translation,
life in noble drudgery. He has been the interpreter of
and life, caring little about the merely external garnish
civilization. His books on "Western Manners and Cus-
s volumes of tracts and essays, have had an enormous

and largely in the expression of Western ideas adapted to the understanding of the Japanese.

The war was ended by July, 1870. Rewards were distributed; and the Government was still further consolidated by creating definite offices, and making all titles, which had been for nearly six centuries empty names, to have reality and power. There was still, however, much dead wood in the ship of state, a condition of chronic strain, a dangerous amount of friction in the machinery, wrangling among the crew, and a vast freight of bad cargo that the purest patriots saw the good ship must "unload," if she was to be saved. This unloading was accomplished in the usual way, by dismissing hundreds of officials one day, and re-appointing on the next only those favorable to the desired policy of the mikado.

Furthermore, it became daily more certain that national development and peace could never be secured while the feudal system existed. The clan spirit which it fostered was fatal to national unity. So long as a Japanese meant by "my country" merely his own clan, loyalty might exist, but patriotism could not. The time seemed ripe for action. The press was busy in issuing pamphlets advocating the abolition of feudalism. Several of the great daimiōs, long before ready for it, now openly advocated the change. The lesser ones knew better than to oppose it. The four great clans, Satsuma, Chōshiu, Tosa, and Hizen (see Appendix), were the pioneers of the movement. They addressed a memorial to the throne, in which it was argued that the daimiōs' fiefs ought not to be looked on as private property, but as the mikado's own. They offered to restore the registers of their clans to the sovereign. These were the external signs of the times. Back of these, there were at least three men who were determined to sweep feudalism away utterly. They were Kido, Ōkubo, Iwakura. The first step was to abolish the appellation of court noble (kugé) and territorial prince (daimiō), and to designate both as kuazokŭ, or noble families. The former heads of clans were temporarily appointed chiji (governors of their clans). This smoothed the way. In September, 1871, the edict went forth calling the daimiōs to Tōkiō to retire to private life. With scarcely an exception, the order was quietly obeyed. The men behind the throne in Tōkiō were ready and even willing to shed blood, should their (the mikado's) commands be resisted, and they expected to do it. The daimiōs who were hostile to the measure knew too well the character of the men who framed the edict to resist it. The writer counts among the most impressive of all his life's ex-

at scene in the immense castle hall of Fukui, when the
chizen bid farewell to his three thousand two-sworded re-
amidst the tears and smiles and loving farewells of the
ce, left behind him lands, revenue, and obedient followers,
o live as a private gentleman in Tōkiō.

udalism began nearly eight centuries ago, and existed un-
e year 1871. It was not a tower of strength in its last
before its fall, it was an empty shell and a colossal sham.
only alive and vigorous when the leaders are men of
tion. Of all the daimiōs, there were not ten of any per-
tance. They were amiable nobodies, great only in stom-
robes. Many were sensualists, drunkards, or titled fools.
ver in each clan lay in the hands of able men of inferior
uled their masters. *These are now the men who compose*
Government of Japan. They rose against the shōgun,
m, sent him to private life, and then compelled their mas-
niōs, to do likewise. They hold the emperor, and carry
nment in his name. The mikado, however, is much more
an his *fainéant* ancestors. Still, the source of government

In 1872, by actual count, four-fifths of the men in the

enterprise of establishing Shintō as the national faith has failed vastly and ignominiously, though the old Shintō temples have been purged and many new ones erected, while official patronage and influence give the ancient cult a fair outward show. Buddhism is still the religion of the Japanese people, though doubtless on the wane.

To summarize this chapter: the shōgun was simply one of the many vassals of the mikado of comparatively inferior grade, and historically a usurper; the term "tycoon" was a diplomatic fraud, a title to which the shōgun had, officially, not the shadow of right; the foreign diplomatists made treaties with one who had no right whatever to make them; the bakufu was an organized usurpation; the stereotyped statements concerning a "spiritual" and a "secular" emperor are literary fictions of foreign book-makers; feudalism arose upon the decadence of the mikado's power; it was the chief hinderance to national unity, and was ready for its fall before the shock came; in all Japanese history the reverence for the mikado's person and the throne has been the strongest national trait and the mightiest political force; the bakufu exaggerated the mikado's sacredness for its own purposes; the Japanese are impressible and ever ready to avail themselves of whatever foreign aids or appliances will tend to their own aggrandizement: nevertheless, there exists a strong tendency to conserve the national type, pride, feelings, religion, and equality with, if not superiority to, all the nations of the world; the true explanation of the events of the last eight years in Japan is to be sought in these tendencies and the internal history of the nation; the shōgun, bakufu, and perhaps even feudalism would have fallen, had foreigners never landed in Japan; the movement toward modern civilization originated from within, and was not simply the result of foreign impact or pressure; the work of enlightenment and education, which alone could assure success to the movement, was begun and carried on by native students, statesmen, and simple patriots.

A mighty task awaited the new Government after the revolution of 1868. It was to heal the disease of ages; to uproot feudalism and sectionalism, with all their abuses; to give Japan a new nationality; to change her social system; to infuse new blood into her veins; to make a hermit nation, half blinded by a sudden influx of light, competitor with the wealthy, powerful, and aggressive nations of Christendom. It was a problem of national regeneration or ruin. It seemed like entering into history a second time, to be born again.

What transcendent abilities needed for such a task! What national
